The Freedom PlanSM

An Overview

Up

"The Clean Power Revolution" describes The Freedom PlanSM, a step-by-step method to convert the USA to 100% wind, hydrogen, solar, and other renewables with existing technologies:

1. **Completion in 10 years.**
2. **Cost: \$2 Trillion.**
3. **Saves the U.S. economy \$20 Trillion by 2025.**
4. Completely eliminates dependence on **foreign oil**.
5. Completely eliminates dependence on **dirty fossil fuels** and dangerous **nuclear** energy.
6. Provides at least **\$6 Trillion of positive economic impact** to America, including:
 - a. 8 to 10 Million new jobs, with at least 3 Million being high-wage manufacturing jobs.
 - b. Hundreds of billions of wind & renewable methane royalties paid to rural America every year where most of these projects are located.
 - c. Stabilizes energy prices (what is the fuel cost of wind energy?) which would otherwise be volatile.
 - d. Lowers energy prices as more renewables are added, since the ongoing fuel & operational costs are far lower than conventional fossil and nuclear power plants.
7. The Freedom PlanSM is Self-Funding once 1 million Americans choose clean power in the form of FutureWindSM (offered by numerous organizations who have officially endorsed The Freedom PlanSM) or a similar Green Tag that is audited by Grant Thornton and supports implementation of The Freedom PlanSM. In other words, with 1 million homes on clean power, 10% of The Freedom PlanSM is built (the 1st domino falls) and the profits from that 1st phase are reinvested to fund the remaining phases to full completion.
8. **Does not rely on any government subsidies**, funding, mandates, or financial support. This is a **Market-Driven solution** to our energy crisis. Any plan that relies on

- government will ultimately fail, according to Fortune Magazine (8/11/2004 "How to Kick the Oil Habit").
9. Describes how the Midwest has enough wind potential to power the entire country's electric grid 8x over, or to power the grid 3x over plus make enough clean, safe **hydrogen** from water (at night during off-peak hours) to power every car & truck in America.
 10. The Freedom PlanSM details how grass roots efforts, through simple endorsements of The Freedom PlanSM by organizations of all sizes, can successfully convert America to 100% clean power in 10 years.
