ALAN J. BAX

I graduated from the University of Missouri - Columbia with a Bachelor of Science degree in Electrical Engineering in December 1995. Concurrent with my studies, I was employed as an Engineering Assistant in the Energy Management Department of the University of Missouri - Columbia from the Fall of 1992 through the Fall of 1995. Prior to this, I completed a tour of duty in the United States Navy, completing a course of study at the Navy Nuclear Power School and a Navy Nuclear Propulsion Plant. Following my graduation from the University of Missouri - Columbia, I was employed by The Empire District Electric Company (Empire or Company) as a Staff Engineer until August 1999, at which time I began my employment with the Staff of the Missouri Public Service Commission (Staff). I am a member of the Institute of Electrical/Electronic Engineers (IEEE).

Daniel I. Beck, P.E.

Supervisor of the Engineering Analysis Section of the Energy Department
Utility Operations Division

Missouri Public Service Commission
P.O. Box 360
Jefferson City, MO 65102

I graduated with a Bachelor of Science Degree in Industrial Engineering from the University of Missouri at Columbia. Upon graduation, I was employed by the Navy Plant Representative Office in St. Louis, Missouri as an Industrial Engineer. I began my employment at the Commission in November, 1987, in the Research and Planning Department of the Utility Division (later renamed the Economic Analysis Department of the Policy and Planning Division) where my duties consisted of weather normalization, load forecasting, integrated resource planning, cost-of-service and rate design. In December, 1997, I was transferred to the Tariffs/Rate Design Section of the Commission's Gas Department where my duties include weather normalization, annualization, tariff review, cost-of-service and rate design. Since June 2001, I have been in the Engineering Analysis Section of the Energy Department, which was created by combining the Gas and Electric Departments. I became the Supervisor of the Engineering Analysis Section, Energy Department, Utility Operations Division in November 2005.

I am a Registered Professional Engineer in the State of Missouri. My registration number is E-26953.

Credentials and Background of

Carol "Gay" Fred

I am currently employed as the Consumer Services Department Manager, in the Staff Counsel Division of the Missouri Public Service Commission. I have been employed at the Missouri Public Service Commission since January 1987.

I received my Bachelor of Science Degree in Business Administration from Almeda University, at Wauconda, IL in May of 2002. I also received my Certification in Project Management from Boston University, at Boston, MA in December 1999.

Prior to joining the Commission, I was employed by United Telephone Company, now known as CenturyLink, from 1977 to 1987, as an internal consultant with primary functions that consisted of call center supervision, credit and collections, outside plant compliance audits, cable assignment specialist and central office switch conversion assistant.

My duties in the Commission have included my previous capacity as a Rate and Tariff Examiner II in the Telecommunications Department under the Operations Division of the Commission, Advisor/Policy Analyst to the Commission, EFIS Project Manager and in my current capacity as Manager of Consumer Services.

I have acquired general knowledge through my experience and analyses in prior rate, complaint, merger, rulemaking and working group cases before this Commission. I have also acquired knowledge of topics through review of Staff work papers for prior complaint and rate cases brought before this Commission. I have reviewed prior Commission decisions with regard to these areas.

I have attended various in-house training seminars and NARUC training seminars and conferences. I am an active member of the NARUC Subcommittee on Consumer Affairs. I

have also participated in and supervised the work on a number of informal and formal complaint proceedings. As the manager of consumer services department I supervise and provide instructions to Consumer Specialist Is and IIs, on similar matters within the Staff Counsel Division.

Randy S. Gross

Educational Background and Work Experience

I have Master and Bachelor of Science degrees in Electrical Engineering from the University of Missouri at Columbia. I am an active licensed Professional Engineer in the states of Kansas and Missouri with inactive licenses in Arizona and Illinois. I belong to the Institute of Electrical and Electronics Engineers (IEEE) and the Instrument Society of America (ISA) professional organizations and have co-authored nine technical papers in the areas of process instrumentation and controls, power plant performance monitoring and information technology. My work experience spans more than 38 years in electrical and instrumentation and control detailed design, information technology, training, software verification and validation, telecommunication, project management and controls, construction management, contract administration, plant start-up, project oversight, plant operating procedures, design basis reconstitution, equipment technical specifications and procurement, nuclear plant and site, detailed design engineering, plant modifications and engineering procedures. From 1972-1997, I was employed by Black & Veatch with responsibilities in electrical, instrumentation and control engineering and project management. From 1997-2001, I was employed by the Foxboro Company (Invensys) as a Principal Account Manager for Distributed Control Systems (DCS) that included hardware, software and instrumentation. From 2001-2002, I provided consulting services for the Argosy Console company in the areas of process engineering and re-engineering, supply chain management, Quality Assurance, Six Sigma and Safety program implementations. From 2002-2005, I provided contract engineering services to AmerenUE at the Callaway Nuclear Station in the areas of Software Verification and Validation, INPO accredited training, Project Management, Cost and Schedule controls, Digital Control System procedures

and Plant Operation procedures. In 2005, I provided contract detailed instrumentation and control engineering services for the Process Division of Burns & McDonnell Engineering for the Conoco Phillips refinery in Amarillo, TX. In 2006, I was employed by CIBER as a Senior Strategist with responsibilities in Project Oversight for large software development projects and Continuity of Operations Plans. From 2007-2009, I provided staff augmentation contract engineering services for the Wolf Creek Nuclear Operating Company (WCNOC) at their Wolf Creek Nuclear Power Station as a Senior Design Professional Engineer for major design projects, emergent engineering issues and plant refueling outage engineering. In 2009, I was employed with Black & Veatch as the Nuclear Division Business Line Manager with responsibilities for business development, outside sale and marketing. I have been employed by the Missouri Public Service Commission since February 2010 as a staff Engineer to provide technical expertise in the areas of smart grid deployment and implementation, transmission, distribution, demand response, renewable/alternative energy sources, plug in hybrid and electric vehicles and coal carbon capture and sequestration.

Paul R. Harrison

Education, Background and Case Participation

I am a Utility Regulatory Auditor IV with the Missouri Public Service Commission (PSC or Commission). I have performed duties as a Utility Regulatory Auditor within the Auditing Department at the Commission since January 18, 2000. I have also been responsible for the supervision of other Audit Department employees in rate cases and other regulatory proceedings before the Commission.

I graduated from Park College, Kansas City, Missouri, where I earned Bachelor of Science degrees in both Accounting and Management with Magna Cum Laude honors in July 1995. I also earned an Associate degree in Missile Maintenance Technology from the Community College of the Air Force in June 1990.

Prior to coming to work at the Commission, I was the manager for Tool Warehouse Inc. for four and one-half years. As the manager, I managed; supervised, coordinated and scheduled daily activities of personal assigned to the Tool Warehouse. In addition, I created and maintained corporate monthly budgets; performed monthly inventory and generated inventory loss reports to corporate headquarters. I was responsible for the daily sales volume and ordered all merchandise, (\$2.5million), for the tool warehouse in accordance with Tool Warehouse policy and procedures.

Prior to being the manager of the Tool Warehouse Inc, I was in the United States Air Force (USAF) for twenty-three years. During my career in the USAF, I was assigned many different duty positions with various levels of responsibility. I retired from active duty on May 1, 1994 as Superintendent of the 321st Strategic Missile Wing Missile Mechanical Flight.

In that capacity, I supervised 95 missile maintenance technicians and managed assets valued in excess of \$50 million.

My duties at the Commission include performing audits of the books and records of regulated public utilities under the jurisdiction of the MoPSC, in conjunction with other Commission Staff (Staff) members. In this capacity, I am required to prepare testimony and serve as a Staff expert witness on rate cases concerning the ratemaking philosophy and methodology of issues that I am assigned.

I have acquired general knowledge of these topics through my experience and analyses in prior rate cases before this Commission. I have also acquired knowledge of these topics through review of Staff work papers for prior rate cases brought before this Commission. I have reviewed prior Commission decisions with regard to these areas. I have reviewed the Company's testimony, annual reports, work papers and responses to Staff's data requests addressing these topics. In addition, my college coursework included accounting and auditing classes. Since commencing employment with the Commission in January 2000, I have attended various in house training seminars and National Association of Regulatory Utility Commission (NARUC) conferences. I have participated in approximately twenty-five formal rate case proceedings. I have also participated in and supervised the work on a number of informal rate proceedings. As a senior auditor and the Lead Auditor on a number of cases, I have participated in the supervision and instruction of new accountants and auditors within the Utility Services Division.

The Schedule below lists the rate cases in which I filed testimony, the issues that I have successfully accomplished and the small informal rate cases that I have completed.

Charles R. Hyneman

Educational and Employment Background and Credentials

I am employed as a Utility Regulatory Auditor V for the Missouri Public Service Commission (Commission). Prior to serving with the Commission I served 12 years on active duty in the United States Air Force in the missile operations and contracting career fields. My experience in defense contracting included the contract administration of construction and services contracts in accordance with the Federal Acquisition Regulation (FAR). I was promoted to the rank of Captain in 1989. I was honorably discharged from the Air Force in December 1992 and joined the Commission Staff in April 1993.

I have approximately 17 year experience in the field of utility rate regulation. During my tenure at the Commission I have been involved in and testified before the Commission in numerous utility rate cases and several utility merger and acquisition cases.

I was awarded a Masters of Business Administration from the University of Missouri at Columbia in 1988. I also earned a Bachelor of Science degree (cum laude) with a double major in Accounting and Business Administration from Indiana State University in 1985. For the past 15 years I have been a licensed Certified Public Accountant (CPA) licensed in Missouri.

Hojong Kang

Educational Background and Work Experience

I have a Ph.D degree in Economics from the University of Missouri, Columbia in 2005, a Master of Business Administration degree from California State University at East Bay in 1996 and a Bachelor of Science degree in Business Administration from Hong-Ik University, Korea in 1991. Prior to my current employment, I spent four years as the Associate Director for the International Economic Research Institute at the University of Missouri and facilitated government policy discussions with Korean government officials in the international scholar community at the University of Missouri. From 2006 to 2008, I taught economics classes including Money, Banking and Financial Market, Firm Theories, and Intermediate Macroeconomics as an Adjunct Assistant Teaching Professor. While I was in the Doctoral program, I worked as a Teaching Assistant for various economics classes and a Research Assistant of economic analysis projects for Missouri's social benefit programs.

I have been employed by the Missouri Public Service Commission since March 2010 and am responsible for Staff's review of electric utility resource planning compliance filings and energy efficiency and demand response programs.

Manisha Lakhanpal

Present Position: Regulatory Economist III

I joined Missouri Public Service Commission in August 2007 as a Regulatory Economist II in the Economic Analysis Section of the Energy Department, Operations Division.

Educational Background:

In December 2005, I graduated with a Masters of Science in Applied Economics, specializing in Electricity, Natural Gas and Telecommunication, from Illinois State University, Normal, Illinois. I have a Post Graduate Diploma in Business Management from Chetana's Institute of Management and Research, Mumbai, India and an undergraduate degree in Political Science and History from University of Delhi, New Delhi, India.

Work Experience:

I first joined Missouri Public Service Commission as an intern in 2006 (May 2006 - August 2006). Prior to returning to PSC I was employed by the Indiana Utility Regulatory Commission, Indianapolis, as a Utility Analyst (September 2006- August 2007). During my time in Indiana I worked on a variety of cases and projects, including a major rate case, wholesale power cost trackers for municipal utilities, environmental cost recovery cases, a certificate of need for the first wind power project in Indiana as well as a related case involving the purchase of output from the facility, and annual report to the legislature on the state of the industry in Indiana.

In the summer of 2005 (May 2005-July 2005), I worked as an Intern at Commonwealth Edison (ComEd), Chicago, on projects related to deregulation of electric markets in Illinois.

In India I have worked as an Operations Executive for an insurance company (June 2001 - December 2003).

**Educational and Employment Background and Credentials
of
Karen K. Lyons**

I am currently employed as a Utility Regulatory Auditor IV for the Missouri Public Service Commission (Commission). I was employed by the Commission in April 2007. Previously, I was employed by AT&T as a Regulatory Complaint Manager from December 1999 to February 2007. In that capacity I was responsible for addressing consumer and business complaints filed with various state and federal regulatory agencies. I earned a Bachelor of Science degree in Management Accounting and a Masters in Business Administration from Park University.

As a Utility Regulatory Auditor, IV I perform rate audits and prepare miscellaneous filings as ordered by the Commission. In addition, I review all exhibits and testimony on assigned issues, develop accounting adjustments and issue positions which are supported by workpapers and written testimony. For cases that do not require prepared testimony, I prepare Staff Recommendation Memorandums.

Cases I have been assigned are shown in the following table:

Case/Tracking Number	Company Name - Issue

Keith A. Majors

Educational and Employment Background and Credentials

I am currently employed as a Utility Regulatory Auditor IV for the Missouri Public Service Commission (Commission). I was employed by the Commission in June 2007. I earned a Bachelor of Science degree in Accounting from Truman State University in May 2007.

As a Utility Regulatory Auditor, I perform rate audits and prepare miscellaneous filings as ordered by the Commission. In addition, I review all exhibits and testimony on assigned issues, develop accounting adjustments and issue positions which are supported by workpapers and written testimony. For cases that do not require prepared testimony, I prepare Staff Recommendation Memorandums.

DAVID MURRAY

Educational and Employment Background and Credentials

I am currently the Acting Utility Regulatory Manager of the Financial Analysis Department for the Missouri Public Service Commission (Commission). I accepted the position of a Public Utility Financial Analyst in June 2000 and my position was reclassified in August 2003 to an Auditor III. I was promoted to the position of Auditor IV, effective July 1, 2006. I was employed by the Missouri Department of Insurance in a regulatory position before I began my employment at the Missouri Public Service Commission.

I was authorized in October 2010 to use the Chartered Financial Analyst (CFA) designation. The use of the CFA designation requires the passage of three rigorous examinations addressing many investment related areas such as valuation analysis, portfolio management, statistical analysis, economic analysis, financial statement analysis and ethical standards. In addition to the passage of the examinations a CFA charterholder must have four years of relevant professional work experience.

In May 1995, I earned a Bachelor of Science degree in Business Administration with an emphasis in Finance and Banking, and Real Estate from the University of Missouri-Columbia. I earned a Masters in Business Administration from Lincoln University in December 2003.

I have been awarded the professional designation Certified Rate of Return Analyst (CRRRA) by the Society of Utility and Regulatory Financial Analysts (SURFA). This designation is awarded based upon experience and successful completion of a written examination, which I completed during my attendance at a SURFA conference in April 2007.

Bret G. Prenger

Education and Employment Background and Credentials

I am currently employed as a Utility Regulatory Auditor III for the Missouri Public Service Commission (Commission). I began my employment with the Commission on June 2, 2008. I earned a Bachelor of Science in Accounting from Missouri State University, in Springfield, MO in May 2008. In earning this degree I completed numerous core Accounting and business classes. I look forward to earning my Masters in Business Administration in the near future.

As a Utility Regulatory Auditor, I perform rate audits and prepare miscellaneous filings as ordered by the Public Service Commission. In addition, I review all exhibits and testimony on my assigned issues, develop adjustments and issue positions which I then support by work papers and written testimony. For those cases that do not require prepared testimony, I prepare Staff Recommendation Memorandums.

Other cases I have been assigned to or participated are:

Educational and Employment Background and Credentials
Of
Arthur W. Rice PE

I am currently employed as a Utility Regulatory Engineer I for the Missouri Public Service Commission (Commission). I was employed by the Commission in April of 2008. Currently a Staff Expert on Utility Company Regulatory Depreciation for water, sewer, gas distribution, and electrical companies.

I received a Bachelors of Science in Chemical Engineering from the University of Massachusetts in 1979. I am a licensed professional engineer in the state of Missouri, License No. 028012

From 1998 to 2008 worked as a self employed business owner. I established Arthur Rice Contracting LLC and developed a residential subdivision on 270 Acres in Callaway County Missouri., obtained the appropriate permits, installed infrastructure and built residential homes. Thirty seven families have moved into the development resulting in approximately \$8,000,000 added to the Callaway County property tax base. I continue to be the President of the Homeowner's association, operate the subdivision sewer company, and maintain the subdivision roads.

From 1979 to 1998 I was employed by Monsanto Company and then Air Products and Chemicals as an engineer and project manager in an industrial equipment manufacture and sales division. I was assigned progressively responsible assignments in equipment and process development, plant operations and plant construction. The processes revolved around manufacturing, installation and operation of gas separation equipment for oil refineries, chemical plants and natural gas processing.

From 1972 to 1977 I was employed by General Electric Company as a tool and die maker apprentice. The facility I worked at produced power, distribution and pole transformers, plus electrical switch gear, surge arrestors and electrical connectors.

From 1966 to 1972 I was trained and employed by the U.S. Navy as a nuclear propulsion plant operator, plant water chemist, and radiological controls specialist. Qualified in submarines and served 3 ½ years on a nuclear submarine. I served the last six months of my tour of duty as an engine room supervisor on a large ammunitions transport ship which was powered by oil fired boilers.

John A. Rogers

Educational Background and Work Experience

I have a Master of Business Administration degree from the University of San Diego and a Bachelor of Science degree in Engineering Science from the University of Notre Dame and am a registered professional engineer. My work experience includes 34 years in energy utility engineering, system operations, strategic planning, regulatory affairs and management consulting. From 1974 to 1985, I was employed by San Diego Gas & Electric with responsibilities in gas engineering, gas system planning and gas system operations. From 1985 to 2000, I was employed by Citizens Utilities in leadership roles for gas operations in Arizona, Colorado and Louisiana. From 2000 to 2003, I was an executive consultant for Convergent Group (a division of Schlumberger) providing management consulting services to energy companies. From 2004 to 2008, I was employed by Arkansas Western Gas and was responsible for strategic planning and resource planning. I have provided expert testimony before the California Public Utilities Commission, Arizona Corporation Commission, Arkansas Public Service Commission and Missouri Public Service Commission in general rate cases, applications for special projects and gas resource plan filings. I have been employed by the Missouri Public Service Commission since December 2008 and am responsible for Staff's review of electric utility resource planning compliance filings, demand-side management programs and fuel adjustment clauses.

HENRY WARREN, PHD
REGULATORY ECONOMIST
UTILITY OPERATIONS DIVISION
ENERGY DEPARTMENT

EDUCATION AND EXPERIENCE

I received my Bachelor of Arts and my Master of Arts in Economics from the University of Missouri-Columbia, and a Doctor of Philosophy (PhD) in Economics from Texas A&M University. Prior to joining the PSC Staff (Staff), I was an Economist with the U.S. National Oceanic and Atmospheric Administration (NOAA). At NOAA I conducted research on the economic impact of climate and weather. I began my employment at the Commission on October 1, 1992 as a Research Economist in the Economic Analysis Department. My duties consisted of calculating adjustments to test-year energy use based on test-year weather and normal weather, and I also assisted in the review of Electric Resource Plans for investor owned utilities in Missouri. From December 1, 1997, until May 2001, I was a Regulatory Economist II in the Commission's Gas Department, where my duties included analysis of issues in natural gas rate cases and were expanded to include reviewing tariff filings, applications and various other matters relating to jurisdictional gas utilities in Missouri. On June 1, 2001 the Commission organized an Energy Department and I was assigned to the Tariff/Rate Design Section of the Energy Department. My duties in the Energy Department include analysis of issues in rate cases of natural gas and electric utilities, tariff filings, applications, and various other matters relating to jurisdictional gas and electric utilities in Missouri, including review of Electric Resource Plans and Regulatory Plans for investor owned electric utilities in Missouri. I have also served on various task forces, collaboratives, and working groups dealing with issues relating to jurisdictional natural gas and electric utilities.

Slump Over, Pain Persists

Bureau Calls End to Recession, Longest Since 1930s; Jobs Recovery Still Slow

By SARA MURRAY

It's official: The 2007-2009 recession, which wiped out 7.3 million jobs, cut 4.1% from economic output and cost Americans 21% of their net worth, marked the longest slump since the Great Depression.

The end of the recession occurred in June 2009, 18 months after the economy began sliding into a downturn in December 2007, said the National Bureau of Economic Research's Business Cycle Dating Committee, a group of academic economists that determines the widely accepted benchmarks for U.S. recessions. The next-longest postwar slumps were those of the early 1970s and the early 1980s, both of which lasted 16 months.

But while the declaration marks a milestone, the economy still faces stubbornly slow growth and thus persistently high joblessness. That point was driven home by a report Monday from the Organization for Economic Cooperation and Development in Paris, which said it doesn't expect the U.S.'s unemployment rate to fall to prerecession levels until at least 2013.

Yet the economy is also showing signs that it has at least avoided a swoon back into recession, including a recent string of better-than-expected data on housing, manufacturing and em-

Recession Declared Over but Pain Persists

Continued from Page One

ployment. Another upbeat signal is that companies have notched strong earnings in recent quarters—and are expected to do so again when they start reporting third-quarter results next month—raising hopes that firms might soon crank up hiring.

Stocks continued their recent rebound yesterday, with the Dow Jones Industrial Average rising 145.77 points to close at 10753.62. Stock-market investors have taken heart from the good signals, pushing up the Dow nearly 7.4% this month.

Monday's close was the highest for the Dow since May 13, just one week after the May 6 "flash crash." At the time, the Dow was on its way to a 14% tumble from its highs for the year. The Dow has since erased most of those losses, as the market's worst fears of the spring and early summer—including the risk of a European financial crisis, another computer-driven stock-market debacle and a double-dip recession in the U.S.—have gradually faded.

The market has also gotten a lift recently from a rising tide of corporate merger activity, which promises big payoffs for shareholders. Companies have been luring investors to buy stock with dividends and share buybacks.

But the uncertainties that Obama hints at changes to his economic team A5

haunted investors earlier this year haven't entirely faded, and the stock market is still off its highs for the year, and even further below the levels before the Lehman Brothers bankruptcy in 2008.

News of the recession's official end point was greeted with near silence in Washington. Republicans weren't keen to say the economy has been growing for more than a year now. And Democrats, with ordinary Americans feeling little relief, weren't trumpeting the findings either. The White House has taken considerable heat for launching "recovery summer" in June and aren't about to hoist a "Mission Accomplished" banner now, White House officials say.

Popular frustration with the economy was on display at a town hall meeting in Washington, aired by CNBC, where President Barack Obama was peppered with questions. The chief financial officer of AmVets, a veterans organization, stood to tell him, "quite frankly, I'm exhausted. I'm exhausted of defending you, defending your administration, defending the mantle of change that I voted for and deeply disappointed with where we are right now."

A man who described himself as a 30-year-old recent law-school graduate struggling to make interest payments on his student loans asked: "Is the American Dream dead to me?" The president was careful to

express more sympathy than confidence. "Even though economists may say that the recession officially ended last year, obviously, for the millions of people who are still out of work, people who have seen their home values decline, people who are struggling to pay the bills day to day, it's still very real for them," President Obama said.

The NBER acknowledged in its announcement that the end of the recession doesn't signify a healthy economy, only that the period of declining economic activity, measured by indicators such as economic output and incomes, has come to an end.

Robert Hall, chair of the NBER committee and an economics professor at Stanford University, said the group was conscious that announcing the recession ended over a year ago could be confusing. Many people "think recession means bad time, and there's no question we're [still] in bad times," he said.

The economy has a long way to go to regain the levels it hit before the downturn.

The U.S. only recently began adding jobs, at a very low rate, which means the country has lost 7.6 million positions since the start of the recession in December 2007. That's about 300,000 more than were lost by the recession's June 2009 end point.

Meanwhile, real gross domestic product has made up only 2.9 percentage points of the 4.1%

lost during the recession, while household net worth has recovered only 4 percentage points of the 21% lost.

"We see low growth and high unemployment and high deficits for a few years to come," Angel Gurría, secretary general for the OECD, said in an interview, "a rather mediocre scenario in the absence of policy intervention."

That means the government may need to continue providing extraordinary support for the labor market, according to the OECD's recommendations, contained in the group's report on the U.S. economy. Steps would include additional job training and education programs to better match workers' skills to business needs and to update the skills of the long-term unemployed, the OECD wrote.

Some 6.2 million unemployed American workers have been out of a job for at least 27 weeks. The longer they're unemployed, the more their skills can degrade and the more difficult it can be for them to rejoin the labor market, presenting a long-term employment problem. "Previous U.S. recessions have exhibited no long-term damage to the economy or long-term increase in unemployment, but it is possible this recession will trigger these effects," the OECD report states.

CORRECTIONS & AMPLIFICATIONS

The global telecom equipment market is set to grow to €150 billion (\$196 billion) by 2013, according to Idate, a French research group. A Monday Corporate News article about Alcatel-Lucent incorrectly gave the dollar conversion as \$196 million.

The surnames of designers Joseph Altuzarra and Yigal Azrouel were misspelled, respectively, as Altazurra and Azruel in a Sept. 16 Fashion Week article about a new Dolce & Gabbana store in Milan.

Mike Pence is a member of

the House of Representatives. In some editions Monday, a photo caption accompanying a U.S. News article about the congressman incorrectly identified him as a senator. In addition, Mr. Pence was incorrectly referred to as Mr. Pace in one instance in the article.

Michelle Obama wore a red-and-black dress by designer Thakoon Panichgul at the Democratic National Convention in 2008. A Sept. 16 Fashion Week article about the designer incorrectly said Ms. Obama wore the dress on the night of her husband's election.

U.S. NEWS

Fed Hints at Move To Boost Recovery Economy Czar Summers to Ste

By JON HILSENKRATH AND LUCA DI LEO

Federal Reserve officials offered their clearest signal yet Tuesday that they are laying the groundwork for new steps to bolster the recovery if they don't see growth pick up soon or if inflation falls further.

The central bank held its regular policy-setting session Tuesday in Washington amid a growing internal debate over whether to restart a controversial bond-purchase program aimed at driving down long-term interest rates and lowering borrowing costs for households, businesses and the U.S. government.

The Fed "is prepared to provide additional accommodation if needed to support the economic recovery," officials said in a statement at the conclusion of the meeting. Inflation, they said, is below the Fed's long-run objective and growth is likely to be "modest" in the near term. The statement echoed comments by Fed Chairman Ben Bernanke last month in Jackson Hole, Wyo.

Central-bank officials have grown uneasy about a disappointingly slow recovery, which has failed to bring down unem-

"This could be viewed as a setup statement to another round of asset purchases," said Stuart Hoffman, chief economist at PNC Financial Services Group.

The Fed concluded a bond-purchase program at the end of March, which added \$1.7 trillion of mortgage debt and Treasury securities to its portfolio. A new program may not be as aggressive because the economy and financial system aren't in as much jeopardy as they were in March 2009, when the last bond-purchase program ramped up.

The central bank has already pushed short-term interest rates to near zero, so it can't use this traditional lever for managing the economy to stimulate growth any further.

The Fed's next steps depend in part on how its outlook for growth and inflation evolves in the weeks ahead.

The central bank wants to keep inflation from getting too low to keep the economy from slipping into a Japan-like period of outright price declines, or deflation. The latest statement elevates this concern.

Most Fed officials have an informal inflation goal between 1.7% and 2%, though some can tolerate it as low as 1.5%. The consumer-price index, excluding volatile food and energy prices, has been below that for several months, up just 0.9% from a year earlier in August.

"This statement was significant because it put the low level of inflation at the center of the debate," said Roberto Perli, a former Fed economist who is an analyst with ISI Group, a Wall Street research firm. He said the Fed could announce the beginning of a bond-buying program when it next meets Nov. 2 and 3.

Mr. Bernanke has noted that the course of inflation is dependent in part on how much slack there is in the economy and on how fast a growing economy takes up that slack—an economy with lots of slack tends to put downward pressure on inflation. One example of slack is high unemployment, which puts downward pressure on wages. This connection between growth and inflation is likely to bring the Fed's growth outlook under increased scrutiny.

The Fed's last official forecast was in June, when it said it expected 2010 growth between 3.0% and 3.5% and 2011 growth between 3.5% and 4.2%. Officials will update their forecast when they next meet.

Those June projections look increasingly out of line with mainstream expectations. A Wall Street Journal poll of forecasters earlier this month put 2010 growth at 2.5% and 2011 at 2.8%. Fed officials have acknowledged the risks to their 2010 outlook, by pointing to modest growth in the "near term."

- Heard on the Street: Central bank puns for inflation — C1B

Continued from Page One Tyson, an economist at the University of California, Berkeley, who served in the Clinton administration as chair of the Council of Economic Advisers.

Mr. Summers' resignation is partially driven by a personal concern, friends say. If he doesn't return to Harvard by January, he will have overstayed a two-year leave of absence and his tenure would be revoked. He would then have to reapply.

"I will miss working with the President and his team on the daily challenges of economic policy making," Mr. Summers said in a written statement.

A senior administration official said Mr. Summers had expected to be named Treasury secretary, a post he held under President Clinton. When he instead was offered a job inside the White House, he initially thought he would stay for a year, then possibly be named chairman of the Federal Reserve Board. Instead, Mr. Obama decided to re-nominate Ben S. Bernanke to head the Fed, and with health-care and financial-regulation bills still in flux, he decided to stay for another year.

As a campaign adviser, Mr. Summers—a former president of Harvard, a former Treasury Secretary and an accomplished academic economist—gave heft to then-candidate Obama. But as he

became more prominent in the Obama inner circle, liberals attacked him as too conservative and too tied to Wall Street. Women's groups continued to grumble about his time at Harvard, when he clashed with women faculty over a comment that women might not be as suited to the rigors of the hard sciences. That controversy led to his stepping down as president.

The criticism has only grown louder, from both the left and the right. House Minority Leader John A. Boehner (R, Ohio) called on the president to fire him and Treasury Secretary Tim Geithner earlier this month as a first step toward remaking his economic policies. Some Democrats have also called for his ouster.

A senior administration official said such criticism didn't figure in his departure. "I think Larry's pretty used to being in the public eye with all its pros and cons," said the official, who is also a friend of Mr. Summers.

With the long list of recent departures, Treasury Secretary Timothy Geithner appears to be the last of the top "economic principals" who came into the White House with Mr. Obama.

The Treasury secretary had to survive recriminations over his failure to pay all his taxes even before he was confirmed. When he unveiled the administration's plan to stem the fiscal crisis,

Lawrence Summers, Harvard bound

stock prices plunged on fears that he had no real plans.

But his handling of the complex financial-regulation bill buoyed his stature in the White House, and administration officials say he isn't about to leave.

Mr. Summers was one of the chief architects of the giant economic stimulus plan signed into law in February 2009. He was a key advocate even before the president's inauguration of a larger, more robust package than the one that eventually passed. Mr. Summers also helped guide the rescue of General Motors and Chrysler, a move White House officials regard as a major success but that remains highly

GOP Halts Repeal of Military

Continued from Page One Reid (D., Nev.) voted "no" in a tactic that leaves him the option to revive the bill later.

Ms. Lincoln expressed frustration at limits placed by Mr. Reid on amendments, as did Sen. Susan Collins (R., Maine), one of the moderate Republicans that Democrats had hoped would support the bill.

Mr. Pryor said the bill had become a "political football."

The vote highlights a significant difference between the two parties on a controversial social issue just weeks before a hard-fought election, and it could spur activists on both sides.

Republicans may use the vote to argue that Democrats are out of touch with mainstream values. Some among the Democrats' liberal base, meanwhile, have been galvanized by the issue.

But unlike gay marriage, the debate over allowing gays and lesbians to serve in the military has become less divisive than in 1993, when the "Don't Ask, Don't Tell" ban was put in place.

A majority of the public now supports ending the prohibition, opinion polls show. Republican objections to the bill Tuesday centered on its timing and other aspects of the legislation.

Beyond that, strategists don't believe either party has much to gain from campaigning hard on the issue.

The current election campaign has centered on economic issues, and leaders of both parties have concluded that voters will punish politicians who appear to be focusing on anything

Democrats had hoped Republican Senator Susan Collins of Maine, shown Tuesday

Yields on TIPS Go Negative

Big Demand for Bonds Suggests Fed Is Winning Deflation Battle; It 'Is Striking'

BY MARK GONGLOFF
AND DEBORAH LYNN BLUMBERG

A COMBINATION OF LOW interest rates and growing fears of rising prices enabled the U.S. government to sell inflation-protected Treasury bonds with a negative yield for the first time ever on Monday.

That means if inflation doesn't appear as investors expect, they could end up paying to lend money to the government.

CREDIT MARKETS The Treasury sold \$10 billion of five-year Treasury inflation-protected securities, or TIPS, at an auction on Monday with a yield of negative 0.55%.

The big demand is a sign the Federal Reserve is gaining some traction in its efforts to kickstart

Tipping Over

Yield on five-year Treasury
inflation-protected securities,
or TIPS

Source: Thomson Reuters

the economy and nudge inflation higher. TIPS are designed to protect investors against inflation, offering a return that rises as

the cost of goods increase. In times of inflation, they are more attractive than standard Treasury bonds, whose fixed income stream is worth less as other prices are rising.

"While the yield on many TIPS is negative, investors in these securities expect a positive return overall," Tony Crescenzi, portfolio manager at Pacific Investment Management Co. in Newport Beach, Calif.

Financial-market investors, economists and even Federal Reserve officials have been engaged in a months-long debate over whether inflation or deflation is the bigger threat to the economy. In some ways, Monday's auction is a sign that some investors are tilting in favor of inflation. There are other signs, too. Gold, a traditional hedge

against inflation, is trading near record highs and the U.S. dollar has been falling.

TIPS investors won't lose money as long as the economy avoids deflation for the next five years, as TIPS investors get extra money every year to keep up with the inflation rate. If inflation is high enough to offset the negative yield, investors will end up with a positive return.

Yields on Treasuries have turned negative before, particularly at the depth of the financial crisis. Then, investors in short-term Treasuries did pay a small amount of money to lend to the government, but were willing to do so because they were able to protect most of their investment from market turmoil.

Negative TIPS Yield Seems to Be a Positive Sign

Continued from the prior page
yields are a result of Fed efforts to fend off deflation by buying up Treasuries and TIPS to push their yields to rock-bottom levels. Investors expect the Fed to announce another round of Treasury purchases after its policy meeting on Nov. 3. Investors have been buying both TIPS and Treasuries in anticipation, but

lately TIPS have outperformed. If negative TIPS yields reflect anxiety about inflation, then that suggests the Fed may be succeeding. Deflation is partly a result of consumers delaying purchases because they think prices are going to fall.

The negative yield on five-year TIPS owes partly to the fact that nominal five-year Treasuries

yield just 1.18%, which is barely higher than consumer price inflation for the past year.

The difference between regular Treasury yields and TIPS yields, often called the "breakeven inflation rate," is a rough measure of the market's inflation expectations for the future. That breakeven inflation rate has grown since the Fed

made it clear it was going to restart its bond buying, an effort known as quantitative easing.

In the case of five-year TIPS, the negative yield suggests inflation expectations of about 1.70%—hardly runaway inflation, but better than deflation.

Caterpillar's Owens to Join Morgan Stanley's Board

Morgan Stanley said it has named outgoing Caterpillar Inc. Chairman James Owens to its board, effective Jan. 1.

Mr. Owens, 64 years old, served as chief executive of Caterpillar from 2004 until June 2010, and will step down from the chairman role at the maker of construction equipment on Nov. 1.

His addition to the board brings the number of directors at the investment bank back up to 13. In May, Charles Noski, chief financial officer of Northrop Grumman Corp., left the board when he was named Bank of America Corp.'s finance chief.

Mr. Owens's election brings the number of independent directors at Morgan Stanley to 10 from nine on Jan. 1.

About EEI's Quarterly Financial Updates

EEI's quarterly financial updates present industry trend analyses and financial data covering 63 U.S. shareholder-owned electric utility companies. These 63 companies include 58 electric utility holding companies whose stocks are traded on major U.S. stock exchanges and eleven electric utilities who are subsidiaries of non-utility or foreign companies. Financial updates are published for the following topics:

- | | |
|-------------------|---|
| Dividends | Rate Case Summary |
| Stock Performance | SEC Financial Statements (Holding Companies) |
| Credit Ratings | FERC Financial Statements (Regulated Utilities) |
| Construction | Fuel |

For EEI Member Companies

The EEI Finance and Accounting Division is developing current year and historical data sets that cover a wide range of industry financial and operating metrics. We look forward to serving as a resource for member companies who wish to produce customized industry financial data and trend analyses for use in:

- Investor relations studies and presentations
- Internal company presentations
- Performance benchmarking
- Peer group analyses
- Annual and quarterly reports to shareholders

We Welcome Your Feedback

EEI is interested in ensuring that our financial publications and industry data sets best address the needs of member companies and the financial community. We welcome your comments, suggestions and inquiries.

The 63 U.S. Shareholder-Owned Electric Utilities

The companies listed below all serve a regulated distribution territory. Other utilities, such as transmission provider ITC Holdings, are not shown below because they do not serve a regulated distribution territory. However, their financial information is included in relevant EEI data sets, such as transmission-related construction spending.

Companies Listed by Category

(as of 12/31/09)

Please refer to the Quarterly Financial Updates webpage for previous years' lists.

Given the diversity of utility holding company corporate strategies, no single company categorization approach will be useful for all EEI members and utility industry analysts. Nevertheless, we believe the following classification provides an informative framework for tracking financial trends and the capital markets' response to business strategies as companies depart from the traditional regulated utility model.

Regulated	80%+ of total assets are regulated
Mostly Regulated	50% to 80% of total assets are regulated
Diversified	Less than 50% of total assets are regulated

Categorization of the 58 publicly traded utility holding companies is based on year-end business segmentation data presented in 10Ks, supplemented by discussions with company IR departments. Categorization of the five non-publicly traded companies (*shown in italics*) is based on estimates derived from FERC Form 1 data and information provided by parent company IR departments.

The EEI Finance and Accounting Division continues to evaluate our approach to company categorization and business segmentation. In addition, we can produce customized categorization and peer group analyses in response to member company requests. We welcome comments, suggestions and feedback from EEI member companies and the financial community.

Stock Performance

HIGHLIGHTS

■ The EEI Index returned 12.5% during Q3, slightly outpacing the Dow Jones Industrials' 11.1% return, the S&P 500's 11.3% return and the Nasdaq Composite's 12.3% gain. This was the second consecutive quarter that the EEI Index outperformed the broad market, reversing the underperformance seen during Q1.

■ Regulated companies returned an average 10.5% during the first nine months of 2010 versus the Mostly Regulated group's 7.0% and the Diversified group's negative 4.9%. Dividends boosted regulated shares and weak natural gas prices weighed on competitive generators.

■ EEI Index companies averaged a strong 4.5% dividend yield on September 30, two percentage points more than the 10-year Treasury bond's 2.5% yield.

■ Electricity demand jumped 6.9% during Q3 due in part to a hotter-than-average summer, and grew 4.5% year-to-year during the first nine months of 2010. Strong capex programs seem likely to produce reasonable earnings growth for many Regulated utilities, contingent upon maintenance of constructive regulatory relationships.

COMMENTARY

The EEI Index produced a 12.5% return for the third quarter of 2010, slightly outpacing the Dow Jones Industrials' 11.1% return, the S&P 500's 11.3% return and the Nasdaq Composite's 12.3% gain. The third quarter of 2010 represented the second consecutive quarter that the EEI Index outperformed the broad market, reversing the underperformance seen during the first quarter.

The late summer's market rally was powered by an eas-

ing of concern about slowing U.S. economic growth and the impact of European sovereign debt loads on the stability of European banks, which drove stock prices down during May and June. Investors instead became more confident as the summer progressed about the U.S. economy's ability to avoid a dip back into recession, while European leaders pieced together a rescue plan that backstopped, at least for now, its most fragile economies and the banks that lent to them.

In such a strong quarter for the market, one might expect utilities to underperform, but continued declines during the third quarter in already low interest rates, the group's strong 4.5% dividend yield, and reasonably healthy prospects for rate base and earnings growth among regulated utilities helped the group keep pace with the major averages. Moreover, second quarter earnings were generally above expectation across the industry, buoyed by the recovery in demand and rate relief in recent rate cases.

The EEI Index likewise slightly outpaced the broad market for the first nine months of 2010, returning 5.6% versus the Dow Jones Industrials' 5.6%, the S&P 500's 3.9% and the Nasdaq Composite's gain of 4.4%.

Regulated Group's Strength Continues

The Regulated group of companies continued to outperform competitive power generators during the quarter, extending for the fifth consecutive quarter a trend that began in Q3 2009. As shown in Table VIII, EEI's Regulated group (80% of assets are regulated) returned 12.0% during Q3 while the Diversified group (less than 50% of assets are regulated) returned 5.1%. The Mostly Regulated group (50% to 80% of assets are regulated), a mix of companies that balance regulated and competitive operations to varying degrees, returned 13.7%. However, due to the migration of company strategies toward traditional regulated operations in recent years, the Diversified group is down to only four publicly traded companies from ten in 2004, while the Mostly Regulated group has decreased from 26 companies to 20. A more telling comparison comes against independent power producers, which are not included in the EEI Index and which generally saw negative returns during the quarter as natural gas prices eroded further, remaining at multi-year lows.

For the first nine months of 2010, the Regulated group's dominance is clear in the data, with a total return of 10.5% versus 7.0% for the Mostly Regulated group and a negative 4.9% return for the Diversified group. And as shown in Table XIV, seven out of the EEI Index's top ten

gainers for the first nine months of 2010 are members of the Regulated group, while the other three are in the Mostly Regulated group.

Natural Gas Prices Remain Depressed

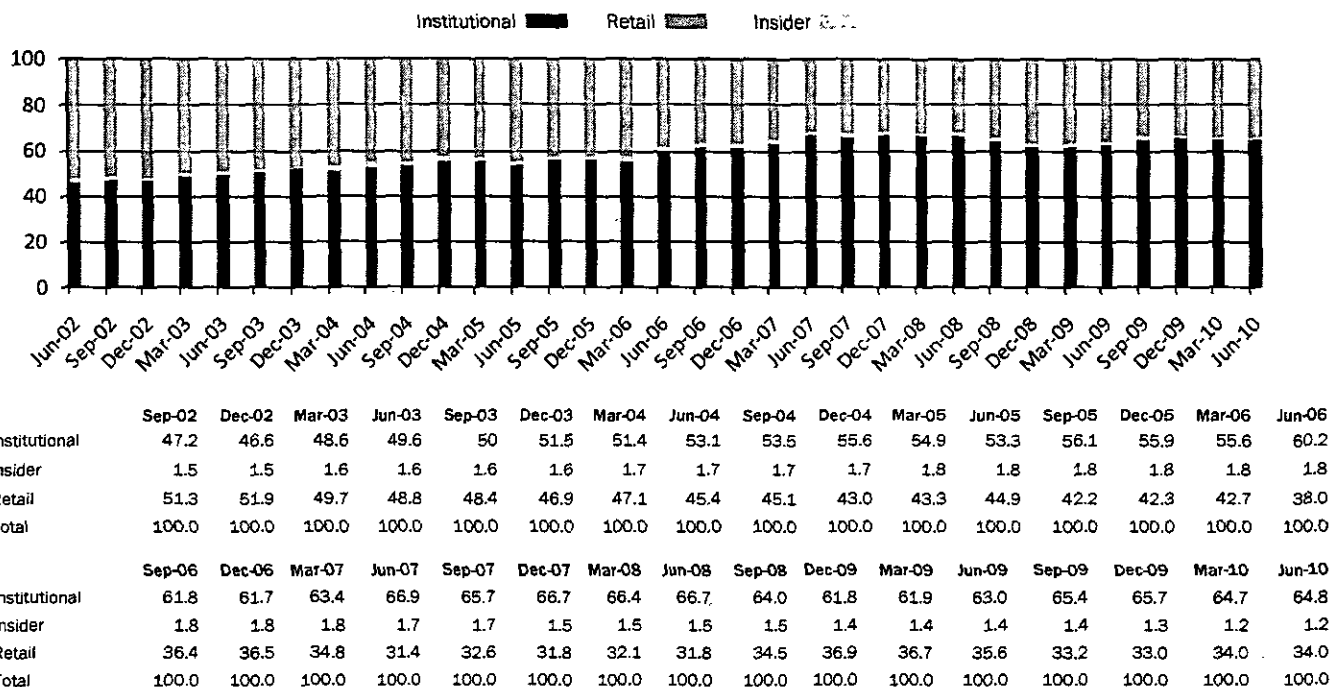

The most significant trend in terms of overall macroeconomic fundamentals impacting the industry during 2010 continues to be the ongoing softness in natural gas spot and futures prices. Natural gas-fired generators are typically the marginal price setters in many competitive power markets across the country and natural gas prices, therefore, exert a strong influence on competitive power prices.

As shown in Chart VI, spot gas prices drifted further downward in Q3, falling under \$4/mm BTU by September 30 from \$4.50/mm BTU in early July. Chart VII shows the marked decline in futures prices during Q3 and over the past two years, which has resulted in analysts ratcheting down the longer-term outlook for competitive power pricing and related earnings estimates for competitive power producers, contributing to the group's share price weakness.

Domestic natural gas supply has been boosted by production from low-cost shale reserves, creating a supply glut. As a result, analysts have become increasingly bearish about the prospects for natural gas prices and long-term competitive power prices, even in a sustainable economic rebound.

XV. Share Ownership by Investor Category (% of total)

U.S. Shareholder-Owned Electric Utilities

Source: SNL Financial and EEI Finance Department. Note: Institutional figures represent end-of-quarter, unweighted average of the 58 publicly traded EEI Index companies.

Power Demand Boosted by Hot Summer

After declining nearly 4% on an annual basis in 2009, nationwide electricity output has rebounded this year, rising 4.5% during the first nine months of 2010. Helped by a generally hot summer across the country (cooling degree days, a measure of air conditioning usage, were 22% higher than the historical average), power demand jumped 6.9% in Q3 and hit record levels in some cities, which likely contributed to the industry's share price strength. Nevertheless, the long-term outlook for power demand remains uncertain, dependent not only on the strength of economic growth, which has slowed as 2010 has progressed, but on the impact that energy efficiency, smart grid and demand response technologies, along with general conservation measures, will have on power usage.

Utility Dividends Offer Relief from Low Interest Rates

Interest rates continue to be a wildcard for the industry and its investors, most directly impacting regulated utility shares, which often appeal to income-oriented investors as a bond substitute with dividend growth potential. Widespread predictions by economists in recent years that interest rates will rise have continually been confounded by declining rates, and this trend continued during the third quarter.

As shown in Table V, the 10-year Treasury yield fell from 3.0% at the start of the quarter to 2.5% by quarter-end. With bond yields low, the strong dividends offered by many utilities are no doubt one important source of support for utility stocks. At September 30, the average dividend yield for the EEI Index's 63 publicly traded utilities stood at 4.5%, about two full percentage points higher than the 10-year Treasury yield, representing the widest gap in 20 years. The gap is likely exaggerated by the government bond's status as a risk-free haven in a time of global macro uncertainty and market anticipation of additional Federal Reserve buying designed to hold down risk-free rates and force capital to flow to corporate investments, but its magnitude clearly supports the sector's investment appeal.

Industry Prospects Appear to Be Sound

Many regulated utilities are engaged in capital spending programs that should help drive solid 6% to 8% earnings growth over the next several years, which analysts point to as an ongoing source of attraction for investors in addition to the sector's dividends. Moreover, recent EPA moves to limit coal plant emissions through the Clean Air Transport Rule (CATR) — which will target SO_x and NO_x emission — and a Maximum Achievable Control Technology (MACT) rule for mercury will conceivably force the retirement of 50 to 60 gigawatts of older, inefficient coal plants

within the next five to ten years, according to many Wall Street analysts who follow the industry. This represents a sizeable slice of a total coal fleet that totals approximately 340 gigawatts.

Replacing this capacity and upgrading other coal plants with emissions control technology offers the potential for extended strong rate base growth at regulated utilities. However, as is always the case in this most political of industries, maintaining healthy regulatory relationships will be a key to achieving reasonable returns for investors. The sharp decline in natural gas prices in recent years has helped to moderate the rise in end-user rates required to finance the industry's elevated capital spending. While most analysts now predict that natural gas prices will remain low over the next few years, any significant uptrend has the potential to boost the fuel cost component of rates and renew the more confrontational regulatory politics as seen in some jurisdictions several years ago, when power prices were forced upward by surging natural gas prices.

However, utilities have important political strengths as well. Their capital investment programs are a source of high-quality jobs and they are often among the largest employers in a given state. In a weak economy burdened by chronically high unemployment and considerable nervousness about job stability — even among those who are employed — regulators, utility managements, company employees and local communities all agree that financially healthy utilities and the good jobs they offer serve everyone's best interest. Nevertheless, the judicious management of regulatory relationships will likely be among the most important factors in achieving success for shareholders and all stakeholders in the years ahead.

By late in the third quarter, most industry analysts were commenting that utility price earnings multiples had returned to near their average levels and that the undervaluation evident earlier in the year had largely closed. However, with interest rates as low as they are and the risk of a return to broad economic weakness still very much in play, there was a general sense of confidence that the sector's capital investment growth potential and strong dividend yields offer a floor of support for its stock prices. There were even some suggestions that the bear market in competitive power may be nearing a bottom, and that investors willing to wait for gains might take advantage of today's depressed stocks, with an eye to anticipating a lift in shares as the stock market begins in 2011 to discount a tightening in power markets driven by coal plant retirements. But such advice also came with the usual admonition that being early into an investment theme often comes hand-in-hand with a painfully long waiting period. ■

Opinion

Rating Drivers

- Mid-size regulated utility operating company with historically good cash flows

- Good asset mix with low-cost coal and nuclear fleet
- Construction and regulatory risks have delayed meaningful improvement in credit profile
- Reliance by parent holding company for upstream dividends to service its debt and pay common dividends

Recent Events

On March 12, 2010 Moody's downgraded the senior unsecured rating of Kansas City Power and Light (KCPL) one notch to Baa2 from Baa1, and affirmed KCPL's A3 senior secured rating, and short-term commercial paper rating at Prime-2. At the same time Moody's affirmed KCPL's parent, Great Plains Energy Incorporated (Great Plains) at Baa3 senior unsecured, and its operating subsidiary, KCPL Greater Missouri Operations (GMO) at Baa3 senior unsecured. The rating outlooks at Great Plains, KCPL, and GMO were all changed to stable from negative.

The downgrade of KCPL was reflective of our opinion that the operating company's credit metrics were weak for the rating category and that the unsecured rating would be better positioned at the Baa2 category given the still significant construction and regulatory goals the company is targeting.

Corporate Profile

Headquartered in Kansas City, Missouri, Kansas City Power and Light Company is an integrated regulated electric utility operating company serving customers in western Missouri and eastern Kansas. KCPL is also the primary operating subsidiary of Missouri based, Great Plains Energy Incorporated. Great Plains is a utility holding company operating through its two major subsidiaries, KCPL and KCPL GMO. Together, the two operating companies serve approximately 820,000 customers in Kansas and Missouri. KCPL has historically been viewed as the primary provider of cash flow for Great Plains but following the July 2008 acquisition of Aquila's Missouri based electric utility operations (renamed GMO) we believe the approximately 20% of consolidated cash flows are now derived from GMO.

On a stand-alone basis KCPL is considered a mid-size utility company with more than 4,000 MW's of controlled generating capacity. KCPL also has access to nuclear power with its 47% interest (545MW) in the Wolf Creek nuclear facility. Including the GMO operations the Great Plains system has a very favorable cost profile with its high level of electricity production sourced from coal fired and nuclear "baseload" generating assets. Together, coal and nuclear power accounted for 97% of KCPL's energy supply in 2009.

Rating Rationale

KCPL's Baa2 senior unsecured rating is based on its historical ability to achieve good levels of cash flow from its regulated utility operations in Missouri and Kansas. However, the company has and continues to face challenges including weakness in credit metrics, a need to maintain generating fleet operational efficiency, the achievement of wholesale power sales targets, and managing the stress that increased environmental expenditures and the large capital expansion program at Iatan 1 & 2 have placed on the company's balance sheet. The combined pressures of these challenges were primary drivers of the March 2010 downgrade of KCPL's unsecured rating. The notching of KCPL's A3 senior secured rating is consistent with Moody's implementation of a widening of the notching between most senior secured debt ratings and the senior unsecured debt ratings or Issuer Ratings of investment grade regulated utilities to two notches from one previously.

The historical reliance that KCPL's parent has placed on the company as a source of dividends has also been a rating consideration. This may be offset somewhat with the acquisition of GMO and the 2009 dividend cut but we note that on a stand-alone basis GMO continues to exhibit a more leveraged capital structure than KCPL which continues to be a consideration in our ratings. We note Great Plains provides a downstream guarantee of the unsecured debt at GMO.

DETAILED RATING CONSIDERATIONS

CREDIT METRICS MAY HAVE TURNED THE CORNER BUT REMAIN WEAK FOR RATING CATEGORY

KCPL's operating results in 2009 were challenged by weakness in the Missouri economy as well as atypically cool summer weather. Although there was modest improvement in credit metrics during the year we believe the credit profile of KCPL looking prospectively is more reflective of the Baa2 rating category given the challenges the company has faced in executing its two Iatan construction programs. The key issues ahead of the company, in our view, are related; successfully transition of Iatan 2 to rate base, and demonstrate continued improvement in its credit metrics.

At year-end 2009, Great Plains reported \$1.5 billion of construction work in progress on its balance sheet (18% of the company's total assets). A large component of that is attributable to KCPL, and principally related to the construction of Iatan 2, an 850MW supercritical coal plant nearing completion in Weston, Missouri (KCPL owns 55% of the project
