COMPLAINANTS' REQUEST TO ADD THE DEPARTMENT OF NATURAL  
RESOURCES AS A PARTY

COMES NOW, Cathy Orlor, and other Complainants being represented by their individual signatures below, to request that the Commission add the Department of Natural Resources as a party to Case No. WC-2006-0082, et al.

For nearly eight, (8), years, the Big Island water and sewer utility, has been operating under the jurisdiction of the DNR. Therefore Complainants are confident that DNR representatives will provide exclusive testimony in this case regarding the construction and expansion, operation and management of this utility, and its applications, permits, and Notices of Violation, issued by DNR.

The DNR has been made an integral party to this case before the Missouri Public Service Commission, in meetings scheduled throughout these proceedings by formal Complainants, as a means of full disclosure of information to the Department regarding its involvement and participation in the utility issues presented to the PSC. In addition to formally scheduled meetings, numerous telephone conversations and E-mail correspondence between DNR representatives and Complainants have also taken place during these proceedings, as a means of full disclosure of information to the Department regarding its involvement and participation in the utility issues.

Additionally, numerous documents and written correspondence between Big Island residents and Complainants and the DNR, spanning nearly eight, (8), years, have been filed as attachments submitted with the formal complaints filed with the PSC, and as exhibits in pleadings filed with the Commission.

The absence of DNR representatives during scheduled PSC proceedings, has proven significant, since DNR has had jurisdiction over this utility for nearly eight, (8), years.

Therefore, Complainants respectfully request the Commission to add the Department of Natural Resources as a party to this case.

Respectfully submitted,

Dean Serrano

Andy Fort

Cathy J. Allen

Benjamin D. Lundy

Joseph J. Schmitt
