**RE: PON Cancellation**

Dear Guy:

Due to CenturyTel's refusal to process MCI's PONs (PON 630917 and 639033), MCI is now requesting that these PONs be canceled.

CenturyTel's offer to process the PONs if MCI submits a supplemental order (Sup) to change the trunk type from local/intralata toll to intralata toll only is not acceptable as MCI's interconnection agreement allows MCI to pass local and ISP traffic over the local/intralata toll group. By requesting to redesignate the trunk groups as something other than local/intralata toll, CenturyTel is denying MCI's rights to interconnect under the local ICA.

As these orders have been outstanding since 4/7/04 for PON 630917 and 4/17/04 for PON 639033, it is clear that CenturyTel does not intend to process these orders in a manner consistent with the interconnection agreement. As a result, MCI will cancel these interconnection trunk orders.

Sincerely,

Dayna Garvin
