ERRATUM OF RENEW MISSOURI

At the oral argument on these cases on August 30, 2011, I said in response to a question by Commissioner Davis that I had no role in drafting the ballot title for Proposition C, the Renewable Energy Standard passed by ballot initiative on November 4, 2008. In retrospect, I believe I misspoke. I am filing herewith a document I drafted at an unknown date, but early in 2008, suggesting several alternative ballot summaries. I no longer have a record of any correspondence I may have sent to the Secretary of State or Attorney General communicating these proposed ballot titles, and to the best of my recollection I never received any response from the Secretary of State or Attorney General.

The actual ballot title, as required by § 116.334, RSMo, still appears on the Secretary of State's web site and reads:

“Shall Missouri law be amended to require investor-owned electric utilities to generate or purchase electricity from renewable energy sources such as solar, wind, biomass and hydropower with the renewable energy sources equaling at least 2% of retail sales by 2011 increasing incrementally to at least 15% by 2021, including at least 2% from solar energy; and restricting to no more than 1% any rate increase to consumers for this renewable energy?

The estimated direct cost to state governmental entities is \$395,183. It is estimated there are no direct costs or savings to local governmental entities. However, indirect costs may be incurred by state and local governmental entities if the proposal results in increased electricity retail rates.”

I apologize if I spoke incorrectly.

Respectfully submitted,

/s/ Henry B. Robertson
