

The Empire District Electric Company A Liberty Utilities Company

Case No. ER-2020-0311

OPC Data Request – 8001

Data Request Received: 04/14/20

Request No. 8001

Date of Response: 4/29/20 Respondent: Peter Thompson

Submitted by: Lena Mantle.

REQUEST:

Empire's Electric Net Fuel & Purchased Power report for December 2019 provided in submission BFMR-2020-0367 states the following:

Asbury was derated due to fuel quality issues prior to consuming all of its recoverable coal inventory on December 12th at which point it did not operate for the remainder of the month. As a result, the unit produced only 5,386 MWh (approximately 95.0% less than budget since it was budgeted to operate normally all month). Asbury yielded over \$2.2 million in unfavorable market margin largely due to increased costs due to its limited operation and coal inventory adjustments that increased its costs by over \$1.9 million.

Please provide the following information:

A. A detailed explanation of the increased cost due to Asbury's limited operation along with all general ledger entries for these increased costs.

B. A detailed explanation of the coal inventory adjustments with all general ledger entries for this adjustment.

RESPONSE:

- A. The increased cost as reported in the Net Fuel & Purchased Power report for December 2019 is primarily attributable to a coal inventory adjustment (\$) and a limited amount of generation (MWh). Refer to the attachment labeled: "DR 8001.A Asbury Costs.xlsx".
- B. Per David Eaton, the Asbury Plant Manager and a professional engineer, there was no recoverable or usable coal at the Asbury Plant as of 12/31/19. Therefore, Accounting adjusted the inventory balances for both blend and PRB coal to zero with 12/31/19 general ledger entry BURNEXP19. Please see DR 8001.B Inventory Adjustments Entry and Support.pdf.

RE: Asbury coal inventory

In my professional judgment, as of 12/31/2019, there is insufficient recoverable coal inventory to start the unit. The coal that remains in both the PRB and blend piles has too much clay and/or rock mixed in to be considered a viable coal for combustion.
