10 CSR 20-6—NATURAL RESOURCES

Missouri Public
Service Commission

until the authority has obtained a certificate of convenience and necessity from the PSC;

4. Any person with complete control of, and responsibility for, the water contaminant source, point source or wastewater treatment facility and all property served by it. The person may constitute a continuing authority only by showing that the authorities listed under paragraphs (3)(B)1.-3. of this rule are not available, do not have jurisdiction, are forbidden by statute or ordinance from providing service to the person or, if available, have submitted written waivers as provided for in subsection (3)(B) of this rule; and

5. An association of property owners served by the wastewater treatment facility, provided the applicant shows that—

A. The authorities listed in paragraphs (3)(B)1.-3. of this rule are not available or that any available authorities have submitted written waivers as provided for in subsection (3)(B);

B. The association owns the facility and has valid easements for all sewers;

C. The document establishing the association imposes covenants on the land of each property owner which assures the proper operation, maintenance and modernization of the facility including at a minimum:

(I) The power to regulate the use of the facility;

(II) The power to levy assessments on its members and enforce these assessments by liens on the properties of each owner;

(III) The power to convey the facility to one (1) of the authorities listed in paragraphs (3)(B)1.-3.; and

(IV) The requirement that members connect with the facility and be bound by the rules of the association; and

D. The association is a corporation in good standing registered with the Office of the Missouri Secretary of state.

(C) The department will review the planning, design, construction and designation of watershed or regional sewage works. Where development is insufficient to warrant immediate construction of facilities for the entire watershed or region, interim facilities for a portion of the area shall be authorized as long as the design is compatible with 10 CSR 20-8, Design Guides. The department shall condition permits for these interim discharges so they will be eliminated upon the availability of watershed or regional facilities. At such time as watershed or regional facilities become available, and to the extent their capacity is sufficient, any existing subregional treatment works and/or lift stations shall be taken out of service and the tributary waste flows diverted into the watershed or regional facilities. A Regional Sewage Service and Treatment Plan shall be developed by all affected political jurisdictions and submitted

to the department. Staff will review the plan and submit recommendations to the Clean Water Commission. The Clean Water Commission may approve, require changes, deny the plan and/or hold public hearings related to approval of the plan.

(D) Industries, including electric cooperatives and mining operations, are by definition continuing authorities for collection and treatment of industrial type wastewater and incidental domestic wastewater associated with their operation when an authority listed in paragraph (3)(B)1. or 2. is infeasible.

(E) Private corporations which are not incorporated under the laws of the state of Missouri shall be represented by a registered agent in the state of Missouri before a construction permit or an operating permit will be issued by the department.

(4) Construction Permits

(A) No person shall cause or permit the construction, installation or modification of any sewer system or of any water contaminant source, point source or wastewater treatment facility without first receiving a construction permit issued by the department except for the following:

1. Construction of a separate storm sewer; and

2. Facilities as provided in other 10 CSR 20-6 regulations.

(B) A separate application for each sewer system, water contaminant source, point source or wastewater treatment facility must be submitted to the department. Where there are multiple releases from a single operating location, however, one (1) application may cover all facilities and releases. For continuing authorities listed in paragraph (3)(B)1. or 2. only one (1) application may be required when the authority operates a sewage treatment plant and has one (1) or more other noncontinuous storm water-related discharges associated with the sewage treatment plant.

(C) An application for a construction permit must be submitted to the department at least one hundred eighty (180) days in advance of the date on which construction begins. Requests for a shorter time for a review of a wastewater treatment facility may be made but must be accompanied by a detailed statement of the justification for the request. No such statement is required when the application is only for the construction of sewers.

(D) An application shall consist of the following items:

1. Unless not required by the department, an engineering report shall be submitted by an engineer and shall contain the information required by 10 CSR 20-8.020 and 10 CSR 20-8.110-10 CSR 20-8.220. If the report includes a wastewater treatment facility, it shall include consideration of the

feasibility of constructing and operating a facility which will have no discharge to waters of the state (see section (12) of this rule). Unless the department specifies otherwise, this report will be reviewed and necessary changes made before the plans and specifications in paragraph (4)(D)2. will be reviewed;

2. Detailed plans and specifications shall be submitted by an engineer and shall contain the information required in 10 CSR 20-8.020 and 10 CSR 20-8.110-10 CSR 20-8.220 or other regulations as applicable;

3. An application form and permit fee;

4. A one inch equals two thousand feet (1" = 2000') scale map (or large) showing the location of all outfalls (alternate scale maps are allowed upon the request of the applicant and approval of the Department of Natural Resources);

5. Other information necessary to determine compliance with the Missouri Clean Water Law and these regulations as required by the department; and

6. If a construction permit is waived by the department, or not required, the information in paragraphs (4)(D)1.-5. may be required with application for the operating permit.

(E) If an application is incomplete or otherwise deficient, the applicant shall be notified of the deficiency and processing of the application may be discontinued until the applicant has corrected all deficiencies. The department will act after receipt of all documents and information necessary for a properly completed application, including appropriate filing fees and other supporting documents as necessary, by either issuing a notice of operating permit pending, issuing the construction permit or denying the permit. The director in writing, shall give the reasons for a denial to the applicant. Applicants who fail to satisfy all department comments after two (2) certified department comment letters in a time frame established by the department shall have the application returned as incomplete and the construction fees shall be forfeited. The applicant has the right to request that the time frames be extended when additional time is needed. The request must occur within the established time frame, it must be in writing and the department will grant reasonable time extensions.

(F) A notice of permit pending is a statement that the department intends to issue an operating permit. The department will issue the public notice of a pending new operating permit for a wastewater treatment facility before it issues the construction permit for the wastewater treatment facility. This allows the public an opportunity for comment prior to the construction of a wastewater treatment facility. A public notice will not be required prior to the issuance of a construction permit
