

Data Information Request
From Union Electric Company d/b/a Ameren Missouri
MPSC Case No. ER-2011-0028

Filed
May 19, 2011
Data Center
Missouri Public
Service Commission

Requested From: Missouri Public Service Commission Staff

Requested By: James B. Lowery

Date of Request: April 26, 2011

Information Requested:

1. Reference the two page document bearing an Exhibit sticker and labeled "Exhibit Mantle 10" attached to this data request.
 - a. Please confirm that the first page, bearing a handwritten number "1" in a circle in the bottom right hand corner, is a printout of a worksheet received by the Staff from the Company in connection with the calculation of the NBFC rates in Case No. ER-2008-0318. Please state which Staff member received it.

Staff response: Staff cannot confirm that this worksheet was received by Staff from the Company

- b. Please confirm that the second page, bearing a handwritten number "2" in a circle in the bottom right hand corner, was a worksheet prepared by the Staff (and/or a modification by the Staff of the worksheet referenced in subpart a above) that the Staff sent to the Company in connection with the calculation of the NBFC rates in Case No. ER-2008-0318. Please state which Staff member(s) prepared (and or modified) this worksheet, and which Staff member sent it to the Company. Please provide the Microsoft Outlook email by which it was transmitted to the Company, and the Microsoft Excel file containing the worksheet transmitted to the Company.

Staff response: Staff cannot confirm that this worksheet was prepared by Staff. However, included in this response is a Microsoft Outlook email with an attached Microsoft Excel file consistent with the second page that shows that this Microsoft Excel file was supplied to Jeremy Hagemeyer of the Staff by Gary S. Weiss of Ameren Services on January 28, 2009.

Response provided by Lena Mantle

2. Please confirm that the hourly loads used in the Staff's production cost modeling in Case No. ER-2007-0002 did not include transmission losses?

Ameren Exhibit No. 169
Date 5-4-11 Reporter JW
File No. ER-2011-0028

Staff response: In the hourly loads for the final Staff fuel model run, Staff used a system loss percentage of 5.93%. Staff cannot confirm nor deny what is or is not in the system loss percentage of 5.93%.

Response provided by Shawn Lange

3. Reference the Company's response and supplemental response No. 1 to Staff Data Request No. 0137 in Case No. ER-2007-0002, copies of which are attached to this data request.
 - a. In connection with his work in Case No. ER-2007-0002:
 - i. Did Staff employee Shawn Lange review the Company's response? When, or approximately when?

Staff response: Shawn Lange reviewed the initial response on 10/3/11, the same day it was filed in EFIS

Response provided by Shawn Lange

- ii. Did Mr. Lange review supplemental response No. 1? When, or approximately when?

Response provided by Shawn Lange

Staff response: Shawn Lange reviewed the supplemental response on 10/23/2006, the same day it was filed in EFIS.

Response provided by Shawn Lange

- b. Did Staff members other than Mr. Lange review supplemental response no. 1 in connection with their work in Case No. ER-2007-0002? If so, which Staff members, and when or approximately when?

Staff response: Mr. Lange forwarded the supplemental response to Erin Maloney on the day that he received the response. Ms. Maloney reviewed the supplemental response after she received it from Mr. Lange.

Response provided by Shawn Lange and Erin Maloney

4. Reference the attached file "May 2010 UE Hourly Loads.xlsx."
 - a. Does the Staff agree that if the sum of the values in columns (starting in row 3) E+F+G+H+I+J+K+L in the "Final Data" tab, are subtracted from the values in column C, the resulting difference equals the AmerenUE (now Ameren Missouri) load at the generation level?

Staff response: Staff does not agree.

Response provided by Erin Maloney

- b. If Staff's answer to subpart a of this part 4 is anything other than an unequivocal "yes," please explain in detail.

Staff response: Staff has not been provided with enough information to make that determination. The physical MWs presented in the column titled "MISO losses" appear for the first time in this filing with no accompanying documentation. The physical MWs contained in columns E through L appear with the following information contained in the "Notes" tab of the submitted file:

"Preliminary Data Includes some estimates for wholesale customers that did not have hourly meter readings available yet, all data potentially subject to revision
Notes Taum Sauk pump load was included in control area load totals from Feb. 27, 2010 through May 5, 2010
California load switched from transmission only service to full requirements Jan. 1, 2010
Load reported in Central Prevailing Time. Daylight savings changes have been normalized so that every day has 24 hours."

Response provided by Erin Maloney

- c. If Staff's answer to subpart a of this part 4 is "yes," would Staff agree that the difference described in subpart a of this part 4 is Net System Input, as that term was described by Staff witness Lena Mantle during her deposition on April 25, 2011?

Staff response: N/A

- d. Please confirm that the data in this file was provided to the Staff as part of the Company's 4 CSR 240-3.190(1)(C) reporting for the month of May 2010.

Staff response: The data on the "Final Data" tab of the file provided with the data request was contained in the 4 CSR 240-3.190 (1) (C) filing received in the month of May 2010.

Response provided by Erin Maloney

5. Reference the attached file "MPSC Data Description 0310.xls."
a. Please confirm that the data in this file was provided to the Staff as part of the Company's 4 CSR 240-3.190(1)(C) reporting for the month of May 2010.

Staff response: The referenced file was not a part of the Company's 4 CSR 240-3.390 (1)(C) reporting for the month of May 2010. But rather, it was received as a part of the

February 2010 and March 2010 submittals which at that time did not contain any of the additional columns. Those file formats were significantly different then the file format received in May 2010.

Response provided by Erin Maloney

Provided May 2, 2011
