

Exhibit 158

**SCHEDULE 12  
FERC ASSESSMENT CHARGE**

Filed  
July 14, 2015  
Data Center  
Missouri Public  
Service Commission

**1. INTRODUCTION**

As a public utility, the Transmission Provider is subject to annual charges assessed by the Commission, pursuant to Part 382 of its regulations (the "FERC Assessment"). For each public utility, such assessment is based on the actual megawatt-hours of energy transmitted in interstate commerce during a calendar year, as reported on FERC Form 582. This Schedule 12 provides for recovery of the estimated amount to be assessed by the Commission in the next year for transmission service provided in the current year, with subsequent true-up to actual cost, when such cost is known.

**2. APPLICABILITY**

This charge shall apply to all energy delivered under Point-To-Point Transmission Service and Network Integration Transmission Service and to all energy delivered to Bundled Retail and Grandfathered Loads to which Section 39.1 of this Tariff applies.

**3. RATE CHARGED**

The charge factor developed by the Commission in the prior calendar year and applied to energy transmitted in the second prior calendar year shall be applied monthly to all energy delivered under Point-To-Point Transmission Service, Network Integration Transmission Service, and to all energy delivered to Bundled Retail and Grandfathered Loads to which Section 39.1 applies in that month.

SPP shall also include in its bills a True-Up Rate. The True-Up Rate shall be the amount of the Commission assessment billed to the Transmission Provider less the total revenue collected by the Transmission Provider under this Schedule 12 for the second prior year, divided by estimated energy to be transmitted during the current year for all energy delivered under Point-To-Point Transmission Service, Network Integration Transmission Service, and to all energy delivered to Bundled Retail and Grandfathered Loads to which Section 39.1 applies. For the first two years that this FERC Assessment Charge is effective, the True-Up rate shall be zero.

4. BILLING

SPP shall bill Transmission Customers and Transmission Owners covered by Section 39.1 the charges specified under this Schedule in accordance with the procedures in Section 7 of this Tariff.
