9 CASE NOS. GR-2017-0215 and GR-2017-0216

10 Q. Please state your name and business address.

11 A. Lisa M. Ferguson, 111 N. 7<sup>th</sup> Street, Suite 105, St. Louis, MO 63101.

12 Q. By whom are you employed?

13 A. I am employed by the Missouri Public Service Commission ("Commission")  
14 as a member of the Auditing Staff ("Staff").

15 Q Are you the same Lisa M. Ferguson who contributed to Staff's *Revenue*  
16 *Requirement Cost of Service Report* filed September 8, 2017 in this case?

17 A. Yes, I am.

18 Q. What is the purpose of your rebuttal testimony in this proceeding?

19 A. My rebuttal testimony will respond to LAC and MGE witness Chuck J.  
20 Kuper's direct testimony and sponsored workpapers concerning income taxes. I will also  
21 explain Staff's position on the appropriate tax timing differences that should be included as  
22 part of LAC's and MGE's current normalized income tax calculation. These tax timing  
23 differences are added and subtracted from net operating income in order to calculate taxable  
24 income, to which the current statutory tax rates are then applied. My rebuttal testimony will  
25 also address the deferred tax expense that typically results from the normalization of certain  
26 tax timing differences.

1 TAX TIMING DIFFERENCES

2 Q. What was Staff's position regarding income tax expense as part of its  
3 direct testimony filing?

4 A. Staff explained in direct testimony that Spire Missouri had not provided the  
5 supporting calculations for LAC's and MGE's proposed direct filed tax timing differences  
6 (flow through adjustments) at the time of Staff's direct testimony filing. As such, Staff  
7 included LAC's and MGE's calculations merely as placeholders for direct testimony due to  
8 lack of support, until such calculations could be provided and analyzed. Staff has now  
9 received and reviewed the data LAC and MGE has provided, and has had discussions with  
10 LAC and MGE about each individual tax timing difference proposed in LAC and MGE's  
11 direct testimony. Based upon this additional review, Staff is now proposing changes to  
12 Staff's calculation of income tax expense.

13 Q. Will Staff continue to review the income tax issue through the true-up date in  
14 this proceeding?

15 A. Yes.

16 Q. What are the individual tax timing differences that LAC and MGE proposed as  
17 part of direct testimony in this rate case, and which Staff used as placeholder values in its  
18 direct filing?

19 A. LAC included the following as add backs and subtractions to net operating  
20 income before taxes:

21 Add Backs:

22	Uncertain Tax Position Adjustment (FIN 48)	\$ 1,535,988
23	Other non-operating, non-deductible expense	\$ 1,882,787

Rebuttal Testimony of  
Lisa M. Ferguson

1	Other miscellaneous, non-deductible expense	\$ 290,372
2	Meals & Entertainment at 50%	\$ 325,000
3	Missouri Affordable Housing Assistance Program	
4	Credits (AHAP)	\$ 286,621
5	Subtractions:	
6	ESOP (Employee Stock Option Plan)	\$ 4,046,571
7	Life Insurance Premiums/Proceeds	\$ 732,956
8	Nontaxable Insurance – Cash Surrender Value	\$ 816,715
9	Investment Tax Credit Write-off	\$ 547,036
10	Depreciation – IRC Section 263A	\$15,633,509
11	Administrative & General non-deductible adjustment	\$ 1,731,345

12 MGE included the following as add backs and subtractions to net operating income:

13 Add Backs:

14	Meals and Entertainment at 50%	\$ 64,917
15	Other miscellaneous on-deductible	\$ 97,127
16	Uncertain Tax Position Adjustment (FIN 48)	\$ 49,067

17 Subtractions:

18	Depreciation – IRC Section 263A	\$11,094,517
----	---------------------------------	--------------

19 Q. Does Staff agree that the tax timing differences proposed by LAC and MGE  
20 are correct and should be included in LAC's and MGE's revenue requirements for regulatory  
21 purposes?

22 A. Not completely. Staff does not agree that inclusion of all tax timing  
23 differences provided by LAC and MGE are appropriate to include as part of the normalized

Rebuttal Testimony of  
Lisa M. Ferguson

1 income tax calculations. Further, for those differences that Staff agrees should be included as  
2 part of the cost of service calculation, Staff believes the values of the tax timing differences  
3 proposed by LAC and MGE are not the correct values to include. The values of all tax timing  
4 differences provided by LAC and MGE as part of their direct testimony filing are based on  
5 estimations. LAC and MGE have fiscal years that end on September 30 of each year. The  
6 test year in this current proceeding is the twelve months ending December 31, 2016. As part  
7 of their direct filings, LAC and MGE calculated estimated tax timing difference amounts for  
8 the twelve months ending December 31, 2016, rather than including the actual tax timing  
9 differences that were used to calculate their filed income tax return as of September 30, 2016.  
10 Prior to the filing of Staff's direct testimony, Staff requested supporting calculations of these  
11 estimated tax timing difference amounts, but LAC and MGE informed Staff that it was not  
12 possible to provide these calculations due to the fact that these amounts were estimated. Staff  
13 then requested the supporting calculations for the actual tax timing differences at  
14 September 30, 2016. Those calculations would include the same information that was used to  
15 complete Spire's consolidated FY 2016 tax return for the Missouri utilities. LAC and MGE  
16 later provided to Staff the requested information regarding the actual tax timing difference  
17 amounts at September 30, 2016, with the supporting calculations; however, it was not in  
18 sufficient time to be included in direct testimony.

19 Q. What is Staff's position concerning the appropriate measurement of tax timing  
20 difference amounts for reflection in rates in this case?

21 A. Staff's position is that it is appropriate to include the tax timing differences that  
22 are based on actual values at September 30, 2016, rather than estimates determined at  
23 December 31, 2016, for which no supporting calculations can be obtained.

Rebuttal Testimony of  
Lisa M. Ferguson

1 Q. What is Staff's position regarding the tax timing differences amounts that  
2 should be used for LAC in this proceeding?

3 A. Staff recommends including the following tax timing difference amounts in  
4 LAC's normalized tax calculation:

5 Add Backs:

6	Book Depreciation	\$48,793,472
7	Uncertain Tax Position Adjustment (FIN 48)	\$ 1,152,392
8	Other Miscellaneous, Non-deductible Expense	\$ 69,769
9	Meals & Entertainment at 50%	\$ 261,087

10 Subtractions:

11	Interest Expense	\$24,051,191
12	Tax Straight-line Depreciation	\$48,793,472
13	MACRS and Bonus Depreciation in Excess of Book	\$16,685,905
14	ESOP (Employee Stock Option Plan)	\$ 3,773,840
15	Depreciation – IRC Section 263A	\$16,196,036
16	Administrative & General Non-deductible Adjustment	\$ 1,272,903

17 Q. What is Staff's position regarding the tax timing difference amounts that  
18 should be used for MGE?

19 A. Staff recommends including the following tax timing difference amounts in  
20 MGE's normalized tax calculation:

Rebuttal Testimony of  
Lisa M. Ferguson

1	Add Backs:	
2	Book Depreciation	\$31,986,384
3	Meals and Entertainment at 50%	\$ 69,121
4	Uncertain Tax Position Adjustment (FIN 48)	\$ 49,067
5	Subtractions:	
6	Interest Expense	\$14,543,904
7	Tax Straight-line Depreciation	\$31,986,384
8	MACRS and Bonus Depreciation in Excess of Book	\$41,798,586
9	Depreciation – IRC Section 263A	\$10,850,002

10 Q. Were there certain tax timing differences that Staff did not include in its  
11 normalized tax calculation for LAC and MGE?

12 A. Yes. Staff did not include the following tax timing differences for LAC: the  
13 other miscellaneous nondeductible items such as luxury skybox expense, lobbying expense,  
14 and fines and penalties; other non-operating nondeductible expenses such as a valuation  
15 allowance against charitable contribution carryforwards, life insurance premiums/proceeds,  
16 nontaxable insurance – cash surrender value, and AHAP credits. Staff did not include the  
17 following tax timing differences for MGE: the other miscellaneous nondeductible items such  
18 as luxury skybox expense, lobbying expense, and fines and penalties.

19 Q. Please explain why Staff did not include these tax timing differences in its tax  
20 calculation.

21 A. Staff did not include these tax timing differences for the other miscellaneous  
22 nondeductible items and non-operating nondeductible items listed above because an add back

1 of expenses for tax purposes should only occur if the expense exists in the income statement.  
2 Staff's position has been that expenses such as those above are not allowable for ratemaking  
3 and has consistently excluded them from its recommendations for utilities' costs of service.  
4 To be consistent with Staff's cost of service, the above add backs and subtractions should be  
5 removed for the items not included in the cost of service to begin with.

6 The Missouri AHAP tax credit is used as an incentive for Missouri businesses and/or  
7 individuals to participate in the production of affordable housing. This state tax credit is  
8 earned by an eligible donor for the donation of cash, equity, services, real-estate or personal  
9 property to the Truman Heritage Habitat For Humanity ("THHFH") for assistance in building  
10 homes. The AHAP tax credit for an eligible donor equals 55% of the total value of the  
11 donation to THHFH. LAC buys into an equity fund associated with THHFH and then those  
12 funds are used by THHFH for construction of affordable housing. Staff did not include these  
13 tax credits as part of the normalized tax calculation due to the fact that the cost of purchasing  
14 into that equity fund would not be included as part of the income statement as part of the cost  
15 of service.

16 **BOOK TO TAX RATIO/DEFERRED TAXES**

17 Q. How did LAC and MGE develop their tax calculations?

18 A. LAC and MGE began by subtracting operating expenses from operating  
19 revenues to develop an amount of net operating income. LAC and MGE then reduced net  
20 operating income by the amount of their flow through adjustments as well as interest on long  
21 term debt to determine the amount of net taxable income. The taxable income was then  
22 multiplied by the effective tax rate to determine the amount of current income tax in LAC's  
23 and MGE's direct cost of service.

Rebuttal Testimony of  
Lisa M. Ferguson

1 Q. Did LAC or MGE take into account book depreciation, tax depreciation or  
2 excess depreciation (temporary tax timing differences) as part of their calculation?

3 A. No. LAC's and MGE's workpapers do not include a separate calculation  
4 where the amount of tax that is calculated due to the "book-tax" difference in depreciation  
5 moves from the current period to a deferred period. In effect, this calculation creates a  
6 reduction in current tax while at the same time increasing deferred tax by the same amount.

7 Q. Does Staff normalize depreciation related temporary tax timing differences?

8 A. Yes, any temporary tax timing differences, such as those created by  
9 depreciation, would create a reduction to current taxes with an offsetting increase to deferred  
10 taxes. However, Staff is concerned about the "book to tax depreciation ratio" calculation that  
11 was provided by LAC and MGE at Staff's request. The values provided to Staff do not seem  
12 appropriate based on past rate cases for Laclede, MGE and other Missouri utilities. Staff has  
13 worked with LAC and MGE and has determined what it considers an appropriate value for the  
14 depreciation related tax timing differences.

15 Q. Did LAC or MGE include a calculation for deferred taxes as part of their direct  
16 cost of service filing?

17 A. As far as Staff is aware, LAC and MGE did not include an annualized level of  
18 deferred tax expense as part of their direct filing.

19 Q. What is Staff's position regarding the correct level of deferred taxes to include  
20 in the cost of service calculation?

21 A. Staff recommends including deferred taxes for the tax timing differences  
22 related to MACRS<sup>1</sup> and bonus depreciation that is in excess of book depreciation. Due to

---

<sup>1</sup> Modified Accelerated Cost Recovery System - the current tax depreciation system in the United States.

Rebuttal Testimony of  
Lisa M. Ferguson

1 Staff normalizing these tax timing differences for purposes of this rate case, a normalized  
2 level of deferred taxes must also be established for these items. As stated above, Staff has  
3 worked with LAC and MGE and has determined what it considers an appropriate value of  
4 deferred taxes for inclusion in the cost of service related to the depreciation related tax timing  
5 differences.

6 Q. Does this conclude your rebuttal testimony?

7 A. Yes, it does.
