Daniel Goodman
Assistant Vice President
Facilities Management & Construction Services
Saint Louis University
3545 Lindell Blvd.
Wool Center, Suite 210
St. Louis, MO 63103

Dear Mr. Goodman,

This letter is to follow-up on conversations between Saint Louis University (SLU) and Spire Missouri regarding certain state gas safety regulations that SLU would be subject to as a gas operator. Gas safety is of utmost importance to us at Spire, as I'm sure it will be for SLU. That being the case, it is imperative that SLU becomes familiar with the gas safety rules and its newfound obligations. These rules include 20 CSR 4240-40.020 (Incident, Annual, and Safety-Related Condition Reporting Requirements), 20 CSR 4240-40.030 (Safety Standards), and 20 CSR 4240-40.080 (Drug and Alcohol Testing). These rules can be found on the Missouri Public Service Commission Website at https://psc.mo.gov/General/PSC_Rules_Statutes. Copies of the attached rules have also been included for your convenience. If you have any questions, please do not hesitate to contact me directly at 314-349-2972 or by email at Craig.Hoeferlin@SpireEnergy.com.

Sincerely,

A handwritten signature in blue ink that reads "Craig R. Hoeferlin". The signature is fluid and cursive, with the first name "Craig" being the most prominent.

Craig R. Hoeferlin
Vice President, Operations Services
