Service Commission

Subject: PVSC Permit #MO-0041467

Dear Lacey,

This is a followup to our meeting on Friday May 24, 2013.

At that time you made some changes in the draft permit and you said you would send us a revised copy, as of this date we have not received it.

Also at that time we objected to some of the findings in the 5/25/2012 Stream Survey. We asked to receive a copy of this report and you said you would send one, As of this date we have not received it.

The Permit also referred to us as a Mobile Home Park, actually we are a residential lake development of about 160 homes with about 50% being weekend seasonal homes. I'm not sure if this makes a difference in the permit.

We have been interviewing a number of Engineering Consultants to perform the Engineering Evaluation and hope to let a contract sometime in July. We find that the schedule of compliance is very tight and we will probably have to ask for a variance. Testing over a less than one year period is not an adequate sample on which to base a study.

To be more specific about our objections:

1. 3.8 miles of gravelly rapids should be enough to dissipate any ammonia, I think the former standard was 2 miles, has this been changed?
2. Our experience with the lagoon shows no or very little odor, periodic duckweed coverage, very little sludge on the surface.
3. The outfall usually runs clear with few solids.
4. There is no sign of sludge immediately downstream of the outfall.
5. Within a few hundred feet the discharge stream is joined by the discharge from our dam spillway and every time it rains the stream gets a large amount of flow.

The only good news is that we have a large area of wooded hillside for irrigation if that is the most efficient solution.

We also object to your "Finding of Affordability" a determination that a large expenditure of money would be necessary would be a financial disaster to our community and cause extreme hardship to our residents.

Another question is :Do you plan to have a public hearing on this permit? Our community is very interested in this matter.

Sincerely,  
August B. Hoernschemeyer P.E.

President, Peaceful Valley Service Company
