(2) Letter from T.E. Herrmann (AmerenUE) to U.S. Nuclear Regulatory Commission, "Submittal of Supplemental Information for the Callaway Plant Unit 2 Combined License Application," ALNRC 00007 dated September 24, 2008

During the Nuclear Regulatory Commission (NRC) staff acceptance review of the Combined License Application (COLA) for Callaway Plant Unit 2 (Reference 1), additional information was requested in Final Safety Analysis Report (FSAR) Section 2.5.

Supplemental information was provided to the NRC on September 24, 2008 (Reference 2). The purpose of this letter is to provide the schedule to incorporate additional details regarding geology and seismology for the Callaway Plant Unit 2 site and to enhance the content of Callaway Plant Unit 2 FSAR Section 2.5. These additional details have been discussed with NRC staff members.

Page 2

A revision of FSAR Section 2.5 will be submitted on or before November 17, 2008. This revision will incorporate the supplement dated September 24, 2008 (Reference 2), include a general update of this section to incorporate additional recent literature, improve the flow of the narrative, improve the quality of figures, and correct an error in the supplement with respect to the update to the earthquake catalogue. AmerenUE believes the FSAR Section 2.5 revision would allow NRC to proceed with their review.

If you have any questions, or need additional information, please contact me at (573) 676-8519 or Dave Shafer at (573) 676-4722.
