Issue Date: July 22, 2015

Effective Date: July 22, 2015

On July 13, 2015, the Staff of the Commission filed a motion asking the Commission to open a proceeding to facilitate discussions to develop a state-wide policy and apparatus for communications and coordination between gas utilities, fire departments, and other emergency responders, to enhance the effectiveness of efforts to respond when a gas leak has occurred, and to prevent third-party damage to natural gas facilities. This working file will facilitate Staff's efforts to obtain input from interested stakeholders regarding those efforts.

Staff may solicit opinions and recommendations from interested stakeholders in whatever manner it believes will be effective. If it believes an order from the Commission scheduling a workshop or otherwise assisting Staff in obtaining information is necessary it may file a motion requesting such action. Staff will be directed to file a report of its findings and recommendations in six months. As part of its report, Staff

shall recommend whether this case should remain open to facilitate further investigation.

This file will serve as a repository for documents and comments. Using this file, any person with an interest in this matter may view documents and may submit comments or documents. As this is not a contested case, anyone may file a comment without legal counsel and without *ex parte* constraints. Intervention requests are not necessary to submit comments or view documents.
