Jefferson City, MO 65102-0360

RE: Case No. TT-2012-0317 - Replacement/Substitute Tariff Page
Global Crossing Local Services, Inc.

Dear Mr. Reed:

Pursuant to my conversation with Bill Voight on your staff, enclosed for filing please find the original of the above referenced replacement/substitute tariff page submitted on behalf of Global Crossing Local Services, Inc. This replacement/substitute tariff page corrects the FCC Tariff No. and Section number where the rates are located.

The following tariff pages are included with this filing:

1st Revised Page 26.1 Corrects the FCC Tariff No. and Section number where the rates are located

Any questions you may have regarding this filing should be directed to my attention at 407-740-3002 or via email to cwrightman@tminc.com. Thank you for your assistance in this matter.

Sincerely,

/s/ Connie Wightman
Consultant

SECTION 2 - RULES AND REGULATIONS (CONT'D)

2.3 Obligations of the Customer (Cont'd)

2.3.4 Identification and Rating of VoIP-PSTN Traffic

This section governs the rating and identification of VoIP-PSTN Traffic. In accordance with the Federal Communications Commission’s Report and Order released November 18, 2011 (FCC 11-161) and Second Order on Reconsideration released April 25, 2012 (FCC 12-47), both in WC Docket No. 10-90, et al. (together, the “FCC Orders”): (1) intrastate VoIP-PSTN Traffic that originates on the Company’s network and is bound for the Customer’s end users is subject to the intrastate switched access rates set forth in this tariff until June 30, 2014, after which time it will be subject to interstate rates contained in the Company’s Tariff F.C.C. No. 19 and in Section 5.4.3 herein; and (2) intrastate VoIP-PSTN traffic that is sent by the Customer for termination to Company end users is subject to interstate switched access rates set forth in the Company’s Tariff F.C.C. No. 19 and in Section 5.4.3 herein.

The remainder of this section establishes the method of separating VoIP-PSTN Traffic from the Customer’s traditional intrastate access traffic, so that VoIP-PSTN Traffic can be billed in accordance with the FCC Orders.

A. Calculation and Application of Percent -VoIP - Usage Factors

1. The Company will determine the number of VoIP-PSTN Traffic minutes of use (MOU) to which interstate rates will be assessed by applying a terminating PVU factor to the total intrastate access MOU terminated by a Customer to the Company’s end user. Beginning on July 1, 2014, the Company will also apply an originating PVU factor to the total intrastate access MOU originated by a Company end user and delivered to the Customer.
2. The Customer will calculate and furnish to the Company a terminating PVU factor representing the whole number percentage of the Customer’s total terminating intrastate access MOU that the Customer exchanges with the Company in the LATA that is sent to Company and which originated in IP format and that would be billed by the Company as intrastate access MOU. Beginning July 1, 2014, the Customer will also calculate and furnish to the Company an originating PVU factor representing the whole number percentage of the Customer’s total originating intrastate access MOU that the Customer exchanges with the Company in the LATA that is received from the Company and that is terminated in IP format and that would be billed by the Company as intrastate access MOU.
