* Apple Performance Slips, CEO's Pay Cut

By TRIPP MICKLE

In a rare stumble, Apple Inc. on Friday revealed it missed its own annual sales and profit goals for the first time since 2009, putting a dent in Chief Executive Tim Cook's annual paycheck and pressuring the company to deliver a blockbuster with its next iPhone.

While in the past a star's mispronunciation might have been rebroadcast on a news program and then forgotten by most people, these days any flubs can be repeat-
