Subject: RE: Spire ISRS Work Orders

I guess I am getting a bit confused. There will be some work orders with negative amounts. How would you propose to handle those. And the blankets never close so there is no way to distinguish from the Work Order authorization sheets what is being added and subtracted in the periods for the ISRSs involved. For example, WO 695300 is a blanket for south district service renewals where the piping installed is generally 1/2 inch plastic. The Work Order sheets (see page 126 of the enclosed) shows 386,642 feet of services retired and the work order value was about \$6 million from March 2016-August 2016 but there is no attribution as to why they were replaced or when since the work order doesn't ever close. On work order 900988, the value in the ISRS was (58,760.74) (again only through August of 2016) while the work order description was for "Install 3840 Ft of 2PL IP main and Abandon 5076 Ft of CI LP main, 48 Ft of ST LP main, 543 Ft of PL LP main on Pennsylvania, Broadway, Stein, Coutois, and Koeln" (page 127 of the attached).

BTW, all blanket work orders on the east side start with a "69". I don't really know what good these will do you.

Subject: Spire ISRS Work Orders

Glenn:

In reviewing the work orders provided Staff noted several missing when comparing the original ISRS applications to the work orders provided. We assume that these are the blanket work orders or work orders for projects less than \$25,000. In the past we have not reviewed these in conjunction with the ISRS cases, however, due to the court's remand we find it necessary to review them to ensure that we capture all of the replaced plastic pipes. Please provide these work orders for all four dockets as soon as possible. Thank you.
