RE: Gladlo Water and Sewer Facilities has been purchased by Confluence Rivers Utility Operating Company

Dear Confluence Rivers Customer,

Confluence Rivers Utility Operating Company, Inc. (Confluence Rivers), a subsidiary of Central States Water Resources, Inc. (CSWR), has assumed ownership of Gladlo Water and Sewer Facilities. Confluence Rivers Utility has been operating the water and sewer facilities at Gladlo since April 1, 2018 and is now the new owner of these facilities. We plan to continue to provide safe, reliable water and sewer services to your home and we look forward to doing the necessary final improvements to ensure your place of residence has access to reliable water and sewer services not just now but far into the future ensuring the sustainability of the community.

Central States Water Resources (CSWR) is committed to improving the quality of the water in Missouri's streams and rivers by working with communities and government organizations in that effort. Confluence Rivers Utility, as a subsidiary of CSWR, is in the process of improving and upgrading the water and sewer systems at Gladlo to meet requirements set by the U.S. Environmental Protection Agency (EPA) and enforced by the Missouri Department of Natural Resources (MO DNR). The EPA and MO DNR have mandated that the water coming from sewer facilities going into area streams and rivers must meet specific emission standards regarding the amount of nitrogen in the form of ammonia. The sewer plant at Gladlo does not now meet those standards, so Confluence Rivers is engineering and installing a sewer system to meet those requirements. Other improvements consist of site improvements and installation of remote monitoring equipment.

The drinking water system at Gladlo will require interior well house repairs, removal of the existing hydro-pneumatic tank and a replacement installed, electrical improvements, and installation of monitoring equipment which will monitor the condition of the water system. These improvements will ensure consistent delivery of safe, reliable water service to your community.

As a Confluence Rivers Customer, you have access to qualified operations and maintenance professionals during normal business hours regarding any water or sewer service issue such as service disruption, manhole overflows, water main leaks etc. We have 24-hour emergency on-call services available to deal with major utility issues.

Confluence Rivers bills customers in arrears. Bills for the previous month are mailed the first week of each month and are due the last business day of each month. Late fees are assessed before the next billing is generated. Future bills will be in postcard format and the billing rates will not be changing at this time. Utility Billing and Customer Service is available from 8:00 a.m. – 5:00 p.m. Monday through Friday with 24-hour messaging services.

Your bill payments should be sent to:
