

Ross A Chronister, graftedon, IL.

As a concerned landowner with a settled easement with spire, we have many concerns. We have ongoing issues with erosion, settling, low production, low areas holding water etc. These are same issues that non settled landowners are fighting spire for. My opinion is Spire should have never installed this line until all issues were settled in advance. Spire pushed this pipeline on us to quickly. At this time I personally think Spire should shut down the pipeline. Thanks
