

Exhibit No.:
Issue: Overview and Policy
Witness: Chris B. Giles
Type of Exhibit: Direct Testimony
Sponsoring Party: Kansas City Power & Light Company
Case No.: ER-2009-____
Date Testimony Prepared: September 5, 2008

MISSOURI PUBLIC SERVICE COMMISSION

CASE NO. ER-2009-____

DIRECT TESTIMONY

OF

CHRIS B. GILES

ON BEHALF OF

KANSAS CITY POWER & LIGHT COMPANY

**Kansas City, Missouri
September 2008**

 Designates "Highly Confidential" Information
Has Been Removed
Pursuant to 4 CSR 240-2.135.

DIRECT TESTIMONY

OF

CHRIS B. GILES

CASE NO. ER-2009-_____

1 **Q: Please state your name and business address.**

2 A: My name is Chris B. Giles. My business address is 1201 Walnut, Kansas City, Missouri
3 64106.

4 **Q: By whom and in what capacity are you employed?**

5 A: I am employed by Kansas City Power & Light Company (“KCP&L” or the “Company”)
6 as Vice President, Regulatory Affairs.

7 **Q: What are your responsibilities?**

8 A: My responsibilities include all aspects of regulatory activities including cost of service,
9 rate design, revenue requirements, and tariff administration.

10 **Q: Please describe your education, experience and employment history.**

11 A: I graduated from the University of Missouri at Kansas City in 1974 with a Bachelor of
12 Arts degree in Economics and in 1981 with a Master of Business Administration degree
13 with concentrations in accounting and quantitative analysis. I was first employed at
14 KCP&L in 1975 as an Economic Research Analyst in the Rates and Regulation
15 Department. I held positions as supervisor and manager of various rate functions until
16 1988 when I was promoted to Director of Marketing. In January 1993, I returned to the
17 rate area as Director, Regulatory Affairs. In March of 2005, I was promoted to Vice-
18 President, Regulatory Affairs.

1 **Q: Have you previously testified in a proceeding at the Missouri Public Service**
2 **Commission (“MPSC” or the “Commission”) or before any other utility regulatory**
3 **agency?**

4 A: I have previously testified before both the MPSC and the Kansas Corporation
5 Commission on numerous issues regarding utility rates and regulation.

6 **Q: What is the purpose of your testimony?**

7 A: The purpose of my testimony is to provide a summary and overview of this case. I will
8 address the progress of KCP&L’s Regulatory Plan (“Regulatory Plan”), which the
9 Commission approved in Case No. EO-2005-0329, including the status of the
10 investments associated with the Regulatory Plan. I will describe the major drivers
11 underlying the proposed rate increase. Finally, I will ask for Commission authorization
12 on certain additional matters.

13 **Q: Please describe the results of the first two rate cases under the Regulatory Plan?**

14 A: The Company filed its first rate case in nearly 20 years on February 1, 2006 (ER-2006-
15 0314, or “2006 case”). The Company requested an increase of \$57 million (11.5%). The
16 Report and Order issued by the Commission on December 21, 2006 approved an increase
17 in Missouri revenues in the amount of \$50.6 million (10.5%), effective January 1, 2007.
18 The increase included an annual amortization amount to maintain credit ratios
19 (“Additional Amortizations”) of \$21.7 million.

20 KCP&L filed the second rate case under the Regulatory Plan on February 1, 2007
21 (ER-2007-0291, or “2007 case”). The Company requested an increase of \$45.4 million
22 (8.3%). The Report and Order issued by the Commission on December 6, 2007 approved

1 an increase in Missouri revenues in the amount of \$35.3 million (6.5%), effective January
2 1, 2008. The increase included an Additional Amortizations amount of \$10.7 million.

3 **Q: Did KCP&L reflect the impact of the Regulatory Plan in these two rate cases?**

4 A: Yes, KCP&L included in the 2006 case the investment to build 100 MW of wind
5 generation, which was completed in September 2006, as well as the investments in
6 customer affordability, energy efficiency, and demand response programs (“Customer
7 Programs”), and system reliability focused transmission and distribution (“T&D”)
8 projects. The Company included in the 2007 case the investment to install selective
9 catalytic reduction (“SCR”) equipment at LaCygne Unit 1, as well as continued
10 investments in Customer Programs and T&D projects. These investments are consistent
11 with and represent continued implementation of the Company’s Comprehensive Energy
12 Plan (“CEP”), as set forth in the Regulatory Plan.

13 **Q: Please describe this rate case filing and how it reflects the continued implementation**
14 **of the CEP and the Regulatory Plan?**

15 A: The Regulatory Plan contemplated as many as four rate cases; however, only two are
16 mandatory, the 2006 case and a case to be filed in 2009 (“2009 case”). The 2007 case
17 was optional, as is the current rate case (“2008 case”). The 2008 case includes rate
18 schedules that are expected to become effective on August 5, 2009. The Company is
19 requesting an increase of \$101.5 million (17.5%), including \$15.1 million related to
20 Additional Amortizations, as described in the testimony of KCP&L witness Michael
21 Cline. The 2008 case includes the installation of the Iatan Unit 1 Air Quality Control
22 (“AQCS”) equipment as set out in the Regulatory Plan. The ACQ equipment is expected
23 to be in service prior to the April 30, 2009 true-up date of this proceeding. The 2008 case

1 also includes continued implementation of Customer Programs, as described in the Direct
2 Testimony of KCP&L witness Allen Dennis, and T&D infrastructure, as described in the
3 Direct Testimony of Company witness William Herdegen, both as set out in the
4 Regulatory Plan.

5 **Q: When will KCP&L file the 2009 case?**

6 A: It is anticipated that rate schedules with an effective date of September 1, 2010, will be
7 filed with the Commission on or about October 1, 2009, or eight months prior to the
8 commercial in-service operation date of Iatan Unit 2.

9 **Q: Please describe the progress of the Regulatory Plan investments in power supply
10 infrastructure.**

11 A: KCP&L completed 100 MW of wind generation at a site near Spearville, Kansas in
12 September 2006. The SCR at the LaCygne Unit 1 generating plant was placed in
13 operation in May 2007. The Iatan Unit 1 AQC equipment is currently under construction
14 and is expected to be in service in early 2009. Company witnesses Brent Davis, Carl
15 Churchman and Kenneth Roberts discuss various aspects of the AQC project in their
16 Direct Testimonies.

17 The Iatan Unit 2 project is well underway. A control budget and schedule has
18 been established. Contracting, procurement, and construction strategies are in place
19 along with a cost control system to track and monitor schedule and costs. Partnership
20 agreements have been executed. Ownership shares, based upon a total of 850 MW, are as
21 follows: KCP&L - 465 MW, The Empire District Electric Company - 102 MW, Aquila,
22 Inc. dba KCP&L Greater Missouri Operations Company ("GMO") - 153 MW, Missouri
23 Joint Municipal Electric Utility Commission - 100 MW, and Kansas Electric Power

1 Cooperative - 30 MW. As part of the Regulatory Plan, the Company submits to the
2 signatories of the Stipulation and Agreement in the Regulatory Plan docket a quarterly
3 report outlining the overall progress of the project. Periodically, the Company meets
4 with the parties to discuss progress.

5 A second phase of investment in environmental equipment for LaCygne unit 1
6 was planned to be completed in 2009. This investment included a fabric filter (baghouse)
7 and scrubber. In late 2006, early 2007, it became known that it would not be possible to
8 complete the second phase of the LaCygne project until 2011 due to the increased lead
9 time required to procure the equipment. Both LaCygne 1 and LaCygne 2 generating
10 units will be required to have equipment designated as Best Available Retrofit
11 Technology (“BART”) sometime in the year 2013. BART includes SCR, baghouse, and
12 scrubber equipment. In addition to the extended lead time to procure AQC equipment, the
13 installed cost of the equipment has increased dramatically since the Regulatory Plan was
14 constructed. Given the increased cost and the need to evaluate all options regarding both
15 LaCygne units, KCP&L contracted with Sargent and Lundy to study various options
16 regarding construction of AQCS at both units. KCP&L is also reviewing options as part
17 of its Sustainable Resource Strategy (“SRS”) and will seek to collaborate with interested
18 parties in formulating this strategy over the course of the next six to nine months.

19 The Regulatory Plan also required KCP&L to evaluate an additional 100 MW of
20 wind generation for service in 2008. The Company conducted an evaluation in the fall of
21 2007 and determined that due to the uncertainty of the capital markets at that time would
22 be prudent not to pursue a wind project that would go into service in 2008. Since that
23 time KCP&L has continued to evaluate wind options for service in 2009. As directed by

1 the Commission in Case No. EO-2008-0224, KCP&L will file an update concerning the
2 potential for future wind projects. by September 15, 2008.

3 **Q: Please describe the status of Customer Programs.**

4 A. The Regulatory Plan established an advisory group, the Customer Programs Advisory
5 Group ("CPAG"), consisting of representatives of signatories to the Regulatory Plan.
6 CPAG has two key objectives: perform pre-implementation evaluation of energy
7 efficiency programs, and review program design, implementation and evaluation plans
8 for all programs. It is not a governmental body and makes no recommendations on
9 government policy. CPAG meets on a regular basis and, as a result, tariffs have been
10 filed and approved by the Commission for all programs. KCP&L witness Allen Dennis
11 more fully describes the progress and success of Customer Programs in his Direct
12 Testimony.

13 **Q: Please describe the status of the T&D infrastructure investments.**

14 A: Numerous projects have been completed and others are well under way, as described
15 more fully in the Direct Testimony of KCP&L witness William Herdegen.

16 **Q: How was the 2008 case test year and resultant rate increase amount determined?**

17 A: Pursuant to the Regulatory Plan, the test year for the 2008 case is based on the historical
18 year ending December 31, 2007. Although the Regulatory Plan contemplated that the
19 Company would file the 2008 case on February 1, 2008, the Regulatory Plan also
20 recognized that KCP&L might need to adjust the timing of its rate filings due to the
21 magnitude of its investments and the length of time of the Regulatory Plan. Because this
22 case is being filed later than anticipated, the update and true-up dates as specified in the
23 Regulatory Plan will need to be revised. KCP&L anticipates an update based on October

1 31, 2008 financials and a true-up as of April 30, 2009. Accordingly, test year data was
2 annualized and normalized and reflects projected values for true-up items as of April 30,
3 2009. The resulting annualized and normalized amounts were then allocated between
4 FERC, Missouri and Kansas jurisdictions. The allocation process is described in the
5 Direct Testimony of KCP&L witness John Weisensee. Additionally, Company witness
6 Larry Loos of Black & Veatch Corporation provides support for certain recommended
7 allocation procedural changes reflected in this rate filing. The cost of service and
8 revenue requirement determination is supported by the Direct Testimony of KCP&L
9 witness John Weisensee and included in his Schedule JPW-1.

10 **Q: What is the amount of rate increase requested in this case?**

11 A: The amount of rate increase is 17.5% or \$101.5 million dollars based on test year revenue
12 of approximately \$580 million.

13 **Q: Does this amount include Additional Amortizations?**

14 A: Yes, KCP&L's requested rate increase includes Additional Amortizations of \$15.1
15 million, as described in the Direct Testimony of KCP&L witness Michael Cline. The
16 Additional Amortization requested is only about 32% of the amount that could have been
17 requested utilizing the Additional Amortization metrics specified in the Regulatory Plan.
18 The lower request resulted from the use of metrics more future-oriented than those
19 encompassed in the Regulatory Plan formulas. However, as Mr. Cline discusses, the
20 Additional Amortization request is dependent on the results of this rate proceeding; that
21 is, Additional Amortization will be adjusted to reflect the outcome of the case as
22 determined by the Commission.

1 **Q: What is the total cumulative amount of Additional Amortization KCP&L proposes**
2 **to include in rates in this case?**

3 A: The Additional Amortization of \$15.1 million requested in this case is in addition to the
4 \$21.7 million ordered in the 2006 case and the \$10.7 million ordered in the 2007 case.
5 This would result in an annual Additional Amortization level of approximately \$47.5
6 million. This total amount will result in an offset to rate base under the Regulatory Plan
7 and will lower rates in future KCP&L rate proceedings.

8 **Q: What is the return on equity KCP&L is requesting in this case?**

9 A: KCP&L is requesting a return on equity of 10.75% based upon a 53.82% equity capital
10 structure of KCP&L's parent holding company Great Plains Energy Incorporated ("Great
11 Plains Energy"). KCP&L witness Samuel Hadaway presents in his Direct Testimony his
12 cost of capital study results and recommendations in support of a 10.75% return on
13 equity. Dr. Hadaway has utilized the same approach as in the 2007 case, which is based
14 on a traditional approach to estimate the underlying cost of equity capital for a group of
15 investment grade electric utility companies.

16 **Q: Does a 10.75% return on equity adequately address the substantial risk of**
17 **KCP&L's Off-system Sales?**

18 A: No, it does not. The risk of the Off-system Sales market consists of several components,
19 including market price, volumetric risk associated with generation variable cost,
20 generation unit outages, coal supply availability, weather, and uncertainty of retail sales
21 growth. A detailed risk analysis of the off-system sales market has been prepared by the
22 Northbridge Group, Inc. ("Northbridge") and is contained in the Direct Testimony of
23 KCP&L witness Michael Schnitzer of Northbridge. The risk of this market is too large

1 for either the Company or its customers to bear entirely. The Commission agreed with
2 this position in the 2006 case and included in the revenue requirement an amount of Off-
3 system Sales Margins at the 25th percentile of the expected value of Off-system Sales
4 Margins for 2007. The Commission reinforced this position in its Report and Order in the
5 2007 case. If the Company's Off-system Sales Margins exceed the 25th percentile, then
6 the Company will book any additional margins as a regulatory liability. By its prior
7 decisions the Commission clearly understands and recognizes the risks associated with
8 these Off-system Sales Markets. Consistent with the Commission's orders in the past
9 two KCP&L rate cases, the Company has included in the revenue requirement in this
10 case a level of Off-system Sales Margins at the 25th percentile for the period July 2009
11 through June 2010, the first full year rates will be in effect resulting from this rate
12 proceeding.

13 Significant changes have occurred in the Off-system Sales market since the
14 Company filed the 2006 case. Based on these changes in the market, the Commission's
15 decisions in the last two KCP&L rate cases regarding Off-system Sales Margins were not
16 only appropriate, but confirm that absent those decisions the Company's cash flow and
17 earnings requirements in 2007 and 2008 would not have been achievable.

18 **Q. Please describe the changes in the market during the 2006 case process.**

19 A. When KCP&L filed its original application for the 2006 case, the expected 50th
20 percentile level of Off-system Sales Margin was ** [REDACTED] **. The Company
21 included in its revenue requirement an amount equal to the 25th percentile, ** [REDACTED]
22 [REDACTED] **. At that time, natural gas prices and the wholesale energy market were at a
23 relatively high level. Natural gas prices were around \$10 per mcf, considerably higher

1 than the \$2-\$5 range during years prior to that case. In the 2006 case I testified that the
2 Commission should look forward and take into account the risk of the Off-system Sales
3 Market in determining the amount of Off-system Margins to include in revenue
4 requirement. Historical data should not be used as indicative of the potential margins in
5 this volatile market. By the time of the true-up, September 2006, natural gas prices had
6 sharply declined. This resulted in a much lower expectation of Off-system Sales
7 Margins. In fact, prices declined to the extent the expected 50th percentile point on the
8 curve was approximately \$11 million lower than originally filed in the case. The 25th
9 percentile was approximately \$7 million lower than originally included in the case.

10 **Q: Did similar changes occur during the course of the 2007 case?**

11 A. Yes, When KCP&L filed its original application for the 2007 case, the expected 50th
12 percentile level of Off-system Sales Margin was ** [REDACTED] **. The Company
13 included in its revenue requirement an amount equal to the 25th percentile, ** [REDACTED]
14 [REDACTED] **. By the time of the true-up, September 2007, the 50th and 25th percentiles were
15 ** [REDACTED] ** and ** [REDACTED] **, respectively.

16 **Q: What level of Off-System Sales Margins did the Commission determine appropriate
17 to include in revenue requirement in the previous two KCP&L rate cases?**

18 A: The Commission's orders in those cases established Off-system Sales Margins at the 25th
19 percentile of projected margins, at ** [REDACTED] ** total Company and ** [REDACTED] **
20 total Company, respectively. The orders stated that if the Company achieves margins in
21 excess of those amounts, the excesses were to be booked as regulatory liabilities to be
22 returned to customers. If KCP&L did not achieve off-system sales margins equal to the

1 25th percentile level, then the Company would not be able to earn its authorized rate of
2 return and earnings by the amounts not achieved in margins up to the 25th percentile.

3 **Q: Did the Company's actual 2007 margins exceed the 25th percentile amount, \$69**
4 **million as ordered in the 2006 case?**

5 A: Actual 2007 total company margins were **** [REDACTED] ****. The Missouri jurisdictional
6 portion of the excess, together with interest, was included as a revenue requirement offset
7 in the current rate proceeding (2008 case), as more fully discussed in the Direct
8 Testimony of Company witness John Weisensee.

9 **Q: Has the Company included a revenue requirement offset in the 2008 case for**
10 **projected 2008 margins in excess of the 25th percentile ordered in the 2007 case**
11 **(** [REDACTED] ** total company)?**

12 A: Because of the inherent difficulties in projecting Off-system Margins, as discussed above,
13 KCP&L did not include an adjustment to reflect projected 2008 margins in excess of the
14 25th percentile ordered in the 2007 case. Rather, actual 2008 margins will be known at
15 the time of true-up in this proceeding and will be compared to the 25th percentile amount,
16 with any overage returned to ratepayers in this case, including interest.

17 **Q: Did the Commission Report and Orders in the 2006 and 2007 KCP&L cases address**
18 **tracking off-system sales margins?**

19 A: No, there was no mechanism ordered to track actual margins realized against margins
20 returned to ratepayers. By way of contrast, such a tracking mechanism is in place for
21 pension costs, whereby costs incurred are tracked against costs recovered in rates, with
22 the difference recorded as a regulatory asset or liability as appropriate.

23 **Q: Would you propose such a tracking mechanism for Off-System Sales Margins?**

1 A: Yes, such a mechanism would be appropriate for a couple of reasons. First, the amounts
2 involved are significant and will become even more so with the completion of the Iatan 2
3 unit. Second, the Company does not file rate cases each and every year; therefore, a
4 serious mismatch may develop between amounts realized and amounts returned to
5 ratepayers.

6 **Q: Are you asking that such a tracking mechanism be ordered in this rate case?**

7 A: No, not in this rate case but in the 2009, Iatan 2 case. We anticipate filing the Iatan 2
8 case shortly after the completion of this rate case, as discussed above and as anticipated
9 in the Regulatory Plan. Therefore, the need for a tracking mechanism in this case is
10 reduced. However, the Company will ask that an off-system sales margin tracking
11 mechanism be implemented in the Iatan 2 rate case because of the anticipated higher
12 margins and the uncertainty as to the timing of future rate cases.

13 **Q: What is the current expectation for Off-system Sales Margins for 2008?**

14 A: The Company's current 50th percentile projection (**[REDACTED]** total Company) for
15 the 2008 case is about equal to the 25th percentile projection (**[REDACTED]** total
16 Company) included in revenue requirement in the 2007 case.

17 **Q: Based on current market estimates what would have been the impact on the
18 Company in 2008 had the Commission included Off-system Sales Margins in
19 revenue requirement at the 50th percentile in the 2007 case?**

20 A: The 50th percentile at the time of the 2007 case true-up was **[REDACTED]** on a total
21 Company basis. Given current market prices and revised margin estimates for 2008,
22 KCP&L would be short cash and earnings related revenue on a total Company basis of
23 about **[REDACTED]**.

1 **Q: What level of Off-system Sales Margin is included in the Company's revenue**
2 **requirement in the current 2008 case?**

3 A: Based on the analysis of Michael Schnitzer of Northbridge, the 25th percentile
4 expectation for 2008 Off-system Sales Margins is ** [REDACTED] ** total Company. This
5 is the amount KCP&L included in the revenue requirement in this case. This amount will
6 be updated in October 2008 and again in April 2009 for the true-up of this case.

7 **Q: Does this mean that KCP&L expects the Off-system Sales Margin to be more in**
8 **2008 than 2007?**

9 A: Yes, the difference between the 25th percentile in the 2007 case and the 25th percentile in
10 the 2008 case is an increase of expected margin of ** [REDACTED] ** on a total Company
11 basis. Michael Schnitzer explains the facts contributing to this increase in his testimony.

12 **Q: Is it appropriate to use historical data to estimate Off-system Sales Margin when**
13 **determining a test-year revenue requirement?**

14 A: No, it is not. The only reasonable and responsible method to determine the appropriate
15 amount of Off-system Sales Margin to include in test year revenue is to project the
16 amount of Margin expected during the first year that the increased rates would be in
17 effect, calculate the risk of those Off-system Sales and share that risk between retail
18 customers and the Company. This is the method described above. This method provides
19 the best balance of interests among customers, investors, and creditors, particularly in
20 view of the scale of KCP&L's construction program through the 2010 timeframe.

1 **Q: Has KCP&L implemented its SO₂ allowance plan?**

2 A: Yes. KCP&L witness Wm. Edward Blunk describes the plan in his Direct Testimony, its
3 implementation and the 2008 plan submitted to the Commission Staff and Office of
4 Public Counsel.

5 **Q: Has the Surface Transportation Board (“STB”) litigation involving Montrose**
6 **freight rates been resolved and reflected in revenue requirement?**

7 A: In May 2008 the STB found that the Union Pacific Railroad ("UP") freight rates for
8 Montrose were excessive and ordered UP to reimburse KCP&L for amounts previously
9 collected above the maximum lawful rate. The projected reparations, less unrecovered
10 litigation costs, were reflected as a reduction in cost of service in this rate proceeding
11 based on a two-year amortization. Company witnesses William Blunk and John
12 Weisensee discuss the STB litigation and the impact of the litigation on KCP&L’s rates
13 in their respective direct testimonies.

14 **Q: Has the Company included the revenue requirement impact of the recent merger**
15 **between Great Plains Energy Incorporated, KCP&L’s parent company, and Aquila,**
16 **Inc. in the revenue requirement for this case?**

17 A: Yes, KCP&L has included its allocable share of the merger savings and transition cost
18 amortization in the revenue requirement in this case, as ordered by the Commission in
19 Case No. EM-2007-0374.

20 **Q: Does the revenue requirement in this case address the Commission’s recent**
21 **rulemakings concerning electric utility operational standards?**

22 A: Yes. As more fully discussed in the Direct Testimony of Company witness William
23 Herdegen, KCP&L has included in its revenue requirement incremental costs resulting

1 from 4 CSR 240-23.020 to 23.030, including Reliability Monitoring and Reporting
2 Requirements, Infrastructure Standards, and Vegetation Management Standards and
3 Reporting Requirements.

4 **Q: Are there any other revenue requirement matters that you would like to draw to the**
5 **Commissioners attention?**

6 A: I would like to briefly address the issue of commodity price sensitivity. Our T&D and
7 production operations and maintenance commodity costs have experienced dramatic
8 price increases driven by increased demand, the weakness of the U.S. dollar and other
9 causes. Company witnesses William Herdegen and Dana Crawford discuss this impact in
10 their Direct Testimonies addressing T&D and production, respectively. In each instance
11 we have attempted to reflect this sensitivity in the maintenance normalization indexing.

12 **Q: Does the Company request Commission authorization on any additional matters?**

13 A: Yes, KCP&L requests Commission authorization on an accounting matter and a tariff
14 matter.

15 **Q: Please briefly describe the accounting request.**

16 A: Financial Accounting Standard (“FAS”) 158 requires the Company to convert its pension
17 and other post-employment benefits (“OPEB”) measurement date from September 30,
18 2008 to December 31, 2008. As a result, KCP&L will incur a “catch up” of three months
19 of additional pension and OPEB expense in 2008. As more fully discussed in the Direct
20 Testimony of Company witness John Weisensee, KCP&L requests the Commission to
21 authorize the deferral of incremental FAS 158 pension and OPEB expense in a regulatory
22 asset account and the amortization of such costs into rates over a five-year period
23 commencing with the effective date of new rates in this rate proceeding.

1 **Q: Please briefly describe the tariff request.**

2 A: As more fully discussed in the Direct Testimony of Company witness Allen Dennis,
3 KCP&L requests the Commission to authorize the implementation of a Residential
4 Economic Relief Pilot Program. This program delivers a monthly \$50 “fixed credit” to
5 low-income customers in an effort to improve low-income home energy affordability.
6 The details behind this program are included in the Company’s proposed tariffs. The
7 Company requests that 50% of the cost of this program be deferred until the 2009 case,
8 with cost recovery determined at that time. The remaining 50% of cost will be borne by
9 KCP&L’s shareholders.

10 **Q: The Report and Order in the 2007 case addressed the Commission’s concerns**
11 **regarding the Company’s all-electric and separately metered space heating rates.**
12 **Has the Company addressed this issue in its direct testimonies in this rate**
13 **proceeding?**

14 A: Yes, the Company was ordered to present in its next rate case “complete cost of service
15 and/or cost-effectiveness studies and analyses of KCP&L’s general service all-electric
16 tariffs and separately metered space heating rates....” The study and analysis was
17 prepared by Paul Normand of Management Applications Consulting, Inc. and he presents
18 the results of his study in his Direct Testimony in this rate proceeding. Further, KCP&L
19 witness Tim Rush discusses the electric rate design related to this issue in his Direct
20 Testimony.

21 **Q: Does that conclude your testimony?**

22 A: Yes, it does.

COUNTY OF JACKSON)

Chris B. Giles, being first duly sworn on his oath, states:

1. My name is Chris B. Giles. I work in Kansas City, Missouri, and I am employed by Kansas City Power & Light Company as Vice President, Regulatory.

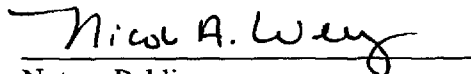

2. Attached hereto and made a part hereof for all purposes is my Direct Testimony on behalf of Kansas City Power & Light Company consisting of sixteen (16) pages, having been prepared in written form for introduction into evidence in the above-captioned docket.

3. I have knowledge of the matters set forth therein. I hereby swear and affirm that my answers contained in the attached testimony to the questions therein propounded, including any attachments thereto, are true and accurate to the best of my knowledge, information and belief.

Chris B. Giles

Subscribed and sworn before me this 5th day of ~~August~~ ^{September} 2008.

Notary Public

My commission expires: Feb. 4, 2011
