TARIFF FORMAT

A. Sheet Numbering - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the PSCM. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. The most current sheet number, approved by the Commission, is the tariff sheet in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

SECTION 3 - DESCRIPTION OF SERVICE, CONT'D.**3.2 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.

The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the "V" and "H" coordinates found in BellCore's V&H Tape and NECA FCC Tariff No. 4.

- | | |
|--------|--|
| Step 1 | Obtain the "V" and "H" coordinates for the Wire Centers serving the Customer and the destination point. |
| Step 2 | Obtain the difference between the "V" coordinates of each of the Wire Centers. Obtain the Difference between the "H" coordinates. |
| Step 3 | Square the differences obtained in Step 2. |
| Step 4 | Add the squares of the "V" difference and "H" difference obtained in Step 3. |
| Step 5 | Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division. |
| Step 6 | Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Wire Centers. |

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE, CONT'D.

3.3 Timing of Calls

Billing for calls placed over the network is based in part on the duration of the call.

3.3.1 Timing for all calls begins when the called party answers the call (i.e. when two way communications are established.) Answer detection is based on standard industry answer detection methods, including hardware and software answer detection.

3.3.2 Chargeable time for all calls ends when one of the parties disconnects from the call.

3.3.3 Minimum call duration and additional increments for billing are specified in the description of each service.

3.3.4 There is no billing applied for incomplete calls.

SECTION 3 - DESCRIPTION OF SERVICE, CONT'D.**3.5 Miscellaneous Rates and Charges****3.5.1 Public Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access The Company service and is unrelated to the Company service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the "#" symbol).

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

3.5.2 Billing Cost Recovery Fee

In order to partially offset increased expenses associated with billing calls via local exchange carriers, an undiscountable billing cost recovery fee will apply each billing period in which collect calls are billed through a Customer's local exchange carrier. This fee will be charged only once per billing period regardless of the number of calls. The fee will not apply in any billing period in which no collect calls are billed via the Customer's local exchange carrier. This fee does not apply to prepaid services paid for by commercial credit card, check money order or wire, or for services billed directly to the Customer by the Company.

SECTION 3 - DESCRIPTION OF SERVICE, CONT'D.**3.6 Institutional Operator Services**

Institutional operator assisted service allows Inmates to place Collect Calls through an automated call processing system. The call processing system prompts the Inmate and the called party such that the call is completed without live operator assistance. Calls are placed on a collect-only basis to the called party.

A number of special blocking and screening capabilities are available with institutional operator services provided by ITI Inmate. These capabilities allow Institutions to control Inmate access to telecommunications services, reduce fraudulent use of the Company's services, and eliminate harassing calls to persons outside the Institution.

For services provided to Inmates of Institutions, the following special conditions apply:

- a. Calls to "900", "976" or other pay-per-call services are blocked by ITI Inmate.
- b. At the request of the Institution, ITI Inmate may block inmate access to toll-free numbers (e.g., 800, 888) and dialing sequences used to access other carriers or operator service providers (e.g., 950-XXXX, 10XXXX).
- c. At the request of the Institution, ITI Inmate may block Inmate access to "911", "411", or local operators reached through "0-" dialing.
- d. At the request of the Institution, ITI Inmate may block Inmate access to specific telephone numbers.
- e. Availability of ITI Inmate's services may be restricted by the Institution to certain hours and/or days of the week.

Information concerning ITI Inmate's services is provided to the administration of each Institution where the Company's services are offered. Inmates may obtain information regarding rates and charges by requesting such information from the Institution's administration.
- g. At the request of the Institution, ITI Inmate may impose time limits on local and long distance calls placed using its services.
- h. At the request of the Institution, equipment may be provided which permits monitoring of inmate calls by legally authorized government officials.

SECTION 3 - DESCRIPTION OF SERVICE, CONT'D.**3.7 Institutional Prepaid Service**

Institutional Prepaid Service allows inmates to set up prepaid accounts for outbound calling. Prepaid calls are originated when the inmate enters their unique PIN and destination number. The institution has the option of enabling a function requiring positive call acceptance on each call placed via Institutional Prepaid Service.

With the assistance of the institution, the Company will set up a Prepaid Account for calls placed from the institution. Funds in the Prepaid Account may only be used for payment of calls placed by inmates. The Company's system informs the inmate of the Available Usage Balance remaining in the Prepaid Account upon access to place a call, and prompts the inmate Customer to place a call by entering the destination telephone number.

Institutional Prepaid Service calls are not distance sensitive. Call timing is rounded up to the nearest one (1) minute increment after the initial minimum period of one (1) minute and therefore the Available Usage Balance is decremented in full minute increments.

Per call and usage for each call placed is deducted from the Available Usage Balance in the Inmate's Prepaid Account on a real time basis as the call progresses.

While a call is in progress and the Available Usage Balance reaches one minute, a voice prompt will announce to the inmate that one minute of time remains on their Prepaid Account and that the call will be cut off after that time.

SECTION 3 - DESCRIPTION OF SERVICE, CONT'D.**3.8 Prepaid Collect Service**

Prepaid Collect Service allows recipients of collect calls from inmate facilities to set up a prepaid account with the Company from which such calls are decremented.

Inmates place a collect call through the standard dialing pattern to a specific telephone number (station to station). The Subscriber accepts the collect call and the charges for that call are deducted from the Subscriber's Prepaid Account. Funds in this Prepaid Account may only be used for payment of calls received by Subscribers to their telephone number specified to the Company when the Prepaid Account is established.

Prepaid Collect Service calls are not distance sensitive. Call timing is rounded up to the nearest one (1) minute increment after the initial minimum period of one (1) minute and therefore the Available Usage Balance is decremented in full minute increments.

Per call and usage for each call placed is deducted from the Available Usage Balance in the Inmates's Prepaid Account. Customers may obtain the current Available Usage Balance, last payment made and last payment date by calling the Company's Customer Service toll free number twenty-four (24) hours a day, seven (7) days a week.
