EdgeLink100
EdgeLink100 is the industry's smallest, most cost-effective DS3 multiplexer available. Its compact, plug-and-play architecture enables service providers to turn up T1s fast, saving installation time and costs as well as valuable real estate. Deployed at every edge of the network from the core to the CPE Edge.

Cuts service deployment costs

- Compact – only 1 RU – saves valuable real estate
- Plug-and-play architecture – fast and easy to install
- Remotely manageable
- TFTP Software Downloadable – in-service upgrades
- Redundant architecture – 1:1
