**Briefly State Your Comment:**

With a family, it can be difficult to pay all associated costs (clothing, diapers, daycare, gas, car insur, <sup>cell</sup> phones, etc) so any increase in utility costs can have a negative effect on expenses. Personally I have 2 furnaces, so I will see a larger increase in my bill. Also there are few programs/rebates available and practical to middle class families that don't qualify for lower income programs.
