| OF SOMOS, INC. AS THE POOLING |) | |

APPLICATION AND MOTION FOR EXPEDITED TREATMENT

COMES NOW Windstream Missouri, LLC (“Windstream”) and respectfully requests that the Commission issue an Order that reviews and reverses the decisions of the North American Numbering Plan Thousands-Block Pooling Administrator, Somos, Inc. (“NANPA”) to withhold certain numbering resources from Windstream.

The requested numbering resources are necessary to support the deployment of a Connect America Fund Phase 2 (“CAF2”) projects.

In support of this Application, Windstream states as follows:

1. Windstream is a Missouri limited liability company duly authorized to conduct business in Missouri, as evidenced by the Certificate of Amendment filed on June 21, 2006 in Case No. IN-2006-0481, and incorporated by reference pursuant to Commission Rule 4 CSR 240-2.060(1)(G). Windstream’s principal office is located at 4001 North Rodney Parham Road, Little Rock, Arkansas 72212. Windstream is a “local exchange telecommunications company” and a “public utility,” and is duly authorized to provide “telecommunications service” within the State of Missouri as each of those phrases is defined in Section 386.020, RSMo 2000.

2. All correspondence, pleadings, orders, decisions and communications regarding this docket should be sent to:

Edward Cadieux
Counsel II
Windstream Missouri, LLC
4001 N. Rodney Parham Road
Little Rock, AR 72112

3. This Application is prompted by the need to serve customers in the Grandin, Oxly, Patterson, Ponder, and Wappapello Park, MO rate centers via new packet switches being deployed to support the CAF2 project in each of these areas. According to the applicable industry *Location Routing Number (LRN) Assignment Practices document (ATIS-0300065)* Windstream must establish a unique LRN to identify the recipient switch or POI and must establish one LRN per LATA per switch from an assigned NXX for the recipient switch in the number portability capable network. Thus, Windstream must obtain an LRN for each new packet switches located in Grandin, Oxly, Patterson, Ponder, and Wappapello Park, MO rate centers. Also pursuant to industry guidelines, only an NXX code holder can obtain an LRN, thus necessitating Windstream's request for an NXX code for each rate center. It should be noted, however, that Windstream would retain only a single thousand-number-block from each new NXX code.

4. Given the need described above, on the dates outlined below, Windstream submitted Applications for the LRNs, NXX code and thousand number blocks required for each rate center to complete the CAF2 projects to Somos, acting as the NANPA. (A copy of each of Windstream's Applications are attached hereto and incorporated by reference herein as Exhibits A-E, respectively.)

| Rate Center | Date of Application |
|--------------------|----------------------------|
| Grandin | October 17, 2019 |
| Oxly | October 22, 2019 |
| Patterson | October 22, 2019 |
| Ponder | October 17, 2019 |
| Wappapello Park | October 17, 2019 |

5. Somos subsequently denied Windstream's request on the grounds that it failed to meet the months-to-exhaust criteria and/or the utilization criteria established by the Federal Communications Commission ("FCC"). (Copies of Somos' denials are attached hereto and incorporated by reference for each rate center as Exhibits F-J, respectively.) As a result of Somos' denial, Windstream has been unable to obtain the LRNs, NXX codes and thousand number blocks it requested and which are required for deployment of the CAF2 projects.

6. Under existing procedures, Somos, as the NANPA, is required to accept or reject an application for numbering resources based solely on FCC criteria, which require that an applicant establish that its existing numbers inventory within the rate center will exhaust within six months of the application and sets a rate center utilization threshold of seventy-five percent.¹ However, as the Commission is aware, the FCC has adopted a safety valve mechanism to allow carriers that do not meet the months-to-exhaust and utilization criteria in a given rate center to obtain additional numbering resources. In establishing the safety valve, the FCC recognized that conditions that could give rise to a need for additional numbering resources “might include situations where a carrier has multiple switches within a rate center but it is unable to readily share numbering resources among those switches.”² The FCC makes clear that through the safety valve mechanism a carrier may challenge a numbering resource denial by the NANPA before the appropriate state regulatory commission and that the state commission has jurisdiction to affirm or overturn the NANPA’s decision to withhold numbering resources.

7. Windstream seeks the Commission’s reversal of Somos’ decision, acting as NANPA, and requests the Commission to direct Somos to assign one LRN per exchange rate center request. The FCC permits such direction in order to meet specific customer demands and specifically grants state commissions “flexibility to direct the NANPA or pooling Administrator to assign additional numbering resources to carriers that have demonstrated a verifiable need for additional numbering resources outside of these specifically enumerated instances.”³ Windstream has demonstrated a verifiable need due to its needs in connection with CAF2 project upgrades to these rural exchanges. Windstream cannot meet the requirements of this request from its current inventory or in any other manner.

¹ *Second Report and Order, Order on Reconsideration* in CC Docket No. 96-98 and CC Docket No. 99-200 and *Second Further Notice of Proposed Rulemaking* in CC Docket No. 99-200, In the Matter of Numbering Resource Optimization, Petition for Declaratory Ruling and Request for Expedited Action on the July 15, 1997 Order of the Pennsylvania Public Utility Commission Regarding Area Codes 412, 610, 215 and 717, FCC 00-419 (rel. December 29, 2000), at ¶ 29.

² *Third Report and Order and Second Order on Reconsideration* in CC Docket No. 96-98 and CC Docket No. 99-200, In the Matter of Numbering Resource Optimization, Implementation of the Local Competition Provisions of the Telecommunications Act of 1996, and the Telephone Number Portability, FCC 01-362, (rel. December 28, 2001), ¶¶ 58, 61 and 65.

³ FCC 01-362 at ¶ 61.

8. Windstream respectfully requests that the Commission act upon this Application within ten (10) business days. The FCC has recognized the importance of timely action:

[W]e recognize that in many instances, the failure to address a request for additional numbering resources can impair a carrier's ability to stay in or expand business. We therefore direct states to act on carrier requests for a safety valve as expeditiously as possible. Although we do not establish a specific time limit for states to act on these requests, we believe that, in most instances, 10 business days from receipt of a request that the state determines to be sufficiently detailed and complete will be sufficient time to review and act upon safety valve requests.⁴

9. This Application complies with the Commission's applicable rule, 4 CSR 240-37.040. Windstream has attached hereto its "Months to Exhaust Worksheets" indicating the utilization of the covered rate centers encompassing both the preceding six months and projected monthly utilization for the next twelve months. 4 CSR 240-37.040(1)(A)1. See, Exhibit C, respectively, attached hereto and incorporated by reference. Additionally, Windstream has attached copies of its originally-filed requests to NANPA and NANPA's denial of those requests. 4 CSR 240-37.040(1)(A)3. See, Exhibits A and B, respectively. These materials and the instant Application demonstrate a verifiable need for the numbering resources requested herein. Windstream has exhausted all other available remedies designed to conserve numbering resources as related to this request.

10. Granting Windstream's Application will not adversely affect the numbering resources available for use by carriers throughout the state in providing telecommunications services to their customers. Granting Windstream's request is in the public interest and consistent with the FCC's rules and decisions.

11. Windstream has no final unsatisfied judgments or decisions against it from any state or federal agency or court which involve Missouri retail customer service or rates, which action, judgment or decision has occurred within three (3) years of the date of this Application, nor does Windstream have any pending action against it in Missouri, brought by end-user customers, which involves retail customer service or rates.

⁴ *Id.* at ¶66.

12. Windstream does not have any annual report or assessment fees that are overdue in Missouri.

WHEREFORE, Windstream respectfully requests that the Commission overturn and reverse Somos' previous determination as the NANPA; direct Somos to grant Windstream's applications regarding its request for the numbering resources included in those applications and as described herein; act within ten (10) business days as suggested by the FCC or as soon thereafter as is possible; instruct Somos acting as NANPA to release the numbering resources as specified herein; and grant all other proper relief to which Windstream may be entitled.

Respectfully submitted,

Windstream Missouri, LLC

If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the Telcordia Technologies, Inc. dba iconectiv (iconectivTM) LERGTM Routing Guide^{xi}. The Operating Company Number (OCN) assigned to the service provider and the OCN of its parent company. An OCN is a four-character alphanumeric NECA-assigned Company Code or a four-character alphanumeric identifier assigned by the iconectivTM Telecom Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS or VoIP. Also indicate the primary type of business in which the numbering resource is to be used. Service Providers may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Section 1.6 Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool except when a service provider is exiting the market or is exchanging a block that was identified as being over 10% contaminated. If the block being returned is over 10% contaminated, the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied.

The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

Footnotes:
