File No. GO-2022-0022

SPIRE MISSOURI INC’S REPORT ON CONTINGENCY PLANNING

Comes Now, Spire Missouri Inc (“Spire Missouri” or “Company”) by and through counsel and files this Report on Contingency Planning and in support thereof states the following:

1. On July 28, 2021, the Missouri Public Service Commission (“Commission”) issued an *Order Opening Investigation* wherein the Commission orders its Staff to undertake an investigation regarding Spire STL Pipeline’s application to the FERC for authority to continue operating the Spire STL Pipeline to provide natural gas to the St. Louis area. The Commission also shortened the time to respond to data requests to allow two business days to object and three business days to respond.
2. On August 16, 2021, the Staff filed its Investigative Report, confidential and public, with the Commission.
3. On September 1, 2021, the Commission issued an *Order Regarding Further Investigation* (the Order) which ordered Spire Missouri to periodically report on its current contingency plans, ongoing contingency plan development, and conditions affecting its ability to provide adequate gas supply and pressure to all customers for the winters of 2021-2022, 2022-2023, and 2023-2024. The Commission ordered Spire Missouri to file such reports monthly, by the 15th of each month, for the period of November 2021 through March 2022. Thereafter, such reports shall be filed at the end of each quarter. Spire Missouri shall provide additional reports when conditions occur operationally or related to Spire

STL's court and FERC cases that prompt Spire Missouri to take action related to its operations or its transportation and storage capacity on pipelines.

4. This Order also ordered Spire Missouri to submit any filings made in FERC docket, CP17-40 to also be submitted in this docket.
5. Spire Missouri has been filing the FERC filings in this docket since October 29, 2021.
6. Additionally, Spire Missouri files the attached Report on Spire Missouri's Contingency Planning, November 2021, marked Exhibit A to this pleading. This filing complies with the Commission's Order issued on September 1, 2021.
7. This Report on Spire Missouri's Contingency Planning includes a description of Spire Missouri's contingency plan development for the last quarter, ongoing contingency plan development, and conditions impacting our ability to provide sufficient natural gas supply and pressure for the Missouri East service territory this winter.

Wherefore, Spire Missouri respectfully submits this Report to comply with the Commission's Order issued September 1, 2021 for the Commission's review and consideration.

Respectfully submitted,

/s/ Matt Aplington
