Subject: Joint Memorandum in Support of Enabling MEEIA Rulemaking

John:

Please find attached a Joint Memorandum in Support of Enabling MEEIA Rulemaking on behalf of KCP&L, Missouri Department of Natural Resources and Natural Resources Defense Council.

These joint comments represent our shared assessment of the most recent draft of Staff's proposed rules focusing on what has been accomplished and where opportunities to further the draft still exist. In particular, the memorandum represents our collective view of the characteristics embodied by any successful implementation of rules consistent with the original intent of the MEEIA and are organized by the following themes:

- Encouragement of DSM Investment
- Determination of the Level of DSM Investment
- Timely Recovery and Approval
- Importance of Flexibility
- Transparency and Accountability

We appreciate the efforts of Staff and look forward to continuing to work to develop rules consistent with the original intentions of the MEEIA.
