

John V Heveroh, SAINT PETERS, MO.

Please extend the approval for the pipeline to operate for the full winter heating season. We residents count on natural gas to heat our homes and our water. Terminating this pipeline December 13 will affect thousands of people in the St. Louis, MO area.

Setting this deadline of 13 December, will hit right in the most severe portion of winter. If this is not extended there will be extremely detrimental consequences for natural gas users.

Concerned natural gas user,
John V. Heveroh
