| Approval to Change its Infrastructure | ) |          |
| System Replacement Surcharge (ISRS).  | ) |          |

**MAWC’s PETITION TO CHANGE ITS  
INFRASTRUCTURE SYSTEM REPLACEMENT SURCHARGE**

COMES NOW Missouri-American Water Company (“MAWC”), pursuant to Sections 393.1000, 393.1003 and 393.1006 RSMo; 4 CSR 240-2.060(1), and 4 CSR 240-3.650 and for its Petition respectfully states as follows to the Missouri Public Service Commission (“Commission”):

**BACKGROUND**

1. Sections, 393.1000, 393.1003 and 393.1006 and Commission Rule 4 CSR 240-3.650 provide eligible water corporations with the ability to recover certain infrastructure system replacement costs outside of a formal rate case filing via an Infrastructure System Replacement Surcharge (“ISRS”). A petition must be filed with the Commission for review and approval before an adjustment can be made to a water corporation’s rates and charges to provide for the recovery of the costs associated with eligible infrastructure system replacements.

**THE APPLICANT**

2. MAWC is a Missouri corporation with its principal office and place of business at 727 Craig Road, St. Louis, Missouri 63141. MAWC is a Missouri corporation in good standing. A Certificate of Good Standing from the Office of the Missouri

Secretary of State was filed in Commission Case No. WM-2001-309 and is hereby incorporated by reference in accordance with Commission rule 4 CSR 240-2.060 (1)(G). MAWC currently provides water service to the public in and around the cities of St. Joseph, Joplin, Brunswick, Mexico, Warrensburg, Parkville, Riverside, Jefferson City, and parts of St. Charles, Platte, Warren and Lincoln Counties Missouri, and most all of St. Louis County, Missouri. MAWC currently provides water service to approximately 456,000 customers. MAWC provides sewer service to approximately 1,000 customers near Parkville, Cedar Hill and Warren County, Missouri. MAWC is a “water corporation” and a “public utility” as those terms are defined in Section 386.020 and 393.1000 (7) RSMo. 2000, and is subject to the jurisdiction and supervision of the Commission as provided by law. Other than cases that have been docketed at the Commission, MAWC has no pending action or final unsatisfied judgments against it from any state or federal agency or court within the past three (3) years that involve customer service. MAWC has no annual report or assessment fees that are overdue.

3. Communications in regard to this Application should be addressed to:

John J. Reichart  
Corporate Counsel & Assistant Secretary  
Missouri-American Water Company

## **THE ISRS REQUEST**

4. MAWC, per this petition, requests an adjustment to its rates and charges through a change to its ISRS rate schedule to provide for the recovery of costs for infrastructure system replacements and relocations eligible for ISRS recognition. The proposed ISRS rate schedule should reflect the appropriate pre-tax ISRS revenues necessary to produce net operating income equal to MAWC's weighted cost of capital multiplied by the net original cost of the requested infrastructure replacements which are eligible for the ISRS, including recognition of accumulated deferred income taxes and accumulated depreciation associated with the aforesaid infrastructure system replacements. MAWC also seeks to recover all state, federal and local income or excise taxes applicable to such ISRS income and to recover all other ISRS costs such as depreciation expense and property taxes due within 12 months of this filing.
5. The infrastructure system replacements for which MAWC seeks ISRS recognition are set forth on Schedule B, which is attached hereto and made a part hereof for all purposes. The infrastructure system replacements listed on Schedule B are either; a) mains and associated valves and hydrants installed as replacements for existing facilities that have worn out or were in a deteriorated condition; or, b) a main cleaning and/or relining project; or, c) infrastructure facility relocations due to the construction or improvement of a highway, road, street, public way or other public work required by or on behalf of the United States, the State of Missouri, a political subdivision of the State of Missouri, or another entity having the power of eminent domain. All installations and associated retirements for the

construction projects included in this ISRS were performed by Company construction personnel. Schedule B also provides the ISRS information by Task Order (work order) and identifies and sub-totals facility relocations on behalf the State of Missouri, on behalf of a political subdivision of the State of Missouri, on behalf of the United States and on behalf of an entity other than the United States, State of Missouri or a political subdivision of the State of Missouri. Customers affected by the proposed ISRS benefit from the ISRS projects because 1) the program accelerates the replacement of aging water mains, 2) reduces the frequency of water service interruptions and 3) improves service reliability. Additionally, there were no financing arrangements directed specifically to the ISRS projects.

6. The infrastructure system replacements listed on Schedule B are eligible for ISRS treatment as they are water utility plant projects that: a) replace and/or extend the useful life of existing infrastructure; b) currently are in service and used and useful (in service date is provided); c) did not increase revenues by directly connecting to new customers since all ISRS projects represented replacements of existing facilities or relocations of existing facilities; d) were not included in MAWC's rate base in its most recently completed general rate case; e) costs related to such projects have not been reimbursed to the utility; and f) were not included in any other MAWC ISRS filing.

7. The Company sometimes receives reimbursement from either private developers or governmental agencies. In the case of a private developer, the Company will enter into an agreement that requires the developer to advance to the Company the money based on an estimated cost to relocate facilities. Once the project is complete, the Company prepares a reconciliation of the actual cost to the estimated cost. If the actual cost exceeds the estimate, the developer is required to reimburse the Company. If the actual cost is less than the estimate, then the Company will refund the difference to the developer.

In the case where a governmental agency requires a relocation of Company facilities, generally, no advance funding is received. In such instance, once the project is complete, the Company will bill the governmental agency for the amount of the cost of the relocated facilities that were located in easements.

In all cases, reimbursements are based on actual construction costs.

8. The infrastructure system replacements listed on Schedule B for which ISRS recognition is requested, were performed within the boundaries of St. Louis County, Missouri. St. Louis County, Missouri has a charter form of government and is inhabited by more than one million people.

9. MAWC had its last general rate proceeding decided by Commission Order issued on November 14, 2008, effective November 28, 2008 in Case No. WR-2008-0311.

10. This Petition is MAWC's request to change the existing ISRS tariff. The current ISRS rates were approved by Commission order issued July 8, 2009 with an effective date of July 18, 2009 in case WO-2009-0379.
11. Attached hereto as Schedule C is the list of infrastructure retirements and related annual depreciation expense associated with the retirements. Schedule C provides the original cost of the retired asset, depreciation rate, and the date the asset was removed from service.
12. Attached hereto as Schedule A is the proposed rate schedule and supporting documents proposed by MAWC in order to change the established ISRS and to provide for the adjustment of its rates and charges to reflect recovery of eligible infrastructure costs. This proposed rate schedule, on an annualized basis, will produce ISRS revenues of \$2,314,257 or an increase of 1.2% based on the base revenue level approved by the Commission in its most recently completed general rate proceeding.
13. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes current state and federal income tax rates of 5.21327% and 33.17536%, respectively. These are the tax rates used in the most current general rate case, WR-2008-0311.

14. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes the filed capital structure and reflects an overall rate of return of 8.01%. Refer to Schedule D.
15. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes a weighted cost rate for debt of 3.21%, as calculated in the capital structure referenced in paragraph 14 above.
16. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes a weighted cost rate for preferred stock of .03%, as calculated in the capital structure referenced in paragraph 14 above.
17. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes a weighted cost of common equity of 4.77%, as calculated in the capital structure in paragraph 13 above. A cost of common equity of 10% was used in the capital structure as determined in the stipulation in the last rate case, Case No. WR-2008-0311.
18. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule applies a current composite property tax rate of .84% to the aforelisted eligible infrastructure system replacements in St. Louis County, Missouri. The property tax rate is based on the current 2009 actual property tax bills. Refer to page four of Schedule A.

19. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes depreciation rates currently applicable to the aforelisted eligible infrastructure system replacements in St. Louis County, Missouri as determined by the Commission in Case No. WR-2007-0216.
20. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes customer class billing determinants as utilized in designing the rates for the St. Louis County district during MAWC's most recently completed rate proceeding.
21. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule identifies the classes of customers benefited by the aforesaid eligible water utility plant projects.
22. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes the customer class cost-of-service study recognized by the Commission for the St. Louis County district during Case No. WR-2008-0311. Therefore, the class cost-of –service study from Case No. WR-2008-0311 was used in this ISRS case to determine the recovery by customer class of the appropriate pre-tax ISRS revenues. The proposed ISRS is being prorated between affected customer classes based on the class cost-of service study as indicated above. Refer to page six of Schedule A.

23. In determining the appropriate pre-tax ISRS revenues, the proposed rate schedule utilizes the rate design methodology recognized by the Commission for the Metro St. Louis district during Case No. WR-2008-0311.

24. The ISRS on an annualized basis produces revenues of at least one (1) million dollars but not in excess of 10 percent (10%) of the base revenue approved by the Commission in Case No. WR-2008-0311.

#### **ADDITIONAL INFORMATION**

25. MAWC will post information on its website to inform customers of the ISRS.

The ISRS information will be posted to the Company's website upon the revised ISRS charge appearing on customer's bills. Refer to Schedule E for an example of the information to be included on the website.

26. Instructions and talking points regarding the ISRS that will be provided to personnel at MAWC's call center will be based upon the information provided on the website referenced in Paragraph 27 of this Petition. Refer to Schedule F for a list of the instructions to be provided to personnel at MAWC's Call Center.

27. MAWC distributes an annual notice to affected customers each year that an ISRS is in effect explaining the continuation of its infrastructure system replacement program and the resulting ISRS surcharge. See Schedule G for an example of this notice.

28. The ISRS charge will be clearly identified on the customer's billing statement. It will appear as a separate charge under ISRS. See Schedule H for an example of a customer bill showing how the ISRS will be described on customers' bills.

29. MAWC distributed to its customers an initial (one-time) informational brochure (bill insert) explaining the Infrastructure System Replacement Surcharge for Case W0-2009-0379 for rates effective July, 18, 2009. For this rate change, customers will receive a bill message. See Schedule I for an example of this bill message.

WHEREFORE, pursuant to 393.1006.2 (3) Applicant respectfully requests the Commission provide notice of this filing in accordance with Commission Rule 4 CSR 240-3.650(7) and , thereafter, issue an Order - and approve any implementing tariff sheets - bearing an effective date of no later than January 21, 2010, authorizing:

- a. The Applicant to recover the cost of eligible infrastructure system replacement (as listed on Schedule B) per a change to MAWC's ISRS (Refer to pages 1 and 3 of Schedule A). This ISRS recognition to be accomplished via an adjustment to MAWC's rates and charges by reflecting the appropriate pre-tax ISRS revenues necessary to produce net operating income equal to MAWC's weighted cost of capital multiplied by the net original cost of the requested infrastructure replacements which are eligible for the ISRS, including recognition of accumulated deferred

income taxes and accumulated depreciation associated with the aforesaid infrastructure system replacements; and,

- b. Granting such other relief as may be necessary and appropriate to accomplish the purposes of Sections 393.1000 through 393.1006, RSMo.

Respectfully Submitted,

---

## Rate I – Infrastructure System Replacement Surcharge (ISRS)

**DESCRIPTION:** Rate I is designed to recover the costs associated with the Company's eligible main, valve and hydrant replacements, main relocations, and main cleaning and relining projects. This ISRS rate is calculated and implemented in accordance with the provisions of sections 393.1000 to 393.1006 RSMO. Any future changes to this rate will also be made in accordance with those provisions.

**APPLICABILITY:** This rate is applicable to any customer class who benefits from the subject utility plant projects eligible for ISRS recovery. The surcharge is calculated consistent with the customer class cost-of-service study recognized by the Missouri Commission in a Company's recent applicable general rate proceeding.

**RATE COMPONENTS:**

In addition to the other charges provided for in the Company's tariffs, a separate charge for the ISRS will apply for service rendered on and after the effective date.

Surcharge Rate (1)

## Investing in Water Systems

The Infrastructure System Reinvestment Surcharge (ISRS) helped to fund more than \$\_\_\_ million in St. Louis County water system upgrades from October, 2008 through March, 2009. This plan of continuous investment in water pipelines improves system reliability at a monthly cost of less than \$\_\_\_ for most residential customers.

### What is ISRS?

ISRS is the Infrastructure System Replacement Surcharge (ISRS) – a program authorized by the State of Missouri in 2003. The program allows Missouri American Water to fund necessary and ongoing improvements to our water infrastructure.

### What are the current ISRS rates?

Effective <date>, the Missouri Public Service Commission approved an increase in the ISRS surcharge. This increase will add an extra \_\_\_ cents per month for the average residential customer using 7,500 gallons of water per month. The surcharge rates are shown in the table below.

### Why do we need the ISRS program?

Missouri American Water uses the ISRS program to replace aging waterlines more quickly, using a planned, systematic approach. In St. Louis County, we maintain more than 4,200 miles of water mains. Throughout our system, many of the older water mains are wearing out due to age and corrosion. The resulting water main breaks can cause service interruptions, damage to property and inconvenience to our customers.

ISRS allows Missouri American water to replace these aging water lines more quickly. We use a systematic approach – identifying the replacement projects with good cost/benefit opportunities.

This infrastructure investment helps reduce the number of water main breaks, improve service reliability and fire protection and enhance the integrity of the water system for future generations.

### Is there regulatory oversight for these charges?

Yes. As water mains and other eligible infrastructures are replaced, the costs are accumulated and reviewed by the Missouri Public Service Commission (MoPSC). If the MoPSC approves the ISRS costs, Missouri American Water applies a surcharge to customer bills to recover, over time, the cost of system improvements.

### What is the impact on customer bills?

The costs of these ongoing system improvements are less than \$\_\_\_ per month for the average residential customer. Costs to make these improvements continue to grow. By investing in these upgrades now, we save construction costs over the long term and help to improve service reliability and fire protection for future generations.

Following is a summary of the ISRS surcharges, by customer type, as of <date>.

| Customer                                                                                                          | Rate per 100 cubic feet (CCF) |
|-------------------------------------------------------------------------------------------------------------------|-------------------------------|

# Investing in Water Systems

The Infrastructure System  
Replacement Surcharge has  
funded more than \$xx million in  
water system improvements from  
{date} to {date}.

Infrastructure Investment

The ISRS charge on your water bill helps fund completed improvements to the vast network of pipelines, fire hydrants and other critical components of St. Louis County’s water system. These ongoing improvements are designed to reduce the number of water main breaks, improve service reliability and fire protection and enhance the integrity of our water system.

The typical residential customer using x,xxx gallons of water pays an average of \$0.xx per quarter for ISRS. It’s an important investment in our community’s water service and fire protection.

ISRS Rates

| Customer                             | Rate per 100 cubic feet (CCF) |
|--------------------------------------|-------------------------------|
| Residential,                         |                               |
| Commercial or Other Public Authority | \$0.00                        |
| Public Water Supply District         | \$0.00                        |
| Resale Customers                     | \$0.00                        |

ISRS is implemented pursuant to Sections 393.1000, 393.1003, 393.1006 RSMo; CSR 240-2.060 (1) and 4 CSR 240-3.650

Missouri American Water maintains about 4,200 miles of water mains and 31,000 fire hydrants in St. Louis County. The Infrastructure System Replacement Surcharge (ISRS) helps us upgrade our aging infrastructure more quickly, improving water service reliability.

Messages from Missouri American Water

Local Office Hours 8:00AM - 5:00PM Monday - Friday.  
\* "The Infrastructure Surcharge (or ISRS) is the result of a new Missouri law that allows us to accelerate the replacement of aging water mains, thereby reducing the frequency of water service interruptions and prevent property damage from main breaks. The Public Service Commission reviews and approves all ISRS charges. At Missouri American Water, we are dedicated to improving the quality and reliability of your water service.  
For additional information regarding ISRS charges, please contact us at 1-866-430-0820, or visit our website at [www.amwater.com](http://www.amwater.com).  
\* Customers may use their credit card, debit card or pay by electronic check by calling toll free: 1-866-271-5522. Customers may also pay on-line at [www.water.paymybill.com](http://www.water.paymybill.com). A service fee will apply. Local payment centers cannot accept Credit/Debit card payments at this time.
