

Mark A Butta, Youngstown, OH.

This is absolutely ridiculous. I can't believe that you're actually considering shutting down STL after the pipeline is constructed and already in-service. This is cancel culture gone crazy. You're allowing the Environmental Defense Fund a second bite at the apple simply because the FERC didn't do its job. I'm not a rate payor in MO but even I can see through this nonsense. Are you intentionally trying to bankrupt Spire?
