

Mark G Jacobs, Ballwin, MO.

I am commenting in support of the continued operation of the STL Pipeline. It is incomprehensible to me that in 2021 in the United States we are literally facing a potential shut down of a natural gas pipeline over what appears to be a legal issue when so many families will be negatively impacted. According to Spire Gas, our service provider, there are over 650,000 consumers, who pay for their gas service, who are potentially impacted by the possible shutdown. Consider that there are real people who will suffer the consequences if this shutdown is allowed to proceed. Please renew or extend the license that will allow the STL Pipeline to continue to operate. Thank you, Mark Jacobs
