STAFF RECOMMENDATION

COMES NOW the Staff of the Missouri Public Service Commission and for its recommendation, states as follows:

1. On November 25, 2015, Alliance Connect, LLC ("the Company") applied for a certificate of service authority to provide basic local, non-switched local, and interexchange telecommunications service and for competitive classification.

2. The Application included sufficient information for the Staff to conclude that the Company possesses sufficient financial, technical and managerial resources to be certificated.

3. In the attached Memorandum, the Staff recommends that the Commission grant the Company's request for basic local, non-switched local, and interexchange telecommunications service authority. The Commission shall grant an application for a certificate of telecommunications service authority upon a finding that the grant of authority is in the public interest. §§ 392.430 and 392.440 RSMo 2000.

4. The Staff also recommends that the Commission classify the Company's services as competitive. The Commission may classify a telecommunications provider or its services as competitive if the Commission determines it is subject to sufficient

competition to justify a lesser degree of regulation and that such lesser regulation is consistent with the protection of ratepayers and promotes public interest. §392.361.4 RSMo Supp. 2013. The Staff further recommends that the Commission state in its order that, pursuant to §392.410, the authority conferred by the certificate of service authority shall be null and void unless it is exercised within one year of its issuance.

5. No tariffs were submitted with the application; the Company may rely on §392.461 RSMo and publish its rates, terms and conditions of service on its publically available web site or it may submit a tariff for approval by the Commission prior to providing service in Missouri.

6. The Company is not delinquent in filing an annual report, paying the PSC assessment, MoUSF, and Relay Missouri.

7. The Staff recommends that the application be granted with the following conditions:

a. The applicant's originating and terminating access rates shall not exceed the access rates of the incumbent local exchange company against whom the applicant is competing pursuant to §§ 392.361.6 and 392.370 RSMo Supp. 2009.

b. If the directly competing ILEC, in whose service area the applicant is operating, decreases its originating and/or terminating access service rates, the applicant shall file an appropriate tariff amendment to reduce its originating and/or terminating access rates in the directly competing ILEC's service area within 30 days of the directly competing ILEC's reduction of its originating and/or terminating access rates in order to maintain the cap.

c. The Company will undertake all necessary measures to ensure its contracts with underlying carriers do not contain provisions preventing delivery of traffic to any telephone exchange area of Missouri. Such measures include but are not limited to:

1) Prevention of call blocking and/or call gapping based on the cost of traffic termination.

2) Preventing the alteration or stripping of Calling Party Number identification.

3) Ensuring sufficient network capacity exists to process all traffic according to industry accepted practices.

WHEREFORE, the Staff recommends that the Commission grant Alliance Connect, LLC's Application for basic local and non-switched local telecommunications service authority on the conditions set forth above and classify the company and its services as competitive and either approve the Company's tariff or allow it to take effect by operation of law.

Respectfully submitted,
