

Kimberly Donnell, Herculaneum, MO.

With winter coming the possibility of not having gas for homes and businesses is unacceptable and a severe health and safety risk to our community. I not only live but also work in the areas that would be affected by this shut down if allowed to happen. My husband and I work for the same company, so if jobs are lost due to lack of gas, we not only don't have heat for our home, but perhaps no food on the table. Please fight to prevent this from happening, this would be a terrible lose for many in our communities if this shut down is allowed to happen. Thank you.
