REBUTTAL TESTIMONY

OF

GREGORY W. LOVETT

ON

BEHALF OF

UNION ELECTRIC COMPANY d/b/a Ameren Missouri

> St. Louis, Missouri January 2015

TABLE OF CONTENTS

I.	INTRODUCTION	1
II.	PURPOSE AND SCOPE	2
III.	RESPONSE TO RECOMMENDATIONS OF STAFF	2

1	REBUTTAL TESTIMONY
2	OF
3	GREGORY W. LOVETT
4	FILE NO. ER-2014-0258
F	
5	I. Introduction
6	Q. Please state your name and business address.
7	A. Gregory W. Lovett, Ameren Missouri, One Ameren Plaza, 1901 Chouteau
8	Avenue, St. Louis, Missouri 63103.
9	Q. By whom are you employed and in what position?
10	A. I am employed by Union Electric Company d/b/a Ameren Missouri
11	("Ameren Missouri" or "Company") as Manager of Energy Efficiency.
12	Q. Please describe your educational background, work experience and
13	the duties of your position.
14	A. I joined Central Illinois Public Service Company ("CIPS") as a
15	Distribution Engineer in Quincy, Illinois in 1981 and held several positions in
16	Springfield, Illinois prior to the merger of CIPS and Union Electric Company ("UE") in
17	1998, when I was Business Improvement Consultant. After the merger, I became Senior
18	Engineer of Metering for Ameren Missouri, then known as AmerenUE. After holding
19	several positions in St. Louis, I was promoted to my current position with Ameren
20	Missouri. I have a Bachelor of Science Degree in Electrical Engineering from the
21	University of Illinois and a Master of Business Administration from Webster University.
22	As Manager of Energy Efficiency in the Energy Efficiency and Renewable Energy

Department, I oversee the operations of the Ameren Missouri Evaluation, Measurement
 and Verification projects for the energy efficiency programs.

3

4

II. Purpose and Scope

Q. What is the purpose of your rebuttal testimony in this proceeding?

5 The purpose of my rebuttal testimony is to respond to the testimony of A. 6 John Buchanan on behalf of the Missouri Department of Economic Development 7 Division of Energy ("DE"). Specifically, I am responding to Mr. Buchanan's request to 8 discontinue biennial evaluations following the "second" evaluation for the Ameren 9 Missouri Low Income Weatherization Program scheduled for completion on July 31, 10 2015, and the associated tariff change. In addition, I am addressing the Low Income 11 Weatherization portion of Staff's Revenue Requirement Cost of Service Report¹ 12 ("Report") prepared by Dr. Henry Warren of the Missouri Public Service Commission 13 Staff ("Staff").

14 III. Response to Recommendations of Staff

Q. Staff offers four recommendations with respect to the Low Income
Weatherization Program administered by DE. Do you agree with those
recommendations?

18 A. To paraphrase, Dr. Warren offers the following recommendations:

Prior utilized funds remain in the Missouri State Environmental
 Improvement and Energy Resource Authority ("EIERA") account for future
 weatherization use.

¹ Staff Report, Revenue Requirement, Cost of Service, Case No. ER-2014-0258, December 5, 2014, p. 138-141.

1	2. Ameren Missouri continue to include \$1.2 million in rates to
2	weatherize homes annually, with \$60,000 being set aside to pay for program evaluation.
3	3. The second evaluation of the program should include the impact of
4	weatherization with respect to gas service for Ameren Missouri combined gas-electric
5	service; and
6	4. Continue evaluations, but do so on a 5-year rather than 2-year
7	basis.
8	Ameren Missouri does not object outright to these recommendations, with the
9	exception of the fourth one. Ameren Missouri does wish to confer with Staff concerning
10	the intent behind the recommendations, particularly No. 3, but has no objection to the
11	principle of considering the benefits for customers who also receive gas utility service
12	(not necessarily confined to Ameren Missouri gas customers).
13	Q. Why should the biennial evaluations continue for the Low Income
13 14	Q. Why should the biennial evaluations continue for the Low Income Weatherization Program?
14	Weatherization Program?
14 15	Weatherization Program? A. The Company recommends the program remain unchanged as described in
14 15 16	Weatherization Program? A. The Company recommends the program remain unchanged as described in the Nonunanimous Stipulation and Agreement Regarding Ameren Missouri's Low
14 15 16 17	Weatherization Program? A. The Company recommends the program remain unchanged as described in the Nonunanimous Stipulation and Agreement Regarding Ameren Missouri's Low Income Weatherization Program from Case No. ER-2012-0166 ("S&A"). From
 14 15 16 17 18 19 20 21 22 23 	Weatherization Program? A. The Company recommends the program remain unchanged as described in the Nonunanimous Stipulation and Agreement Regarding Ameren Missouri's Low Income Weatherization Program from Case No. ER-2012-0166 ("S&A"). From paragraph 3: This group (Stakeholder) will review and discuss the evaluations and provide input to Ameren Missouri regarding the timing and scope of work for future evaluations. The Stakeholder Group will also discuss the recommendations contained in the evaluations and possible

$ \begin{array}{r} 1 \\ 2 \\ 3 \\ 4 \\ 5 \\ 6 \\ 7 \\ 8 \\ 9 \\ 10 \\ 11 \\ 12 \\ 13 \\ 14 \\ 15 \\ 16 \\ 17 \\ 18 \\ \end{array} $		Low Income Weatherization Program funds to hire an Evaluation, Measurement and Verification (EM & V) contractor for future evaluations. The cost of the evaluation will not exceed \$120,000 unless the Stakeholder Group determines otherwise. Any withheld funds that are in excess of amounts needed for future evaluations shall be used to provide low income weatherization services; such amount shall be included in the following year's weatherization fund payment after the evaluation is completed. If additional funds are expected to be needed to perform the second evaluation, the Stakeholder Group may request Ameren Missouri Gas or Laclede to supplement the funds provided by Ameren Missouri electric to hire the EM & V contractor. This agreement does not obligate Ameren Missouri Gas or Laclede to provide supplemental funds, and any such provision of supplemental funding by either entity would be entirely at the discretion of that entity.
19	Q.	Does Dr. Warren agree with continuing the evaluations of the Low
20	Income Wea	atherization program as described above?
21	А.	No. He agrees with the funding of evaluations, but would like to move the
22	evaluation to	a 5-year rather than a 2-year cycle. On page 138 of the Report, Dr. Warren
23		
23	states:	
24	states:	2) That Ameren Missouri continue to collect \$1.2 million in
24 25	states:	rates annually, of which \$1.14 million will be for low-
24 25 26	states:	rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the
24 25 26 27	states:	rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually
24 25 26 27 28	states:	rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization
24 25 26 27 28 29	states:	rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization program if determined by the Ameren Missouri
24 25 26 27 28	states:	rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization
24 25 26 27 28 29		rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization program if determined by the Ameren Missouri
24 25 26 27 28 29 30		rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization program if determined by the Ameren Missouri stakeholders to be appropriate; the continues on page 139:
24 25 26 27 28 29 30 31		rates annually, of which \$1.14 million will be for low- income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization program if determined by the Ameren Missouri stakeholders to be appropriate;
24 25 26 27 28 29 30 31 32		 rates annually, of which \$1.14 million will be for low-income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization program if determined by the Ameren Missouri stakeholders to be appropriate; he continues on page 139: 4) That the timing of any evaluation subsequent to the second biennial evaluation should be at the discretion of the
24 25 26 27 28 29 30 31 31 32 33		 rates annually, of which \$1.14 million will be for low-income weatherization as currently allocated between the Weatherization Agencies, and \$60,000 allocated annually to the biennial evaluation of the low-income weatherization program if determined by the Ameren Missouri stakeholders to be appropriate; 4) That the timing of any evaluation subsequent to the

1	Q.	What is the purpose of conducting future evaluations?
2	А.	The S&A clearly spells out the purpose of the evaluations. Paragraph 2
3	states:	
4 5 6 7 8 9		This evaluation will estimate both the electric and natural gas savings realized by Ameren Missouri electric customers who use natural gas supplied by either Ameren Missouri or Laclede for space heating. It will also include an evaluation of the effect of weatherization on participants' ability to pay gas and electric bills and on the customers' arrearages.
10	In add	lition, paragraph 3 includes the cost effectiveness component, as follows:
11 12		The second evaluation will include an assessment of cost effectiveness.
13	While	I agree that program evaluation funding is important, it is for the purpose
14	of obtaining <i>i</i>	useful and routine evaluations of the program. Accordingly, I disagree with
15	Staff's recor	nmendation to discontinue biennial evaluations in favor of a 5-year
16	evaluation. F	For evaluations to be meaningful, there must be a reasonable interval within
17	which the rec	commendations can be incorporated into the program. Five years is simply
18	too long, and	diminishes the value of performing evaluations in the first place. Problems
19	with the prog	ram would remain for five full years, and continuous improvements cannot
20	be made to r	refine the program to meet participant needs and achieve energy savings.
21	Continuing th	ne biennial evaluation will ensure customer funds are being utilized in the
22	most appropr	iate way and checks and balances are in place to monitor the program and
23	improve the e	energy savings results. This is not possible without on-going evaluations.
24	Q.	Have past evaluations of this program provided information to meet
25	these require	ements?

A. Yes. The evaluation process for this program has evolved and improved over the last few years. The third evaluation is just starting and with the input from the

regulatory stakeholder group, twelve evaluation objectives will be addressed by the thirdparty evaluator. Of these twelve objectives, eight are new, which will provide the Company, DE and other stakeholders with valuable information to improve the program process and impact results to better utilize customers funds. After working with DE to implement appropriate changes, on-going evaluations will be needed to analyze and document the benefits and identify opportunities for future improvements.

7

Q. When was the Low Income Weatherization Program first evaluated?

8 A. I was part of the regulatory stakeholder group that agreed to complete the 9 first evaluation of the Low Income Weatherization program. It was completed by 10 Apprise in December 2009 ("Apprise Evaluation").

11 Q. Did the Apprise Evaluation make any recommendations to improve 12 the program?

A. Yes. The Apprise Evaluation included fourteen recommendations in four
areas: program management, weatherization staff training, impact and satisfaction.

15

Q. Has DE fully implemented all of these improvements?

A. No, according to the 2012 evaluation conducted by The Cadmus Group ("Cadmus Evaluation"), several of the Apprise Evaluation recommendations have not been fully implemented. One of the Cadmus Evaluation recommendations included in the Apprise Evaluation is a concern to the evaluation of the Program is the tracking database.

While DE did develop a new Missouri weather assistance program database, data collected in it is so limited that the ability to conduct the most recent evaluation was negatively impacted.

1 Q. What problems were caused by the fact that the database was not 2 fully implemented?

3 A. While DE did secure a new database system as recommended in the 4 Apprise Evaluation, measure level detail was not collected and recorded in the new 5 database system. The lack of this data negatively impacted the 2012 evaluation to the 6 extent that the scope of the Cadmus Evaluation needed to be reduced from the original 7 evaluation plan. Cadmus anticipated having specific data on measures that were installed 8 at each participant's home, similar to the level of detail they see in the databases for other 9 Ameren Missouri energy efficiency programs. When Cadmus learned that the anticipated 10 level of detail was not available, they had to eliminate their plan to develop measure level 11 savings and Total Resource Cost ("TRC") results. This significantly reduced the quality 12 of the impact results, because the cost effectiveness of individual measures could not be 13 determined. This is particularly concerning given the fact that the low income program is 14 only evaluated every two years rather than annually. With good data, improvements can 15 be identified, and if followed, higher energy savings can be achieved.

Q. Did Cadmus make other recommendations in its evaluation report that were similar to the recommendations found in the Apprise Evaluation?

A. Yes. Cadmus made a total of seven recommendations and the following
recommendations are similar to the 2009 Apprise Evaluation recommendations:

- Increasing Ameren Missouri sponsorship awareness through leave-behind
 materials;
- Developing Ameren Missouri-specific Low Income Weatherization
 Program funding guidelines that complement the existing federal

- guidelines and allow CAAs to more comprehensively serve participants, 1 2 thereby achieving greater savings; 3 Collaboratively assessing the potential addition of new electric measures; ٠ 4 Tracking and electronically reporting measure-specific details for all 5 participants; 6 • Tracking and electronically reporting previously inoperable heating or 7 cooling units, as well as those that were replaced rather than tuned-up. 8 Q. Does Ameren Missouri agree with these recommendations? 9 A. Yes, it does. Ameren Missouri developed educational energy efficiency 10 program materials for customers and would like to work with DE to evaluate potential 11 electric measures that may be included in the Low Income Weatherization Program in the 12 future. Ameren Missouri also supports the recommendation for improvements to the 13 database to assist in future evaluation efforts. Were there any other results in that evaluation report that you would 14 Q. like to discuss? 15 16 A. Yes. Other results included: 17 Participants in the program saw an average energy savings of 12%; • 18 The average number of disconnects for participants in the program • 19 declined by 133%. 20 This type of information is needed to show the evaluated results and benefits of
- the program.

1	Q.	What is the status of the second evaluation identified in the S&A?
2	А.	After extensive input with the regulatory stakeholder group, Ameren
3	Missouri issu	ed a Request for Proposals on October 31, 2014 and subsequently received
4	eight bids.	Ameren Missouri is currently negotiating with the selected bidder on the
5	Statement of	Work and expects work to begin on the evaluation in January and have a
6	final report b	y July 31, 2015, in accordance with the S&A.
7	Q.	Does Ameren Missouri expect to learn anything new in this evaluation
8	or is this sim	ply a repeat of previous evaluations?
9	А.	Yes, we do expect to receive new information with this evaluation. In
10	addition to th	ne previous evaluation process, cost effectiveness and billing analysis, there
11	are several ne	ew objectives to the current evaluation which are:
12	•	The evaluator will receive billing data and avoided costs from Laclede
13		Gas Company, allowing a more comprehensive cost effective analysis and
14		customer bill payment analysis since many of the measures included in the
15		Low Income Weatherization Program are building shell measures that
16		save both electricity and gas;
17	•	The evaluator will be able to conduct a measure level analysis by
18		accessing data directly from the NEAT audit tool used by the Community
19		Action Agencies;
20	•	The evaluator will compare the traditional utility cost effectiveness results
21		to the Savings to Investment Ratio ("SIR") used by the audit tool and
22		explain the differences;

	•	The evaluator will examine the split between gas and electric spending
2		and determine if this split is appropriate based upon program savings;
3	•	The evaluator will discuss the non-energy benefits of the program;
4	•	The evaluator will elicit feedback from sub-grantees on program design;
5	•	The evaluator will receive comments from the regulatory stakeholders
6		prior to issuing the final report.
7	Q.	Are the previous issues experienced with the database expected to be
8	an issue for t	this evaluation?
9	А.	Yes, the current status of the database is expected to be an issue. DE has
10	expressed to	Ameren Missouri that no changes have been made to the database as a result
11	of the last ev	aluation. The only recent upgrade has been to attach the audit reports as a
12	pdf file attac	hment in the database, but this enhancement was already being developed
13	when Cadmu	s evaluated the program.

1	Q. Do low income programs have the same cost effectiveness
2	requirements as other energy efficiency programs undertaken pursuant to the
3	Missouri Energy Efficiency Investment Act ("MEEIA")?
4	A. No, they do not. While this program is not a MEEIA program, the
5	MEEIA program offers a point of comparison. Low Income Weatherization programs do
6	not have the same requirement to be cost effective as other energy efficiency programs
7	such as MEEIA, and I am not advocating the DE Weatherization Program be required to
8	meet strict cost-effectiveness tests. Nonetheless, they should be developed to be as cost
9	effective as possible, and evaluations can help achieve this end.
10	Even without requirements for cost effectiveness, Ameren Missouri believes its
11	customers' money should still be spent in an effort to get the most savings for customers.
12	There is a vast difference between a program that has a non-cost-effective TRC of .8 to .9
13	and one that has a TRC of .1 to .2. To continue running a program with an extremely low
14	TRC without attempting to make program improvements would not be advisable.
15	Q. Are there any other reasons to calculate cost effectiveness?
16	A. Yes, if the cost effectiveness of specific measures can be determined, the
17	best mix of measures can be determined. There is a limited amount of funds that can be
18	spent on each home, so it makes sense to spend those funds on the measures most
19	beneficial to the homeowner.
20	Q. You mentioned one of the new evaluation objectives is that the
21	evaluator will compare the traditional utility cost effectiveness results to the SIR
22	

22 used by the audit tool. How is this cost effectiveness test different?

1	A. The Saving to Investment Ratio is the ratio of the present value of an
2	energy saving stream with respect to the present value of the cost of making the energy
3	efficiency improvements. According to the U.S. Department of Energy explanation of
4	the audit tools, the SIRs are calculated using fuel costs and installation costs
5	representative of the home and agency. This means they are the retail rates the customer
6	pays, whereas the energy savings stream of the TRC is based upon the utility's avoided
7	cost, which is typically lower than retail rates. The SIR also does not include the
8	administrative cost of running the program, while the TRC includes all costs. A measure
9	can pass the SIR, but not pass the TRC test.
10	IV. <u>Response to DE</u>
11	Q. Do you agree with Mr. Buchanan's assessment that evaluations of the
12	Low Income Weatherization Program should be discontinued after the July 31, 2015
12 13	Low Income Weatherization Program should be discontinued after the July 31, 2015 evaluation?
13	evaluation?
13 14	evaluation?A. No, I do not. Mr. Buchanan's main argument is that the funds used to pay
13 14 15	evaluation? A. No, I do not. Mr. Buchanan's main argument is that the funds used to pay for the evaluation could have been used to pay for weatherization of more homes. The
13 14 15 16	evaluation? A. No, I do not. Mr. Buchanan's main argument is that the funds used to pay for the evaluation could have been used to pay for weatherization of more homes. The \$60,000 annually set aside for evaluation would translate to eighteen additional homes
13 14 15 16 17	evaluation? A. No, I do not. Mr. Buchanan's main argument is that the funds used to pay for the evaluation could have been used to pay for weatherization of more homes. The \$60,000 annually set aside for evaluation would translate to eighteen additional homes based upon an average cost per home of \$3,196.77 from the Low Income Weatherization
 13 14 15 16 17 18 	evaluation? A. No, I do not. Mr. Buchanan's main argument is that the funds used to pay for the evaluation could have been used to pay for weatherization of more homes. The \$60,000 annually set aside for evaluation would translate to eighteen additional homes based upon an average cost per home of \$3,196.77 from the Low Income Weatherization 2014 third quarter report provided by DE at the most recent stakeholder meeting. Mr.
 13 14 15 16 17 18 19 	evaluation? A. No, I do not. Mr. Buchanan's main argument is that the funds used to pay for the evaluation could have been used to pay for weatherization of more homes. The \$60,000 annually set aside for evaluation would translate to eighteen additional homes based upon an average cost per home of \$3,196.77 from the Low Income Weatherization 2014 third quarter report provided by DE at the most recent stakeholder meeting. Mr. Buchanan states on page 10 of his testimony that the average cost of a home being
 13 14 15 16 17 18 19 20 	evaluation? A. No, I do not. Mr. Buchanan's main argument is that the funds used to pay for the evaluation could have been used to pay for weatherization of more homes. The \$60,000 annually set aside for evaluation would translate to eighteen additional homes based upon an average cost per home of \$3,196.77 from the Low Income Weatherization 2014 third quarter report provided by DE at the most recent stakeholder meeting. Mr. Buchanan states on page 10 of his testimony that the average cost of a home being weatherized is only \$2,000 rather than the \$3,196.77 in the DE 2013 third quarter report.

received without periodic evaluations. In addition, Ameren Missouri will release any
 funds collected for evaluation that are not spent back to DE to weatherize low income
 homes. This amount is expected to be approximately \$24,000 in 2015, which will
 weatherize seven additional homes.

5

6

Q. Does Mr. Buchanan give any other reasons why future evaluations of the Low Income Weatherization Program should be discontinued?

7 A. Yes. Mr. Buchanan states that biennial evaluations do not give DE 8 enough time to implement changes. I disagree. Ameren Missouri implements its MEEIA 9 programs on a 3-year cycle with an annual evaluation. Ameren Missouri and its 10 implementers make program design changes on at least an annual basis and occasionally 11 more often, as conditions warrant. There is no reason why DE cannot implement changes 12 within a 2-year period. Important changes that were recommended as far back as 2009 13 have still not been implemented. In contrast to Mr. Buchanan's recommendation to 14 terminate evaluations of the programs, I would recommend that adherence to evaluation 15 recommendations be monitored and the implementation of those recommendations be 16 considered in future rate cases, when this program and its funding are at issue.

17

Q. What was Mr. Buchanan's final reason for discontinuing evaluations?

A. Mr. Buchanan states that the biennial evaluation addresses only one of four utility funded weatherization programs administered by DE. While this is true, unless DE is willing to commit to a thorough evaluation of the entire low income weatherization process in Missouri, the best and most appropriate thing Ameren Missouri can do is to evaluate the program that is funded by its customers. The Company has committed substantial funding to this program over the last several years, and the

1 associated expenses have been included in rates paid by customers. The 2015 evaluation 2 will attempt to include all funding sources and all energy savings, including gas and 3 electric, for those homes served by Ameren Missouri electricity that receive 4 weatherization through the program. In addition, Ameren Missouri has received a 5 commitment from one of the other utilities, Laclede Gas Company, which has been 6 participating in the current evaluation design calls, to provide the data needed to analyze 7 gas savings.

8 Q. Why do you believe this program should continue to be evaluated 9 periodically?

10 A. The evaluation that is expected to be completed by July 31, 2015 will be 11 the most in-depth evaluation completed to date. As such, it can be expected to have more 12 detailed recommendations to improve the program. If DE implements at least some of 13 those recommendations, it will be beneficial to conduct a future evaluation to determine 14 the impact of those changes on the program. Ameren Missouri, its customers, and the 15 participants in the weatherization program all have a shared interest in improving 16 effectiveness of the money spent to administer this program. We cannot achieve that end, 17 however, if we do not evaluate the performance of the program at some reasonable 18 interval.

19

Q. How often do you believe evaluations should be conducted?

A. The current schedule of every two years is appropriate. This gives DE and Community Action Agencies sufficient time to implement recommended changes before the next evaluation to determine the effectiveness of these changes. As previously stated,

Ameren Missouri's MEEIA programs are evaluated and program improvements are
 implemented every year.

3 Q. Do you agree with Mr. Buchanan that tariff sheet 175 needs to be 4 updated?

- A. Yes, with respect to changing the name of Missouri Department of Natural Resources to Division of Energy in paragraph 1 and updating the date of the next evaluation, but I do not agree with removing paragraph 5 which describes the evaluation process.
- 9 Q. Does this conclude your rebuttal testimony?
- 10 A. Yes, it does.

BEFORE THE PUBLIC SERVICE COMMISSION OF THE STATE OF MISSOURI

)

In the Matter of Union Electric Company d/b/a Ameren Missouri's Tariffs to Increase Its Revenues for Electric Service.

Case No. ER-2014-0258

AFFIDAVIT OF GREGORY W. LOVETT

STATE OF MISSOURI)) ss

CITY OF ST. LOUIS

Gregory W. Lovett, being first duly sworn on his oath, states:

)

1. My name is Gregory W. Lovett. I work in the City of St. Louis, Missouri, and I am employed by Union Electric Company d/b/a Ameren Missouri as Manager, Energy Efficiency.

Attached hereto and made a part hereof for all purposes is my Rebuttal 2.

Testimony on behalf of Union Electric Company d/b/a Ameren Missouri consisting of

15 pages, and Schedule(s) N/A , all of which have been

prepared in written form for introduction into evidence in the above-referenced docket.

3. I hereby swear and affirm that my answers contained in the attached testimony to the questions therein propounded are true and correct.

Gregory W. Lovett

Subscribed and sworn to before me this $\frac{16^{44}}{16^{44}}$ day of <u>Annuary</u>, 2015.
