3 **KAREN LYONS**

4 **KANSAS CITY POWER & LIGHT COMPANY**

5 **Great Plains Energy, Incorporated**

6 **CASE NO. ER-2012-0174**

7 Q. Please state your name and business address.

8 A. Karen Lyons, Fletcher Daniels State Office Building, Room G8, 615 East 13th
9 Street, Kansas City, Missouri 64106.

10 Q. By whom are you employed and in what capacity?

11 A. I am a Utility Regulatory Auditor with the Missouri Public Service
12 Commission (Commission or PSC).

13 Q. Are you the same Karen Lyons who has previously provided testimony in
14 this case?

15 A. Yes. I previously contributed to Staff's Cost of Service report and Rebuttal
16 Testimony in Case No. ER-2012-0174, for the Kansas City Power & Light Company (KCPL)
17 rate case and I also contributed to Staff's Cost of Service report and Rebuttal Testimony in the
18 KCP&L Greater Missouri Operations Company (GMO) rate case addressing the rate districts
19 GMO-MPS and GMO-L&P in Case No. ER-2012-0175.

20 Q. What is the purpose of your surrebuttal testimony in this proceeding?

21 A. I am responding to several KCPL witnesses addressing the following issues,
22 Bad Debt factor-up, Property Tax Tracker, Renewable Energy Standard costs, Revenue
23 growth, Hawthorn 5 SCR and Transformer costs, and finally miscellaneous items.

1 **EXECUTIVE SUMMARY**

2 Q. Please summarize Staff's position with regard to the bad debt factor up?

3 A. In this testimony, I respond to KCPL's request to recover bad debt expense in
4 excess of the annualized level of bad debt expense calculated in this case. I explain Staff's
5 recommendation that KCPL not be allowed to recover bad debt expense at a level that
6 includes the full impact of the revenue requirement increase in this rate case. KCPL's request
7 to include an adjustment for bad debt expense associated with the revenue requirement
8 increase (or decrease) is commonly referred to as bad debt "factor up" or bad debt "gross up."

9 KCPL's rationale for making this request is based on an assumption that completely
10 lacks any factual evidence to support their assumption. On the other hand, Staff has analyzed
11 KCPL's own historical Missouri retail revenues and net write-offs to determine if a direct and
12 proportional relationship exists with Missouri retail revenues and bad debt expense. Staff's
13 analysis of the actual net write-offs as compared to related revenues is displayed in Staff's
14 charts and graphs, where such charts and graphs show the bad debt expense sometimes moves
15 in the opposite direction that retail revenues move, or the data illustrates that bad debt and
16 revenues do not have a direct relationship nor do they move in direct proportion when levels
17 of rates and revenues increase. Staff recommends that the Commission deny KCPL's request
18 to adopt KCPL's proposed bad debt "factor up" for bad debts. However, in the event that the
19 Commission does grant KCPL's request to "factor up" bad debt expense proportionate with
20 an increase in revenue requirement, then Staff recommends to also reflect in the bad debt
21 "factor-up" additional forfeited discounts (late payment fees) that will increase as result of the
22 rate increase.¹

¹ Lyons Rebuttal Testimony includes additional analysis on the relationship to Missouri retail revenues and forfeited discounts.

1 Q. Please summarize Staff's position with regard to the property tax tracker?

2 A. Property taxes are known and measurable costs that Staff and KCPL have used
3 the same methodology to calculate an annualized level of property tax expense to include in
4 KCPL's cost of service. In response to KCPL's request for a property tax tracker, in its
5 rebuttal testimony in this case, Staff explained that any increase in property taxes is
6 attributable to the additions of substantial plant over the last several years. In this testimony,
7 Staff will show that 2010-2011 tax levies in the State of Missouri have both decreased and
8 increased in Missouri counties. The same can be said for Missouri assessments. Trackers are
9 typically used for costs that are unpredictable or there are extraordinary circumstances
10 surrounding the costs. Property taxes are neither unpredictable nor extraordinary. Staff
11 recommends the Commission deny KCPL's request for a property tax tracker.

12 Q. Please summarize Staff's position with regard to the Renewable Energy
13 Standard costs?

14 A. Staff recommends reflecting in KCPL's cost of service an annualized level of
15 RES expenditures over the twelve month period ending March 31, 2012, updated through
16 August 31, 2012, to be included in rates. In addition Staff recommends a three (3) year
17 amortization of deferred RES costs with no rate base treatment. KCPL is requesting rate base
18 treatment for the unamortized balance. In addition to providing several reasons as to why the
19 Commission should deny KCPL rate base treatment for the RES costs in my rebuttal
20 testimony in this case, including an annualized level of RES costs is another example of why
21 RES costs should not be included in rate base. The inclusion of an annualized level of RES
22 costs allows KCPL to recover these costs sooner than deferring and amortizing the costs.

1 Staff recommends the Commission deny KCPL's request to include any unamortized balance
2 of RES costs in rate base.

3 Q. Please summarize Staff's position with regard to the Retail Revenues?

4 A. Staff includes customer growth revenues as part of Staff's weather normalized
5 revenues which is included in Staff's calculation of KCPL's revenue requirement. As part of
6 the audit process, Staff reviews all customer classes with the exception of the Large Power
7 group, to determine if there are increases or decreases in each of the classes and whether a
8 growth adjustment should be calculated. Although Staff has been consistent when calculating
9 KCPL's customer growth in KCPL's past rate cases, KCPL brought to Staff's attention some
10 concerns with the number of classes in Staff's customer growth analysis. As a result of
11 internal Staff discussions, Staff agrees with KCPL and will update the number of classes
12 included in Staff's customer growth adjustment consistent with KCPL.

13 Q. Please summarize Staff's position with regard to the Hawthorn 5 SCR costs?

14 A. Since 2004, KCPL customers have paid for SCR costs related to lower
15 performance standards accepted by KCPL. This issue is similar to the issue presented to the
16 Commission in 2009 and 2010 in that the problem of increased costs has not changed. The
17 difference is in 2009 and 2010, Staff recommended a reduction to rate base for the amount of
18 a settlement KCPL received from the manufacturer. The Commission ordered in Case No.
19 ER-2010-0355 that KCPL's rate base should not be reduced by the settlement. Staff treated
20 the settlement as ordered by the Commission. The problem is KCPL customers are still
21 paying for increased capital, O&M, and fuel costs based on lower performance standards but
22 yet the customers are paying a premium price for the SCR based on the original contract.
23 Staff's position is if KCPL customers are paying for a piece of equipment at the original

1 contract price, then the customers should only pay the costs associated with the
2 original performance standards. Based on this concept, Staff made adjustments to KCPL's
3 cost of service for increased catalyst replacements, increased ammonia costs, and increased
4 fuel costs.

5 Q. Please summarize Staff's position with regard to the Hawthorn 5
6 Transformer costs?

7 A. Similar to the Hawthorn SCR issue described above, KCPL customers have
8 paid and are still paying for costs related to the Hawthorn 5 transformer failure in 2005. In
9 the 2009 and 2010 KCPL rate cases, the Staff recommended the reduction of KCPL's rate
10 base for the amount of a settlement KCPL received from the transformer manufacturer. As
11 with the Hawthorn SCR, the Commission ordered that KCPL's rate base should not be
12 reduced. Staff treated the settlement in this case as the Commission ordered. KCPL
13 customers are still paying for increased costs associated with the transformer failure that
14 include increased capital and fuel costs. As a result, Staff adjusted KCPL's outage rate for the
15 Hawthorn 5 generating unit, which in effect reduces KCPL's fuel expense in this case.

16 **BAD DEBT EXPENSE**

17 Q. What is the purpose of this section of your surrebuttal testimony?

18 A. I am responding to KCPL witness John P. Weisensee's rebuttal testimony,
19 addressing KCPL's request to "gross up" or "factor up" bad debt expense by including a level
20 of bad debt expense associated with the revenue requirement increase granted in this rate case.

21 Q. What is Staff's recommendation with regard to a bad debt "factor up"?

22 A. As discussed in detail in my rebuttal testimony in this case, Staff recommends
23 the Commission deny KCPL's request to "factor up" bad debt expense associated with the

1 ordered revenue requirement increase in this case. Included in my rebuttal testimony in this
2 case, Schedules KL-1A, KL-1B, and KL-1C, are analyses of KCPL's historical Missouri
3 retail revenues and bad debt expense, both net of gross receipts tax. Theoretically, KCPL's
4 request appears reasonable. However, upon analyzing KCPL's historical retail revenues and
5 bad debt expense, the theory simply does not hold true and, as a result, is no more than an
6 assumption. In my rebuttal testimony for this case, I provide a historical analysis for the
7 period of 2005-2011 that also includes examples of KCPL's highest revenue producing
8 months, June through September, and the corresponding bad debt expense for these months.
9 The analysis does not validate KCPL's assumption that bad debt expense will increase with
10 any additional revenue requirement, ordered by the Commission, in KCPL's previous rate
11 cases. Consequently, the same can be said for any additional revenue requirement ordered by
12 the Commission in this rate case.

13 Q. Please explain KCPL's position with the bad debt "factor up"?

14 A. Mr. Wiesensee states in his rebuttal testimony on page 6, lines 14-17
15 and 21-22:

16 This is an issue that has been discussed in several recent KCP&L rate
17 cases, and which was decided by this Commission in the Company's
18 favor in Case No. ER-2006-0314 ("2006 Case"). KCP&L again
19 proposes that the bad debt expense built into rates in this case include
20 bad debts related to the revenue increase in this case.

21 ...

22 It is logical and intuitive that increased revenue will result in increased
23 bad debt write offs, assuming all other factors remain constant.
24 (emphasis added)

25 Q. Do you agree with Mr. Wiesensee's statement, "It is logical and intuitive that
26 increased revenue will result in increased bad debt write offs."?

1 A. Yes. As discussed above, the assumption that bad debt expense will increase
2 as revenues increase appears to be theoretically logical. However, after analyzing KCPL's
3 historical Missouri retail revenues and bad debts, the facts do not support KCPL's
4 recommendation. KCPL has suggested the Commission ignore the facts and base its decision
5 on an assumption.

6 Q. Has KCPL provided any evidence supporting its recommendation to include
7 an additional level of bad debt expense associated with the revenue requirement ordered in
8 this case?

9 A. No. KCPL has not provided any analysis to support the inclusion of a level of
10 bad debt expense related to the revenue increase in this case. Mr. Weisensee's sole argument
11 is based on the assumption that bad debt expense will increase as it relates to a rate increase,
12 "assuming all other factors remain constant."² This statement is just another assumption
13 KCPL uses in its recommendation. First KCPL makes the assumption that bad debt expense
14 will increase with the additional revenue requirement ordered in this case, and then KCPL
15 makes the assumption that all other factors remain constant. Staff has provided the analysis to
16 contradict the first assumption and there is simply no evidence to support that all other factors
17 remain constant. Mr. Weisensee confirms this in his rebuttal testimony where he states, "The
18 economy could improve dramatically, resulting in overall bad debt write-offs not increasing,
19 but no one can predict those events."³

20 Q. Did the Commission Order in Case No. ER-2006-0314 support KCPL's
21 position related to the bad debt "factor up"?

² Weisensee Rebuttal Testimony in Case No. ER-2012-0174, Page 7.

³ Weisensee Rebuttal Testimony in Case No. ER-2012-0174, Page 7.

1 A. Yes. On page 63 of the Commission Order in Case No. ER-2006-0314, the
2 Commission states,

3 The Commission finds that the competent and substantial evidence
4 supports KCPL's position, and finds this issue in favor of KCPL. The
5 Commission understands Staff's argument that there is not a perfect
6 positive correlation between retail sales and the percentage of bad
7 debts. While it's possible that KCPL's bad debt expense could
8 decrease, the Commission finds it more probable, and therefore just and
9 reasonable, that an increase in the amount of revenue that KCPL is
10 allowed to collect from its Missouri retail ratepayers will result in a
11 corresponding increase in bad debt expense.

12 Q. Are there additional facts supporting Staff's position that were not presented to
13 the Commission in KCPL's 2006 rate case?

14 A. Yes. During the 2006 rate case, Staff analyzed Missouri retail revenues and
15 bad debt expense for the period of 2000-2005, prior to KCPL's rate cases associated with the
16 regulatory plan. The comparison of Missouri retail revenue and net write-offs for the period
17 of 2000-2006 is attached to this surrebuttal testimony as Schedule KL-SUR-1. At the time of
18 the 2006 KCPL rate case, Staff did not have any KCPL historical data, subsequent to any
19 KCPL rate case, to analyze. Staff's analysis of Missouri retail revenue and bad debt expense
20 for the period of 2000-2005 confirmed that no direct relationship existed between retail
21 revenues and bad debt. However, since Staff did not have data subsequent to a KCPL rate
22 case, it was difficult to prove additional revenue requirement would not have a direct
23 proportional effect on bad debt expense for the 2006 KCPL rate case. Conversely, since the
24 2006 KCPL rate case, KCPL ratepayers have experienced four rate increases; and
25 accordingly, Staff has historical data to analyze the relationship between Missouri retail
26 revenues and bad debt expense. The rate cases and the effective date of rates, for each rate
27 case, are provided in the table below.

1

Case Number	Test Year	Update Period	True-Up Period	Effective Date of Rates
ER-2006-0314	Calendar Year 2005	June 30, 2006	September 30, 2006	January 1, 2007
ER-2007-0291	Calendar Year 2006	March 31, 2007	September 30, 2007	January 1, 2008
ER-2009-0089	Calendar Year 2007	September 30, 2008	March 31, 2009	September 1, 2009
ER-2010-0355	Calendar Year 2010	June 30, 2010	December 31, 2010	May 4, 2012

2

3

Q. What is the significance of KCPL's rate cases following the 2006 rate case?

4

A. As discussed above and in my rebuttal testimony in this case, Staff provided examples of KCPL's highest revenue producing months (June through September), which included the months subsequent to a KCPL rate increase, to determine if a relationship of increased revenues results in increased bad debts. Staff determined there was no direct relationship between revenues and bad debts. In addition, Staff analyzed KCPL's historical Missouri retail revenues and bad debt expense for the twelve (12) month period directly following a rate increase. In other words, Staff analyzed the data for the twelve (12) month period ending December 31, 2007, (2006 rate case, effective date of rates January 1, 2007), twelve (12) month period ending December 31, 2008, (2007 rate case, effective date of rates January 1, 2008), twelve (12) month period ending August 31, 2010 (2009 rate case, effective date of rates, September 1, 2009), and finally, the eight (8) month period ending December 31, 2011 (2010 rate case, effective date of rates, May 4, 2011).⁴

16

Q. What did Staff conclude from the results of its analysis?

17

A. Similar to Staff's analysis of KCPL historical Missouri retail revenues and bad debt for the period of 2000-2005, the period of 2005-2011 and during the summer peaking

18

⁴ To be consistent with the 6-month lag of when KCPL receives revenues and when the bad debt associated with the revenues are realized, Staff reviewed data through December 2011.

1 months, Staff concluded that bad debt expense did not have a proportionally direct
2 relationship to revenues. Approximately half of the data reviewed by Staff indicated that
3 there was no direct correlation or proportionate relationship between Missouri retail revenues
4 and bad debt expense. That is, while electric revenues increased (or decreased), actual bad
5 debt write-offs tend to decrease (or increase) by different amounts and in different directions.
6 Even in situations where revenues and bad debts tend to move in the same direction, Staff
7 observed that they were either increased or decreased by different and disproportionate
8 amounts. Again, this situation does not, in any way, support KCPL's assumption that bad
9 debt write-offs have a proportional relationship to retail revenues.

10 Q. Finally, does any other party oppose KCPL's recommendation to include an
11 additional level of bad debt expense related to the revenue requirement filed in this case?

12 A. Yes. MIEC's and MECG's witness Greg Meyer opposes KCPL's
13 recommendation for the bad debt "factor up." In addition to providing data for the period of
14 2007 through 2010, which confirms no direct correlation between increased retail revenues
15 and bad debt expense, Mr. Meyer opposes the bad debt "factor up" because it goes beyond the
16 True-Up period in this case. Mr. Meyer's states:

17 Considering the effective date of rates and the six-month lag between
18 revenues and write-offs, the adjustment proposed by KCPL will not be
19 fully recognized on the books of KCPL until June 2014. This is 22
20 months beyond the true-up date of August 31, 2012 in this case.
21 KCPL's proposed adjustment is also 18 months beyond the operation
22 of law date. Effective, KCPL is attempting to collect rates for bad debt
23 that won't fully be realized for another 18 months. The adjustment
24 clearly violates the test year concept of a rate case whereby all relevant
25 factors are analyzed to a consistent point and time.⁵
26 (Emphasis Added)

⁵Meyer Direct Testimony in Case No. ER-2012-0174

1 Q. Does Staff agree with Mr. Meyers?

2 A. Yes.

3 Q. Please summarize Staff's recommendation?

4 A. Staff recommends the Commission deny KCPL's request to include an
5 additional level of bad debt expense related to any revenue increase ordered in this case. Staff
6 provided several examples, based on KCPL's own historical Missouri retail revenues and bad
7 debt expense, which confirm there is no correlation between increased revenues and bad debt
8 expense. Based on Staff's analysis of retail revenues and bad debt expense for the period
9 of 2000-2005, which is the period of years prior to any KCPL rate cases, and for the period of
10 2006-2011, which is the period of years subsequent to KCPL rate cases, Staff concluded that
11 the relationship of increased revenues and bad debts are not proportionally related nor exhibit
12 a direct correlation. In other words, even though KCPL has increased its rates four times
13 since 2006, the relationship between increased revenues and bad debt expense was the same
14 prior to 2006 when no revenue increase existed as a result of a rate case. Therefore, KCPL's
15 assumption that bad debts will increase dollar for dollar with additional revenue ordered in
16 this case is simply not true. However, in the event that the Commission does grant KCPL's
17 request to "factor-up" bad debt expense proportionate with an increase in revenue
18 requirement, then Staff recommends to also reflect in the bad debt "factor-up" additional
19 forfeited discounts (late payment fees) that will increase as result of the rate increase.

20 **PROPERTY TAX TRACKER**

21 Q. What is the purpose of this section of your surrebuttal testimony?

22 A. I am responding to KCPL witness Darrin R. Ives rebuttal testimony addressing
23 KCPL's request for a property tax tracker.

1 Q. Does Staff recommend implantation of a property tax tracker?

2 A. No, Staff does not recommend the Commission authorize KCPL to implement
3 a property tax tracker.

4 Q. What is your response to Mr. Ives' statement in his rebuttal testimony in this
5 case that:

6 ...property taxes are significant component of the Company's cost of
7 service and as the level of such taxes can and has changed significantly
8 from year to year with little control by the Company, it makes sense to
9 address such recovery through a defined mechanism such as a tracker.⁶

10 A. In this statement Mr. Ives disregards the predictability of property tax expense,
11 and he ignores that the cause of KCPL's recent increases in property tax expense – significant
12 new physical plant additions – are entirely within the control of KCPL.

13 Q. Why is the predictability of property tax expense relevant?

14 A. As explained in my rebuttal testimony in this case, a tracker should be used in
15 rare circumstances where it is extremely difficult to identify an amount of cost to be included
16 in rates. For example, I recommended the use of a tracker in Case No. ER-2010-0355 and
17 again in this case for operation and maintenance costs of Iatan 2. The recommendation of a
18 tracker was made because at the time Iatan 2 was placed in service, KCPL had limited
19 operational experience and no historical costs for Staff to determine an annualized level of
20 operation and maintenance expense. In this case, Iatan 2 will have operated for two (2) years.
21 Staff determined two (2) years is not an adequate period of time to recommend an annualized
22 level of operation and maintenance expense; and therefore, Staff recommended the
23 continuation of the tracker. Iatan 2 operation and maintenance expense is an unusual
24 circumstance as a result of limited operation experience and limited historical data. Unlike

⁶ Ives Rebuttal page 22, lines 7-12.

1 the Iatan 2 operation and maintenance expenses, property taxes are known and measurable
2 costs for which both KCPL and Staff have historically used the same method to calculate an
3 annualized level to include in rates.

4 Q. Why has KCPL's property tax expenses changed over the past several years?

5 A. KCPL's property tax expenses have increased due to KCPL's construction of
6 an entire new generation plant, and KCPL has significantly expanded its capital investment in
7 other plants. Although Staff agrees that property taxes have changed, Staff disagrees with the
8 reason for the change and changes in property tax expense are out of KCPL's control.
9 According to Mr. Ives rebuttal testimony on page 21,

10 What is certain is that the Company has little control over the actual
11 property tax valuations, the mill levy tax rates and thus the ultimate
12 property taxes to be paid. Property taxes are determined on an annual
13 basis and, due in part to budgetary issues of state and local
14 governments such taxes, can and have changed significantly over the
15 past several years...

16 Attached as Schedule KL-SUR-2 to this surrebuttal testimony, is a report on
17 Missouri's property taxes from the State Auditor's Office completed in December 2011.
18 Although the complete report is available, due to its voluminous nature, data supporting
19 KCPL's territory is attached to this surrebuttal testimony. The report shows that while some
20 counties' assessments and levies have increased, others have decreased or remained flat when
21 compared to 2010.

22 Q. How does KCPL have control over property tax expense?

23 A. First, KCPL has the ability to time its rate cases to ensure significant changes
24 to property taxes are captured in rates. Second, KCPL and other utilities have the right to
25 appeal property tax assessments to the State Tax Commission. For example, Ameren
26 Missouri appealed its 2010 property tax assessment from the State Tax Commission and

1 reached a settlement with the State Tax Commission in the summer of 2011, resulting in a
2 refund.⁷ If a situation were to occur similar to the issue previously described for Ameren
3 Missouri, KCPL would have no incentive to appeal its property assessments because a tracker
4 would allow KCPL to recover property tax expense through rates.

5 Q. Does KCPL have any planned plant additions that would cause an increase in
6 its taxable property in the near future?

7 A. No. As discussed in my rebuttal testimony in this case, Staff is unaware of any
8 future significant plant additions until 2015, the expected completion date of the
9 environmental equipment for the LaCygne generating unit.

10 Q. Please summarize Staff's position for a Property Tax Tracker.

11 A. Staff does not recommend that the Commission authorize KCPL to implement
12 the accounting for a property tax tracker. Property taxes are known and measurable costs that
13 KCPL and Staff have historically used the same methodology to calculate an annualized level
14 to include in rates. However, now KCPL requests and argues that a property tax tracker is
15 necessary because of increased property taxes of which they have no control. While Staff
16 agrees property taxes have increased, the increases are attributable to significant plant
17 additions over the last several years. Although KCPL wants the Commission to believe that
18 KCPL has no control over property taxes, this is simply not true. Establishing a property tax
19 tracker will remove any incentive KCPL has to reasonably appeal property taxes.

20 **RENEWABLE ENERGY STANDARDS**

21 Q. What is the purpose of this section of your surrebuttal testimony?

⁷ Gary S. Weiss Rebuttal Testimony, in Case No. ER-2012-0166.

1 A. This section of the testimony is to respond to the rebuttal testimony of KCPL
2 witness Tim M. Rush regarding KCPL's position on Staff's accounting treatment of the costs
3 associated with the Missouri Renewable Energy Standard (RES).

4 Q. Please summarize Staff's accounting treatment of the costs associated with
5 the RES?

6 A. Staff's recommendation, in this case, is to include all deferred costs, including
7 carrying costs, less the costs already recovered in rates, through the True-Up period,
8 August 31, 2012, with an amortization of these costs over a three (3) year period, with no rate
9 base treatment for the unamortized balance. In addition, Staff is recommending an annualized
10 level of RES costs to be included in KCPL's cost of service. Staff included an annualized
11 level of costs through March 31, 2012, and will continue to examine the costs through the
12 True-Up period, August 31, 2012.

13 Q. Why has Staff not included rate base treatment for RES costs?

14 A. In my rebuttal testimony in this case, pages 19-21, Staff identifies several
15 reasons why rate base treatment should not be accepted by the Commission. An additional
16 reason is that including an annualized level of RES costs in KCPL's cost of service allows
17 KCPL to recover the RES costs sooner than if all the costs were deferred and amortized.

18 Q. Does KCPL provide an explanation why deferred RES costs should be
19 included in rate base?

20 A. KCPL witness Rush states on page 30 of his rebuttal testimony,

21 "The primary objective of the RES is to increase the use of renewable
22 energy and thereby reduce future coal generation. Therefore, and
23 particularly as relates to solar renewable energy, the deferred RES costs
24 are similar in nature to deferred DSM costs. Since both the Staff and the
25 Company have consistently included deferred, unamortized DSM costs in

1 rate base, KCP&L has included deferred RES costs in rate base in this
2 rate case.”

3 Q. Does Staff agree with Mr. Rush’s recommendation?

4 A. No. Demand-Side Management (DSM) costs are different than RES costs
5 because DSM programs are designed to decrease the amount of energy a customer uses. A
6 reduction in demand or energy offsets the need for Company generation, which generation
7 typically earns a rate of return in rate base. However, the use of renewable energy does not
8 decrease the need of demand or energy, but alters the source of the energy. A company does
9 not have to suffer a loss in rate base from incurring RES expense.

10 Q. What is Staff’s recommended accounting treatment from the deferred RES
11 costs that KCPL has incurred through August 31?

12 A. In Mr. Rush’s rebuttal testimony at page 30, line 10, he identifies the
13 deferred RES cost balance as \$3.8 million as of March 31, 2012. At the time of this
14 surrebuttal testimony, the August balance is unknown. However, Staff will examine the RES
15 costs for the True-Up. Staff recommended, in its Cost of Service report filed in this case, on
16 August 2, 2012 and again in my rebuttal testimony filed on September 5, 2012, the deferred
17 costs through August 31, 2012 be amortized over a three (3) year period. The amortization
18 period of three (3) years is based on no rate base treatment. Staff’s recommendation of an
19 annualized level and a shorter amortization period than KCPL’s recommended five (5) years,
20 benefits KCPL by allowing a quicker recovery of these costs. If the Commission decides rate
21 base treatment for the deferred RES costs is appropriate then Staff recommends a longer
22 amortization period of six (6) years.

1 **RETAIL REVENUES**

2 Q. Please explain the issue related to KCPL retail revenues?

3 A. KCPL and Staff make customer growth adjustments to test year kWh sales and
4 rate revenue to reflect the additional kWh sales and rate revenue, that would have occurred if
5 the number of customers taking service at the end of the update period (March 31, 2012) and
6 at the end of the True-Up period (August 31, 2012) had existed throughout the entire test year.
7 KCPL witness George M. McCollister disagrees with the number of KCPL retail rate classes
8 Staff used to develop its customer growth adjustment.

9 Q. Did Staff calculate customer growth on all of KCPL's retail rate classes?

10 A. No. During the audit process for retail revenues, Staff reviews all retail
11 customer classes, with the exception of the Large Power group, to determine if there is a
12 significant change in the number of customers in each of KCPL's retail rate classes. Staff
13 looks for increases and decreases in each of the classes to determine if Staff should include
14 the class in its customer growth adjustment. For its direct case, Staff determined that KCPL
15 experienced a decrease in its overall growth in the number of its utility customers.

16 Q. Please explain why KCPL's Large Power class is not included in Staff's
17 customer growth adjustment for KCPL.

18 A. Large Power customer's energy consumption and revenue patterns vary
19 significantly across this group of customers, making it necessary to examine the history of
20 each customer on an individual basis. Staff witness Seoung Joun Won addresses the Large
21 Power revenue annualization on page 86 of Staff's Cost of Service report in this case.

22 Q. Has Staff been consistent with the method it uses to calculate KCPL's
23 customer growth in each of KCPL's rate cases beginning in 2006?

1 A. Yes. Staff's method of determining the appropriate level of customer growth,
2 (increase or decrease) is consistent in each of KCPL's rate cases beginning in 2006.

3 Q. Has Staff discussed KCPL's concern with its customer growth adjustment?

4 A. Yes. As a result of internal Staff discussions, Staff agrees with KCPL that all
5 retail rate classes should be included in the customer growth adjustment to accurately reflect
6 KCPL increase or decrease in customers. During the true-up in this case, Staff will include all
7 of KCPL's retail rate classes in its customer growth adjustment.

8 **HAWTHORN 5 SELECTIVE CATALYTIC REDUCTION**

9 Q. What is the purpose of this portion of your surrebuttal testimony?

10 A. I am responding to the rebuttal testimony of KCPL witnesses Darrel L.
11 Hensley addressing Staff's capital and fuel adjustments and Burton L. Crawford, addressing
12 Staff's fuel adjustments related to the performance standards of the Hawthorn 5 selective
13 catalytic reduction system (SCR).

14 Q. Is this the same Hawthorn 5 SCR issue presented by Staff in KCPL's 2006 and
15 2007 rate cases?

16 A. No. The Hawthorn 5 SCR issue presented by Staff in KCPL's 2006 and 2007
17 rates cases related to the insurance proceeds received by KCPL as a result of the February
18 1999 explosion of KCPL's coal-fired Hawthorn 5 generating unit and how the insurance
19 proceeds were treated. KCPL took the position in the 2006 and 2007 rates cases that its
20 customers did not pay for the purchase power costs as a result of the outages. Although the
21 circumstances that led to the outage and the purchase power costs were entirely different for
22 the Hawthorn 5 issue presented in the 2009 and 2010 cases and in this current rate case,
23 KCPL took the same position, used in the 2006 and 2007 rate cases, that KCPL customers

1 never paid for purchased power costs related to the Hawthorn SCR and Hawthorn transformer
2 that will be discussed later in this testimony.

3 Q. Is this the same Hawthorn 5 SCR issue presented by Staff in KCPL's 2009 and
4 2010 rate cases?

5 A. Although the performance of the SCR and the increased costs KCPL customers
6 continue to pay is the same, Staff's recommendation to resolve the issue has changed. The
7 issue presented by Staff in KCPL's 2009 and 2010 rate cases addressed the poor performance
8 of the Hawthorn 5 SCR that resulted in a dollar settlement negotiated with the contractor. The
9 boiler contract for the SCR had certain performance standards guaranteed to meet specific
10 contract standards by Babcock and Wilcox (B&W) at a specific contract price. This case
11 addresses the performance of the SCR and the increased costs KCPL has incurred and
12 ultimately KCPL customers will pay during the period rates in this case are in effect based on
13 the test year and update period for this case. The performance of the SCR has not changed in
14 that the SCR never met the original contract standards, yet KCPL customers are paying the
15 original contract price for the plant. And as a result of KCPL accepting lower performance
16 standards for the SCR, KCPL customers have paid and will continue over the life of the plant
17 to pay for increased costs for fuel, more frequent replacements of catalysts resulting in higher
18 capital and maintenance costs, and increased cleaning of the catalysts resulting in higher
19 maintenance costs.

20 Q. What was Staff's recommendation in the 2009 and 2010 rate cases?

21 A. In the 2009 and 2010 rate cases, Staff was attempting to align the original
22 contract price paid by KCPL customers to the lower performance standards accepted by
23 KCPL. Staff's recommendation in the 2009 and 2010 rate cases was to reduce KCPL's rate

1 base by the amount of the settlement proceeds KCPL received from B&W. KCPL received
2 the settlement from B&W based on what was described as an “unacceptable catalyst
3 performance issue.”⁸ KCPL should have offset the original contract price of the SCR by the
4 settlement amount to account for the lower performance standards and accurately reflect what
5 KCPL customers should be paying for the SCR. KCPL is allowed recovery of all its prudent
6 investments. For the Hawthorn 5 SCR and transformer, discussed later in this testimony,
7 KCPL is recovering costs for plant that it did not pay for. Listed below is the original contract
8 price of the SCR based on the guaranteed performance standards of B&W, the settlement
9 received from B&W, and the price KCPL customers should be paying based on the lower
10 performance standards of the SCR.

11 **

_____	_____
_____	_____
_____	_____

12 **

13 KCPL’s position in the last rate case was KCPL customers never paid for the costs
14 that KCPL claimed the settlement was intended to recover and therefore its customers were
15 not entitled to the settlement proceeds. This included the cost of replacement power and
16 additional ammonia expenses.⁹ Staff’s position in the 2009 and 2010 rate cases and continues
17 in this case is KCPL customers have paid and will continue to pay for increased costs
18 associated with the lower performance standards of the SCR including the purchase

⁸ Staff’s Cost of Service Report, Appendix 3, Schedule KL-2

⁹ KCPL witness Blanc surrebuttal testimony in Case No ER-2010-0355, Page 49, lines 7-18

1 power and ammonia costs that KCPL, in the 2009 and 2010 rate cases, claimed its customers
2 never paid.

3 Q. What is original cost?

4 A. The term “original cost,” as defined by the Electric Plant Instruction Section of
5 the FERC Uniform System of Accounts (“USOA”), relates to:

6 All amounts included in the accounts for electric plant acquired as an
7 operating unit or system, except as otherwise provided in the texts of
8 the intangible plant accounts, shall be stated at the cost incurred by the
9 person who first devoted the property to utility service. (Paragraph
10 15,052 of USOA).

11 As a result of B&W’s failure to meet the original contract price and the settlement KCPL
12 received from B&W, KCPL should have reduced the original cost of the SCR by the
13 settlement amount. As previously identified in the table above, the original price that KCPL
14 customers should be paying in rates is ** _____ **.

15 Q. Did the Commission decide the issue of how to treat the settlement proceeds in
16 Case No. ER-2010-0355?

17 A. Yes. In Case No. ER-2010-0355, the Commission ordered KCPL’s rate base
18 should not be reduced by the settlement amount KCPL received from B&W.¹⁰ In this case,
19 Staff treated the settlement proceeds as ordered by the Commission.

20 Q. What is Staff’s position in this rate case?

21 A. In the 2009 and 2010 rate cases, Staff had two options to address this issue.
22 The first and preferred option was to reduce KCPL’s rate base by the settlement amount in
23 effect giving KCPL customers credit for the lowered performance standards. The second
24 option was to make individual adjustments to KCPL’s plant in service and accumulated
25 reserve, O&M maintenance expense, and fuel expense based on the lower performance

¹⁰ Commission Report and Order, Page 80.

1 standards accepted by KCPL. Staff concluded reducing rate base was the best option. While
2 customers would have to pay higher operating costs because of the lowered performance
3 standards, reflecting the settlement as an adjustment to reduce rate base would resolve the
4 issue in one rate case, and Staff believed that was the fair way of resolving this matter. On the
5 other hand, the second option requires individual adjustments to KCPL's plant in service and
6 accumulated reserve, O&M maintenance expense and fuel expense over the life of the plant.
7 Since the Commission ordered that the original contract price of the SCR be included in
8 KCPL's rate base, Staff is recommending adjustments to remove the higher costs associated
9 with the lower than expected performance of the SCR in this case. These adjustments are
10 intended to align the original contract price with the costs that would be expected to be
11 incurred based on the original contract performance standards.

12 The problems with the SCR continues today, causing KCPL customers to continue to
13 pay for increased capital, O&M maintenance and fuel costs associated with a SCR that has
14 never met the contract specifications. KCPL customers are paying the full contract price and
15 as such should only pay for the capital, O&M maintenance, and fuel costs that would occur if
16 the SCR operated based on the original contract specifications. KCPL's witness in the 2010
17 rate case recognized this was an option for Staff when he stated, "If Staff, for example,
18 thought the Company's fuel costs were unreasonably high at some point in the future because
19 of this, that they could always raise that."¹¹ Since KCPL customers have paid and, absent
20 adjustments, will continue to pay for excess costs due to the lowered performance standards
21 of the Hawthorn 5 SCR, Staff's recommendation in this case is to adjust costs for premature
22 change out of the catalysts, for ammonia consumption that exceeds what KCPL would have
23 incurred based on the original contract with B&W, and for fuel by excluding any outages

¹¹ Case No ER-2010-0355, Transcripts Volume 34, Page 3691, lines 14-17.

1 directly related to the underperforming SCR. By making these adjustments, the costs for
2 operating the SCR that are paid by KCPL customers are in line with the original contract
3 performance standards and thus the original price of the SCR currently reflected in KCPL's
4 rate base.

5 Q. What is KCPL's position with the Hawthorn SCR?

6 A. KCPL's position according to Darrel L. Hensley is to have the Commission
7 focus on "the performance of the SCR after the unit was placed in service in 2001 rather than
8 the design model based upon several variables with which the US industry had limited
9 experience at the time."¹² Staff believes it is unreasonable to overlook the original design and
10 guarantees made by B&W as this is the basis of the issue. **It is unfair to hold KCPL**
11 **customers responsible for the original contract price of the SCR when KCPL lowered**
12 **the standards of the SCR, and then hold KCPL customers responsible for all the**
13 **increased costs associated with the lowered performance standards.**

14 Q. Please provide the background of the problems with the Hawthorn 5 SCR.

15 A. In February 1999 an explosion entirely destroyed the Unit 5 boiler located at
16 the Hawthorn generating plant. After the explosion B&W and KCPL entered into an
17 engineering, procurement, and construction (EPC) agreement for the construction of
18 Hawthorn Unit 5 boiler island (B&W Agreement or Agreement). The Agreement required
19 B&W to install a SCR at Hawthorn Unit 5. The SCR was installed to reduce pollution
20 associated with operating a coal-fired generating unit. Under the Agreement, B&W
21 guaranteed specific performance standards, including an ammonia slip test. After the SCR
22 was placed in service in June 2001, the boiler failed the ammonia slip test. The guaranteed
23 performance standards were part of the contractual agreement between B&W and KCPL. The

¹² Hensley rebuttal testimony, Page 6, Lines 1-4.

1 full contract price, KCPL paid for and is included in customer rates, for the SCR equipment
2 included the guaranteed performance standard in the contract.

3 As a result of the failed performance standards, KCPL and B&W tried to resolve the
4 issues by B&W doing additional work in 2002. Although attempts were made by B&W to
5 adhere to the guaranteed performance standards, problems with the equipment continued to
6 exist in 2004. Since B&W was unable to meet the performance standards from the original
7 contract set forth in the Agreement, B&W and KCPL entered into a Memorandum of
8 Understanding (MOU), and revised the requirements of the ammonia slip test standards. This
9 revision lowered SCR performance standards originally agreed to by B&W that were
10 identified in the original contract Agreement regarding the ammonia slip test. Subsequently,
11 B&W failed to meet these revised lowered standards. Because the SCR never met either the
12 original contract performance standards or the revised lowered standards, B&W's failure to
13 meet the ammonia slip test standards caused KCPL to experience increased replacements of
14 catalysts, increased usage of ammonia, plus additional cleaning and maintenance expense, all
15 resulting in significantly higher than expected costs to run and maintain the SCR equipment.
16 After the revised standards identified in the MOU could not be met, KCPL requested
17 liquidated damages from B&W based on the difference between the costs KCPL would incur
18 if the standards were met and what costs KCPL incurred because the standards were not met.

19 In 2007, KCPL received a settlement from B&W as recognition of the higher costs to
20 operate this generating unit. Because the performance standards identified in the initial
21 Agreement and the MOU were never met the settlement in essence recognized a lower
22 performing piece of equipment, which will require higher operating and maintenance costs
23 over the life of the unit—all of the costs KCPL has and will pass on to its customers.

1 Q. Has KCPL's customers incurred greater costs as a result of lower performance
2 standards of the SCR?

3 A. First, KCPL paid the B&W original contract price, which is in KCPL's rate
4 base and is being recovered by KCPL customers. After B&W was unable to meet the
5 guaranteed contractual specifications, KCPL accepted lower specifications and in return
6 received a settlement from B&W for ** _____ **. The settlement amount, accepted by
7 KCPL, represented a fraction of what KCPL customers will pay for substantial increased fuel,
8 capital, and O&M maintenance costs over the life of the SCR. During settlement negotiations
9 with B&W, KCPL estimated the excess capital costs over the life of the SCR to be
10 ** _____ ** to ** _____ **. According to a memorandum dated June 6, 2007
11 provided by KCPL in Data Request No. 530 in Case No. ER-2009-0089,

12 ** _____

32 [emphasis added] (The entire memorandum is attached to Staff's Cost of
33 Service report in this case as Appendix 3, Schedule KL-1)

1 The estimate outlined by KCPL in the memorandum identified above does not include
2 the additional costs that KCPL customers have and will continue to pay for fuel and O&M
3 maintenance over the life of the SCR. As a result of the increased capital costs identified by
4 KCPL in the memorandum, and the additional increased fuel and maintenance costs over the
5 life of the SCR, KCPL acted imprudently by accepting a settlement amount from B&W that
6 was far less than the anticipated costs KCPL customers have and will continue to pay over the
7 life of the SCR. KCPL has acknowledged that the performance of the SCR has led to
8 increased capital, O&M maintenance, and fuel costs through data requests in Case Nos.
9 ER-2009-0089 and ER-2010-0355¹³ and in testimony in Case No. ER-2010-0355 and
10 ER-2012-0174. Despite KCPL's acknowledgement of the increased costs for the SCR, KCPL
11 continues to hold its customers responsible for all of the increased capital, O&M maintenance
12 and fuel costs by passing the costs to its customers in rates.

13 Q. Did KCPL acknowledge increased costs for catalyst replacements, ammonia,
14 and O&M maintenance for the underperformance of the SCR?

15 A. Yes. In response to Data Request No. 133 in Case No. ER-2009-0089,
16 KCPL stated:

17 ** _____
18 _____
19 _____
20 _____
21 _____
22 _____
23 _____
24 _____
25 _____
26 _____
27 _____ **

¹³ Data Request 133 in Case No. ER-2009-0089.

1 Q. What testimony has been provided by KCPL to support increased costs
2 associated with performance of the SCR?

3 A. In Case No. ER-2010-0355, when asked if KCPL anticipates increased capital,
4 maintenance and ammonia costs, KCPL witness Blanc stated, “We do anticipate it being
5 greater than what was contemplated in the initial contract.”¹⁴ Likewise, when KCPL witness
6 Blanc was asked if O&M maintenance and ammonia costs associated with the SCR, have
7 increased and would be considered recurring, he agreed.¹⁵

8 KCPL witness Mr. Hensley explains the background of the problems with the SCR on
9 page 5 of his rebuttal testimony in this case. In his explanation he states, “[b]ecause of the
10 failure to meet the ammonia slip test, KCPL has had to replace catalysts more often and has
11 used more ammonia than was in B&W’s original design model.”¹⁶ KCPL’s own witnesses
12 recognize the Company has and will continue to incur increased capital, O&M maintenance,
13 and fuel costs above what was agreed to under the original contract with B&W.

14 Q. What is the significance of the B&W original design model as described by
15 Mr. Hensley?

16 A. KCPL and B&W agreed upon a contract price based on the original design
17 model. B&W was never able to meet the original contract performance standards and as
18 previously mentioned, KCPL accepted lower performance standards but the original contract
19 price remained the same. The original contract price is currently included in KCPL’s rate
20 base and therefore, included in rates and paid by KCPL customers. Since KCPL customers
21 are paying the full contract price of the SCR, KCPL customers should receive the benefit of
22 the full contract price by only paying for the capital, O&M maintenance, and fuel costs based

¹⁴ Case No. ER-2010-0355 Transcript, Volume 35, page 3684, ll 3-4.

¹⁵ Case No. ER-2010-0355 Transcript, Volume 35, page 3685, lines 9-25 and page 3686, lines 1-3.

¹⁶ Case No. ER-2012-0174, Rebuttal Testimony of Darrel L. Hensley, page 5.

1 on the original contract specifications guaranteed by B&W. Yet, despite the fact KCPL
2 customers are paying the full contract price of the SCR, KCPL continues to pass the
3 increased capital (also increased return and depreciation costs), O&M maintenance, and fuel
4 costs to its customers and opposes any attempt to remove these higher costs.

5 Q. Explain why KCPL has and will continue to incur additional costs for
6 replacement catalysts.

7 A. Since B&W was never able to meet the performance standards they
8 guaranteed, KCPL will need to change out the catalysts more frequently than what would be
9 expected if the performance standards had been met.

10 Q. What are the costs KCPL would expect for changeout of the catalyst if the
11 performance standards were met?

12 A. KCPL states in the memorandum mentioned above, the changeout costs for the
13 catalysts would range from ** _____ ** over a thirty (30) year period¹⁷ if
14 the original B&W performance standards were met.

15 Q. What is the significance of the costs KCPL is anticipating over the life of the
16 plant as a direct result of the failed performance standards?

17 A. KCPL is expecting its customers to absorb capital costs above the expected
18 capital costs range of ** _____ ** (original contract specifications) to a
19 range of ** _____ ** (lowered contract specifications) over a thirty (30)
20 year period. The latter represents the capital costs associated with changing out the catalysts
21 more frequently in the future due solely from the failure of this equipment to meet the original
22 performance standards. When additional fuel costs and other O&M maintenance costs are

¹⁷ The thirty (30) year period is identified by KCPL in the June 6, 2007 Memorandum provided as Schedule KL-1 in Staff's Cost of Service report in Case No. ER-2012-0174.

1 included, KCPL customers will pay significantly higher costs over the life of the SCR.

2 Q. What are the actual capital costs KCPL has incurred since the SCR was placed
3 in service in 2001?

4 A. Prior to 2004, B&W paid the capital costs associated with full and partial
5 replacement of catalysts. The first catalyst replacement paid by KCPL customers occurred in
6 March 2007. For the period of March 2007 through March 2012, KCPL customers have paid
7 ** _____ ** for full and partial replacement of catalysts.¹⁸ The following chart identifies
8 the full and partial catalyst replacements beginning when the SCR was placed in service in 2001.

9 **.

¹⁸ Actual costs provided by KCPL in response to Data Request 146 and 146.1 in Case No. ER-2012-0174.

¹⁹ Staff's Cost of Service report filed on August 2, 2012, Appendix 3, Schedule KL-1.

²⁰ **

**

1 Q. How do the actual costs incurred by KCPL for full and partial catalyst
2 replacements compare to the estimated costs identified in the memorandum discussed above?

3 A. As mentioned above, KCPL estimated the additional full and partial catalyst
4 costs of **_____** based on the lower revised performance standards.

5 In a five year period (2007-2012), KCPL customers have already paid more than 50% of the
6 anticipated increased costs (lowered contract specifications) and have exceeded the capital
7 costs expected with the original contract specifications. At this rate, KCPL customers will
8 pay approximately \$60 million in capital costs over a thirty (30) period that were guaranteed
9 to cost approximately \$6.5 million over a thirty (30) year period.

10 Q. As mentioned earlier in this testimony, KCPL witness Mr. Hensley states,
11 “It is KCPL’s position that it is more accurate to judge the performance of the SCR after the
12 unit was placed in service in 2001 rather than a design model based upon several variables
13 with which the US industry had limited experience at the time.” Does Staff agree with
14 KCPL’s position?

15 A. No. The original contract with B&W and the performance of the SCR after the
16 unit was placed in service in 2001 is the basis of this issue. First, KCPL customers are
17 currently paying a premium price for an SCR that has never met the original contract
18 specifications. KCPL accepted lower revised specifications for the SCR that led to increased
19 capital, O&M maintenance, and fuel costs, but the premium price KCPL customers paid for
20 the SCR was not reduced. In addition, KCPL passes the increased costs associated with the
21 lower revised standards on to its customers. Second, as discussed earlier in this testimony,
22 KCPL has provided several data request responses and testimony acknowledging the lower
23 standards of the SCR would increase costs. In fact, KCPL was so concerned with the

1 increasing costs that it requested and received a settlement from B&W for what was identified
2 as an “unacceptable catalyst performance.”²¹ **If KCPL’s position is to not judge the design**
3 **model as Mr. Hensley stated, then why would KCPL request and receive a settlement**
4 **from B&W for what was characterized as an “unacceptable catalyst performance**
5 **issue.”**

6 Q. What adjustment to KCPL’s cost of service did Staff make for the catalyst
7 replacements in this case?

8 A. Based on the original contract specifications, catalyst replacements should
9 occur after 24,000 hours of use or approximately three years.²² The catalyst replaced in
10 March 2012 occurred after two years instead of the guaranteed three years. Consequently,
11 Staff made an adjustment to KCPL’s plant in service and a corresponding adjustment to
12 accumulated reserve for approximately 1/3 of the catalyst replacement costs.

13 Q. Please explain why Staff did not make an adjustment to the catalyst
14 replacements that occurred in 2007 and 2010 as identified in the table above?

15 A. As previously mentioned, B&W paid for all the full and partial catalyst
16 replacements prior to 2004 and as such, KCPL customers were not responsible for catalyst
17 replacement costs until March 2007. Based on the original contract specifications of a 24,000
18 hour useful life (3 years), Staff would expect replacement of the catalysts in 2007. The next
19 catalyst replacement occurred in 2010 and again Staff would expect replacement of the
20 catalysts in 2010. Therefore, an adjustment was not necessary for the catalyst replacements
21 that occurred in 2007 and 2010.

²¹ Schedule KL-2, Staff’s Cost of Service report, p 2.

²² Staff’s Cost of Service report, Appendix 3, Schedule KL-1.

1 Q. What is the revenue requirement impact of Staff's adjustment to reduce
2 KCPL's rate base for the catalyst replacements that occurred in March 2012?

3 A. As discussed above, the catalyst replacements that occurred in March 2012
4 were transferred to plant in service until April 2012. Therefore, Staff did not reflect the
5 adjustments for the catalyst replacements that occurred in March 2012 in its direct case.
6 However, Staff will reflect these adjustments in its true up. The rate base value is
7 approximately \$788,803, which has a revenue requirement impact of approximately \$60,430.

8 Q. Are KCPL customers paying for any other increased costs associated with the
9 failure of the SCR to meet the original performance standards guaranteed by B&W?

10 A. Yes. KCPL customers are paying for increased ammonia costs as a result of
11 the SCR failing to meet the B&W guaranteed ammonia slip test?

12 Q. Does KCPL agree that increased ammonia costs are a result of the failed
13 ammonia slip test?

14 A. Yes. As previously mentioned, KCPL witness Hensley stated, "Because of the
15 failure to meet the ammonia slip test, KCP&L has had to replace catalysts more often and
16 has used more ammonia than was in B&W's original design model."²³ In addition, in Case No.
17 ER-2010-0355, KCPL witness Blanc confirmed KCPL has incurred increased ammonia
18 consumption.²⁴

19 Q. What are the actual ammonia costs KCPL has incurred above the expected
20 ammonia costs associated with the original contract specifications guaranteed by B&W?

21 A. KCPL provided the following data to Staff in response to Data Request 146 in
22 Case No. ER-2012-0174:

²³ Case No. ER-2012-0174, Rebuttal Testimony, Page 5, lines 4-6.

²⁴ Case No. ER-2010-0355 Transcript, Volume 34, page 3707, line 6.

**

3

Q. Have KCPL customers paid for the actual annual ammonia costs identified in

4

the table above?

5

A. Yes. In the last four KCPL rate cases, Case No. ER-2006-0314, Case No.

6

ER-2007-0291, Case No. ER-2009-0089 and Case No. ER-2010-0355, the plant-related costs

7

for the under-performing SCR were included in rate base and the excess maintenance and fuel

8

costs were included in KCPL's cost of service. The higher fuel costs for ammonia were fully

9

reflected in each of the four rate cases. The higher purchase power costs were also included

10

in the rate case and reflected in rates. Staff witness Cary G. Featherstone will address fuel

11

and purchase power costs in his surrebuttal testimony. In each of these cases, Staff includes

12

operating costs and plant levels consistent with the test year, update period and true-up period

NP

1 ordered by the Commission. Likewise, Staff includes an expense level that is consistent with
2 the test year and update period for each case.

3 Q. What were the test years and true-up periods used in past KCPL rate cases?

4 A. The following table identifies the test year and update period for each of
5 KCPL's last four rate cases.

6

Case Number	Test Year	Update Period	True-Up Period	Effective Date of Rates
ER-2006-0314	Calendar Year 2005	June 30, 2006	September 30, 2006	January 1, 2007
ER-2007-0291	Calendar Year 2006	March 31, 2007	September 30, 2007	January 1, 2008
ER-2009-0089	Calendar Year 2007	September 30, 2008	March 31, 2009	September 1, 2009
ER-2010-0355	Calendar Year 2010	June 30, 2010	December 31, 2010	May 4, 2012

7

8 Q. What is the importance of identifying the test year and update periods of
9 KCPL's last four rate cases?

10 A. Based on the test year and update periods of each of the last four KCPL rate
11 cases, KCPL customers have paid for all increased costs related to the SCR for catalyst
12 replacement, (capital and expense), catalyst cleaning expense and fuel expense. This would
13 include the costs related to increased ammonia consumption.

14 Q. Did Staff make an adjustment to remove increased ammonia costs associated
15 with the lowered contract specifications to KCPL's cost of service in this case?

16 A. Yes. Based on the data provided by KCPL and included in the table above,
17 KCPL has incurred increased ammonia costs through the period of 2002-2011. Again, KCPL
18 customers are paying a premium for the SCR based on the original contract price and
19 therefore, KCPL customers should pay no more than the expected ammonia costs that would
20 have occurred if the SCR contract specifications were never lowered. In this case, Staff made

1 an adjustment for the difference of the ammonia costs KCPL would have incurred if the SCR
2 performed to the level guaranteed by B&W and the actual costs KCPL incurred as a result of
3 lowered contract specifications, during the test year, September 30, 2011.

4 Q. What is the revenue requirement impact of Staff's adjustment to reduce
5 ammonia expense?

6 A. Staff's adjustment to ammonia reduces KCPL's revenue requirement on a
7 Missouri Jurisdictional basis of approximately, \$57,441.

8 Q. There are several statements throughout this testimony indicating KCPL
9 customers have and will continue to pay increased O&M maintenance costs as a result of
10 lowered contract specifications. Did Staff make an adjustment to KCPL's cost of service for
11 O&M maintenance expense related to SCR catalyst cleaning in this case?

12 A. Although KCPL has experienced higher than normal O&M expenses since the
13 SCR was placed in service in 2001, Staff did not make any adjustments to the O&M costs
14 directly related to the SCR catalyst cleaning that occurred during the test year ending
15 September 30, 2011. Although KCPL customers have paid for increased O&M maintenance
16 costs as a result of the lower performance standards that occurred prior to the test year in this
17 case, the costs are considered out of period, so no adjustment was made. The O&M
18 maintenance costs related to catalyst cleaning that KCPL reported in the test year occurred
19 during a normal maintenance outage. Staff would expect to see some level of catalyst
20 cleaning during a normal maintenance outage and therefore Staff did not make an adjustment
21 for the SCR O&M maintenance costs that occurred during the test year.

22 Q. Did Staff make any other adjustments to KCPL's cost of service related to
23 the SCR?

1 A. Yes. As previously mentioned, KCPL customers have paid for increased costs,
2 including fuel associated with the lower performance standards of the SCR. KCPL's position
3 in the last case was that KCPL customers have never paid the purchase power costs as a result
4 of the outages that occurred because of the problems with the SCR, which is simply not true.
5 Mr. Featherstone discusses this issue in detail in his surrebuttal testimony in this case. KCPL
6 customers have paid for increased fuel costs in the last four rate cases related to the SCR
7 outages at Hawthorn 5 and are still paying for increased fuel costs in this case by virtue of
8 how Staff calculates fuel costs. Similar to the ammonia costs previously mentioned, Staff did
9 not exclude any SCR related outages when determining the outage rate in any of the last four
10 rates cases and therefore included all additional fuel costs associated with these outages. In
11 this case, Staff used the outage period for the years of 2005-2011 to determine the outage rate
12 used in Staff's fuel model. To ensure KCPL customers are not continually held responsible
13 for higher fuel costs caused by a subpar SCR, Staff excluded outages related to the SCR
14 performance that occurred from 2005-2011 when developing its outage rate used in the fuel
15 model. This in effect reduces the level of fuel expense included in KCPL's cost of service.
16 The outage report for Hawthorn 5 identifying the SCR outages Staff excluded is attached to
17 this surrebuttal as Schedule KL-SUR-3.

18 Q. Did Staff remove every outage that was associated with the
19 underperforming SCR?

20 A. No. Based on the outage report attached to this testimony as Schedule
21 KL-SUR-3, any SCR outage that KCPL identified as a scheduled, planned or maintenance
22 outage was not removed by Staff. The outages Staff removed to develop the outage rate only
23 included outages that were unplanned or forced, or outages that were identified as a derate.

1 Q. As discussed above, KCPL claims its customers never paid for additional fuel
2 and purchase power expense. Explain.

3 A. During the last case, KCPL claimed it removed the outages during the
4 normalization process of fuel and therefore its customers never paid the increased costs
5 associated with the outages. KCPL witness Blanc stated, “[w]e removed those as an
6 abnormal event. And that was appropriate. Because if we included those, it would be –we
7 would be asking customers to pay that for as long as rate – those rates were effective, and that
8 wouldn’t be appropriate.”²⁵

9 Q. Did Staff remove the outages related to the SCR performance in any of
10 KCPL’s last four rate cases?

11 A. No. Staff did not remove any outages when developing its fuel model related
12 to the SCR performance in any of the last four rate cases.

13 Q. What is KCPL’s position with regard to the removal of the Hawthorn 5 outages
14 related to the SCR performance?

15 A. Contrary to KCPL’s position in the last rate case when they claimed the
16 Hawthorn 5 outages related to the SCR were removed from its fuel analysis, KCPL takes the
17 position in this case that it is inappropriate to remove the outages. KCPL witness Crawford
18 states in his rebuttal testimony, page 5, lines 1-6,

19 While one could claim that any single event is unusual in nature and
20 should be eliminated from the averaging process, the nature of plant
21 performance is such that events do occur that may not happen ever
22 again in the life of the plant. In other words, “normalizing out” one-
23 time events or focusing on the performance of a particular piece of
24 equipment can easily result in understating expected performance since
25 abnormal events can and will occur.²⁶

²⁵ Case No ER-2010-0355, Transcript, Volume 34, page 3706, lines 8-12.

²⁶ Rebuttal Testimony of Burton L. Crawford, page 5, lines 1-6

1 In the last case, KCPL used the same phrase “normalizing out” when they claimed
2 KCPL customer have never paid for increased fuel and purchase power costs for the SCR and
3 the transformer which is discussed in further detail later in this testimony. KCPL is
4 inconsistent with its position regarding this issue. In the last rate case, KCPL advised the
5 Commission they removed the outages as it would be inappropriate to include the outages
6 thus causing its customers to pay higher rates and in this case, it is inappropriate to exclude
7 the outages.

8 Q. What is the revenue requirement impact of Staff’s adjustment to adjust the
9 Hawthorn outage rate based on the SCR outages?

10 A. The revenue requirement impact of Staff’s adjustment to the Hawthorn 5
11 outage rate for the SCR outages on a total Company basis is approximately \$309,821, and
12 \$177,434 on a Missouri Jurisdictional basis.

13 Q. Is there anything else you need to address relating to KCPL’s position on
14 this issue?

15 A. Yes. Mr. Hensley makes the statement in his rebuttal testimony on page 6,
16 lines 18-20, “[i]t is unreasonable to attempt to hold KCP&L accountable for the original
17 design specifications on an installation that was the first of its kind for the industry.” KCPL
18 does not think it should be held responsible for the original design specifications but in fact,
19 they held the manufacturer responsible and continue to hold their customers responsible by
20 paying for the original contract price of the SCR, which KCPL did not pay, and forcing their
21 customers to pay for all the increased costs for the SCR based on their decision to accept
22 lower performance standards.

23 Q. Does Staff recommend an alternative to the adjustments discussed above?

1 A. Yes. Staff's adjustment in the last case attempted to match the SCR contract
2 price with the lowered contract performance standards by reducing KCPL's rate base for the
3 settlement amount received from B&W. Since the Commission ordered that KCPL's rate
4 base should not be reduced, in this case Staff is attempting to match the original contract price
5 with the costs associated with the original contract performance standards. To do this, Staff
6 adjusted the increased SCR costs to what would be expected based on the original contract
7 specifications. As mentioned earlier in this testimony, Staff prefers the position it took in the
8 last case because adjusting KCPL's rate base allows KCPL customer to receive the benefit of
9 the lowered performance standards and would require no further adjustments in future rate
10 cases. In this case, adjustments will be required to make KCPL customers whole in all future
11 KCPL rate cases through the life of the SCR. If the Commission agrees with Staff that KCPL
12 customers should not continue to be responsible for increased costs associated with the SCR,
13 the best approach would be to reduce KCPL's rate base for the settlement amount received
14 from B&W.

15 Q. Please summarize Staff's position with the Hawthorn 5 SCR settlement.

16 A. Staff's adjustments for the SCR reduce the increased expense that occurred due
17 to the underperformance of the SCR. Since KCPL customers are paying for the original
18 contract price of the SCR, KCPL customers should pay no more than the costs that would
19 have occurred if B&W met the guaranteed performance standards. KCPL customers have and
20 will continue to pay for increased costs for catalyst replacements, O&M maintenance and fuel
21 for the life of the SCR. It is unreasonable and unfair to hold KCPL customers responsible for
22 these costs.

1 **HAWTHORN TRANSFORMER**

2 Q. What is the purpose of this portion of your surrebuttal testimony?

3 A. I am responding to the rebuttal testimony of KCPL witnesses Burton L.
4 Crawford, addressing Staff's fuel adjustments related to the performance standards of the
5 Hawthorn 5 transformer.

6 Q. Is this the same Hawthorn 5 transformer issue presented by Staff in KCPL's
7 2009 and 2010 rate cases?

8 A. Although the failure of the transformer and the increased costs related to the
9 failure that KCPL customers continue to pay is the same, Staff's recommendation to resolve
10 the issue has changed. The issue presented by Staff in KCPL's 2009 and 2010 rate cases
11 addressed all the increased costs to KCPL of the operation of Hawthorn 5 generating unit
12 resulting from the transformer failure and paid by KCPL customers in its utility rates. The
13 capital costs included the original cost of the transformer that was included in KCPL's rate
14 base. And after the failure of the transformer in 2006, the cost of the new transformer was
15 included in KCPL's rate base, all of which are paid by KCPL customers. In addition, the
16 salaries and benefits, office space, and all employee-related costs of KCPL's attorneys and
17 employees who worked on KCPL's dispute with the contractors and subcontractors, increased
18 maintenance, increased fuel and purchase power expense, and increased expenses that were
19 capitalized to the new plant as a result of the transformer failure and paid by KCPL
20 customers. Similar to the SCR issue in the 2010 rate case described above, Staff had two
21 options to address the increased costs KCPL customers have and are currently paying in rates.
22 The first and preferred option was to reduce KCPL's rate base by the settlement amount
23 KCPL received from Siemens and the other was to make separate adjustments for the
24 increased costs to capital, fuel and purchased power, and other operating expenses.

1 Q. What was Staff's recommendation in the 2009 and 2010 rate cases?

2 A. As a result of the costs included in KCPL's rate base and all other costs related
3 to the transformer failure Staff recommended a reduction to KCPL's rate base for the
4 settlement amount KCPL received from Siemens. Staff concluded reducing rate base was the
5 best option because KCPL customers would be compensated for all the increased costs
6 associated with the transformer failure and the adjustment would resolve the issue in one
7 rate case. On the other hand, the second option required individual adjustments to KCPL's
8 plant in service and accumulated reserve, O&M maintenance, and fuel and purchase
9 power expenses.

10 Q. Did the Commission decide the rate base issue in Case No. ER-2010-0355?

11 A. Yes. In Case No. ER-2010-0355, the Commission ordered KCPL's rate base
12 should not be reduced by the settlement amount KCPL received from Siemens.²⁷ In this case,
13 Staff treated the settlement proceeds as ordered by the Commission.

14 Q. What is Staff's recommendation in this case?

15 A. The failure of the Hawthorn 5 transformer resulted in increased costs as
16 discussed above including increased purchase power costs and other fuel expenses as a result
17 of the forced outages. Although the outages occurred in 2006, KCPL customers continue to
18 pay for these costs by virtue of how Staff calculates fuel. Although KCPL customers paid for
19 all the costs associated with the transformer failure and continue to pay for the increased
20 capital costs that are included in KCPL's rate base, Staff only adjusted the outage rate for the
21 period of 2005-2011 to remove the outages related to the failure of the Hawthorn 5
22 transformer in this case. The adjustment to the outage rate reduces the level of fuel expense
23 included in Staff's determination of KCPL's revenue requirement.

²⁷ Commission Report and Order, Page 80.

1 Q. Please describe what led to the Hawthorn 5 outage, related to the transformer
2 failure, and ultimately a settlement from Siemens?

3 A. In August 2005, the generator step-up transformer at KCPL's Hawthorn 5
4 generating unit failed. In September 2005, a backup step-up transformer was installed.
5 During June 2006, a new step-up transformer was installed. KCPL sued the contractors and
6 subcontractors claiming they were responsible for the transformer failure. The case settled at
7 the end of 2007, and was finalized in 2008 with payment made to KCPL. KCPL received a
8 dollar settlement for the transformer failure from Siemens. All the increased costs to KCPL
9 of the operation of Hawthorn 5 resulting from the transformer failure were paid by KCPL
10 customers in its utility rates. The increased costs included, but are not limited to, fuel and
11 purchase power expense.

12 Q. Please explain the increased capital costs KCPL customers have paid in the
13 past and will continue to pay because of the transformer failure?

14 A. According to KCPL's response to Data Request No. 366.1 in Case No.
15 ER-2006-0314, KCPL included ** _____ ** in new plant in its rate base for the
16 purchase of the new GE transformer and retired ** _____ ** from plant-in-service for
17 the original transformer. At a minimum, KCPL customers were charged for additional plant
18 of ** _____ . **

19 Q. Did KCPL provide Staff with documentation to support that KCPL incurred
20 increased maintenance costs prior to the transformer failing in 2005?

21 A. Yes. According to the First Amended Petition (Petition), included in KCPL's
22 response to Data Request No. 527 in Case No. ER-2009-0089, Siemens performed

1 maintenance on the transformer prior to it failing in 2005. The following excerpt was taken
2 from the Petition:

3 ** _____
4 _____
5 _____
6 _____ **

7 Selected pages of the First Amended Petition are attached to this surrebuttal testimony
8 as Schedule KL-SUR-4. Staff felt the entire document was too voluminous to attach as a
9 schedule. However, the highly confidential document is available for review by the
10 Commission or other parties.

11 Q. How much did KCPL receive in settlement proceeds from Siemens?

12 A. KCPL received a total settlement of ** _____ ** of which,
13 ** _____ ** was received by KCPL, net of legal costs incurred for this settlement.
14 The settlement is on a total KCPL basis and was received on February 7, 2008.

15 Q. When did the outages related to the transformer failure occur?

16 A. As mentioned earlier in this surrebuttal testimony, the transformer failed
17 August 2005. A back-up transformer was installed September 2005 and the new transformer
18 was installed June 2006. Leading up to the transformer failure, there were several outages
19 that occurred in June 2005. The next outage occurred from August 29, 2005 (date the
20 Siemens transformer failed) to September 29, 2005 (when an old back-up transformer was
21 placed in service). The back-up transformer was used until KCPL received a new transformer
22 to replace the Siemens transformer. The second outage occurred from June 6-19, 2006, when
23 KCPL replaced the old back-up transformer with a new GE Transformer. This information
24 was provided by KCPL in Data Request No. 526.1. Attached to my surrebuttal testimony as

1 Schedule KL-SUR-3 is a list of the outages that occurred at Hawthorn 5 related to the
2 transformer failure, as well as the outages related to the SCR issue discussed above.

3 Q. Did Staff remove every outage that occurred and that was associated with the
4 transformer failure?

5 A. No. Based on the outage report attached to this testimony as Schedule
6 KL-SUR-3, the outage that occurred from June 6-19, 2006, replacement of the back-up
7 transformer with the new GE transformer was a scheduled or planned outage. The outages
8 Staff removed to develop the outage rate only included outages that were unplanned or forced,
9 or outages that were identified as a derate.

10 Q. What is KCPL's position with regard to Staff's adjustment to the outage rate?

11 A. KCPL believes it is inappropriate to adjust the Hawthorn 5 outage rate for a
12 single unusual event. Mr. Crawford states on page 5, lines 1-6,

13 While one could claim that any single event is unusual in nature and
14 should be eliminated from the averaging process, the nature of plant
15 performance is such that events do occur that may not happen ever
16 again in the life of the plant. In other words, "normalizing out" one-
17 time events or focusing on the performance of a particular piece of
18 equipment can easily result in understating expected performance since
19 abnormal events can and will occur.²⁸

20 In the 2010 rate case, KCPL's position was just the opposite of what Mr. Crawford is
21 suggesting in this rate case. Similar to the SCR issue discussed above, KCPL claimed in the
22 2010 rate case that customers never paid for the fuel or purchase power costs related to
23 outages. Therefore, KCPL customers were not entitled to the settlement for the transformer
24 failure and for the SCR as discussed above. When asked if KCPL incurred higher fuel and
25 purchase power costs in KCPL's previous rate cases, KCPL witness Blanc stated, "No.

²⁸ Rebuttal Testimony of Burton L. Crawford, p. 5, ll 1-6.

1 Something that extraordinary would not be captured. I mean, that was a large unanticipated
2 unusual, non-recurring – to use the words the Commission has used in the past –event.”²⁹

3 Q. Did KCPL or Staff adjust the outage rate for the Hawthorn 5 generating unit as
4 a result of the failed transformer in KCPL’s previous rate cases?

5 A. No. KCPL and Staff did not adjust the outage rate in any of the previous rates
6 cases related to the transformer failure. Staff witness Cary G. Featherstone will address the
7 higher costs for fuel and purchase power in his surrebuttal testimony.

8 Q. Is Staff recommending adjustments for any other costs associated with the
9 Hawthorn 5 transformer failure in this rate case?

10 A. No. Although KCPL customers continue to pay for the capital costs, as
11 previously discussed, Staff did not make any additional adjustments related to the transformer
12 failure other than adjusting the outage rate.

13 Q. What is the revenue requirement impact of Staff’s adjustment to adjust the
14 Hawthorn outage rate based on the transformer outages?

15 A. The revenue requirement impact of Staff’s adjustment to the Hawthorn 5
16 outage rate for the transformer outages on a total company basis is approximately \$447,270,
17 and \$256,152 on a Missouri jurisdictional basis.

18 Q. Does Staff recommend an alternative to the adjustments discussed above?

19 A. Yes. Staff’s adjustment in the last two rate cases attempted to compensate
20 KCPL customers for all the capital, O&M maintenance, and fuel and purchase power costs
21 that were paid by KCPL by reducing KCPL’s rate base for the settlement amount received
22 from Siemens. In this case, KCPL customers are still paying for the costs associated with the
23 transformer failure and as such should be compensated. As mentioned earlier in this

²⁹ Case No. ER-2010-0355, Transcript, Vol. 34, p 3695, ll 6-9.

1 testimony, Staff prefers the position it took in the last case because adjusting KCPL's rate
2 base allows KCPL customers to be compensated for all the increased costs associated with the
3 transformer failure and the adjustment would resolve the issue in one rate case. If the
4 Commission agrees with Staff that KCPL customers should not continue to be responsible for
5 increased costs associated with the transformer failure, the best approach would be to reduce
6 KCPL's rate base for the settlement amount received from Siemens.

7 Q. Please summarize Staff's position with the Hawthorn 5 transformer.

8 A. KCPL incurred costs which were ultimately paid by KCPL customers as a
9 result of the transformer failure at the Hawthorn 5 generating unit. KCPL customers paid for
10 all the costs at the time the transformer failed in 2005 and continue to pay for capital costs and
11 fuel and purchase power costs today. In the last rate case KCPL had the Commission believe
12 the outages associated with the failure were removed and therefore KCPL customers never
13 paid the purchase power and fuel costs and should not receive the benefits of the settlement
14 proceeds received from Siemens. In this case, KCPL claims it is inappropriate to remove the
15 outage. The fact is the outages for the transformer were never removed by Staff or by KCPL
16 in the previous KCPL rate cases. Therefore, KCPL customers did pay for all the costs,
17 capital, O&M maintenance, and fuel and purchase power. By virtue of how fuel and purchase
18 power is calculated, KCPL customers are still paying these costs and the plant related cost as
19 a result of the failed transformer. Similar to the SCR, Staff is attempting to make the
20 customer whole for all the costs KCPL customers have paid and will continue to pay as a
21 result of the transformer failure. KCPL used the argument of removing the outage in the last
22 rate case to support their false claim that customers have never paid for the costs including
23 fuel and purchase power and now contradict their position in this case stating it is improper to

1 remove unusual outages. KCPL customers are entitled to a reduction in fuel and purchase
2 power expense since in KCPL's own witness words, "**we removed those as an abnormal**
3 **event. And that was appropriate. Because if we included those, it would be – we would**
4 **be asking customers to pay that for as long as rate – those rates were effective, and that**
5 **wouldn't be appropriate.**"³⁰

6 **MISCELLANEOUS**

7 Q. What is the purpose of this section of your surrebuttal testimony?

8 A. I am responding to clarifications related to the credit/debit card program and
9 prepayments addressed in KCPL witness John P. Weisensee rebuttal testimony.

10 Q. What is the issue with credit/debit card program?

11 A. Mr. Weisensee states on page 16, line 19-20, "KCPL would like to point out
12 that Staff did not make the annualization adjustment in its direct case..."

13 Q. Does Staff agree with this statement?

14 A. No. During the course of an audit, Staff will review KCPL's expenses during
15 the test year and make adjustment to increase the expense level, decrease the expense level, or
16 in some cases, include the test year expense level to represent ongoing costs." Credit/debit
17 card expense is an example of Staff using the test year level to represent an annualized level.
18 Although Staff intends to update these costs through the True-Up period, August 31, 2012, the
19 level of credit/debit card expense in its direct case reflects an annualized level.

20 Q. What is the issue with Prepayments?

21 A. Staff included an incorrect statement in its KCPL Cost of Service report on
22 page 70, lines 26-27, filed on August 2, 2012. Staff included a statement suggesting that

³⁰ Case No ER-2012-0174, Transcripts, Volume 34, page 3706, lines 8-12.

Surrebuttal Testimony of
Karen Lyons

1 KCPL includes gross receipts taxes in prepayments. Staff agrees with Mr. Weisensee
2 that KCPL did not include gross receipts taxes in its prepayments.

3 Q. Does this conclude your surrebuttal testimony?

4 A. Yes, it does.

(1) This column includes levies that existed in prior years and were revised due to an election. This column also includes school levies that increased due to the school board's election to implement Missouri Constitutional Amendment No. 2 approved by voters on November 3, 1998, which allows school districts to levy a minimum of \$2.7500 by school board action alone.

(2) This column includes new voter approved tax rates, newly formed districts, or a levy voted to replace an expired levy.

APPENDIX V
 2011 PROPERTY TAX RATES
 2010 – 2011 PERCENTAGE CHANGE IN TOTAL ASSESSED VALUATIONS BY COUNTY
 OVERALL COUNTY VALUATION CHANGES PRIOR TO ADJUSTMENTS

The 2011 consumer price index (CPI) of 1.50% was certified by the State Tax Commission.

High County: DeKalb 26.94

Low County: Reynolds -15.50

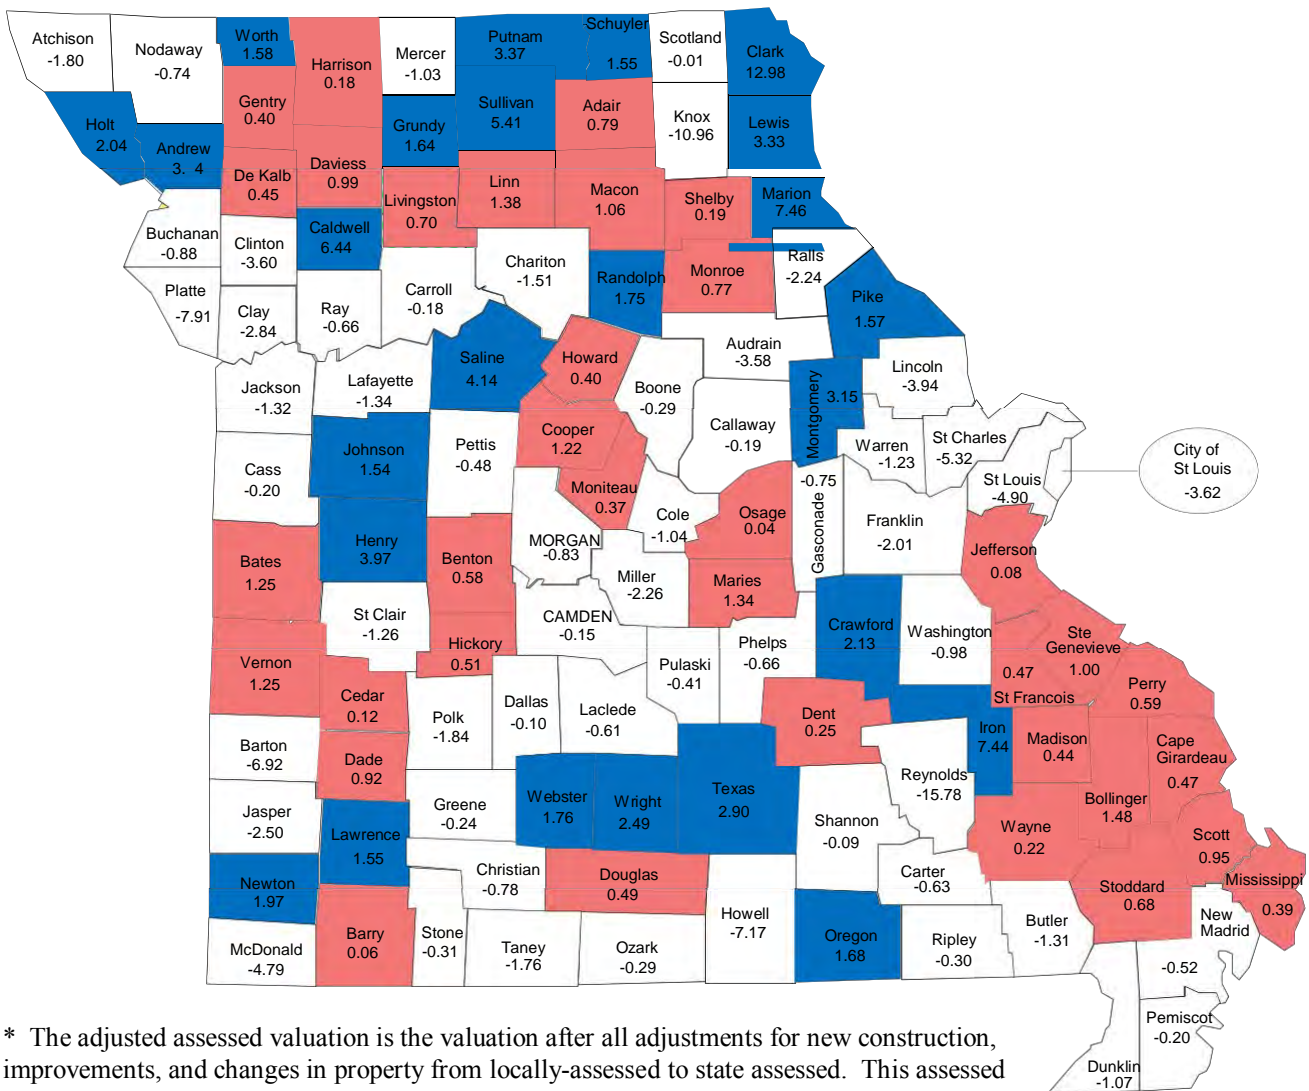

APPENDIX VI

2011 PROPERTY TAX RATES

2010 – 2011 PERCENTAGE CHANGE IN ADJUSTED ASSESSED VALUATIONS BY COUNTY*

The 2011 consumer price index (CPI) of 1.50% was certified by the State Tax Commission.

* The adjusted assessed valuation is the valuation after all adjustments for new construction, improvements, and changes in property from locally-assessed to state assessed. This assessed valuation is compared to the total prior assessed valuation in the calculation for compliance with the Hancock Amendment.

High County: Clark 12.98

Low County: Reynolds -15.78

APPENDIX VII
 2011 PROPERTY TAX RATES

LISTING OF 2010 AND 2011 TAX RATES FOR LOCAL GOVERNMENTS LEVYING A SINGLE TAX RATE ON ALL PROPERTY

Political Subdivision	Purpose	2010			2011			Revenue	Expiration Year
		Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied		

LEGEND:

- * Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
- ** Levy did not exist in the given year.
- A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
- B A voter approved increase to an existing levy.
- C Levy includes a recoupment rate authorized by state law.
- D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for 2011 levies and Report No. 2010-168, Review of 2010 Property Tax Rates.
- E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.
- G Article X, Section 11(g) of the Missouri Constitution allows the Kansas City 33 School District School Board to set its tax levy at a rate that is lower than the court-ordered rate for the 1995 tax year (which was \$4.96). The rate so established may be changed from year to year by the School Board.
- H City of Neosho in Newton County reinstated a previously authorized levy that was voluntarily reduced to zero in 1998 - 2009.

NOTE:

Taxing authorities are listed by primary county and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright followed by the City of St. Louis). When a taxing authority is in more than one county, it is listed under the primary county only.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both the taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

This Appendix does not list taxing authorities that levied a separate tax rate for each subclass of property. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Taxing authorities partially in St. Louis County, whether the primary county is St. Louis County or another county, are required to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendixes VIII-A and VIII-B for a listing of 2011 and 2010 taxing authorities that calculated separate tax rates for each subclass of property.

APPENDIX VIII-A
 2011 PROPERTY TAX RATES

LISTING OF 2011 TAX RATES FOR LOCAL GOVERNMENTS LEVYING A SEPARATE TAX RATE FOR EACH SUBCLASS OF PROPERTY

Political Subdivision	Purpose	Residential Real Estate			Agricultural Real Estate			Commercial Real Estate			Personal Property			Revenue
		Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	
<u>Clay</u>														
City of Gladstone	General Revenue	240,926,430	0.9290	0.9290	519,040	0.9290	0.9290	58,338,511	0.9290	0.9290	50,543,720	0.9290	0.9290	3,254,545

APPENDIX VIII-B
2011 PROPERTY TAX RATES

LISTING OF 2010 TAX RATES FOR LOCAL GOVERNMENTS LEVYING A SEPARATE TAX RATE FOR EACH SUBCLASS OF PROPERTY

Political Subdivision	Purpose	Residential Real Estate			Agricultural Real Estate			Commercial Real Estate			Personal Property		
		Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied

LEGEND:

- * Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
- ** Levy did not exist.
- A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
- B A voter approved increase to an existing levy.
- C Levy includes a recoupment rate authorized by state law.
- D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for the 2011 levies.
- E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.000 and levy up to its calculated tax rate ceiling.
- F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.
- G Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.

NOTE:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Political subdivisions partially in St. Louis County and partially in another county(ies) were also required by previous legislation to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendix VII for a listing of 2011 and 2010 taxing authorities that calculated a single tax rate to apply to all property.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

LEGEND:

- * Levy was not certified due to insufficient substantiating data; however, it does not appear a rate was levied.
- ** Levy did not exist.
- A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
- B A voter approved increase to an existing levy.
- C Levy includes a recoupment rate authorized by state law.
- D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see Report No. 2010-168, Review of 2010 Property Tax Rates.
- E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.000 and levy up to its calculated tax rate ceiling.
- F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.
- G Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for the 2010 levies. Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- H Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- I Determination of compliance is pending an Attorney General Opinion requested to determine interpretation of the correct operating levy established by the ballot language from November 2008. Levy also includes a recoupment rate authorized by state law. School district also has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- J A voter approved increase to an existing levy. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- K A voter approved increase to an existing levy. Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.

NOTE:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property.
