COMMENT:

I am opposed to the new coal-burning power plant, and in favor of the proposals for energy conservation, improved pollution control at existing plants, and "alternative generating systems" including especially wind. And am also in favor of KCP&L's being able to recover these costs in utility rates. The power plant is not in the public interest, while the other items are. There are many reasons for this position. Testimony at this hearing by Mr. Volland, Ms DeWitt and Dr. Spectus have listed many.
