AT&T 00 INFO directory assistance service goes beyond ordinary information.

You can dial knowing very little and an AT&T information specialist will help solve your case. AT&T customers can just dial from their home. It's easy to use and cost just \$1.99! Once an information specialist locates your information you can choose to be connected right away (AT&T customers pay their regular AT&T applicable per-minute costs on the connected call). Non-AT&T customers dial 10-10-ATT-00.*

Directory Assistance

Use AT&T 00 INFO to find any listed number in the U.S, whether it's local or long distance. Missing some information? No problem-- we'll try to fill in the blanks!

Yellow Pages Search

AT&T 00 INFO can also provide yellow page information anywhere in the US, including your own area. You'll get information for up to two listings, which are randomly selected per your requested area.

Phone Listing Information

AT&T 00 INFO can provide phone numbers, addresses, area codes and zip codes, even when you don't have the exact name, spelling or location of the person or business you are searching for.

Reverse Look-up

Even if you only have a phone number, AT&T 00 INFO can provide the name and address. It's no mystery to us!

Live Information Specialists

AT&T 00 INFO has live, friendly information specialists, not computers or recordings, who work with you to get the information you need. And when the search is over, we'll even offer to connect your call.*

* AT&T non-subscriber rates apply for connected calls made by non-AT&T customers using 10-10-ATT-00.
