## LEARN MORE

Directory Assistance used to be free, or cost a dime. As technology and competition have forced prices downwards for most telecom services, Directory Assistance costs have risen. Most major mobile phone companies charge \$1.25 for a call to national Directory Assistance, and some landline phone companies charge even more.

At **Easy411**" we offer the same service you'll receive from your mobile phone carrier - at about half the cost. We use operators (not voice-activated computers) to listen to your inquiry and look up your number. That way, if you're not sure about the exact spelling or location, you can explain it to a real person. And this helps to prevent the most irritating outcome of all - calling 411 and not getting the right number.

Signup is very easy, and takes about 90 seconds. Register your credit card and your mobile phone numbers (and your home phones too, if you like). You can call the Easy411" service from any phone number that you have registered by dialing 1-877-Easy411. When you call the service from a registered number, we authenticate you as a customer and pass your call on to the Directory Assistance operator. There's no need to log in or provide your user name or password - the system handles the call automatically.

When you register on the website, you'll be immediately activated to use the Easy411" service. We'll charge your credit card each month for the calls you make, at \$0.65 per call.

On the Easy411 website, you can log into your account and make changes. You can change your password, add or delete phone numbers, and update your credit card and contact information. You can also see how many calls you've made recently, and you can view a summary of the invoices we've sent to your credit card.

That's all there is to it.
