Subject: Help

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Missouri Public Service Commission:

I am a Noranda employee and have worked at the New Madrid aluminum smelter for over 27 years. I, along with all the New Madrid employees and families need you to help support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel and surrounding communities. The smelter is the lifeblood of this region.

Without this lower electricity rate, the new Madrid smelter is in great danger of closing like so many other aluminum plants have before. Noranda currently is paying the second highest electricity rate of the remaining 9 aluminum smelters left in the United States. If we do not get a rate reduction, over 900 jobs are in severe jeopardy.

I, along with so many of my friends, families, and co-workers are proud of where we live and we cherish our small family oriented communities. For so long, we have been a community with families that have worked together, gone to church together and raised our children together. We've watched our children grow up and many have become employed by Noranda Aluminum. Without Noranda, these close knit bonds would not have been possible.

Noranda has provided a stable environment for so many in this region and provided families to live comfortably allowing them to continue to be a family together.

Noranda has allowed me and many of MY family members (Uncle, cousins, brother), to be employed at such a great company, plus together having over 120 combined years of employment with Noranda Aluminum.

I have been blessed to have had Noranda as my employer for the more than 27 years. The friends I have made at the company and in the community have been irreplaceable. I also take pride in the work that I do for this company. Without Noranda our communities would be devastated. Our towns would become ghost towns, forcing retailers to close, family restaurants to go out of business, local dentists, small health care providers and many other family business would more than likely be forced to close their doors due to the devastating blow to the economic support that Noranda employees and their families pass on to these businesses.

I am asking you to please put yourself in my place when making your decisions. The power to save this plant is within your hands. A compromise is sitting before each of you, the commissioners, that would provide Noranda the rate relief greatly needed to keep this plant open while helping to protect many other ratepayers.

Please grant the applications for rehearing filed by the consumer parties.

I am asking you to PLEASE approve the rate relief requested in the consumer stipulation and help SAVE OUR MORE THAN 900 JOBS.... HELP SAVE COMMUNITIES..... AND ALLOW OUR FAMILIES TO CONTINUE TO LIVE A LIFE TO COMFORTABLY RAISE OUR CHILDREN AND TAKE CARE OF OUR FAMILIES FOR MANY YEARS TO COME.

Thank you for your time and consideration.

Kathee Brown

Manager, Sales Administration

Subject: Request for rehearing and rate relief

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please consider that approximately 2/3 of the power consumed by Noranda occurs during off-peak hours as defined in Rider I of the Ameren rate schedule, where off-peak hours are typically where the higher-cost generation is usually throttled back or taken offline and the lower-cost generation carries the system. This suggests a lower cost to serve and presents an opportunity to pass those lower costs to the customers at that time. No mention of time-of-day usage by rate classes was found in your staff's Rate Design and Class Cost of Service report issued 07/19/2012 for rate case ER2012-0166.

Additionally, from the above-referenced report, the staff suggests that even with the proposed rate schedule, the large users will still be paying more than smaller users on a percentage basis over the costs to serve those respective users, in effect, the large users have been subsidizing the smaller ones for some time.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

**Sincerely,
Dave Evans - Reliability Superintendent**

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. I have been in the primary aluminum industry for over 25 years, and I have been employed at 3 other aluminum smelters prior to coming to work at Noranda. Each of these plants were in the Northwest and all have been shut down due to the cost of power. I have witnessed what it did to the smaller communities that surrounded them and do not want to see that happen again. We, the New Madrid employees and our families and friends need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. These Bootheel area communities are very reliant upon taxes, wages, etc that are generated from the Noranda plant and those working there. Without this smelter, this area will be drastically changed for the worse.

Please grant the applications for the rehearing that has been filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Dear Missouri Public Service Commission:

My name is Chad Pinson and I have been a Noranda employee for 19 years. I currently live in Sikeston Missouri at 510 Laurelwood Avenue. I am a second generation Noranda employee as my father worked for the company for 31 years before he retired. I started my career with the New Madrid facility as an engineering co-op in 1994 and then hired in full time in 1996 upon graduation from college. I owe a lot to this facility as the employees here helped shape and mold me into the person I am today. After working here for six years, I transferred to another facility within the company and have had the opportunity to spend time at all six of our plant locations. However; it was with great humility this past summer, when I accepted the opportunity to return to the New Madrid facility as the Assistant Site Manager. This is where I got my start and I want to ensure that this facility is here for multiple generations.

The employees here at New Madrid are some of the best that I have worked with. They are not only dedicated to their jobs, but many of them are very active in our local communities. They realize the importance of Noranda to this area and that it is indeed the lifeblood of this region. The jobs here support our families and multiple communities across the bootheel region.

Please do not allow the New Madrid smelter to be another statistic on the list of closed Aluminum smelters in the United States due to uncompetitive power. Please grant the applications for rehearing filed by the consumer parties and please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,
Chad Pinson
Assistant Site Manager

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Ironically, the reason my wife and I moved to Missouri to work at Noranda Aluminum, is because the smelter where I previously worked for decades was shut down due to high power prices. Kaiser Mead, located on the northern edge of Spokane, Washington, was an 8 potline operation employing ~1100 people. At the time the smelter was closed, it was operating more efficiently than it had in its 5 + decade history. The impact on the Spokane economy when Kaiser Mead shut down was very significant and prolonged. I can't imagine the devastation to the economy of SE Missouri if Noranda were to close. I'm certain that if that were to occur, home values would plummet, cost of unemployment benefits would skyrocket, and the impact on local businesses would most likely result in many closures. There simply has to be a compromise solution to this problem. I've always believed that if there is enough will, there is a way.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,

Michael R. Newman

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. As I was growing up, my family lived in the St. Louis area, the smelter provided work for my father and contributed to my family permanently locating to Southeast Missouri as he was a project manager during the construction of the third pot line in the late 1980's and the Single Piece Anode project in the late 1990's. The smelter has also supported my own family for the past 22 years.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,

PATRICE NIEDBALSKI

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. I have worked for Noranda for 14 ½ years. I drive over an hour one way to come to work. My job here at Noranda has allowed me to raise my 2 girls and will be the reason that I can afford to send them to college. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. If the smelter was to close, I would have to uproot my family and move somewhere else away from family and friends in order to find a similar job.

Please consider all the families that will be affected if the smelter was to close.

I ask that you please grant the applications for rehearing filed by the consumer parties.

I ask that you please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,

Dear Missouri Public Service Commission,

As a lifelong Southeast Missourian I recognized the importance of Noranda to our area at a young age, long before I was employed by Noranda. All my life I had heard the word "Noranda", and knew it was significant part of our community. At the age of 20 I began my career at Noranda, and have since married, have one child and reside in Portageville, Mo. I'm now 39 years old and more than ever realize the impact the smelter has on not only Portageville, but all the surrounding communities. Noranda has been very good to my family, affording us a comfortable and "STABLE" lifestyle in my home town.

Now I fear for not only my family's future, but all the employees at the smelters future. Without the help of the PSC, the smelter could close, as have many other smelters over the years that were unable to secure sustainable power rates. I would like to ask the following of the PSC, which would give our New Madrid smelter a fighting chance to keep the lights on, and to continue providing for the hundreds of Southeast Missouri friends and families.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,

The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

I would like to stay working in Missouri, I have received my education in Missouri and worked at other production facilities in the area. There have been a number of facilities that have closed in recent years like Federal Mogul Powertrain in Malden, in which I worked for eight years prior to closure. It is getting more difficult to find good manufacturing based jobs in this area for people to work and support their families. Noranda needs to remain open to support the area and the state.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Dear Missouri Public Service Commission:

I am the Engineering Manager at the New Madrid aluminum smelter. I have worked in New Madrid for 13 years. I have a young family that has grown up in the area from Kindergarten through High School and now into college.

As an engineer, I am contacted by recruiters often to change companies for higher pay, benefits, or bigger challenges. But, this area has become home, many friends that have become family and the great people that I work with have always kept me at the New Madrid smelter. Also, Noranda at New Madrid may seem like a faceless corporation, it is NOT. It is people, fathers and mothers, grandparents, sons, brothers and sisters from the janitors to the plant president, and it is a community that I am proud to be part of.

These New Madrid employees and their families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

I have been an employee of Noranda in New Madrid for 3 years. I would love to retire from Noranda. The New Madrid Smelter is very important to my family and our region. Without lower electricity rate, the New Madrid Smelter is in danger of closing down like so many aluminum plants before. Noranda currently pays the second-highest electric rate of the 9 aluminum smelters in the US. If this doesn't change, hundreds of jobs including mine are in jeopardy.

The power to save our plant is in your hands. Please help save my job as well as the 900 other employees employed at this plant. Please grant a rehearing in the Noranda case. Please approve the rate relief compromise supported by the consumer groups.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Subject: Public Service Commission request

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Missouri Public Service Commission,

I am contacting you to ask that the Public Service Commission grant the current application filed requesting a rehearing of the Noranda Rate request. This rate request is critical to the survival of the Noranda Smelter and the Bootheel economy. I am concerned that if this compromised rate case is not considered in the near future that we may lose our ONLY major manufacturing plant.

Noranda is such a vital part of the Southeast Missouri area that many state citizens think that it is impossible for the plant to close. I once had the same opinion but over the last 19 years of employment at Noranda I have come to realize that if the compromised power rate is not granted there is a very good chance that the plant will close. While working at the smelter over the last 19 years I have traveled to several different smelters that have closed looking to purchase used equipment. One thing in common with all of these plants is that they closed due to unaffordable electric rates.

In closing, please allow the Noranda compromised rate request to be reheard in front of the Public Service Commission and to grant the rate requested.

Thank you for your time,

Neil Priggel

Dear Missouri Public Service Commission:

My name is Craig Wissink and I have worked at the New Madrid aluminum smelter since 2007. My family as well as all of the New Madrid families need you to support the Office of Public Counsel's compromise in the Noranda rate complaint. I personally have worked in four smelters in the United States that are no longer in business due to high power rates that resulted in closure of the facilities. I ask that you support Noranda by granting the application for rehearing filed by the consumer parties. Please approve the relief requested in the consumer stipulation and save our jobs. Please keep these good jobs here in the United States and not let them slip away abroad.

Sincerely,

Craig A. Wissink EHS Safety Engineer

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Missouri Public Service Commission:

I am a Noranda employee and have worked at the New Madrid aluminum smelter for over 37 years. My father worked here from 1970 until his death in 1989. He was one of the first people hired at the very beginning here at New Madrid. So you can see that Noranda it has been very important to our family over the years. I am hopeful to be employed with Noranda for several more years until I retire; unless something like this rate case causes the plant to close.

I don't think you will find anyone in the Bootheel of Missouri that doesn't have family or friends that work or have worked here. Noranda has touched many lives over the years. Our school systems in this area will be very affected if something happens to Noranda. They will lose students if their parents have to move out of the area. You see, there are not very many good paying jobs in the Bootheel that can support the influx of people that will lose their jobs. This will have a domino effect on other businesses in the area and all small business will likely have to close.

We are fortunate to have a caring company as Noranda here. I know that they donate to the different school activities in the area and many charities. How will these entities get the money they need to keep going?

The New Madrid employees and families need your support of the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties.

I am asking that you please approve the rate relief requested in the consumer stipulation and **SAVE OUR JOBS.**

Subject: Missouri Public Service Commission Please Grant The Rate Relief To Save the New Madrid Smelter

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. I relocated my family from Minnesota approximately 18 months ago when I accepted the position at Noranda, New Madrid. The Smelter has been a mainstay in Southeastern Missouri for more than four decades now. It is also the largest manufacturing employer in SEMO. To have it close would have a devastating impact not only on the 900 plus employees and families, but also to the region in general. Not to mention the possibility of having to uproot my family again in less than 2 years. If the compromise stipulation is not approved, that could very well spell the end of the New Madrid facility. As we know, manufacturing in the U.S. has been declining over the years. This is an opportunity for the commissioners to ensure that Noranda, New Madrid does not become another statistic. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Subject: Missouri Public Service Commission Please Grant Rate Relief

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Missouri Public Service Commission:

I am a Noranda employee and have worked at the New Madrid aluminum smelter for the past 14 years. My previous employer, Alcoa Eastalco Works in Frederick Maryland, shut down years ago because of the same issue we are now facing here at Noranda – high power rates. I had expected to retire from that facility, having committed 20 years of my life there. Instead I witnessed firsthand the plug being pulled and the devastation to employees and their families and friends, not to mention the many businesses that had depended on that smelter. The New Madrid employees and families now need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

It is interesting to me that the Commission views the amount of relief requested by Noranda as a huge burden on the rest of the ratepayers – so much so that they could not consider granting any of it to help save the company and the economy of the entire bootheel of our state. And then in nearly the same breath, the Commission seemed to have no issue with two other actions that cost the ratepayers even more: The first is another FAC increase that was slipped almost furtively to the ratepayers. The second is the attitude that the millions upon millions of dollars that Ameren over-earned appears to be considered by the Commission as merely fluff, a pittance that is not worthy of further discussion. That fluff happens to be greater than the relief requested by Noranda which could save the company, its nearly 1,000 direct jobs, and the untold thousands of additional indirect jobs affected that rely on Noranda to bolster the economic condition of southeast Missouri.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Subject: Noranda Rate Relief

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Missouri Public Service Commission:

I am the Technical Manager at the New Madrid aluminum smelter. I am into my 35th year working in the North American primary aluminum smelting business. The smelter at New Madrid is my 5th US smelter that I have been employed at during my career. I am disheartened to say that three of those five smelters are no longer in business. I have had to personally endure the pain of watching almost two thousand employees walk out of their plants for the last time; no longer having jobs with which to keep this country's manufacturing base strong or with which to feed and clothe families. And the reason for every closing was due to non-competitive power costs. The reason for every one of the 23 smelters that have been shuttered in the US since I have been in this business is related to power costs!

People like yourselves on the outside generally don't believe that it will happen – that a plant of this size will shut down due to high power costs. I understand your position; I've personally seen it happen too many times. Leaders at the smelters look to people in your position for relief, but you don't recognize the danger. Unless you're like us, living in the middle of the reality of trying to survive in this very competitive and often subsidized global smelting environment, you can't relate to the danger. You think that it won't happen, that we'll somehow figure out how to marginalize this major portion of our operating expense and things will get better. But it doesn't get better without relief. And then it does happen – smelters are closed and tens of thousands of American jobs are lost in the process. Are you willing to take the gamble that your constituents, the 900 plus employees at the New Madrid smelter, won't suffer the same fate because you didn't recognize the danger? Unfortunately, the reality of the danger is something that is generally seen in hindsight, once it is too late to bring the smelter and its jobs back to life. You have the opportunity right now, once and one time only, to not let this one get away from you!

The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties. Please approve the rate relief requested in the consumer stipulation and save our jobs.

Dear Missouri Public Service Commission:

09/22/14

I am a 35 year Noranda employee. As a Noranda employee I have watched closely the Noranda rate design case before the PSC. Real jobs are now being lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant. The reality and threat of these job losses is extremely important to me because my family relies on the New Madrid smelter for their livelihood. The smelter is the economy engine for the Bootheel. Without the smelter, families and businesses in the region would suffer greatly.

I support the rehearing and stipulation filed by the Office of Public Counsel (OCP) in this case. The stipulation has strong support for consumer groups and other ratepayers. Right now, the commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region.

Please approve the OCP's compromise stipulation that provides a job to 900 hardworking employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

DENNIS M. CARDEN

Dear Missouri Public Service Commission:

I am a Noranda employee and have worked at the New Madrid aluminum smelter for 24 years. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,

Mark O'Neal

Dear Missouri Public Service Commission:

I am a friend to an employee at the New Madrid smelter. As a friend I have watched closely the Noranda rate design case before the Public Service Commission (PSC). Real jobs are now being lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant.

The reality and threat of these job losses is extremely important to me because friend relies on the New Madrid smelter for their livelihood. The smelter is the economic engine for the Bootheel. Without the smelter, families and businesses in the region will suffer greatly.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Teresa Birk

Dear Missouri Public Service Commission:

My husband is employed at the Noranda smelter. As a family member to the New Madrid smelter I have watched closely the Noranda rate design case before the Public Service Commission (PSC). Real jobs are now being lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant.

The reality and threat of these job losses is extremely important to me because my family and community rely on the New Madrid smelter for their livelihood. The smelter is the economic engine for the Bootheel. Without the smelter, families and businesses in the region will suffer greatly. As a school teacher, the number of families the New Madrid smelter brings to our area is apparent in our classrooms. In a small community with not a whole lot to offer it is of great benefit to have a business such as Noranda draw families into the region. If the New Madrid plant were to close, many of these families would be forced to take up residence elsewhere which would be detrimental to our small businesses, local community, and public school system.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Commissioners of The Missouri Public Service Commission,

I write this letter to you with a deep and intimate knowledge of electricity rates and aluminum smelters. You see, I have been in this business of making primary aluminum for 42 years. My father did the exact same jobs I have done for 40 years with Reynolds Aluminum before me. I grew up in this business. It has provided an excellent career for myself and enabled me to provide adequately for my family. However, my career in aluminum has not been without issue. Unfortunately, those issues have always been around power and the availability of power at a rate to sustain a smelter.

I grew up in Northwest Alabama. Reynolds had their flagship smelter and rolling mill located there. At this time, there were 4 smelters located in the Tennessee Valley because of power. As TVA predicted a huge increase in power consumption, they embarked on a program to build half a dozen nuclear powered power plants. Due to cost overruns and public opinion of nuclear power plants, only one was completed. (Browns Ferry Nuclear Power Plant) The others were never completed and never generated a single watt of power. However, the cost of these huge plants had to be paid for. And this caused power rate increase which caused both consumer and industrial power rates to sky rocket. In the 70's and 80's, close to a million tons of primary aluminum were produced in the Tennessee Valley. Along with the revenue generated from this metal, there were literally thousands of high paying jobs in these smelters. Today, not one ounce of primary metal is produced in the Tennessee Valley. Nor is there a single high paying job remaining that is associated with primary aluminum smelting. Small towns, like Scottsboro Alabama, Sheffield Alabama, New Johnsonville Tennessee, literally saw their populations shrink dramatically because of high power rates and what it did to the smelters in those towns.

In the Pacific Northwest, a huge aluminum industry, Kaiser, Alcoa, Reynolds, all had huge smelters located in towns that depended on the existence of these smelters. The reason these smelters were there? Cheap hydro power. BPA, the Bonneville Power Administration had lots of cheap power. They too forecast huge increases in power loads and started to build Nuclear Plants. The WPPSS, Washington Public Power Supply Systems, or fondly called Whoops, was formed to build these power systems. Huge nuclear plants would be built to bridge the gap that hydro from BPA would not be able to supply because of skyrocketing demand. Again, guess what, the huge demand never materialized. Billions, and I mean billions of dollars wasted. Sound similar to the TVA fiasco? Yes it does. And who got stuck with the bill? Right again, the consumers and the Industrials. Power demand did not skyrocket, but cost of electricity did. And what happened, again, almost identical to the smelters on the TVA grid, the smelters on the BPA grid could not compete in the global aluminum market and shut down. When I was transferred to the Pacific Northwest, there were 11 smelters operating in the Pacific Northwest. Millions of tons of metal produced by people with good paying jobs and benefits. Small towns that thrived because of the revenues and salaries of these plants. Now? Slightly different story. Two smelters remain. One because of a great long term rate granted by the BPA. The other remaining smelter operates because the owner of the smelter also owns a huge percentage of the local hydro dam and has long term cheap power from that.

So my plea is this, I have seen what happens first hand. I have seen power rates go up and smelters go down. I have seen families move. I have seen families that did not move, disintegrate. I have seen small thriving towns become a place where no one wants to live, simply because you have no work at all there. It is not in the best interest of Missouri, the USA or the public in general for our economy to lose another heavy industrial plant when we don't have

to. Noranda deserves a lower power rate than consumers do because of our lower cost of service and our ability to provide a base load to the power generator. We also need a long term reasonable power rate for us to survive and New Madrid not to become one of those places where people say, "you know a smelter used to be there."

Subject: Missouri Public Service Commission Please Grant The Rate Relief To Save The New Madrid Smelter

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Missouri Public Service Commission members:

My name is Ray Staffey and I am employed as a Maintenance Planner at the Noranda Aluminum Smelter in New Madrid Missouri. I have been employed here at the smelter for 18 months. I am sure you are receiving lots of letters and emails regarding the electric power rate case at our facility. However, with this email, I would like to tell you personally how much this smelter affects my family, and perhaps you may gain a different viewpoint as it relates to the local community.

In 2010, my four year old son Cole, had a brain bleed requiring two brain surgeries. This left him unable to move the left side of his body, and accordingly, left him wheelchair bound, or so we thought. Fast forwarding to today, my son, now nine years old, not only walks, but runs, he also plays sports, and you would never know he had such a significant event if it weren't for the large scar on the right side of his head. The Kenny Rogers Children's Center (KRCC) in Kirksville Missouri is responsible for giving our son back to us. How does this tie in with this rate case you may ask? Well, Noranda Aluminum has donated over \$40,000 each year that my son has been going to the center, and they also provide the option for the smelter employees to donate from their payroll to the center as well. I am not sure how long Noranda Aluminum has been giving to the center prior to 2010, but I have no doubts it has been quite a long time. This center operates solely on donations from the community and it never charges the families a dime for its world class therapy that so many local children need. My wife and I founded a group called Cole's Team in 2010 made up of family and friends, and we have shared the stage with the Noranda Aluminum Smelter management at the KRCC annual Telethon for the past four years. I can tell you that without the help of the Noranda Aluminum Smelter and its employees, this center will not be able to help children like my son. The smelter is not only a vital part of the economy, it is a vital part of KRCC and I, as well as my wife and three children, personally look to you to see the benefits outside of the economic impact that closing the smelter would have. Without the donation from the smelter and its employees, KRCC would lose therapists, the ability to purchase specific equipment needed for an individual child, and ultimately lose the ability to help children in need. Commissioner's, there are currently hundreds of children on the waiting list to get into the center to begin therapy. Noranda Aluminum in New Madrid makes it possible for KRCC to expand to help these children and reduce that waiting list. I implore you to take the time to view just a few of the children and their stories, including my son Cole, here <http://www.kennyrogerscenter.org/telethon-stars>. Of course, if the smelter is forced to close, I would not have a job, and therefore, would not be able to get my son to therapy twice each week.

Without a lower electricity rate, the smelter is danger of following the historical decline of so many other aluminum smelters in the United States. You have the power to favor the rate relief and not only save our jobs and economy here in SEMO, but to keep open the charitable organizations that rely on our help. You have a compromise before you, and I personally ask you to consider ALL aspects of effects that granting this rate relief will sustain.

Vote in favor of the compromise and your voting to keep another U.S. facility operating, you would be voting in favor of keeping jobs in Missouri, and for me personally, you would be voting to keep my son, and so many other children like him, to have a place to get help locally when they need it. The power is yours to stand behind the Office of

Public Counsel's compromise stipulation in the Noranda rate complaint. Stand with the Governor Jay Nixon, stand with our State Representatives, and so many others in favor of this rate relief. Our way of life here in SEMO heavily depends on your decision to keep the smelter operating.

Sincerely,

Ray Staffey

Commissioner Robert S. Kenney, Chairman
Missouri Public Service Commission
P. O. Box 360
Jefferson City, MO 65102-0360

Dear Missouri Public Service Commission:

I am a close friend and family member to several employees that work at Noranda Aluminum, which is located in New Madrid, MO. As a friend and family member, I have watched closely the Noranda rate design case before the Public Service Commission (PSC). Real jobs are now being lost in the Bootheel because Noranda is unable to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant.

The reality and threat of these job losses is extremely important to me because friends and family members of mine rely on the New Madrid smelter for their livelihood. The smelter is the economic engine for the Bootheel. Without the smelter, families and businesses in the region will suffer greatly.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Tamra Martin

Dear Missouri Public Service Commission:

The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. The over 900 jobs at the smelter support employees, families and the local communities in the Bootheel of Missouri. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save these jobs.

Sincerely,

Michele Prior

Subject: noranda electricity rate

I am a Noranda employee and work at the New Madrid aluminum smelter. I have been working at Noranda for the past 28 years. The Smelter has been a mainstay in Southeastern Missouri for more than four decades now. It is also the largest manufacturing employer in SEMO. To have it close would have a devastating impact not only on the 900 plus employees and families, but also to the region in general. If the compromise stipulation is not approved, that could very well spell the end of the New Madrid facility. As we know, manufacturing in the U.S. has been declining over the years. This is an opportunity for you the commissioners to ensure that Noranda, New Madrid does not become another statistic. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. I have a life time of family and friends that would have to pick up and move possibly out of state so they can take care of their family. This is only a small piece of the iceberg that would be crushed. If we lost these jobs they will never come back and the small towns in the bootheel will dry up and be gone forever. Without a lower rate of electricity we will shut down, all you have to do is look at the charts on aluminum plant, so don't make New Madrid the next one.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Thanks

Dallas Snider

Subject: Noranda Power Rate

Dear Missouri Public Service Commission:

I am a President of USW Local 7686 and work at Noranda's New Madrid smelter. A few weeks ago, because of the Public Service Commission's decision not to grant Noranda power rate relief, I had to watch many good, hard-working people lose their jobs, and without a better electric rate, many others will soon be out of work. Real jobs are now being lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save more than 900 jobs.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Stan Ivie

September 24, 2014

Dear Missouri Public Service Commission:

As superintendent for the New Madrid County R-1 School District, it is with great concern for our community and school district that Noranda Aluminum has been placed in the position to have a rate design case before the Public Service Commission (PSC). The future of our school district is in your hands as a decision is being determined in regard to this. Real jobs are now being lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant. Both scenarios will be detrimental to the R-1 District. Not only in students, but for state aid and taxes that are required to run the district effectively.

The New Madrid County R-1 School District educates many of the children whose parent is employed or has lost their job with Noranda due to this rate design case. There are so many families within our district that rely on Noranda for their family income. Noranda is the economic backbone for the Bootheel. Without Noranda, families and businesses in the region will suffer greatly, which will cause our school district to suffer greatly.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri and to the New Madrid County R-1 School District. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Subject: Please approve the Noranda proposal by the OPC`

Dear Missouri Public Service Commission:

I am a Noranda employee who grew-up in Southeast Missouri and fully realize what Noranda, or any employer of this size and that pays well means to this region. I grew-up in Bloomfield, Missouri, and experienced what it is like to live in an area that went from having a large manufacturing facility to life afterward. The town never recovered, families left, the downtown died, and crime increased. All because the jobs were moved over seas. You have the power to not to allow this to happen to New Madrid and many of the small communities in this area. Every smelter that has closed in the United States has closed because of their power rate being too high to compete with China and other countries.

Please vote to approve the Office of Public Counsel's proposal, and keep the one economic oasis in Southeast Missouri from joining with the economic desert that surrounds it.

Sincerely,

Mark Christian

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,
Joyce Gibbar

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,

Greg Bixler, Scrubber Attendant

Dear Missouri Public Service Commission:

My son is a Noranda employee and works at the New Madrid aluminum smelter. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate request. These jobs at the smelter support employees, families and the local communities in Southeast Missouri and adjacent areas. This smelter is critical to the survival of this region and is one of the few places where good jobs for good pay still exist.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,

Larry Bleckler
Retired factory worker

September 23, 2014

Dear Missouri Public Service Commission:

I am a close relative of an early employee of Noranda who helped to build the Noranda plant at New Madrid, Missouri, and also served as a foreman. I still have a close relative who is an employee. As an interested party, I have watched closely the Noranda rate design case before the Public Service Commission (PSC). Real jobs are now being lost in the Bootheel because Noranda is not able to secure an affordable electric rate. The PSC can stop these job losses immediately and prevent future layoffs, or even worse, closure of the plant.

The reality and threat of these job losses is extremely important to me because a family member relies on the New Madrid smelter for her livelihood. The smelter is the economic engine for the Bootheel. Without the smelter, families and businesses in the region will suffer greatly.

I support the rehearing and stipulation filed by the Office of Public Counsel (OPC) in this case. The stipulation has strong support from consumer groups and other ratepayers. Right now, the Commission has an opportunity to approve a compromise solution that is supported by all affected parties and to save 900 jobs that are the lifeblood of an entire region. Jobs are very important to the Bootheel. The closing of Noranda would be a catastrophe to this area.

Please approve the OPC's compromise stipulation that provides a job to 900 hard-working employees and ensures critical economic support for businesses and families in Southeast Missouri. This is a consumer friendly approach that keeps rates low for everyone.

Sincerely,

Armon J. Keaster

Jefferson City, MO 65102

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

[Employee Name]

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

Moses Rowe

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

Stephen Zschille

Jefferson City, MO 65102

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

[Employee Name]

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

[Employee Name]

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

A handwritten signature in cursive script, appearing to read "William Palmer", with a long horizontal flourish extending to the right.

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

[Employee Name]

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

KEVIN MORSE

Dear Commissioners,

I am a member of USW Local 7686 and work at Noranda's New Madrid aluminum smelter. I am writing to ask you to vote in favor of Noranda's request for a rehearing in its rate complaint and to vote in favor of rate relief for Noranda. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the rate complaint. The union jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region. Please vote in favor of the stipulation and save 900 family-supporting jobs in New Madrid.

Sincerely,

Danny Bras 451-

Dear Missouri Public Service Commission:

I am a Noranda employee and work at the New Madrid aluminum smelter. The New Madrid employees and families need you to support the Office of Public Counsel's compromise stipulation in the Noranda rate complaint. Our jobs at the smelter support employees, families and the local communities in the Bootheel. The smelter is the lifeblood of this region.

Please grant the applications for rehearing filed by the consumer parties.

Please approve the rate relief requested in the consumer stipulation and save our jobs.

Sincerely,
