## Save on Lighting

Get reduced prices on a variety of LED lighting.

### Efficient Lighting Program

Save money instantly at checkout when you buy select light-emitting diode (LED) bulbs! Receive your instant discount when you shop for qualifying ENERGY STAR® LED lighting products at participating retailers.

#### How do LEDs compare to traditional incandescent bulbs?

- **Energy Efficiency.** LEDs use up to 90% less energy.
- **Cost Savings.** Improved energy efficiency means each bulb can save you \$30 - \$80 in electricity costs over its lifetime.\*
- **Long Life.** LEDs last up to 25 times longer. You don't have to replace them as often, which is great for hard-to-reach light fixtures.
- **Variety.** LEDs come in many styles, lumens and temperatures - from dimmable candelabras to bright spotlights - so you'll find options to fit almost any fixture in your home.
- **Instant Discounts.** Through the Ameren Missouri Efficient Lighting program, you can enjoy a lower price on select ENERGY STAR LEDs at participating retailers, which saves you even more!\*\*

FIND A RETAILER
