RETAIL REVENUES 17
GMO AAO'S 18
GMO-L&P PHASE-IN 23
MISCELLANEOUS 24

1 **EXECUTIVE SUMMARY**

2 Q. Please summarize Staff's position with regard to the bad debt factor-up?

3 A. In this surrebuttal testimony, I respond to GMO's request to recover bad debt
4 expense in excess of the annualized level of bad debt expense calculated in this case for each
5 of its rate districts, MPS and L&P. I explain Staff's recommendation that GMO not be
6 allowed to recover bad debt expense, at a level that includes the full impact of the revenue
7 requirement increase in this rate case for each of its rate districts. GMO's request to include
8 an adjustment for bad debt expense associated with the revenue requirement increase (or
9 decrease) is commonly referred to as bad debt "factor-up" or bad debt "gross-up."

10 GMO's rationale for making this request is based on an assumption that completely
11 lacks any factual evidence to support their assumption. Conversely, Staff has analyzed the
12 GMO-MPS and GMO-L&P own historical retail revenues and net write-offs to determine if a
13 direct and proportional relationship exists with retail revenues and bad debt expense. Staff's
14 analysis of the actual net write-offs as compared to related revenues is displayed in Staff's
15 charts and graphs, where such charts and graphs show the bad debt expense sometimes moves
16 in the opposite direction that retail revenues move, or the data illustrates that bad debt and
17 revenues do not have a direct relationship nor do they move in direct proportion when levels
18 of rates and revenues increase. Staff recommends that the Commission deny GMO's request
19 to adopt the bad debt "factor-up" for bad debts for each of its rate districts, MPS and L&P.
20 However, in the event that the Commission does grant GMO's request to "factor-up" bad debt
21 expense proportionate with an increase in revenue requirement, then Staff recommends to also

1 reflect in the bad debt “factor-up” additional forfeited discounts (late payment fees) that will
2 increase as result of the rate increase.¹

3 Q. Please summarize Staff’s position with regard to the property tax tracker?

4 A. Property taxes are known and measurable costs that Staff and GMO have used
5 the same methodology to calculate an annualized level of property tax expense to include in
6 GMO’s cost of service for each of its rate districts, MPS and L&P. In response to GMO’s
7 request for a property tax tracker, in its rebuttal testimony in this case, Staff explained that
8 any increase in property taxes is attributable to the additions of substantial plant over the last
9 several years. In this testimony, Staff will show that 2010-2011 tax levies in the State of
10 Missouri have both decreased and increased in Missouri counties. The same can be said for
11 Missouri assessments. Trackers are typically used for costs that are unpredictable or there are
12 extraordinary circumstances surrounding the costs. Property taxes are neither unpredictable
13 nor extraordinary. Staff recommends the Commission deny GMO’s request for a property tax
14 tracker for each of its rate districts, MPS and L&P.

15 Q. Please summarize Staff’s position with regard to the Renewable Energy
16 Standard costs?

17 A. Staff recommends reflecting in GMO’s cost of service an annualized level of
18 RES expenditures over the twelve month period ending March 31, 2012, updated through
19 August 31, 2012, for each of its rate districts, MPS and L&P. In addition Staff recommends a
20 three (3) year amortization of deferred RES costs with no rate base treatment. GMO is
21 requesting rate base treatment for the unamortized balance. In addition to providing several
22 reasons as to why the Commission should deny GMO rate base treatment for the RES costs in

¹ Lyons Rebuttal Testimony includes additional analysis on the relationship to Missouri retail revenues and forfeited discounts.

1 my rebuttal testimony in this case, including an annualized level of RES costs is another
2 example of why RES costs should not be included in rate base. The inclusion of an
3 annualized level of RES costs allows GMO to recover these costs sooner than deferring and
4 amortizing the costs. Staff recommends the Commission deny GMO's request to include any
5 unamortized balance of RES costs in rate base.

6 Q. Please summarize Staff's position with regard to the Retail Revenues?

7 A. Staff includes customer growth revenues as part of Staff's weather normalized
8 revenues which is included in Staff's calculation of the GMO-MPS and GMO-L&P revenue
9 requirement. As part of the audit process, Staff reviews all customer classes with the
10 exception of the Large Power Service (LPS) group, to determine if there are increases or
11 decreases in each of the classes and whether a growth adjustment should be calculated.
12 Although Staff has been consistent when calculating the GMO-MPS and GMO-L&P
13 customer growth in GMO's past rate cases, GMO brought to Staff's attention some concerns
14 with the number of classes in Staff's customer growth analysis for each of its rate districts,
15 MPS and L&P. As a result of internal Staff discussions, Staff agrees with GMO and will
16 update the number of classes included in Staff's customer growth adjustment for each of its
17 rate districts, MPS and L&P.

18 Q. Please summarize Staff's position with regard to GMO's AAO?

19 A. The purpose of an AAO is to allow a utility the opportunity to recover costs
20 that are considered extraordinary and material. In between rate cases the presumption is the
21 utility is recovering its expenses. Consequently, the amortization period granted by the
22 Commission in an AAO should not be tied to a rate case. Staff recommends a reduction to
23 the GMO-L&P annual amortization expense associated with the ice storm that occurred in

1 2007 in the GMO-L&P service territory. In addition, Staff recommends the Commission
2 require GMO track any over-recovery associated with the GMO-L&P ice storm and
3 GMO-MPS Sibley AAO's to be used to offset any future request for an AAO by GMO in
4 the GMO-L&P cost of service calculation.

5 The Commission approved an AAO for GMO, f/d/b/a Aquila Inc. ("Aquila"),
6 allowing GMO-L&P to amortize the 2007 ice storm costs over a five year period beginning
7 January 1, 2008, through January 1, 2013. Since the amortization period ends before the
8 effective date of rates in this case, Staff recommends an adjustment to reduce the annual
9 amortization expense to mitigate the over-recovery of these costs. Staff's recommendation to
10 reduce the annual amortization expense will continue to cause an over-recovery of the
11 GMO-L&P ice storm costs. Therefore, Staff recommends the Commission require GMO
12 track any over-recovery associated with the GMO-L&P ice storm to be used to offset any
13 future request for an AAO by GMO in the GMO-L&P cost of service calculation.

14 GMO-MPS currently books an amortized level of expense for two AAO's granted by
15 the Commission in 1993 for the Sibley rebuild. The twenty (20) year recovery period will end
16 in May and June 2013. Staff did not make an adjustment to reduce the amortization expense
17 for these AAO's because the amortization period ends beyond the True Up period in this case.
18 However, to mitigate the over-recovery of these costs, Staff recommends the Commission
19 require GMO to track any over-recovery associated with the GMO-MPS Sibley AAO's to be
20 used to offset any future request for an AAO by GMO in the GMO-MPS cost of service
21 calculation.

22 Q. Please summarize Staff's position with regard to the GMO-L&P Phase-in?

1 A. Staff recommends the GMO-L&P Phase-In be cancelled, and the unrecovered
2 revenue of approximately \$5.6 million be amortized over a three (3) year period, and GMO
3 establish a tracker that will be trued-up at the end of the three (3) year amortization period.
4 Staff witness Curt Wells provides additional details related to the GMO-L&P Phase-in in his
5 surrebuttal testimony in this case.

6 **BAD DEBT EXPENSE**

7 Q. What is the purpose of this section of your surrebuttal testimony?

8 A. I am responding to GMO witness John P. Weisensee's rebuttal testimony,
9 addressing GMO's request to "gross-up" or "factor-up" bad debt expense by including a level
10 of bad debt expense associated with the revenue requirement increase granted in this rate case
11 for each of its rate districts, MPS and L&P.

12 Q. What is Staff's recommendation with regard to a bad debt "factor-up"?

13 A. As discussed in detail in my rebuttal testimony in this case, Staff recommends
14 the Commission deny GMO's request to "factor-up" bad debt expense associated with the
15 ordered revenue requirement increase in this case for each of its rate districts, MPS and L&P.
16 Included in my rebuttal testimony in this case, Schedules KL-1A, KL-1B, and KL-1C, are
17 analyses of the GMO-MPS and GMO-L&P historical retail revenues and bad debt expense,
18 both net of gross receipts tax. Theoretically, GMO's request appears reasonable. However,
19 upon analyzing GMO's historical retail revenues and bad debt expense, the theory simply
20 does not hold true and, as a result, is no more than an assumption. In my rebuttal testimony
21 for this case, I provide a historical analysis for the period of 2000-2011 that also includes
22 examples of the GMO-MPS and GMO-L&P highest revenue producing months, June through
23 September, and the corresponding bad debt expense for these months. The analysis does not

1 validate GMO's assumption that bad debt expense will increase with any additional revenue
2 requirement.

3 Q. Please explain GMO's position with the bad debt "factor-up"?

4 A. Mr. Wiesensee states in his rebuttal testimony on page 6, lines 8-12 and 17-18.

5 This is an issue that has been discussed in several recent GMO rate
6 cases, and which was decided by this Commission in the Kansas City
7 Power & Light Company's favor in Case No. ER-2006-0314 ("2006
8 Case"). GMO again proposes that the bad debt expense built into rates
9 in this case include bad debts related to the revenue increase in this
10 case.

11 ...

12 It is logical and intuitive that increased revenue will result in increased
13 bad debt write offs, assuming all other factors remain constant.
14 (emphasis added)

15 Q. Do you agree with Mr. Wiesensee's statement, "It is logical and intuitive that
16 increased revenue will result in increased bad debt write offs."?

17 A. Yes. I agree that Mr. Wiesensee's assumption about bad debt write offs is
18 theoretically logical. However, after analyzing the GMO-MPS and GMO-L&P historical
19 retail revenues and bad debts, the facts do not support GMO's recommendation. GMO has
20 suggested the Commission ignore the facts and base its decision on an assumption.

21 Q. Has GMO provided any evidence supporting its recommendation to include
22 an additional level of bad debt expense associated with the revenue requirement ordered in
23 this case?

24 A. No. GMO has not provided any analysis to support the inclusion of a level of
25 bad debt expense related to the revenue increase in this case. Mr. Wiesensee's sole argument
26 is based on the assumption that bad debt expense will increase as it relates to a rate increase,

1 “assuming all other factors remain constant.”² This statement is just another assumption
2 GMO uses in its recommendation. First GMO makes the assumption that bad debt expense
3 will increase with the additional revenue requirement ordered in this case, and then GMO
4 makes the assumption that all other factors remain constant. Staff has provided the analysis to
5 contradict the first assumption and there is simply no evidence to support that all other factors
6 remain constant. Mr. Weisensee confirms this in his rebuttal testimony where he states, “The
7 economy could improve dramatically, resulting in overall bad debt write-offs not increasing,
8 but no one can predict those events.”³

9 Q. Did the Commission Order in Case No. ER-2006-0314 support KCPL’s
10 position related to the bad debt “factor-up”?

11 A. Yes. On page 63 of the Commission Order in Case No. ER-2006-0314, the
12 Commission states,

13 The Commission finds that the competent and substantial evidence
14 supports KCPL’s position, and finds this issue in favor of KCPL. The
15 Commission understands Staff’s argument that there is not a perfect
16 positive correlation between retail sales and the percentage of bad
17 debts. While it’s possible that KCPL’s bad debt expense could
18 decrease, the Commission finds it more probable, and therefore just and
19 reasonable, that an increase in the amount of revenue that KCPL is
20 allowed to collect from its Missouri retail ratepayers will result in a
21 corresponding increase in bad debt expense.

22 Q. Has the Commission ordered in favor of GMO with regard to a bad debt
23 “factor-up”?

24 A. No. Although this is an issue that has been discussed in previous GMO rate
25 cases, the Commission has not heard the issue other than in written testimony.

² Weisensee Rebuttal Testimony in Case No. ER-2012-0175, Page 7.

³ Weisensee Rebuttal Testimony in Case No. ER-2012-0175, Page 7.

1 Q. Based on Staff's analysis of the GMO-MPS and GMO-L&P 2000-2011
2 historical retail revenues and net write offs, did Staff have any other conclusions?

3 A. Yes. As discussed in my rebuttal testimony in this case, Staff provided
4 examples of the GMO-MPS and GMO-L&P highest revenue producing months (June through
5 September), which also included the months subsequent to a GMO-MPS and GMO-L&P rate
6 increase, to determine if a relationship of increased revenues results in increased bad debts.
7 Staff determined there was no direct relationship between revenues and bad debts. In
8 addition, Staff analyzed the GMO-MPS and GMO-L&P historical retail revenues and bad
9 debt expense for the twelve (12) month period directly following a rate increase. In other
10 words, Staff analyzed the data for the twelve (12) month period ending February 2007, (2005
11 rate case, effective date of rates March 1, 2006), twelve (12) month period ending May 2008,
12 (2007 rate case, effective date of rates June 3, 2007), and finally, twelve (12) month period
13 ending August 31, 2010 (2009 rate case, effective date of rates, September 1, 2009). Staff did
14 not have a full twelve (12) months of data subsequent to the effective date of rates in the 2010
15 rate case to analyze.

16 Q. What did Staff conclude from the results of its analysis?

17 A. Similar to Staff's analysis of the GMO-MPS and GMO-L&P historical retail
18 revenues and bad debt for the period of 2000-2011, and during the summer peaking months,
19 Staff concluded that bad debt expense did not have a proportionally direct relationship to
20 revenues. Approximately half (1/2) of the data reviewed by Staff indicated that there was no
21 direct correlation or proportionate relationship between retail revenues and bad debt expense.
22 That is, while electric revenues increased (or decreased), actual bad debt write-offs tend to
23 decrease (or increase) by different amounts and in different directions. Even in situations

1 where revenues and bad debts tend to move in the same direction, Staff observed that they
2 were either increased or decreased by different and disproportionate amounts. Again, this
3 situation does not, in any way, support GMO's assumption that bad debt write-offs have a
4 proportional relationship to retail revenues.

5 Q. Finally, does any other party oppose GMO's recommendation to include an
6 additional level of bad debt expense related to the revenue requirement filed in this case?

7 A. Yes. MIEC's and MECG's witness Greg Meyer also opposes GMO's
8 recommendation for the bad debt "factor-up." In addition to providing data for the period of
9 2007 through 2010, which confirms no direct correlation between increased retail revenues
10 and bad debt expense, Mr. Meyer opposes the bad debt "factor up" because it goes beyond the
11 True-Up period in this case. Mr. Meyer's states:

12 Considering the effective date of rates and the six-month lag between
13 revenues and write-offs, the adjustment proposed by GMO will not be
14 fully recognized on the books of GMO until June 2014. This is 22
15 months beyond the true-up date of August 31, 2012 in this case.
16 GMO's proposed adjustment is also 18 months beyond the operation of
17 law date. Effective, GMO is attempting to collect rates for bad debt
18 that won't fully be realized for another 18 months. The adjustment
19 clearly violates the test year concept of a rate case whereby all relevant
20 factors are analyzed to a consistent point and time.⁴
21 (Emphasis Added)

22 Q. Does Staff agree with Mr. Meyer?

23 A. Yes.

24 Q. Please summarize Staff's recommendation?

25 A. Staff recommends the Commission deny GMO's request to include an
26 additional level of bad debt expense related to any revenue increase ordered in this case for
27 each of its rate districts, MPS and L&P. Staff provided several examples, based on the

⁴Meyer Direct Testimony in Case No. ER-2012-0175.

1 GMO-MPS and GMO-L&P own historical retail revenues and bad debt expense, which
2 confirm there is no correlation between increased revenues and bad debt expense. Based on
3 Staff's analysis of retail revenues and bad debt expense for the period of 2000-2011 Staff
4 concluded that the relationship of increased revenues and bad debts are not proportionally
5 related nor exhibit a direct correlation. Therefore, GMO's assumption that bad debts will
6 increase dollar for dollar with additional revenue ordered in this case is simply not true.
7 However, in the event that the Commission does grant GMO's request to "factor-up" bad debt
8 expense proportionate with an increase in revenue requirement, then Staff recommends to also
9 reflect in the bad debt "factor-up" additional forfeited discounts (late payment fees) that will
10 increase as result of the rate increase.

11 **PROPERTY TAX TRACKER**

12 Q. What is the purpose of this section of your surrebuttal testimony?

13 A. I am responding to GMO witness Darrin R. Ives rebuttal testimony addressing
14 GMO's request for a property tax tracker.

15 Q. Does Staff recommend implantation of a property tax tracker?

16 A. No, Staff does not recommend the Commission authorize GMO to implement
17 a property tax tracker.

18 Q. What is your response to Mr. Ives' statement in his rebuttal testimony in this
19 case that:

20 ...property taxes are significant component of the Company's cost of
21 service and as the level of such taxes can and has changed significantly
22 from year to year with little control by the Company, it makes sense to
23 address such recovery through a defined mechanism such as a tracker.⁵

⁵ Ives Rebuttal page 23, lines 13-16.

1 A. In this statement Mr. Ives disregards the predictability of property tax expense,
2 and he ignores that the cause of GMO's recent increases in property tax expense – significant
3 new physical plant additions – are entirely within the control of GMO.

4 Q. Why is the predictability of property tax expense relevant?

5 A. As explained in my rebuttal testimony in this case, a tracker should be used in
6 rare circumstances where it is extremely difficult to identify an amount of cost to be included
7 in rates. For example, I recommended the use of a tracker in Case No. ER-2010-0356 and
8 again in this case for operation and maintenance costs of Iatan 2. The recommendation of a
9 tracker was made because at the time Iatan 2 was placed in service, GMO had limited
10 operational experience and no historical costs for Staff to determine an annualized level of
11 operation and maintenance expense. In this case, Iatan 2 will have operated for two (2) years.
12 Staff determined two (2) years is not an adequate period of time to recommend an annualized
13 level of operation and maintenance expense; and therefore, Staff recommended the
14 continuation of the tracker. Iatan 2 operation and maintenance expense is an unusual
15 circumstance as a result of limited operation experience and limited historical data. Unlike
16 the Iatan 2 operation and maintenance expenses, property taxes are known and measurable
17 costs for which both GMO and Staff have historically used the same method to calculate an
18 annualized level to include in rates.

19 Q. Why has GMO's property tax expenses changed over the past several years?

20 A. GMO's property tax expenses have increased due to GMO's construction of an
21 entire new generation plant, and GMO has significantly expanded its capital investment in
22 other plants. Although Staff agrees that property taxes have changed, Staff disagrees with the

1 reason for the change and changes in property tax expense are out of GMO's control.

2 According to Mr. Ives rebuttal testimony on page 22,

3 What is certain is that the Company has little control over the actual
4 property tax valuations, the mill levy tax rates and thus the ultimate
5 property taxes to be paid. Property taxes are determined on an annual
6 basis and, due in part to budgetary issues of state and local
7 governments such taxes, can and have changed significantly over the
8 past several years...

9 Attached as Schedule KL-SUR-1 to this surrebuttal testimony, is a report on
10 Missouri's property taxes from the State Auditor's Office completed in December 2011.

11 Although the complete report is available, due to its voluminous nature, data supporting
12 GMO's territory for each of its rate districts MPS and L&P is attached to this surrebuttal
13 testimony. The report shows that while some counties' assessments and levies have
14 increased, others have decreased or remained flat when compared to 2010.

15 Q. How does GMO have control over property tax expense?

16 A. First, GMO has the ability to time its rate cases to ensure significant changes to
17 property taxes are captured in rates. Second, GMO and other utilities have the right to appeal
18 property tax assessments to the State Tax Commission. For example, Ameren Missouri
19 appealed its 2010 property tax assessment from the State Tax Commission and reached a
20 settlement with the State Tax Commission in the summer of 2011, resulting in a refund.⁶ If a
21 situation were to occur similar to the issue previously described for Ameren Missouri,
22 GMO would have no incentive to appeal its property assessments because a tracker would
23 allow GMO to recover property tax expense through rates for each of its rate districts, MPS
24 and L&P.

⁶ Gary S. Weiss Rebuttal Testimony, in Case No. ER-2012-0166.

1 Q. Does GMO have any planned significant plant additions that would cause an
2 increase in its taxable property in the near future?

3 A. No. As discussed in my rebuttal testimony in this case, Staff is aware that
4 GMO has plans for environmental upgrades for Unit 1 of the Jeffery Energy Center, any
5 property taxes associated with this upgrade will not impact property taxes in the next few
6 years. Likewise, GMO has plans for environmental upgrades to Sibley, Unit 3⁷.
7 The anticipated completion date of this project is 2017. The costs associated with these
8 projects are significant and as with any significant plant additions, Staff would expect the
9 Company to file a rate case to coincide with the environmental upgrades in service dates.

10 Q. Please summarize Staff's position for a Property Tax Tracker.

11 A. Staff does not recommend that the Commission authorize GMO to implement
12 the accounting for a property tax tracker. Property taxes are known and measurable costs that
13 GMO and Staff have historically used the same methodology to calculate an annualized level
14 to include in rates for each of its rate districts, MPS and L&P. However, now GMO requests
15 and argues that a property tax tracker is necessary because of increased property taxes of
16 which they have no control. While Staff agrees property taxes have increased, the increases
17 are attributable to significant plant additions over the last several years. Although GMO
18 wants the Commission to believe that GMO has no control over property taxes, this is simply
19 not true. Establishing a property tax tracker will remove any incentive GMO has to
20 reasonably appeal property taxes.

21 **RENEWABLE ENERGY STANDARDS**

22 Q. What is the purpose of this section of your surrebuttal testimony?

⁷ Great Plans Energy Inc. 10-Q Page 30.

1 A. This section of the testimony is to respond to the rebuttal testimony of GMO
2 witness Tim M. Rush regarding GMO's position on Staff's accounting treatment of the costs
3 associated with the Missouri Renewable Energy Standard (RES).

4 Q. Please summarize Staff's accounting treatment of the costs associated with
5 the RES?

6 A. Staff's recommendation, in this case, is to include all deferred costs, including
7 carrying costs, less the costs already recovered in rates, through the True-Up period,
8 August 31, 2012, with an amortization of these costs over a three (3) year period, with no rate
9 base treatment for the unamortized balance. In addition, Staff is recommending an annualized
10 level of RES costs to be included in GMO's cost of service for each of its rate districts, MPS
11 and L&P. Staff included an annualized level of costs through March 31, 2012, and will
12 continue to examine the costs through the True-Up period, August 31, 2012.

13 Q. Why has Staff not included rate base treatment for RES costs?

14 A. In my rebuttal testimony in this case, pages 21-22, Staff identifies several
15 reasons why rate base treatment should not be accepted by the Commission. An additional
16 reason is that including an annualized level of RES costs in the GMO-MPS and GMO-L&P
17 cost of service allows GMO to recover the RES costs sooner than if all the costs were deferred
18 and amortized.

19 Q. Does GMO provide an explanation why deferred RES costs should be included
20 in rate base?

21 A. GMO witness Rush states on page 45 of his rebuttal testimony,

22 "The primary objective of the RES is to increase the use of renewable
23 energy and thereby reduce future coal generation. Therefore, and
24 particularly as relates to solar renewable energy, the deferred RES costs
25 are similar in nature to deferred DSM costs. Since both the Staff and the

1 Company have consistently included deferred, unamortized DSM costs in
2 rate base, GMO has included deferred RES costs in rate base in this
3 rate case.”

4 Q. Does Staff agree with Mr. Rush’s recommendation?

5 A. No. Demand-Side Management (DSM) costs are different than RES costs
6 because DSM programs are designed to decrease the amount of energy a customer uses. A
7 reduction in demand or energy offsets the need for Company generation, which generation
8 typically earns a rate of return in rate base. However, the use of renewable energy does not
9 decrease the need of demand or energy, but alters the source of the energy. A company does
10 not have to suffer a loss in rate base from incurring RES expense.

11 Q. What is Staff’s recommended accounting treatment from the deferred RES
12 costs that GMO-MPS and GMO-L&P has incurred through August 31?

13 A. In Mr. Rush’s rebuttal testimony at page 45, line 10, he identifies the
14 deferred RES cost balance as \$1.7 million and \$0.4 million for GMO-MPS and GMO-L&P,
15 respectively, as of March 31, 2012. At the time of this surrebuttal testimony, the August
16 balance is unknown. However, Staff will examine the RES costs for the True-Up. Staff
17 recommended, in its Cost of Service report filed in this case, on August 9, 2012 and again in
18 my rebuttal testimony filed on September 12, 2012, the deferred costs through
19 August 31, 2012 be amortized over a three (3) year period. The amortization period of three
20 (3) years is based on no rate base treatment. Staff’s recommendation of an annualized level
21 and a shorter amortization period than GMO’s recommended five (5) years, benefits GMO by
22 allowing a quicker recovery of these costs. If the Commission decides rate base treatment for
23 the deferred RES costs is appropriate then Staff recommends a longer amortization period of
24 six (6) years.

1 **RETAIL REVENUES**

2 Q. Please explain the issue related to GMO retail revenues?

3 A. GMO and Staff make customer growth adjustments to test year kWh sales and
4 rate revenue to reflect the additional kWh sales and rate revenue, that would have occurred if
5 the number of customers taking service at the end of the update period (March 31, 2012) and
6 at the end of the True-Up period (August 31, 2012) had existed throughout the entire test year.
7 GMO witness George M. McCollister disagrees with the number of GMO-MPS and
8 GMO-L&P retail rate classes Staff used to develop its customer growth adjustment.

9 Q. Did Staff calculate customer growth on all of the GMO-MPS and GMO-L&P
10 retail rate classes?

11 A. No. During the audit process for retail revenues, Staff reviews all retail
12 customer classes, with the exception of the Large Power group, to determine if there is a
13 significant change in the number of customers in each the of GMO-MPS and GMO-L&P
14 retail rate classes. Staff looks for increases and decreases in each of the classes to determine
15 if Staff should include the class in its customer growth adjustment. For its direct case, Staff
16 determined that GMO-MPS experienced an increase in its overall growth and GMO-L&P
17 experienced a decrease in its overall growth in the number of its utility customers.

18 Q. Please explain why the GMO-MPS and GMO-L&P Large Power class is not
19 included in Staff's customer growth adjustment.

20 A. Large Power customer's energy consumption and revenue patterns vary
21 significantly across this group of customers, making it necessary to examine the history of
22 each customer on an individual basis. On page 102-103 of Staff's Cost of Service report in
23 this case, Staff witness Robin Kliethermes addresses the Large Power revenue annualization

1 for GMO-MPS and Staff witness Kim Cox address the Large Power revenue annualization for
2 GMO-L&P.

3 Q. Has Staff been consistent with the method it uses to calculate the GMO-MPS
4 and GMO-L&P customer growth in GMO's previous rate cases?

5 A. Yes. Staff's method of determining the appropriate level of customer growth,
6 (increase or decrease) is consistent in GMO's previous rate cases.

7 Q. Has Staff discussed GMO's concern with its customer growth adjustment?

8 A. Yes. As a result of internal Staff discussions, Staff agrees with GMO that all
9 retail rate classes should be included in the customer growth adjustment to accurately reflect
10 the GMO-MPS and GMO-L&P increase or decrease in customers. During the True-Up in this
11 case, Staff will include all of the GMO-MPS and GMO-L&P retail rate classes in its customer
12 growth adjustment.

13 **GMO AAO'S**

14 Q. What is the purpose of this section of your surrebuttal testimony?

15 A. I am responding to GMO Witness John P. Weisensee's rebuttal testimony,
16 addressing GMO's request to include the full annual amortization of the GMO ice storm costs
17 in GMO's cost of service for setting rates in the L&P rate district.

18 Q. What is Staff's recommendation with regard to GMO's request to include the
19 full annual amortization of the GMO's ice storm costs in GMO's cost of service for the L&P
20 rate district?

21 A. To limit the magnitude of over-recovery of the ice storm costs, Staff
22 recommends an adjustment of the annual amortization costs through August 31, 2012, the
23 True-Up period. In other words, Staff made an adjustment to remove eight (8) months of

1 the annual amortization expense in the cost of service calculation. In addition, Staff
2 recommends GMO-L&P track the over-recovery to be used to offset any future request for an
3 AAO by GMO-L&P.

4 Q. Please provide the background that led to these costs.

5 A. In December 2007, a significant ice storm struck the area served by GMO,
6 f/d/b/a Aquila Inc. (“Aquila”), in its L&P rate district. Aquila filed an application for an AAO
7 in January 2008 for the L&P rate district, under Case No. EU-2008-0233. The Commission
8 approved the AAO, allowing GMO-L&P to amortize the ice storm costs over a five year
9 period beginning January 1, 2008, through January 1, 2013.⁸

10 Q. What is the annual level of expense currently included in GMO’s rates for the
11 L&P rate district?

12 A. The current level of expense included in GMO-L&P’s rates is \$1,589,436
13 and reflects a full twelve (12) months of expense. Since the amortization period ends
14 January 1, 2013, and the effective date of rates in this case is January 27, 2013, including a
15 full twelve months of expense in GMO’s cost of service for the L&P rate district would result
16 in an over-recovery of the ice storm costs. Even Staff’s adjusted level will result in an
17 over-recovery but a lesser amount.

18 Q. What level of expense is Staff recommending in GMO’s cost of service for the
19 L&P rate district?

20 A. Staff made an adjustment for the period of January 2012 through August 2012,
21 the True-Up period in this case, resulting in an adjustment of \$1,059,624. The remaining
22 expense level Staff is recommending is \$529,812 which represents four (4) months of expense
23 (September 2012-December 2012).

⁸ Order Granting Accounting Authority Order, Case No. EU-2008-0233.

1 Q. Will Staff's recommendation of \$529,812 result in an over-recovery of ice
2 storm costs?

3 A. Yes. As previously mentioned the amortization period ends January 1, 2013.
4 GMO-L&P will continue to recover four (4) months of expense, \$529,812 on an annual basis,
5 until GMO's next rate case.

6 Q. How much of the ice storm costs will GMO-L&P over-recover?

7 A. Assuming GMO files a rate case in 2015 to coincide with when Staff's
8 anticipates the next KCPL rate case will be filed, GMO-L&P will have over-recovered
9 \$4,768,308 based on the Company's recommendation and \$1,059,624 based on Staff
10 recommendation. The following table identifies the amount of over-recovery by year.

11

Comparison of Staff and GMO-L&P Ice Storm Over-Recovery (based on annual amortization expense)		
Year	Staff	GMO-L&P
December 2013	\$618,114 ⁹	\$1,589,436
December 2014	\$529,812	\$1,589,436
December 2015	\$529,812	\$1,589,436
Total Over-Recovery	\$1,059,624	\$4,768,308

12
13 Q. Why does GMO believe a full year's amortization should be included in its
14 cost of service calculation for the L&P rate district?

15 A. Mr. Weisensee states in his rebuttal testimony, page 19, lines 10-13,

16 The Company did not begin recovering its costs for the ice storm until
17 new rates were effective in the 2009 Case, September 1, 2009.
18 Therefore, the Company will not fully recover these costs until
19 September 1, 2014, well beyond the effective date of new rates in the
20 current rate case.

⁹ The December 31, 2013 balance for Staff includes one month (January 2013) of the Commission ordered amortization level, \$1,589,436, and eleven months of Staff's recommended \$529,812 annual amortization expense.

1 Q. Does Staff agree that the costs will not be fully recovered by GMO?

2 A. No. An AAO allows a utility the opportunity to recover costs that are
3 considered extraordinary and material occurring during severe weather such as ice and wind
4 storms, tornados or other weather conditions that damages the utility facilities. These costs
5 are distinctive from any other costs, such as payroll and fuel, because the ice storm's cost
6 deferred under this AAO relate to events that have destroyed utility property and as such, has
7 to be rebuilt, replaced, or restored under emergency conditions. The amortization period
8 related to a Commission approved AAO and the collection of the costs are generally not tied
9 to a rate case. The presumption in ratemaking is that the utility company is recovering its
10 costs during the rates are in effect up to the time rates are changed in a rate case. In other
11 words, GMO-L&P recovered its expenses for the ice storm amortization during the period of
12 January 1, 2008, through September 1, 2009 (the beginning of the ice storm amortization
13 period through the effective date of rates in Case No. ER-2009-0090).

14 Q. Is Staff's treatment of the amortization in this case consistent with any other
15 cases related to AAO amortizations?

16 A. Yes. In May 2002, Aquila requested an AAO for ice storm costs as a
17 result of an ice storm that occurred in January 2002 in the MPS rate district, Case No.
18 EU-2002-1053. The Commission approved the AAO allowing Aquila to amortize the ice
19 storm costs over a five (5) year period beginning February 1, 2002, through February 1, 2007.
20 Subsequent to the AAO, Aquila filed a rate case, Case No. ER-2004-0034. While the
21 amortization started in February 2002, the first rate case after this amortization started was in
22 Case No. ER-2004-0034 where the ice storm was included as an adjustment to cost of service
23 in that case with rates becoming effective April 22, 2004 (25 months after the amortization of

1 the ice storm costs began). The annual amortization expense was included in Aquila's rates
2 for the MPS rate district until Case No. ER-2007-0004 when Staff adjusted the level of
3 amortization expense. As previously mentioned the amortization period for the AAO ended
4 February 2007. The True-Up period for Case No. ER-2007-0004 was December 31, 2006.
5 Similar to Staff's recommendation in this case which is to remove eight (8) months of the
6 annual amortization that coincides with the True-Up period of August 31, 2012, in Case No.
7 ER-2007-0004 Staff made an adjustment to remove ten (10) months of annual amortization
8 expense, that coincided with the True-Up period, of December 31, 2006.

9 Q. Did Aquila file testimony opposing Staff's recommendation of removing ten
10 (10) months of the annual amortization expense in Case No. ER-2007-0004?

11 A. No. Although Case No. ER-2007-0004 was a contested case, Aquila (MPS)
12 did not oppose Staff's treatment of the ice storm amortization.

13 Q. Does Staff address annual amortization expense for any other GMO AAO's in
14 this case?

15 A. Yes. In 1993 two AAO's were granted by the Commission for the Sibley
16 rebuild project in Case No. ER-93-37. GMO-MPS currently books an amortized level of
17 expense for the two AAO's. The Commission ordered a twenty (20) year recovery period for
18 both AAO's. The amortization period for one is June 1993 through May 2013, and July 1993
19 through June 2013 for the other.

20 Q. Did Staff recommend an adjustment to the annual amortization expense in
21 this case?

22 A. No. The amortization period ends for both AAO's in 2013, after the effective
23 date of rates in this case. However, similar to the GMO-L&P ice storm addressed earlier,

1 GMO-MPS will begin to over-recover these costs in June and July 2013. Staff recommends
2 GMO-MPS track the over-recovery and any over-recovery be used to offset any future
3 request for an AAO by GMO for its MPS rate district.

4 Q. Please summarize Staff's position with regard to GMO-MPS Sibley AAO and
5 the GMO-L&P ice storm AAO.

6 A. The purpose of an AAO is to allow a utility the opportunity recover costs that
7 are considered extraordinary and material. In between rate cases the presumption is the utility
8 is recovering its expenses. Consequently, the amortization period granted by the Commission
9 in an AAO should not be tied to a rate case. Staff recommends the Commission limit the
10 over-recovery of the GMO-L&P ice storm costs by accepting Staff's recommendation to
11 reduce the annual amortization expense. In addition, Staff recommends the Commission
12 require GMO to track any over-recovery associated with the GMO-L&P ice storm and
13 GMO-MPS Sibley AAO's be used to offset any future request for an AAO by GMO in those
14 respective cost of service calculation.

15 **GMO-L&P PHASE-IN**

16 Q. What is the purpose of this section of your surrebuttal testimony?

17 A. I am responding to the GMO witness Tim M. Rush's rebuttal testimony,
18 addressing Staff's recommendation to end the phase-in of rates in the L&P rate district, and
19 the resulting amortization of the unrecovered revenues.

20 Q. What is Staff's recommendation of the unrecovered revenues related to the
21 GMO-L&P Phase-in ordered by the Commission in Case No. ER-2010-0356?

22 A. Staff recommends the L&P Phase-in be cancelled, and the unrecovered
23 revenue of approximately \$5.6 million be amortized over a three (3) year period, and GMO

1 establish a tracker that will be trued-up at the end of the three year amortization period.¹⁰

2 Staff witness Curt Wells provides additional details related to the GMO-L&P Phase-in in his
3 surrebuttal testimony in this case.

4 Q. Does GMO agree with Staff's recommendation to amortize the unrecovered
5 revenue over a three (3) year period?

6 A. No. Although the Company supports Staff's proposal to end the Phase-in,
7 GMO opposes the three year amortization period recommended by Staff. Mr. Tim Rush
8 states on page 16, lines 3-6 of his rebuttal testimony, "It would be more appropriate for the
9 amortization period of the phase-in to be two (2) years, rather than three (3) year proposed by
10 Staff. This would result in full recovery of the phase-in closer to June 25, 2014, the time that
11 the phase-in was to be completed."

12 Q. Does Staff agree with the GMO's request to amortize the unrecovered
13 revenues over a two (2) year period?

14 A. No. Staff's recommendation of a three (3) year amortization is based on the
15 understanding that GMO will file a rate case that coincides with KCPL's anticipated rate case
16 in 2015 that is associated with the LaCygne environmental upgrades. Recovery of a two year
17 period would result in an over-recovery of the revenues. If the Commission decides the
18 GMO-L&P Phase-in is appropriate, Staff recommends a three (3) year period.

19 **MISCELLANEOUS**

20 Q. What is the purpose of this section of your surrebuttal testimony?

21 A. I am responding to clarifications related to the credit/debit card program and
22 prepayments addressed in GMO witness John P. Weisensee's rebuttal testimony.

¹⁰ Staff's Cost of Service report, p. 96.

1 Q. What is the issue with credit/debit card program?

2 A. Mr. Weisensee states on page 23, lines 14-16, "GMO would like to point out
3 that Staff did not make the annualization adjustment in its direct case..."

4 Q. Does Staff agree with this statement?

5 A. No. During the course of an audit, Staff will review GMO's expenses during
6 the test year and make adjustment to increase the expense level, decrease the expense level, or
7 in some cases, include the test year expense level to represent ongoing costs. Credit/debit
8 card expense is an example of Staff using the test year level to represent an annualized level.
9 Although Staff intends to update these costs through the True-Up period, August 31, 2012, the
10 level of credit/debit card expense in its direct case reflects an annualized level.

11 Q. What is the issue with Prepayments?

12 A. Staff included an incorrect statement in its GMO Cost of Service report on
13 page 87, lines 5-7, filed on August 9, 2012. Staff included a statement suggesting that GMO
14 includes gross receipts taxes in prepayments. Staff agrees with Mr. Weisensee that GMO did
15 not include gross receipts taxes in its prepayments.

16 Q. Does this conclude your surrebuttal testimony?

17 A. Yes, it does.

APPENDIX VII
 2011 PROPERTY TAX RATES

LISTING OF 2010 AND 2011 TAX RATES FOR LOCAL GOVERNMENTS LEVYING A SINGLE TAX RATE ON ALL PROPERTY

Political Subdivision	Purpose	2010			2011			Revenue	Expiration Year
		Assessed Value	Ceiling	Levied	Assessed Value	Ceiling	Levied		

LEGEND:

- * Levy was not certified due to insufficient substantiating data; however, it does not appear that a rate was levied.
- ** Levy did not exist in the given year.
- A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
- B A voter approved increase to an existing levy.
- C Levy includes a recoupment rate authorized by state law.
- D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for 2011 levies and Report No. 2010-168, Review of 2010 Property Tax Rates.
- E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.
- G Article X, Section 11(g) of the Missouri Constitution allows the Kansas City 33 School District School Board to set its tax levy at a rate that is lower than the court-ordered rate for the 1995 tax year (which was \$4.96). The rate so established may be changed from year to year by the School Board.
- H City of Neosho in Newton County reinstated a previously authorized levy that was voluntarily reduced to zero in 1998 - 2009.

NOTE:

Taxing authorities are listed by primary county and categorized by type of taxing authority. The counties are listed alphabetically (Adair through Wright followed by the City of St. Louis). When a taxing authority is in more than one county, it is listed under the primary county only.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both the taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

This Appendix does not list taxing authorities that levied a separate tax rate for each subclass of property. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Taxing authorities partially in St. Louis County, whether the primary county is St. Louis County or another county, are required to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendixes VIII-A and VIII-B for a listing of 2011 and 2010 taxing authorities that calculated separate tax rates for each subclass of property.

- B A voter approved increase to an existing levy.
- C Levy includes a recoupment rate authorized by state law.
- D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for the 2011 levies.
- E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.000 and levy up to its calculated tax rate ceiling.
- F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.
- G Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.

NOTE:

This Appendix contains levy information for political subdivisions wholly in St. Louis County and the City of Gladstone in Clay County. Previous legislation required taxing authorities wholly in St. Louis County and allowed the City of Gladstone in Clay County to calculate a separate tax rate on each subclass of property. Political subdivisions partially in St. Louis County and partially in another county(ies) were also required by previous legislation to levy a single rate on all property when one or more counties opted in and one or more counties opted out of the provisions requiring the multi rate calculation. See Appendix VII for a listing of 2011 and 2010 taxing authorities that calculated a single tax rate to apply to all property.

All rates in the levied column represent the rate extended and certified to the State Auditor's office by both taxing authority and the county or counties in which the tax rate is levied.

Assessed Value column presents only the assessed valuation the property tax is levied against.

The revenue generated is computed by dividing the assessed valuation by 100 and multiplying the quotient by the tax rate levied.

APPENDIX VIII-A
 2011 PROPERTY TAX RATES

LISTING OF 2011 TAX RATES FOR LOCAL GOVERNMENTS LEVYING A SEPARATE TAX RATE FOR EACH SUBCLASS OF PROPERTY

Political Subdivision	Purpose	Residential Real Estate			Agricultural Real Estate			Commercial Real Estate			Personal Property			Revenue

LEGEND:

- * Levy was not certified due to insufficient substantiating data; however, it does not appear a rate was levied.
- ** Levy did not exist.
- A A new voter approved tax rate, newly formed district, or a levy voted to replace an expired levy.
- B A voter approved increase to an existing levy.
- C Levy includes a recoupment rate authorized by state law.
- D Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see Report No. 2010-168, Review of 2010 Property Tax Rates.
- E School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- F School district has a partial Proposition C (sales tax) waiver which allows the school district to waive a portion of its required Proposition C reduction to the extent necessary to collect \$2.7500 or the amount stated on the ballot.
- G Levied a tax rate in excess of the legally permissible tax levy as provided by state law, see the Results Section for the 2010 levies. Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- H Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- I Determination of compliance is pending an Attorney General Opinion requested to determine interpretation of the correct operating levy established by the ballot language from November 2008. Levy also includes a recoupment rate authorized by state law. School district also has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- J A voter approved increase to an existing levy. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
- K A voter approved increase to an existing levy. Levy includes a recoupment rate authorized by state law. School district has a full Proposition C (sales tax) waiver which allows the school district to reduce its required Proposition C reduction to \$0.0000 and levy up to its calculated tax rate ceiling.
