Mr. Lawlor,

In our brief conversation following the meeting with commissioners, I mentioned how many tornadoes have hit Monroe County in the last 7-8 yrs. Most recently tornado hit last spring on eastern Route M, destroying 8 electric poles, 2 sheds, and many other buildings and shed roofs. We lost 3 people in tornadoes in 2006 and 2007. These tornadoes have increased for some reason over the years which prompted us to have a storm shelter in our home.

We call ourselves tornado alley, it starts in southeast Randolph and runs through Monroe Co. Has Clean Line investigated this?

Thanks,  
Marilyn O'Bannon  
SW Monroe County
