## MOL-10

### LETTERS OF SUPPORT

### PART 4 OF 4

**Note:** The individuals who signed the following letters have expressed their personal support of the Grain Belt Express Project and not the support of the entire business or organization with which they are affiliated. Employers have been listed for identification purposes, as well as to show the wide diversity of support from Missouri residents.

Date:

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102-0360

Re: Support for Grain Belt Express Clean Line

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Missouri Public Service Commissioners:

I am writing to express my support for the Grain Belt Express Clean Line. The United States has some of the best wind resources in the world, making it possible to obtain a sizable portion of our energy from a clean, domestic resource. However, there are thousands of megawatts of projects stranded in development that cannot be built due to insufficient transmission infrastructure. The challenge lies in connecting abundant, low-cost, renewable resources to communities that need the power with an efficient transmission solution.

Clean Line Energy is developing projects to address this challenge. The Grain Belt Express Clean Line will create thousands of temporary jobs, enable construction of more than 3,500 megawatts of low-cost, clean energy, and deliver enough electricity to power more than 1.4 million American homes.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Subject: Support Grain Belt Express Clean Line

Dear Missouri Public Service Commissioners:

I am writing to express my support for the application of Grain Belt Express Clean Line LLC to operate as an electrical corporation in the state of Missouri and to build, own and operate the Grain Belt Express Clean Line.

The Grain Belt Express Clean Line is a high voltage direct current (HVDC) transmission line that will deliver low cost wind energy from western Kansas to population centers in Missouri and farther east. By connecting some of the best wind resources in the country to markets with greater demand for power, the Grain Belt Express Clean Line will enable over 3,500 megawatts of new wind energy projects to be built, which will likely send ripple effects through the growing wind energy supply chain in Missouri.

The Grain Belt Express Clean Line will create thousands of jobs, facilitate low cost clean energy, and deliver enough energy to power more than 1.4 million American homes. The transmission line will also increase much needed tax revenues for several Missouri counties.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move this project forward.

Sincerely,

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

Re: Support for Grain Belt Express Clean Line

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

## ONLINE SUPPORT

May 07, 2013

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Christy Turner  
Peculiar, MO

May 08, 2013

Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Thanks, to finally doing something for our country and earths future. Everyone should be glad to finally come to realize fossil fuel is no longer the future for this earth and the people who live on it. I,am 100% behind this effort and project.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

gregory malott  
laddonia, mo

Jim Schmidt  
Hamilton, MO

March 13, 2014

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Renewable wind energy is important to the environment and the economy of the Midwest. Although there are many high quality sites available, the lack of adequate electric transmission lines have hampered development of wind farms. The Grain Belt Express can fill this need, and create quality short and long term jobs. I urge you to approve this request.

The biggest reasons I support this project are:

- Job Creation
- New Wind Energy Generation

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

The biggest reasons I support this project are:

- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Brooke Holman  
Columbia, MO
