I. INTRODUCTION .....	3
II. JURISDICTIONAL ALLOCATION .....	5
III. CLASS ALLOCATION .....	7
IV. ESTIMATED RATE IMPACT .....	11
V. SUMMARY AND CONCLUSIONS .....	14

1 **I. INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS AFFILIATION.**

3 A. Gregory E. Macias, Principal Consultant, Black & Veatch Management Consulting, LLC  
4 (“Black & Veatch”).

5 **Q. WHAT IS YOUR BUSINESS ADDRESS?**

6 A. My business address is 8400 Ward Parkway, Kansas City, Missouri 64114.

7 **Q. PLEASE SUMMARIZE YOUR EDUCATIONAL AND PROFESSIONAL**  
8 **EXPERIENCE.**

9 A. I have a B. S. degree in civil engineering from the University of Missouri - Columbia. I  
10 joined Black & Veatch in 2007. I have worked on numerous studies involving electric,  
11 natural gas, water and wastewater utilities, primarily focusing on utility rate, financial  
12 and regulatory matters for investor owned and municipal utilities. The majority of the  
13 projects I have conducted involved utility rate and regulatory matters, including revenue  
14 requirements, cost of service, and rate design services, as well as depreciation and  
15 valuation services, with additional studies in bond financing. Prior to joining Black &  
16 Veatch, I was employed as a utility engineering specialist at the Missouri Public Service  
17 Commission. I have filed expert testimony in proceedings in Missouri, New Mexico, and  
18 Iowa.

19 **Q. ON WHOSE BEHALF ARE YOU APPEARING?**

20 A. I am appearing on behalf of The Empire District Electric Company (“Empire” or  
21 “Company”) in this proceeding.

22 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

1 A. The purpose of my testimony is to present the estimated customer rate impacts that result  
2 from Empire’s proposed 800 MW wind project. At Empire’s request, I have calculated  
3 an estimated jurisdictional allocation of the costs associated with the proposed 800 MW  
4 wind project, and then apportioned the jurisdictionally allocated amounts to Empire’s rate  
5 classes in each jurisdiction. I then calculated an estimated customer rate impact for each  
6 customer class in the respective jurisdictions. I do not suggest any changes to the current  
7 rate designs in place in each jurisdiction; my analysis is simply a pro-forma estimate.  
8 The actual rate design will be determined in future rate cases.

9 **Q. HOW IS YOUR TESTIMONY ORGANIZED?**

10 A. My testimony is organized in the following sections:

- 11 Section I - Introduction
- 12 Section II - Jurisdictional Allocation
- 13 Section III - Class Allocation
- 14 Section IV - Estimated Rate Impact
- 15 Section V- Summary and Conclusions

16 In addition, I am sponsoring the following attachments referenced in my testimony:

- 17 Direct Attachment GEM-1 – Jurisdictional Allocation of Revenue Requirement  
18 Impact
- 19 Direct Attachment GEM-2 – Estimated Impact to Customer Classes

20  
21

1 **II. JURISDICTIONAL ALLOCATION**

2 **Q. PLEASE EXPLAIN HOW THE REVENUE REQUIREMENT IMPACT OF**  
3 **EMPIRE’S 800 MW WIND PROPOSAL WAS ALLOCATED TO EMPIRE’S**  
4 **VARIOUS JURISDICTIONS.**

5 A. The jurisdictional allocation of the revenue requirement impact of Empire’s 800 MW  
6 wind proposal was based on the jurisdictional allocation factors for the twelve month  
7 period ended July 2017. These factors were calculated consistent with Empire’s prior  
8 practice. Because Empire’s 800 MW wind proposal relates to changing its production  
9 assets, I used jurisdictional allocation factors related to the production function. The  
10 demand related costs were allocated to the jurisdictions based on the 12-month average  
11 coincident peak demand, and the energy related costs were allocated to the jurisdictions  
12 based on annual kilowatt-hour sales.

13 **Q. HOW DID YOU DETERMINE WHETHER EMPIRE’S PROPOSED REVENUE**  
14 **REQUIREMENT IMPACT OF ITS WIND PROPOSAL WAS DEMAND OR**  
15 **ENERGY RELATED?**

16 A. Empire provided me with the details supporting the total revenue requirement impact of  
17 the 800 MW wind proposal on an annual basis. The revenue requirement impact is  
18 detailed by the general high-level categories of Revenue Requirement and Benefits. The  
19 Revenue Requirement category includes operations and maintenance expense, tax equity  
20 payments, property taxes, depreciation expense, interest expense, return on investment,  
21 and income tax. The Benefits category contains Southwest Power Pool (“SPP”) revenue,  
22 which is off-system sales revenue, and fuel costs.

1 Based on the details supporting Empire’s revenue requirement impact analysis, it is  
2 evident that the Revenue Requirement category of costs consist of demand-related costs  
3 related to investment in production plant and fixed O&M, whereas the Benefits category  
4 of fuel is an energy-related variable costs. Regarding the Benefits category of SPP  
5 revenues, the distinction between demand-related and energy-related is less clear. The  
6 SPP revenues associated with the off-system sales of energy produced by the proposed  
7 800 MW wind project will have no fuel associated with it and will have nominal amounts  
8 of variable O&M associated with the production of energy. Therefore, it is appropriate to  
9 treat the SPP revenues from the wind project as an offset to the demand-related costs of  
10 investment and fixed O&M of the wind project, and allocate it based on the demand-  
11 related allocation factor.

12 The absence of future SPP revenues associated with off-system sales from the  
13 Asbury plant (due to its retirement) should be offset by the absence of future fuel costs  
14 associated with the production of energy. Therefore, all of the Benefits category for  
15 Asbury (fuel and SPP revenues) are appropriately allocated based on an energy-related  
16 allocation factor.

17 **Q. WHAT IS THE RESULT OF THE JURISDICTIONAL ALLOCATION PROCESS**  
18 **DESCRIBED ABOVE?**

19 A. The results of the allocation of the revenue requirement impact of Empire’s 800 MW  
20 wind proposal to Empire’s jurisdictions for the 20-year period 2018-2037 is presented in  
21 Table 1 below. A year-by-year summary is provided in **Direct Attachment GEM-1** to  
22 this testimony.

1  
2

Table 1

Jurisdictional Allocation of Revenue Requirement Impact

<b>Jurisdiction</b>	<b>Allocation Percentage</b>	<b>Allocation Amount (2018-2037)</b>
Missouri Wholesale	5.12%	(\$42,475,187)
Kansas Wholesale	0.19%	(\$1,596,124)
Missouri Retail	84.24%	(\$699,037,242)
Kansas Retail	5.05%	(\$41,891,046)
Oklahoma Retail	2.48%	(\$20,580,228)
Arkansas Retail	2.93%	(\$24,284,759)
Total	100.00%	(\$829,864,585)

3

4 **III. CLASS ALLOCATION**

5 **Q. PLEASE EXPLAIN HOW THE JURISDICTIONAL APPORTIONMENT OF THE**  
6 **REVENUE REQUIREMENT IMPACT OF EMPIRE’S 800 MW WIND**  
7 **PROPOSAL WAS ALLOCATED TO THE CUSTOMER CLASSES IN EACH OF**  
8 **ITS JURISDICTIONS.**

9 A. The customer class allocation of the jurisdictionally allocated revenue requirement  
10 impact was based on the most recent class cost of service study presented by Empire in  
11 each jurisdiction. Using the demand and energy classifications determined in the  
12 jurisdictional allocation process, the respective class allocation factors from Empire’s  
13 previous class cost of service studies were used to allocate the revenue requirement  
14 impact to its customer classes. Table 2 lists the case numbers of the most recent cost of

1 service study filed by Empire in each jurisdiction which were used as the basis for the  
2 class allocations.

Table 2  
Rate Filing Cost of Service Study Reference

Jurisdiction	Case Number	Test Year Ended
Missouri	ER-2014-0351	December 2013
Kansas	10-EDPE-314-RTS	June 2009
Oklahoma	PUD 201600468	June 2016
Arkansas	13-111-U	June 2013

3  
4 For demand-related costs, an average and excess demand (“AED/12CP”) allocation  
5 factor was used for Missouri, Kansas and Oklahoma. In Arkansas, an average and peak  
6 1CP allocation factor was used. For energy-related costs, a kWh procurement allocation  
7 factor was used.

8 **Q. PLEASE DESCRIBE THE AED/12CP ALLOCATION FACTOR.**

9 A. The AED/12CP demand allocation factor has been consistently used in the Company’s  
10 previous class cost of service studies to allocate production-related costs to customer  
11 classes in its Missouri, Kansas, and Oklahoma jurisdictions. Demand costs are those  
12 costs that vary with some measure of maximum demand. However, for production, a  
13 portion of the cost of a baseload unit is incurred for the purpose of lowering energy costs.  
14 The AED/12CP allocation method recognizes a portion of the production-related costs

1 are related to energy and the excess cost is a pure demand related cost. The average and  
2 peak ICP allocator is preferred in Arkansas.

3 **Q. PLEASE DESCRIBE THE KWH PROCUREMENT ALLOCATION FACTOR.**

4 A. The kWh procurement energy allocation factor has been consistently used in the  
5 Company's previous class cost of service studies to allocate production-related costs in  
6 each of its customer classes. Energy costs are those costs that vary directly with the  
7 production of energy such as fuel costs, other fuel related expenses or purchased power  
8 expense. The kWh procurement allocation method recognizes that the losses incurred on  
9 the system can be different for different classes of service.

10 **Q. WHAT IS THE RESULT OF THE CLASS ALLOCATION PROCESS**  
11 **DESCRIBED ABOVE?**

12 A. The results of the customer class allocation of the revenue requirement impact of  
13 Empire's 800 MW wind proposal for the 20-year period 2018-2037 is presented in Table  
14 3 below. A year-by-year summary is provided in **Direct Attachment GEM-2** to this  
15 testimony.

16

<b>Total Empire</b>			<b>(\$829,864,585)</b>	

1 **IV. ESTIMATED RATE IMPACT**

2 **Q. HOW WAS THE ESTIMATED RATE IMPACT CALCULATED?**

3 A. After the jurisdictional revenue requirement impact of Empire's wind project was  
4 allocated to the customer classes as described above, I calculated an estimate of the  
5 customer rate impact by dividing the total dollar amount allocated to each class by the  
6 kWh sales of the respective customer classes. The kWh sales relied upon for this  
7 estimated rate impact calculation were the billing units from Empire's most recent class  
8 cost of service study in each jurisdiction. This is consistent with the allocation factors  
9 used for the class allocation factors, and is the most current information that was readily  
10 available. I calculate the rate impact on a kWh basis for simplicity of estimating and  
11 presentation, and only for the purpose of demonstrating the magnitude and direction of  
12 the impact.

13 **Q. WHAT IS THE RESULT OF THE ESTIMATED RATE IMPACT**  
14 **CALCULATIONS?**

15 A. The 20-year average estimated impact to customer rates, on a per kWh basis, of Empire's  
16 800 MW wind proposal is presented in Table 4 below. A year-by-year summary is  
17 provided in **Direct Attachment GEM-2** to this testimony.

1 **Q. HAVE YOU CALCULATED AN ESTIMATED BILL COMPARISON BY RATE**  
 2 **CLASS?**

3 A. Yes. The estimated typical bill impact for non-lighting rates is shown in Table 5 below  
 4 based on the 20-year average rate impact shown in Table 4 above. A year-by-year  
 5 summary is provided in **Direct Attachment GEM-2** to this testimony.

Table 5

	Transmission	1,790,000	(\$9,247.04)

6

1 V. SUMMARY AND CONCLUSIONS

2 Q. PLEASE SUMMARIZE YOUR TESTIMONY.

3 A. My testimony addresses issues related to the estimated customer rate impacts resulting  
4 from Empire's 800 MW wind proposal. I presented estimates of jurisdictional allocation,  
5 customer class allocation, customer rate impacts and typical bill impacts.

6 Q. IS EMPIRE PROPOSING TO CHANGE CUSTOMER RATES OR RATE  
7 DESIGN AT THIS TIME?

8 A. No.

9 Q. IS EMPIRE PROPOSING THAT THE ESTIMATED RATE IMPACTS YOU  
10 CALCULATED AS DESCRIBED ABOVE WILL ACTUALLY BE  
11 EXPERIENCED IN ITS NEXT RATE PROCEEDINGS?

12 A. No. The rate impacts I have calculated are for informational purposes only to provide a  
13 relative scale of impact to each rate class in each jurisdiction. At the time Empire seeks  
14 to include costs associated with the wind project in rates, Empire would propose rates  
15 based on the respective revenue requirements, jurisdictional allocation, and class cost of  
16 service study conducted at that time.

17 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

18 A. Yes, it does.

The Empire District Electric Company  
Jurisdictional Allocation of Revenue Requirement Impact
