RE: Call from Pemiscot County Special School District

Shortly before noon, I received a call from the Pemiscot County Special School District. Their power is out and they could not reach Ameren UE via telephone. All they got were recorded messages. Their concern was that both Pemiscot County Special School District and Delta C-7 School District have large quantities of frozen goods stored in freezers that they serve to school children at lunch. They really needed direction as to how long power was going to be out, so they could make a decision about bringing in generators or moving the frozen food.

I e-mailed Wess Henderson asking him to look into this matter. At the time, Wess and Lena Mantle were unavailable, so I called Gaye Suggett from Ameren to relay the above-mentioned comments to her and asked for a response to the schools. She responded she would look into it and that someone would contact the school. Gaye subsequently called me to tell me they had spoken with a representative of the school and estimated service would be restored tomorrow.
