Spire STL Pipeline’s Application at)
FERC for a Temporary Certificate to)
Operate)
File No. GO-2022-0022

**SPIRE MISSOURI’S
SEPTEMBER 2022 REPORT ON CONTINGENCY PLANNING**

COMES NOW, Spire Missouri Inc. (“Spire Missouri” or “Company”) by and through counsel and files this September 2022 Report on Contingency Planning and in support thereof states the following:

1. On July 28, 2021, the Missouri Public Service Commission (“Commission”) issued an *Order Opening Investigation* wherein the Commission orders its Staff to undertake an investigation regarding Spire STL Pipeline’s application to the FERC for authority to continue operating the Spire STL Pipeline to provide natural gas to the St. Louis area. On August 16, 2021, the Staff filed its Investigative Report, confidential and public, with the Commission.
2. On September 1, 2021, the Commission issued an *Order Regarding Further Investigation* (the Order) which ordered Spire Missouri to periodically report on its current contingency plans, ongoing contingency plan development, and conditions affecting its ability to provide adequate gas supply and pressure to all customers for the winters of 2021-2022, 2022-2023, and 2023-2024. The Commission ordered Spire Missouri to file such reports monthly, by the 15th of each month, for the period of November 2021 through March 2022. Thereafter, such reports shall be filed at the end of each quarter. Spire Missouri shall provide additional reports when conditions occur operationally or related to Spire STL’s

court and FERC cases that prompt Spire Missouri to take action related to its operations or its transportation and storage capacity on pipelines.

3. Spire Missouri files the attached Report on Spire Missouri's Contingency Planning, September 30, 2022, marked Exhibit A to this pleading. This filing complies with the Commission's Order issued on September 1, 2021.
4. This Report on Spire Missouri's Contingency Planning includes that the Federal Energy Regulatory Commission Staff issued its draft Environmental Impact Statement (EIS), which is generally supportive of the Spire STL Pipeline. A final EIS has not yet been issued. As stated in its June 2022 Report, Spire Missouri continues to monitor and work on alternative supply since the last report, including evaluating the continued uncertainty surrounding the long-term operation of Spire STL Pipeline.

WHEREFORE, Spire Missouri respectfully submits this Report to comply with the Commission's Order issued September 1, 2021 for the Commission's review and consideration.

Respectfully submitted,

/s/ Matt Aplington
