I.	INTRODUCTION	1
II.	AUDIT PROVISIONS	1
III.	THE ICA AMENDMENT	4

1 I. <u>INTRODUCTION</u>

- 2 O. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
- 3 A. My name is William E. Greenlaw. My business address is 311 S. Akard Street, Dallas,
- 4 TX 75202.
- 5 Q. ON WHOSE BEHALF ARE YOU PROVIDING REBUTTAL TESTIMONY TODAY?

7

- 8 A. Southwestern Bell Telephone Company, d/b/a AT&T Missouri ("AT&T Missouri").
- 9 Q. HAVE YOU PREVIOUSLY FILED TESTIMONY IN THIS PROCEEDING?
- 10 A. Yes. I am the same William E. Greenlaw who filed direct testimony on behalf of AT&T
- 11 Missouri on September 28, 2012.
- 12 Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?
- 13 A. My rebuttal testimony responds to the direct testimony filed on September 28, 2012 by
- John Jennings and Gerard J. Howe on behalf of Big River Telephone Company, LLC
- 15 ("Big River").
- 16 Q. HOW IS YOUR REBUTTAL TESTIMONY ORGANIZED?
- 17 A. I first address their testimonies relating to the ICA's audit provisions. I next address their
- testimonies relating to the ICA amendment signed by the parties and approved by the
- Commission in 2009.
- 20 II. AUDIT PROVISIONS
- 21 Q. PAGE 5 OF MR. JENNINGS' DIRECT TESTIMONY AND PAGE 3 OF MR.
- 22 HOWE'S DIRECT TESTIMONY CLAIM THAT AT&T DID NOT INVOKE ITS
- 23 AUDIT RIGHTS REGARDING BIG RIVER'S CLAIM THAT THE PERCENT
- 24 ENHANCED USAGE (PEU) OF ITS TRAFFIC WAS 100%, IS THIS TRUE?
- 25
- 26 A. Yes.
- 27 Q. ARE THE AUDIT PROVISIONS IN THE PARTIES' ICA DESIGNED FOR THIS
- **TYPE OF DISPUTE?**

Not really. The audit provisions contained within the parties' ICA in Section 38 of the General Terms and Conditions are really designed to resolve issues about the details of bills and invoices that are quantitative in nature. Section 38.1 states that "either Billed (auditing) Party may audit the Billing Party's books, records and other documents once in each Contract Year for the purpose of evaluating the accuracy of the Billing (audited) Party's billing and invoicing..." The same section goes on to state reciprocal terms for the billing party as well, specifically that "...The Billing Party may audit the Billed Party's books, records and other documents once in each Contract Year for verification of the accuracy of information that the Billing (auditing) Party is entitled, under this Agreement, to rely on in billing and invoicing for services provided to the Billed (audited) Party hereunder...."

A.

A.

However, Big River is making the broader assertion that all of the traffic that originated on its network and terminated to end users served by AT&T Missouri's network was enhanced services traffic exempt from exchange access charges. Given that fact, auditing Big River's records would have provided no benefit to either party in resolving or clarifying the dispute.

Q. WHY DO YOU SAY THAT THE AUDIT WOULD NOT HAVE RESOLVED THE DISPUTE?

Big River has not disputed the number of minutes that AT&T Missouri billed for exchange access charges on the grounds that AT&T Missouri miscalculated the minutes of use ("MOUs") or that AT&T Missouri applied incorrect rates, or that AT&T Missouri otherwise committed some mathematical or calculation error. Candidly, if they were making those types of claims and were unsatisfied with the billing dispute resolution initially, then Big River certainly could have availed itself of its right to audit AT&T

Missouri's billing. In this case, however, Big River simply asserted that the PEU factor for the telecommunications traffic originating from its network and terminating via the PSTN to AT&T end users was 100%. Similarly, AT&T Missouri was not disputing that Big River was sending a specific quantity of traffic to AT&T Missouri pursuant to the terms and conditions of the ICA. This dispute has been, and continues to be, an interpretative disagreement over what type of traffic Big River is terminating to AT&T Missouri's network and whether that traffic should be subject to the exemption of access charges pursuant to the terms and conditions within the parties' ICA. A comprehensive audit of party's usage records, books or invoices related to this traffic would not reveal any new information and thus would not compel either party to change its position.

A.

11 Q. IS THERE ANY CHARACTERISTIC IN THE USAGE RECORDS THAT AT&T 12 RECORDED FOR BIG RIVER'S TERMINATING TRAFFIC THAT WOULD 13 DISTINGUISH THE USAGE AS ENHANCED SERVICES TRAFFIC?

A. No. While I am certainly not an expert on usage record field values, I have confirmed that there is nothing populated on the usage records recorded by AT&T Missouri's switches that would provide a differentiation that one record is associated with an information service (enhanced service) and one record is associated with a regular two-way telecommunications call on the PSTN.

Q. PLEASE SUMMARIZE YOUR POSITION ON THE APPLICABILITY OF THE PARTIES AUDIT LANGUAGE IN THIS DISPUTE?

Simply put, if AT&T Missouri had gone through the motion of invoking the audit provisions in the parties' ICA at the onset of the receipt of billing disputes from Big River, it would have just added a step to the ongoing dispute process. The outcome would have been the same because the information that an audit would have produced would have not changed the basis of either party's argument. At the end of the day, Big

River and AT&T Missouri would still be seeking a ruling from this Commission as to the nature of the traffic that Big River is terminating to AT&T Missouri's network and whether that traffic is subject to the applicable exchange access charges. Making an issue of whether an audit was requested in lieu of, or in addition to, the normal dispute resolution procedures is a red herring that distracts from addressing the merits of the real dispute at hand.

7 III. <u>THE ICA AMENDMENT</u>

9 Q. DID THE PARTIES' ORIGINAL ICA ADEQUATELY ADDRESS HOW ENHANCED SERVICES WERE TO BE HANDLED WITH RESPECT TO INTERCARRIER COMPENSATION?

A. As Mr. Jennings pointed out in his direct testimony, Attachment 12, Section 13.3 of the parties' ICA provided for a factor that the Parties would use to identify how much of the traffic terminating to the other Parties' network was enhanced, and therefore exempt from exchange access charges. The original language included "...without limitation Voice over Internet Protocol ("VoIP") traffic...." under these terms and conditions. Many of AT&T Missouri's ICAs of the same vintage provided similar language folding VoIP traffic under the umbrella of enhanced services traffic.

20 Q DID THIS CREATE A NEED TO ADDRESS THE DISTINCTION BETWEEN THE TWO?

22 A. Yes. The original language in the ICA did not distinguish between interconnected VoIP
23 traffic, specifically, and enhanced services traffic, generally. It became apparent that
24 interconnected VoIP traffic should be subject to a different intercarrier compensation
25 structure.

1 2 3	Q	DID THE MISSOURI LEGISLATURE SUBSEQUENTLY ADDRESS THE COMPENSATION STRUCTURE APPLICABLE TO INTERCONNECTED VOIP TRAFFIC?
4	A.	Yes. As noted in my direct testimony, in 2008, HB 1779 was enacted into law. The
5		resulting new Section 392.550.2, RSMo, states:
6 7 8 9 10 11 12 13 14		Interconnected voice over Internet protocol service shall be subject to appropriate exchange access charges to the same extent that telecommunications service are subject to such charges. Until January 1, 2010, this subsection shall not alter intercarrier compensation provisions specifically addressing interconnect voice over internet protocol service contained in an interconnection agreement approved by the commission pursuant to 47 U.S.C Section 252 and in existence as of August 28, 2008. (emphasis added)
15	Q.	DOES THE PARTIES' ICA CONTAIN LANGUAGE IMPLEMENTING HB 1779?
16 17	A.	Yes. As mentioned in my direct testimony, one of the provisions of the ICA amendment
18		that Big River executed with AT&T Missouri effectively addressed intercarrier
19		compensation arrangements with respect to VoIP traffic. Access charges would not
20		apply to that traffic until after December 31, 2009, as provided for in HB 1779.
21		However, pursuant to the terms and conditions outlined in the amendment, AT&T
22		Missouri was entitled to access charges with respect to interconnected VoIP traffic from
23		January 1, 2010 forward, as likewise provided for HB 1779. Consequently, AT&T
24		Missouri billed Big River for the traffic in accordance with those amended terms.
25 26 27	Q	PAGES 5 AND 6 OF MR. JENNING'S DIRECT TESTIMONY DISCUSSES AT&T STRIKING A REFERENCE TO ENHANCED SERVICES IN THE PARTIES' ICA AMENDMENT. IS THAT SIGNIFICANT?
28	A.	No. It is true that the original draft of the amendment negotiated between Big River and
29		AT&T Missouri contained the broader term "enhanced services." While the broader term

did not harm Big River given what type of traffic Big River was terminating to AT&T

Missouri, the provisions of the final executed amendment between the parties were changed to more accurately reflect the specific reading of the statute, specifically addressing "the exchange of interconnected VoIP traffic as defined in Section 386.020 (RSMo)." This change would only be relevant to Big River's position in this dispute if the traffic it was terminating to AT&T Missouri was enhanced services traffic other than interconnected VoIP traffic. As Mr. Neinast explained in detail in his direct testimony, the traffic that Big River is terminating to AT&T Missouri's network is not enhanced services traffic that would fall outside the scope of HB 1779, and the amended ICA by extension.

A.

10 Q. SO BASED ON YOUR REFERENCE TO HB 1779, ARE YOU ASSERTING 11 THAT BIG RIVER'S TRAFFIC IS ACTUALLY INTERCONNECTED VOIP 12 TRAFFIC?

Whether Big River's traffic is simply POTS traffic or interconnected VoIP traffic is not particularly relevant. What matters is that it is very clear that this traffic does not constitute enhanced services traffic. The calls between Big River end users and AT&T Missouri's end users represent two parties talking in a two-way telephone conversation. Whether the Big River customer has the ability to record the conversation or use any other supposed "enhanced" feature functionality before, during or after the call is irrelevant, because these calls originate and terminate as voice calls and are subject to appropriate exchange access charges. Whether the transmission of a call involves interconnected VoIP or just IP in the middle becomes moot at that point. The significance of HB 1779 is simply that those terms removed any ambiguity regarding intercarrier compensation between AT&T Missouri and CLECs for interconnected VoIP

- 1 traffic from January 1, 2010 forward, so there is no scenario where the exchange access
- 2 charges at issue in this dispute would not be applicable.
- 3 Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?
- 4 A. Yes.
