Ĺ

1	SURREBUTTAL TESTIMO	ONY
2	OF	
3	DAVID M. SOMMERER	<b>!</b>
4	CASE NO. GR-96-450	
5	MISSOURI GAS ENERGY, A DIV	ISION OF
6 7		ANY
8	Q. Please state your name and business addres	s.
9	A. David M. Sommerer, P.O. Box 360, Jeffers	on City, Mo. 65102.
10	Q. By whom are you employed and in what ca	pacity?
11	A. I am the Manager of the Procurement	Analysis Department with the
12	2 Missouri Public Service Commission.	
13	Q. Are you the same David M. Sommerer tha	t prepared rebuttal testimony in
14	this case?	
15	A. Yes.	
16	Q. What is the purpose of your surrebuttal test	imony?
17	A. To respond to the rebuttal testimony of	Missouri Gas Energy (MGE)
18	witnesses and various Mid-Kansas Partnership/Rivers	side Pipeline Company, L.P.
19	(Mid-Kansas/Riverside) witnesses.	
20	Q. Is Mid-Kansas/Riverside still generally kno	wn by that name.
21	A. No. Mid-Kansas/Riverside in generally	y known as Kansas Pipeline
22	Company (KPC). Ownership of KPC has changed a	t least twice since 1999. In
23	November of 1999 Midcoast Energy Resources, In	ac. announced that it would

acquire KPC. In May of 2001, Enbridge Inc. announced the completion of a merger transaction with Midcoast Energy Resources Inc.

3

Mr. Langston criticizes what he calls Staff's basis for the proposed Q. disallowance on page 5, lines 3-5. Do you agree?

5

6

7

8

9

10

4

A. No. First of all, the entire basis for the adjustment was not described in

> 15 16

17

19

18

20

21

22

23

direct testimony. The difference between Williams Pipeline Central (Williams) rates and Mid-Kansas/Riverside is so striking (approximately double) that the Staff's goal in its direct testimony was to raise a reasonable doubt about the prudence of the Mid-Kansas/Riverside contract. In Kansas Power and Light Company Case No. GR-89-48 the Commission indicated that the Company "has the burden of showing its proposed rates are just and reasonable." The Company "has the burden of showing the reasonableness of costs associated with its rates for gas." Further it stated, "The standard is that when some participant in a proceeding creates a serious doubt as to the prudence of an expenditure, then the company has the burden of dispelling those doubts and proving that the questioned expenditure was prudent". Therefore the Staff's direct case presented and viewed the alarming difference in price between two pipelines that provide essentially the same quality of firm transportation service as meeting the standard for "raising serious doubt". Second, the rates charged under the Missouri Agreement are excessive, and MGE's cost of gas should be adjusted accordingly, which is consistent with the 1996 Stipulation and Agreement where it was stated, "In addition, the Signatories agree that the rates charged pursuant to the Missouri Agreements shall not be the subject of any ACA prudence review until the case associated with the audit period commencing July 1, 1996, and ending June 30, 1997."

- Q. At page 5 of his testimony Mr. Langston states that the simple fact that price levels are different under two contracts is not in and of itself a reasonable basis for a prudence disallowance. How do you respond?
- A. While the statement is true, it misses the point in this case. For example, Staff has not suggested that the Panhandle transportation contract is imprudent, even though Panhandle rates are higher than Williams. The key element in this case is that MGE replaced a KPL contract that the Commission has found imprudent with a contract that contains the same imprudent terms and conditions. The damages to Missouri ratepayers have been mitigated somewhat by the addition of some favorable gas supply terms, and the Staff has recognized that improvement. But the contract remains imprudent for the same reasons noted by the Commission in Case No. GR-93-140.
- Q. What is your comment about the sentence from paragraph 5 of the May, 1996 Stipulation and Agreement that Mr. Langston references on page 6 of his rebuttal testimony?
- A. Regrettably, subsequent experience has proven that Staff's acceptance of this one sentence has given MGE an opening to extend the boundaries of the settlement. However, the Staff's rebuttal testimony in this case has shown clearly that although MGE made numerous attempts to remove the Missouri Agreements from a prudence review, this entire attempt proved unsuccessful and MGE had to settle with a "muddying of the waters". Now, MGE is trying to succeed by offering up stretched interpretations of the settlement.
- Q. Do you have anything further to add regarding your interpretation of the 1996 Stipulation and Agreement?

22

23

1 A. Yes. Besides my rebuttal testimony which provides an extensive analysis 2 of the documents leading up to the May 2, 1996 Stipulation and Agreement, I reviewed 3 the Case files from GR-94-228. Unfortunately there was little discussion in the 4 transcript about the May 2, 1996 Stipulation. Furthermore, there was no Staff 5 memorandum in support of the Stipulation and Agreement. Mr. Hack did file a cover 6 letter with the filing of the May 2, 1996 Stipulations which is attached as Schedule 1. 7 In that letter Mr. Hack states, "Because this Stipulation and Agreement, if adopted, 8 affects a number of other cases in addition to those referenced above, (specifically, Case 9 Nos. GR-94-227, GR-95-82, and GR-96-78). I request that a copy of this letter and a 10 copy of the Stipulation and Agreement be placed in each of those case files," As in the 11 Stipulation and Agreement, Mr. Hack lists those cases that the Stipulation affects. It 12 would have been an easy matter to reference other cases affected, but not yet docketed. 13 This was not done because no other ACA periods were covered by the Stipulation and 14 Agreement. 15 What were other steps you took to review the background of the Q. 16 negotiations? 17 A. I attempted to retrieve e-mails from that time period for further support. E-mails prior to late 1997 were not recoverable. 18 19 Could you further clarify the Staff's prudence disallowance in this case? Q. 20 Although the history of the contracting process is extensive, Staff's A.

concerns are straightforward. Western Resources Inc. (WRI, also known as Kansas Power and Light) signed the original agreement in 1990 (see Gas Purchase Agreement in Wendell Putman rebuttal schedule WCP 1 pages 17 through 31). This contract was

·
·
·
·
·
·
·
· • 

effective from 1-15-1990 to 12-31-1992. This agreement contained a price cap in Article 5.3 that capped Mid-Kansas prices at Williams' rates. The section reads as follows:

Notwithstanding the price provisions set forth in Section 5.2 of this Agreement, Buyer shall not in any month pay Seller a price at the Delivery Point in excess of the Williams Natural Gas Company posted Rate Schedule F-2 price less 15 cents per Dth. If the F-2 Rate Schedule is replaced or superseded by a rate having a demand charge, WNG's rate, for purposes of such comparison, shall be determined by calculating KPL's average unit cost for gas purchased from WNG in the Kansas City Metropolitan Area.

- Q. What was the next step?
- A. In October of 1991 WRI and Mid-Kansas/Riverside amended the Gas Purchase Agreement to remove the price cap and extend the term to 10-31-2009. The parties replaced the price cap with a new Article 5.4 that reads as follows.

Should any regulatory authority having jurisdiction over the rates charged by Buyer for gas service at any time deny Buyer the right to recover any amount paid to Seller hereunder, Buyer shall notify Seller of such denial within thirty day thereof, and Seller shall reduce its rates and charges to Buyer for the affected service to the level approved for recovery retroactive to the first date of service for which recovery is denied. In the event such rate reduction is required, KPL and Seller will adjust the term of this Agreement to ensure that overall revenues generated hereunder are adequate to allow Seller to recover its costs of operation and its financing costs, including principal, interest, and applicable financing fees, associated with the above level of service.

- Q. What was the Commission's view of this contract?
- A. In WRI Case No. GR-93-140, the Commission found that WRI's decision to allow removal of the price cap was imprudent. In that Order the Commission stated that WRI's decision to enter into an agreement allowing removal of the price cap provision was imprudent because WRI produced no compelling evidence to counter the

conclusion that removal of the price cap was imprudent. The Commission cited the advice of Mr. Jack Roberts, a consultant and former gas supply manager for KPL, that removal of the price cap would be imprudent on KPL's part. The Commission further stated that the evidence did not demonstrate that removal of the price cap was necessary to retain Mid-Kansas as competitors to Williams Natural Gas Company.

#### Q. What happened in 1994?

A. MGE purchased the Missouri properties from WRI early in 1994. As part of that purchase, MGE willingly accepted an allocation of various gas supply and transportation contracts. The allocations from WRI included the assignment of 100% of the Mid-Kansas/Riverside Agreements. On November 17, 1994, the Staff filed its rebuttal testimony in Case No. GR-93-140. The case went to hearing in early February 1995. On February 24, 1995, just after the hearing on the prudence of the 1991 contract terms, MGE executed two new agreements with Mid-Kansas/Riverside. These agreements, and the rates resulting from them, are the subject of this proceeding. These agreements essentially continued the high rates that resulted from the pancaking of several Mid-Kansas/Riverside affiliated intrastate pipelines in Kansas. The term of the agreement still ends on October 31, 2009. There was some temporary mitigation that the Staff has already recognized as part of the commodity pricing offset. The process leading up to the May 1996 Stipulation and Agreement is described more fully in Staff witness Shaw's rebuttal and surrebuttal testimony. The Commission in its order of June 11, 1996 approved the Stipulation that was filed in May of 1996.

Q. Please further describe the February 24, 1995 agreements.

MGE signed two contracts on February 24, 1995. The first was a sales A. contract that contained, along with the excessive transportation rates, a favorable gas supply commodity rate. Unfortunately this favorable gas supply rate ended June 1998 based upon the movement over to the "transportation only" contract (the second 1995 after **FERC** February 24. contract) the asserted jurisdiction over Mid-Kansas/Riverside. Besides carrying over the high rates from the previous contracts, the 1995 contracts continued the use a "regulatory disallowance" provision, Article 4.3, set out in Wendell Putman's schedule WCP 4 page 13. There is no "price-cap" protection.

- Q. What is the effect of changing the price cap for the possibility of a regulatory disallowance?
- A. As a KCC Staff witness explained in testimony filed in a 1997 case at the KCC:
  - Q. By removing the price protection from the contract, how did the risks change?
  - By removing the market price-cap protection from the contracts, Western and KPP displaced essentially all of KPP's business risk onto Western's ratepayers. Rather than the contract protecting the ratepayers through a market price-cap, the burden of protecting the ratepayers shifted to the Commission. Since all costs incurred under the contract, absent regulatory disallowance, flow through Western's PGA directly to the ratepayers, Western continued to face little risk. At the same time, KPP shed all of its market risk of remaining price competitive with existing providers in the territory as required by its certificate. All of this market risk was transferred to the ratepayers. The only mitigation of this risk is "regulatory oversight" and paragraph 5.4 of the amended contract and equivalent language in the new contracts. Admittedly, paragraph 5.4 of the amended contracts and equivalent language in the new contracts (while still providing Western protection from risk) transfers some risk back to KPP through the regulatory

1 1 ( j :

process. However, the risk to KPP is much lower under the regulatory oversight of paragraph 5.4 and than the risk to KPP under the market price-cap provision. (David R. Springe, Kansas Corporation Commission Docket No. 97-WSRG-312-PGA Rebuttal Testimony)

The same results affect Missouri ratepayers, a substantial reduction in the protection

provided by recitation of a specific, reasonable transportation rate.

- Q. Do you have any comments regarding the testimony of Mid-Kansas witness Joan W. Schnepp?
- A. Yes. Ms. Schnepp cites MGE's increased volumes over the Mid-Kansas/Riverside Pipeline system as a benefit. This benefit was short-lived. Below is a summary of MGE's takes over this system.

13	ACA period	Volumes taken (MMBtu)
14	1996-1997	8,835,570
15	1997-1998	8,884,517
16	1998-1999	4,170,000
17	1999-2000	2,195,000

- Unfortunately for MGE's customers, the rates paid to Mid-Kansas/Riverside are based on straight-fixed-variable rate design, a method that collects the majority of costs through the reservation charge regardless of consumption.
- Q. Do you agree with Mr. Langston's conclusion on page 13 of his rebuttal testimony that "...it is unrealistic to think that MGE could have negotiated rates on the Mid-Kansas/Riverside system down to levels comparable to the Williams system, much less to terminate the agreement in total"?

25

The Kansas experience is illustrative here. 1 Α. No. Kansas Gas 2 Service (KGS), the successor to WRI/KPL for service to Kansas City, Kansas has been 3 subject to the same high rates that MGE pays. The Kansas Corporation Commission (KCC) Staff made similar arguments as the Missouri Staff regarding the 4 5 1991 amendments. Mr. Glenn Smith of the KCC staff on page 16 of his direct testimony 6 in KCC Case No. 97-WSRG-312-PGA (a copy is attached as Schedule 2 to my 7 testimony) states as follows: 8 If the Commission finds that the transportation 9 component of the KPP contracts is unreasonable and imprudent, what action would you recommend that the Commission consider? 10 11

A. Regarding the transportation rate, I would recommend that the Commission consider one of these actions:

First, a finding that the contract (s) is (are) excessive, unreasonable and adversely impact the public interest, and as such should be abrogated.

The second possible action is to find that the transportation rate is unreasonable and imprudent and that PGA pass through of the excess in not permitted.

O. How did the above referenced 1997 KCC case end?

A. The parties entered into a Settlement Agreement on July 9, 1997. This agreement was subsequently approved by the KCC in Case No. 97-WSRG-312-PGA on July 29, 1997. I am attaching as Schedule 3 to my testimony the prepared direct testimony of William G. Eliason on behalf of Kansas Gas Service Company filed in FERC Docket No. RP99-485-000 that references and explains the Kansas actions. I am also attaching, as Schedule 5, the hearing transcript and Kansas Gas Service's corrections

to that transcript. This transcript excerpt does not include the entire hearing in FERC Docket No. RP99-485-000 but is the entire portion of Mr. Eliason's examination.

- Q. Why do you believe this testimony is relevant to this case?
- A. Mr. Eliason describes much of the regulatory history of Mid-Kansas/Riverside proceedings in the state of Kansas. He indicates that on May 21, 1999, Kansas Gas Service filed suit in Case No. 99C06574 in Johnson County District Court against KPC. This case involves the 1997 KCC settlement. He indicates that one of the highlights of that 1997 Stipulation and Agreement was that beginning August 1, 2001, KPC would decrease its rates to competitive rates, which the parties agreed would be the WGPC (Williams) firm rates for deliveries into Kansas City and Wichita.
  - Q. Please continue.
- A. In one of the questions and answers Mr. Eliason describes a comparison between the Williams competitive alternative and the KPC rate. This discussion follows:
  - Q. Mr. Langley has made extensive comments regarding the competitive benefits brought about by his efforts to establish KPC as a going concern. Do you agree with his assessment?
  - A. Yes and no. I agree with Mr. Langley that Western was actively encouraged by the KCC to develop competitive alternatives to WGPC and its predecessors. KPC was one of the options which Western was encouraged by the KCC to consider. I will agree that for the period from 1988 through 1994, KPC's rates were fairly equivalent to the rates charged by WGPC. Since 1994, KPC's rates have become significantly higher than the rates charged by WGPC. For example, for gas delivered into Wichita, the demand rate currently being charged by KPS is \$11.456/MMBtu and the comparable demand rate charged by WGPC is \$5.895/MMBtu. For deliveries into Kansas City, Kansas and Johnson County, the demand rate currently being charged by KPC is \$19.965/MMGtu and the comparable demand rate charged

16 17

18

19

20

21

22

Α. No. He discusses the fact that William's has extensive storage capability, while KPC does not. This is indeed the case. I am also not aware of any complaints against Williams pertaining to quality of service issues in Kansas City, Mo.

- Q. What is the status of FERC Case No. RP99-485-000?
- It has been briefed but no final decision has been made regarding KPC's A. rates. Alarmingly, it is conceivable that MGE's current contract rates to KPC, the rates under discussion in this case, may greatly exceed rates paid for the same service in Kansas City, Kansas, and the ultimately FERC approved rates. August 1, 2001 will be a watershed date in Topeka, Kansas. One of the many common threads between Kansas and Missouri is the pattern of signing Stipulation and Agreements that ultimately end up in court because of differences in opinion on the meaning of key provisions.
  - Q. Have you had discovery issues with MGE and Mid-Kansas/Riverside?
- Yes. The bulk of staff's data requests were issued on or around March 28, A. Answers to those requests have been received throughout April and May. 2001. Numerous requests, however, are still outstanding from Mid-Kansas/Riverside and many responses were received late and/or have just recently been received. MGE and Mid-Kansas/Riverside have objected to several key data requests. The Staff is still considering motions to compel for this information.

MISSOURI PIRI IC SERVICE COMMISSION

RE: Case No. GR-94-101/228 - Gas Service/Missouri Gas Energy

Dear Mr. Rauch:

Enclosed for filing in the above-captioned case are an original and fourteen (14) conformed copies of a Stipulation and Agreement. Because this Stipulation and Agreement, if adopted, affects a number of other cases in addition to those referenced above (specifically, Case Nos. GR-94-227, GR-25-82 and GR-96-78). I request that a copy of this letter and a copy of the Stipulation and Agreement be placed in each of those case files. Sufficient extra copies have been provided for that purpose.

This Stipulation and Agreement does not resolve the entire case; at this point, the issue set out in the hearing memo filed last Friday, April 26, 1996, will need to be tried. In addition, this Stipulation and Agreement is not unanimous because it has not been executed by all parties. However, Williams Natural Gas, one of the non-signatory parties, has provided a letter indicating its lack of opposition (attached hereto). The other non-signatory, Missouri Gas Users Association, has also provided a letter (attached) indicating that it will not oppose the Stipulation and Agreement.

Also, as a housekeeping matter, the parties filed a unanimous Stipulation and Agreement on December 14, 1995 in this docket resolving a number of other issues. I understand that Stipulation and Agreement will be taken up by the Commission as it makes its decision in this case.

David L. Rauch May 2, 1996 Page 2

This filing has been mailed or hand-delivered this date to counsel of record for all parties to all of the dockets listed in this letter.

Thank you for your attention to this matter.

Sincerely yours,

Robert J. Hack General Counsel

573/751-8705 573-751-9285 (Fax)

Enclosure

cc: Counsel of Record
ALJ Derque

Schedule 1-2

In the Matter of the Partial Suspension of Western Resources Monthly Purchased Gas Adjustment (PGA).

97-WSRG-312-PGA ST 20572F TO 1997

TESTIMONY

PREPARED BY

GLENN D. SMITH

UTILITIES DIVISION

STATE CORPORATION COMMISSION

\*\* Denotes Confidential Material

- Q. Would you please state your name?
- 2 A. My name is Glenn D. Smith. My business address is 1500
- 3 Southwest Arrowhead Road, Topeka, Kansas 66604.
- 4 Q. By whom and in what capacity are you employed?
- 5 A. I am employed by the Kansas Corporation Commission as Chief
- 6 of Natural Gas Operations.
- 7 Q. Please state your educational and employment background.
- 8 A. I received a Bachelor of Science Degree in Electrical
- 9 Engineering from Wayne State University, Detroit, Michigan
- 10 and a Masters Degree in Business Administration from the
- University of Nebraska at Omaha. For approximately 20 years
- 12 I was employed by Northern Natural Gas Company (Enron
- 13 Corporation) in professional positions in operations and
- engineering. Included in the positions were those of
- district operations manager, manager of technical and
- 16 administrative services, and manager of pipeline facility
- 17 planning: Presently I am employed by the Kansas Corporation
- 18 Commission as Chief, Natural Gas Operations. In this
- 19 position I am responsible for several functions including
- 20 natural gas engineering, pipeline safety, and gas
- 21 operations.

22

#### INTRODUCTION AND BACKGROUND

- 23 Q. What is the purpose of your testimony?
- 24 A. My testimony is intended to demonstrate that certain costs
- 25 that Western Resources Inc. (WRI) attempted to include in
- their December, 1996 Purchased Gas Adjustment (PGA) are

1	unreasonable and imprudent, and that WRI should not be
2	permitted to pass them through to ratepayers in December or
3	in succeeding months

Q.

- Will you please describe the development of "competition" in the natural gas market in Kansas by summarizing the 1985 certification of Phenix and Kansas Pipeline Company LP?
- A. On January 1,1985, the Commission issued an Order granting a limited certificate of convenience and authority to Kansas Pipeline Company L.P.(KPCLP) to do business as a public utility in the transportation and sale of natural gas with deliveries to be made through the physical facilities of local distribution companies. In this Order the Commission set out the "minimum requirements of certificability" wherein it stated:

"Finally, Applicant must make an adequate showing of its ability to maintain adequate service at rates lower than those prevailing in the territory to be served." (citation omitted), Order, Jan1, 1985, In re: Kansas Pipeline Company, L.P., KCC Docket No.142, 583-U, at 14.

In May, 1985 the Commission issued an Order and Certificate to Phenix transmission Company with identical language. Order, May 29,1985, In re: Phenix Transmission Company, KCC Docket No.143,306-U Paragraph 32.

Such a showing was necessary for the Commission to determine if the proposed service was required by public convenience and necessity or whether the service would be a wasteful and useless burden to the community and the public.

1		That inquiry remains as relevant today as it did in 1985.
2	Q.	Will you describe the contract history of gas purchase by
3		WRI from KPP (and its predecessors)?
4	Α.	WRI and KPP entered first into a gas purchase contract in
5		January, 1987 for a three month period. To my knowledge no
6		gas flowed under that contract. In August, 1988 another gas
7		purchase contract( Exhibit GDS-1) was signed and gas moved
8		under that contract starting in November, 1988. The duration
9		of the contract was through January, 1993.
0	Q.	What were the price terms of the 1988 contract?
. 1	Α.	The price terms were as follows;
.2		**
.2 3		
.4 .5		
6 7		
. / .8		
9		
20		**
21	Q.	Will you describe the situation in the gas industry in the
22		fall of 1991?
23	Α.	The situation in the fall of 1991 was one of uncertainty. It
24		was widely recognized that the Federal Energy Regulatory
25		Commission(FERC) was about to issue an order based, in part,
26		on public comments to a Notice of Proposed Rulemaking (FERC
27		Docket RM 91-11). It was believed that there would be
28		further steps toward competition, but the exact nature of
29		those steps were unknown. Fixed price long term gas purchase

contracts were no longer common. Gas purchase contract

30

durations were becoming shorter, and typically the price of 1 the gas was tied to a market index. WRI was receiving bids 2 3 for gas supply tied to an index at least as early as November, 1990, according to a response to a staff data 4 request1 to WRI. 5 What types of actions was WRI taking during this time? 6 Q. 7 In November, 1990, WRI signed their first long term gas Α. purchase contracts that were tied to an index. This was a 8 9 contract with Amoco for, what is commonly known as, Tight Sands gas. The basic terms for the gas price was a monthly 10 demand( or reservation) charge of \*\*\_\_\_\_\_\_ i 1 12 13 The commodity charge was \*\*\_\_\_\_\_\*\* 14 Additionally, WRI entered into a gas purchase contract with 15 Oxy for Tight Sands gas, \*\*\_\_\_\_\_ 16 17 WRI's transportation and full service contracts with MNG were about to expire, and the parties agreed, in 1991 and 18 19 early 1992, to extend them until a time that it was reasonably certain that FERC would have issued their order 20 21 on restructuring'. After FERC Order 636 was issued on April 18,1992 and WRI and 22 Ο.

23

WNG recontracted for service, what was the duration of the

Docket 97-WSRG-312-PGA DR-5 March 11,1997

<sup>&</sup>lt;sup>2</sup> Docket 97-WSRG- 312-PGA DR-4 March 11,1997

1		contract?
2	Α.	The duration of the transportation contracts ranged from **
3		** Under FERC rules promulgated in Order
4		636, those who were contracting for no-notice bundled
5		service prior to the issuance of Order 636 had first rights
6		to retain no-notice( but unbundled) service. They could
7		offer less than full tariff rate and/or less than a 20 year
8		term for the service, but could lose the service if another
9		entity made an offer that had a higher economic value. The
.0		original customer then had the opportunity to match (or
l		exceed) the offer and retain the service. At least some of
2		the capacity contracted for the longer terms were necessary
.3		to match offers by others for no-notice service. **
4		
.5		
6		**
7		In summary, WRI did not contract with WNG for long time
8		periods post 636 unless there were strong business reasons
9		to do so. Contract durations were, and are, minimized.
.0	Q.	Is it accurate to say that WRI and KPP entered into a
1		contract modification and extension, as well as entering
22		into new long term contracts in the midst of great industry
23		uncertainty?
24	Α.	Yes.
:5	Q.	How long was the contract extension ?
:6	Α.	**

Α.	Paragraph 5.2 of the amended contract contains the price
	terms. They are as follows:
	**
	**

- 13 Q. Did WRI management have reason to question the prudence of
  14 entering into the contracts with KPP which extended the
  15 duration of the contract, and immediately increased the
  16 costs?
- 17 A. Mr. Bill Johnson, then President and CEO, Gas Service
  18 Division of KPL Gas Service, received a letter dated
  19 February 22,1991 from Mr. Jack Roberts, a KPL consultant,
  20 alerting the company of both the imprudence of the contract
  21 generally, but also of the specific imprudence of distinct
  22 terms contained within the proffered contract(s).
- Q. Did Mr. Roberts have qualifications that permitted him to comment knowingly on the prudence of the proposed contract(s)?
- 26 A. Yes, he had been a long term manager for WRI in the gas
  27 supply area, and previously had contract approval authority.
- 28 Q. Could you cite examples of specific warnings that Mr.
- 29 Roberts made to Mr. Johnson?
- 30 A. On page 3 of his letter of February 22,1991( attached as

1		Exhibit GDS-2), with reference to the proposed price term
2		amendment of the August 8,1988 contract, Mr. Roberts
3		observed:
4 5 6 7 8 9 10		**
12	Q.	Was this comment the only one that Mr. Roberts made
13		regarding the prudence of the proposed contract terms?
14	Α.	No. There were multiple contracts addressed in this memo as
15		the proposals covered five proposed new/amended contracts.
16		The references sometimes addressed similar provisions in
17		different contracts. Additionally, he commented on the
18		perceived imprudence of certain provisions contained in the
19		proposals on aspects of the contracts that are not a topic
20		of this PGA docket.
21	Q.	Is there evidence that WRI considered that there was a
22		potential that Mr Roberts might be correct, and that the
23		Commission might disallow pass-through of some costs
24		associated with these contracts?
25	Α.	Yes, in Section 5.4 of the terms and conditions of the
26		amended contract(Exhibit GDS-3) and contained in the terms
27		of the new contracts (Exhibit GDS-4) is the proviso that;
28 29		**
30		
31		

1 2 3 4 5		**
6 7	Q.	Is this term, or one functionally equivalent, present in
8		contracts between WNG and WRI?
9	Α.	No, Staff reviewed WRI's contracts currently in place for
10		service by WNG, and could not find a functionally equivalent
11		clause.
12	Q.	Based on your industry knowledge, is a similar clause common
13		in contracts between pipelines and local distribution
14		companies?
15	Α.	No, I am not aware of any other instances where a similar
16		clause exists.
17	Q.	Can you be more specific as to the costs that are
18		unreasonable and imprudent?
19	Α.	The unreasonable and imprudent costs include that portion
20		which represents the excess cost between KPP and the
21		competitive alternative of both the transportation and gas
22		commodity purchased from Kansas Pipeline Partnership (KPP).
23		TRANSPORTATION COSTS
24	Q.	Why are a portion of the transportation costs unreasonable
25		and imprudent?
26	Α.	As previously described, in October, 1991, WRI and KPP
27		amended an existing gas purchase contract that had as its
28		price term that the cost was to be **
29		

1		
2		
3		** The immediate
4		impact was to increase the costs by **
5		** There was no
6		way to seek competitive alternatives during that period. A
7		subsequent rate increase has created a wide gap between the
8		cost to transport gas on KPP, and on the alternative
9		pipeline.
10	Q.	Didn't the KCC approve those rates, thus making them
11		reasonable?
12	Α.	No, although the KCC approved those rates for KPP to charge
13		based on its Cost of Service, it is not necessarily
14		reasonable for WRI to pay those rates if cheaper
15		alternatives are available.
16	Q.	Are the unreasonable and imprudent actions limited to the
17		amended contract?
18	Α.	No, at the same time WRI and KPP increased the contract term
19		by 18 years and removed the price cap, they also contracted
20		for additional volumes. Some were transportation and some
21		were sales volumes. There were provisions for some of these
22		additional volumes to be shifted between sales and
23		transportation. These additional contracts contained terms
24		and conditions that were functionally the same as the
25		amended contract. **
26		**

- 1 Q. Why is the transportation rate unreasonable and imprudent?
- 2 A. It is unreasonable and imprudent as there is no control on
- 3 the price to assure that the rate is competitive with the
- 4 alternative pipeline, and WRI is locked in for 18 years, so
- 5 there is no way to seek a less costly alternative for an
- 6 extended period of time for this portion of WRI's supply
- 7 needs. The resultant cost presently exceeds the competitive
- 8 alternative by a factor of more than three. Exhibit GDS-5
- graphically demonstrates the unit transportation costs on an
- annual basis for volumes transported on WNG and KPP for the
- 4 years, 1993-1996. It is readily apparent that the
- difference in unit costs have increased over the 4 years,
- and for the year 1996 the unit cost on KPP is \$2.14/ Mmbtu.
- 14 For 1996 the WNG unit cost was \$0.61 /Mmbtu.
- 15 Q. Didn't the KCC have the power to control KPP's rate under
- the 1991 contracts?
- 17 A. No, the KCC must set KPP's rates based on KPP's cost of
- 18 service. The KCC cannot reduce the rates to reflect the
- 19 rates of other jurisdictional (or non-jurisdictional)
- companies.
- 21 Q. Does that mean that the only way that the KCC can control
- the passthrough on the PGA is to abrogate the contract?
- 23 A. No, the contract contains the provision, described above,
- 24 that adjusts the contract price to reflect the actual amount
- 25 the KCC permits WRI to pass through its PGA, irrespective of
- 26 KPP's Commission approved cost-of service based rate.

#### COMMODITY COSTS

- What are the terms of the commodity component of the KPP contracts?
- 4 A. The commodity rate that WRI is to pay to KPP under the contracts is the actual rate paid by KPP to purchase the
- 6 commodity.

- 7 Q. Why does Staff believe that the costs are imprudent?
- 8 A. There are several reasons. First, the result is egregious.
- 9 In January, 1995, subsequent to the October, 1991 signing of
- the gas purchase contract with WRI, KPP entered into a gas
- Il purchase contract with an affiliate (Margasco) to purchase
- gas at \*\* \_\_\_\_ \*\* That rate is excessive and clearly does
- not represent the rate that would be achievable in an arms-
- length negotiation. Additionally, that contract was amended
- to permit; the rate to go higher than \*\*\_\_\_\_\*\* if actual
- 16 cost exceeded that amount<sup>3</sup>. There is no definition of whether
- 17 this cost; is a weighted average cost of gas, or whether a
- single package of gas would trigger the provision. Secondly,
- WRI has failed to audit the costs, and never filed a
- complaint; with the Commission upon learning that the rate
- 21 being billed was not the result of an arms-length
- 22 negotiation. While it is true that WRI personnel have
- 23 mentioned the problem to Staff, it remains the
- responsibility of WRI to initiate a complaint. The mere

<sup>&</sup>lt;sup>3</sup>KCC Docket 97-WSRG-312-PGA DR-6

- mentioning of a problem does not shift the responsibility to initiate action to Staff. It is common to hear "gripes" from one party regarding actions or inactions on the part of another entity. WRI has been both the initiator and recipient of formal complaints in the past, and is well aware of the procedures.
- 7 Q. What is the basis for Staff's contention that the rate is not representative of an arms-length negotiation?
- First, there is no evidence that KPP attempted to negotiate 9 Α. a gas supply contract with any entity other than their 10 affiliate. In response to Staff data request #7 KPP claimed i 1 that no bid solicitations were retained for the period 1991-12 present. It stretches the imagination to believe that even 13 for the current heating season no documentation was 14 retained, unless there were no bids requested from other 15 suppliers. Secondly, the price that is being charged is not 16 what one would pay for short term gas supplies from other, 17 non-affiliated suppliers. 18
- 19 O. What evidence does Staff offer to support that contention?
- 20 A. Western Resources contracts for long term gas supplies in
  21 addition to winter season, 30 day supplies, and daily
  22 supplies. Exhibits GDS-6 and GDS-7 list the bids that
  23 Western Resources received in response to requests for
  24 proposal for gas supply for winter seasons into the Transok
  25 pipeline (as well as others). Transok is the transmission
  26 line which feeds KPP in Oklahoma. Thus, these offers are

ſ		good prokles for the price that western Resources should be
2		paying KPP. These prices are considerably lower than KPP
3		prices. They average \$0.10/MMbtu demand charge and have an
4		average commodity cost of Index +\$0.015/MMbtu. For the 1995-
5		96 winter season WRI purchased approximately **** Mmbtu
6		from KPP. The cost of gas purchased from KPP would have
7		averaged **** Mmbtu more than the proxy. This would have
8		amounted to approximately **** more than purchasing on a
9		competitive basis. These calculations are shown on Exhibit
10		GDS-8.
11	Q.	Is there other evidence to support the contention that the
12		gas commodity price is not representative of an arms-length
13		negotiation?
14	Α.	Yes, Margasco was one of the marketers that WRI solicited
15		proposals from for spot supplies into Transok. In 1996
16		Margasco bid to supply 30 day spot supplies to MRI for the
17		months of June, July, and October. For these 3 months
18		Margasco's bids ranged from a low of **
19		**

- 20 Q. Was Margasco the low bidder for any of the 3 months?
- 21 A. No, but the bids were competitive, and they generally fell within the range of other bidders.
- Q. How did the Margasco spot bids for these 3 months compare to the KPP contract price for the same time period?
- 25 A. The results are shown in the table below. It is apparent that the KPP contract price is approximately \$0.23/ Mmbtu

more costly than the Margasco spot bid price. This is in a market where winning or losing a bid often is a difference of \$0.0025 /Mmbtu or less. Clearly, the KPP contract with Margasco is not an arms-length negotiation equivalent.

IMPACT OF CONTRACT(s)

16 Q. What has been the impact of the KPP contracts on Kansas 17 ratepayers?

- 18 A. For the period 1992-1996 Kansas ratepayers have paid in
  19 excess of an additional \$48 million as a result of the KPP
  20 contracts as compared to the competitive alternative.
- 21 Q. How is the \$48 million figure calculated?
- 22 A. The \$ 48 million was determined by first calculating the
  23 cost/MMbtu for all volumes delivered utilizing WNG,
  24 including all direct bills and refunds. Next the identical
  25 calculations were performed for all volumes delivered over

<sup>&</sup>lt;sup>4</sup> KPP contract price is 114% of the 5 pipeline average index

- 1 KPP. The difference/MMbtu was computed by taking the 2 difference in the unit costs. Finally, the total variance
- 3 was figured by multiplying the difference/Mmbtu by the
- 4 volumes moved over KPP.
- 5 Q. What was the source of the data used in this analysis?
- 6 A. WRI provided the data in response to a staff data request.
- 7 Staff performed the calculations, and the data and
- 8 calculated values are contained in exhibit GDS-9.
- 9 Q. How did the rates compare prior to the revising of the 10 contract in 1991?
- 11 A. For the period November, 1988-December, 1991, by buying gas
- from KPP and transporting it over the KPP pipeline, WRI paid
- 13 \$1.9 million more than they would have paid had they
- 14 purchased the gas on the open market and transported those
- 15 volumes over WNG. This equates to an average excess of
- 16 about \$0.16 /Mmbtu.
- 17 Q. There is a significant change between the two periods of
- 18 time. To what is the change attributed?
- 19 A. The change is attributed to a sharp increase in the cost of
- 20 KPP services. At the end of 1991 the cumulative rate of
- 21 commodity plus transport services over KPP was approximately
- 22 \$3.21/MMbtu, and the WNG rate was approximately \$3.05.NMbtu.
- 23 By year-end 1996 the KPP cumulative rate had increased to
- \$4.12, while the WNG rate was \$3.00/Mmbtu. This change is
- 25 shown even more clearly if one compares the rate for the
- year 1996. The combined commodity and transportation rate

- on KPP was \$5.70/MMbtu, and the WNG rate was \$3.21/MMbtu.
- Possible Commission Actions
- 3 Q. If the Commission finds that the transportation component of
- 4 the KPP contracts is unreasonable and imprudent, what action
- 5 would you recommend that the Commission consider?
- A. Regarding the transportation rate, I would recommend that the Commission consider one of these actions:
- First, a finding that the contract(s) is(are)excessive,
- 9 unreasonable and adversly impact the public interest.
- 10 and as such should be abrogated.
- The second possible action is to find that the
- 12 transportation rate is unreasonable and imprudent and
- 13 that PGA pass through of the excess is not permitted.
- 14 Q. What portion of the transportation rate is excessive?
- 15 A. There are at least 3 ways of calculating the excess.
- First is to use the average cost of transportation over
- WNG as the standard.
- The second is to use the highest priced VMG firm
- 19 transportation tariff as the standard.
- The third alternative is to use a value between the two
- 21 as the standard of a competitive alternative.
- 22 Q. Do you have a recommendation regarding these three
- 23 alternative transportation rates?
- 24 A. I believe that the appropriate level of transportation
- charge pass through should be the weighed average cost of
- 26 WNG transportation, including GRI and ACA charges. The least

- appropriate comparison is the WNG firm transportation

  tariff, plus GRI and ACA. An average of the two alternatives

  discussed above would be a reasonable compromise position,

  and would fall within the range of reasonableness.
- Do you have a recommendation on a Commission finding regarding the commodity portions of the WRI-KPP contracts?
- 7 The evidence presented heretofore is clear: the rates baid Α. 8 by WRI for the commodity are unreasonable as they do not represent prices that are attainable in an arms-length transaction. WRI should not be permitted to pass through 10 more than the competitive alternative. It has been shown 11 that the competitive alternative is Index + \$0.115 /Mmbtu, 12 where the Index is the arithmetic average of the Inside FERC 13 price for the five pipelines (WNG, NNG, ANR, PEPL, and NGPL). 14
- 15 O. Does this complete your testimony?
- 16 A. Yes.

#### CONFIDENTIAL

# UNITED STATES OF AMERICA BEFORE THE FEDERAL ENERGY REGULATORY COMMISSION

Kansas Pipeline Company

Docket No. RP99-485-000

# PREPARED DIRECT TESTIMONY OF WILLIAM G. ELIASON ON BEHALF OF KANSAS GAS SERVICE COMPANY, A DIVISION OF ONEOK, INC.

- 1 Q. Please state your name and business address.
- 2 A. My name is William G. Eliason. My business address is 200 S.W. Sixth
- 3 Street, Topeka, Kansas 66203.
- 4 Q. By whom and in what capacity are you employed?
- 5 A. I am employed by Kansas Gas Service Company, a Division of ONEOK,
- Inc. (Kansas Gas Service or the Company), as Vice President, Gas
- 7 Strategy.
- 8 Q. Please describe your educational background and professional experience.
- 9 A. I received a degree in civil engineering from the University of Nebraska in
- 10 1974. Since that time, I have been employed in the natural gas industry.
- I was employed by Peoples Natural Gas Company for 14 years. My
- responsibilities at Peoples included engineering, marketing, and gas

Supply. After leaving Peoples, I was employed for six years by Rangeline Corporation, where, ultimately, I assumed the position of Chief Operations Officer. Rangeline was the unregulated gas marketing subsidiary of Western Resources, Inc. (Western). At Rangeline, I was involved directly with the marketing of natural gas. I moved to Western in July 1994 and assumed responsibility for gas transmission and supply. In December 1997, I became an employee of Kansas Gas Service. In my current position, I am responsible for the Gas Supply Department, the Transportation Services Department, FERC Regulatory Department and the Marketing (Business Development) Department.

11 Q. What is the purpose of your testimony?

Α.

My testimony will provide the background for the business and contractual relationships between Kansas Gas Service and Kansas Pipeline Company (KPC) (throughout my testimony, my references to KPC include all of its affiliates and their predecessor companies). In the course of this general discussion, I will briefly discuss the July 9, 1997 Settlement Agreement entered into by Kansas Gas Service, KPC and the Staff of the Kansas Corporation Commission (KCC), and Kansas Gas Service's lawsuit filed against KPC in the State District Court of Johnson County, Case No. 99C06574. I will also testify regarding certain items

- 1 contained in KPC's filing such as deferred service cost, acquisition
- 2 premium, depreciation and outside services.
- 3 Q. Will other witnesses testify on behalf of Kansas Gas Service?
- 4 A. Yes. Mr. Richard Tangeman will testify regarding KPC's claim that it is
- 5 entitled to deferred service costs as a result of delays by Western in
- 6 entering into new agreements with KPC. Mr. Tangeman will also testify
- 7 regarding certain aspects of KPC's depreciation and negative salvage
- 8 costs. Mr. William E. Brown will testify regarding the negotiations which
- 9 Mr. Langley alleges he had with Mr. Brown.
- 10 Q. Please provide a general description of Kansas Gas Service.
- 11 A. Kansas Gas Service is a division of ONEOK, Inc., which is headquartered
- in Tulsa, Oklahoma. ONEOK, Inc. provides natural gas distribution
- service to approximately 1.4 million natural gas customers in Kansas and
- Oklahoma. It is the eighth largest natural gas distribution company in
- the United States.
- 16 Q. How did Kansas Gas Service become part of ONEOK, Inc.
- 17 A In late 1996, ONEOK and Western entered into an agreement to combine
- the natural gas properties of the two companies. Western had
- approximately 635,000 natural gas customers located in Kansas and
- 20 northeast Oklahoma. Western also had approximately 500,000 electric

customers in Kansas. Pursuant to the agreement between Western and ONEOK, Western contributed all of its natural gas assets and liabilities to a wholly-owned subsidiary, WAI, Inc. ONEOK then merged into WAI, Inc. and WAI, Inc. was then renamed ONEOK, Inc. Western received common stock from ONEOK, giving it a 9.9% ownership interest in ONEOK. Western also received preferred stock in ONEOK which could be converted into an additional 35% of the common stock of ONEOK, giving Western potentially a 45% interest in ONEOK. The transaction between Western and ONEOK closed on November 26, 1997.

3

4

ō

6

7

8

- 10 Q. Please give a brief description of Western's gas business before entering
  11 into the agreement with ONEOK.
- Western initially was involved in the natural gas business as Kansas 12 Α. Power and Light (KPL). KPL owned a transmission line which ran from 13 the Hugoton Gas field in southwest Kansas to the northeast portion of the 14 15 state, serving approximately 110,000 customers. Under the KPL system, KPL was responsible for buying its own gas, transporting it and 16 distributing it to the end use customer. In 1983, KPL bought the Gas 17 18 Service Company, which served approximately 900,000 natural gas customers and was almost exclusively a pure natural gas distribution 19 company. Its customers were located in Kansas, Missouri and Oklahoma. 20

Its primary service centers were Kansas City, Missouri. Kansas City, Kansas, Wichita, Kansas, Topeka, Kansas and Johnson County, a heavily populated county bordering Kansas City, Missouri and Kansas City, Kansas. In 1993, Western sold its Missouri properties, representing approximately 450,000 customers, to the Southern Union Company. This transaction closed on January 31, 1994.

1

2

3

4

õ

- 7 Q. How did the Gas Service Company acquire the gas it delivered to customers?
- 9 Α. The Gas Service Company acquired gas from an interstate pipeline, Williams Gas Pipelines Central, Inc. (WGPC) and its predecessor 10 companies. As discussed by Mr. Langley, WGPC was previously part of 11 the Cities Service organization, as was the Gas Service Company. These 12 13 two entities were separated in the 1940s, not the 1950s, as suggested by Mr. Langley. The Gas Service Company acquired all of its gas from 14 WGPC and its predecessors under full requirements contracts. In the 15 16 mid-1980s, Western, as the successor to the Gas Service Company, began the process of securing supplies of gas from alternative sources, either by 17 purchasing gas from producers and marketers and transporting the gas 18 over WGPC or by buying gas from alternative sources such as KPC's 19 20 predecessors. Later in my testimony, I will discuss several reasons why

KPC should not recover any deferred service cost for shortfalls in the sale of gas by KPC to Western in the 1989 to 1991 time frame. As will be shown in the testimony of Richard Tangeman, such shortfalls were not caused by inaction on the part of Western/Gas Service, as such delays were in great part caused by KPC itself. Mr. Tangeman will discuss in greater detail Western's efforts to obtain conversion and reduction rights from WGPC in the late 1980s. In August 1988, Western entered into the first major contract with KPC. A second contract was entered into in 1990, and several other contracts were entered into on October 3, 1991.

- 10 Q. Please describe the contracts currently in effect between Kansas Gas

  11 Service and KPC.
- A. All of the contracts in effect were signed by Kansas Gas Service's predecessor companies and by the predecessor companies of KPC. There are nine contracts in effect today. The contracts are described below:
  - 1. Contract dated August 8, 1988, with a contract demand of 35,000 MMBtu/day and a termination date of October 31, 2009, originally signed by KPL and Kansas Pipeline Company, L.P. The contract is labeled a Gas Purchase Agreement, but, as a result of the Settlement Agreement dated July 9, 1997, which I will discuss later in my testimony, the contract became a transportation only

2.

3.

agreement. The agreement provides that the price to be charged shall be equal to KPC's maximum rates but that the parties may agree to a lesser rate. Service under this agreement is for deliveries to the Kansas City metropolitan area on the Kansas side.

- Gas Transportation Service Agreement dated October 3, 1991, with a contract demand of 48,668 MMBtu/day and a termination date of October 31, 2009, originally signed by KPL and KansOk. The agreement provides that the price to be charged shall be equal to KPC's maximum rates but that the parties may agree to a lesser rate. This represents deliveries from TransOk in Oklahoma to Riverside at the Kansas/Oklahoma state line.
- Service Agreement dated October 3, 1991, Rate Schedule FT, with a contract demand of 48,668 MMBtu/day and a termination date of October 31, 2009, originally signed by KPL and Riverside Pipeline Company. The agreement provides that the price to be charged shall be equal to KPC's maximum rates but that the parties may agree to a lesser rate. This gas is received from KansOk (No. 2 above) carried across the state line and delivered to Kansas Natural Partnership (No. 4 below).

- 4. Gas Transportation Service Agreement dated October 3, 1991, with a contract demand of 48,668 MMBtu/day and a termination date of October 31, 2009, originally signed by KPL and Kansas Natural Partnership. The agreement provides that the price to be charged shall be equal to KPC's maximum rates but that the parties may agree to a lesser rate. This gas is received from Riverside (No. 3 above), with deliveries up to 21,100 MMBtu/day to Wichita and up to 27,568 MMBtu/day to Kansas Pipeline Partnership (No. 5 below).
- 5. Gas Transportation Service Agreement dated October 3, 1991, with a contract demand of 27,568 MMBtu/day and a termination date of October 31, 2009, originally signed by KPL and Kansas Pipeline Partnership. The agreement provides that the price to be charged shall be equal to KPC's maximum rates but that the parties may agree to a lesser rate. This gas is received from Kansas Natural Partnership (No. 4 above) and delivered to the Kansas City metropolitan area on the Kansas side.
- 6. Gas Purchase Contract dated February 28, 1995, with a contract demand of 6,857 MMBtu/day and a termination date of October 31, 2009, originally signed by Western and Kansas Pipeline Partnership. The contract is labeled a gas purchase contract, but,

7.

as a result of the Settlement Agreement dated July 9, 1997, the contract became a transportation only contract. The price is tied to Panhandle Eastern's no-notice service. Service under the contract is for the cities of Paola and Osawatomie

- Gas Purchase Contract dated February 28, 1995, with a contract demand of 6,900 MMBtu/day and a termination date of October 31, 2009, originally signed by Western and Kansas Pipeline Partnership. The contract is labeled a gas purchase contract, but, as a result of the Settlement Agreement dated July 9, 1997, the contract became a transportation only contract. The price is tied to WGPC's no-notice service. Service under the contract is for the city of Ottawa.
- Gas Purchase Contract dated February 28, 1995, with a contract demand of 5,700 MMBtu/day and a termination date of October 1, 2007. Originally signed by Western and Kansas Pipeline Partnership. The contract is labeled a gas purchase contract, but, as a result of the Settlement Agreement dated July 9, 1997, the contract became a transportation only contract. The contract provides that the price to be charged shall be equal to KPC's maximum rates through October 31, 2002. Thereafter, through

- October 31, 2007, the price is tied to WGPC's rate for firm
  transportation service. Service under the contract is for Johnson
  County.
- 9. Gas Transportation Service Agreement dated February 28, 1995, 4 5 with a contract demand of 62,568 MMBtu/day between Western and Kansas Pipeline Partnership. Transportation service under G 7this agreement begins on November 1, 2009 and continues through 8 October 14, 2014. The contract provides that the price to be 9 charged shall be the lesser of KPC's maximum rate or WGPC's rate 10 for firm transportation service. Service under this agreement is for 11 delivery to the Kansas City metropolitan area on the Kansas side.
- 12 Q. Is KPC still providing sales service to Kansas Gas Service?
- 13 A. No.
- Q. Did this change occur when KPC became subject to FERC jurisdiction on May 11, 1998?
- 16 A. No. The merchant portion-of these contracts was terminated on July 11,
  17 1997, pursuant to paragraph 1.4 of the July 9, 1997 Settlement
  18 Agreement.
- 19 Q. Please describe the July 9, 1997 Settlement Agreement entered into by 20 KPC, Western and the Staff of the KCC.

The July 9. 1997 Settlement Agreement was entered into by KPC, Western and the Staff of the KCC to resolve many disputes involving the rates and charges of KPC. A copy of the Settlement Agreement is attached as Exhibit WGE-2. The primary focus of this settlement was to move KPC from an uncompetitive, to a competitive position, vis a vis WGPC, while at the same time maintaining KPC in a sound financial position to enable it to continue as a viable competitor to WGPC. The Settlement Agreement was designed to make KPC live up to its promise, which it had made for years, that its presence would be a positive competitive benefit for Kansas natural gas consumers. From 1994 onward, KPC had lost any right to claim that its presence was beneficial to consumers in the State of Kansas.

12 Q. What happened in 1994?

Α.

Α.

On March 25, 1994, KPC filed a rate case at the KCC to increase substantially its rates and charges and to combine certain of its subsidiaries operating on an intrastate basis within the state of Kansas, KCC Docket No. 190,362-U. Specifically, KPC proposed an annual revenue increase of \$11 million and, in addition, sought to direct bill Western for \$55.6 million. KPC's proposed rate base of \$114 million included deferred charges (primarily market entry costs) of \$62 million. KPC also sought to have its rates converted from a volumetric charge to a

straight fixed variable charge. The Commission granted KPC the authority to begin charging its cost of service on a straight fixed variable basis beginning in June of 1994. On March 17, 1995, the KCC issued an order authorizing KPC to increase its rates substantially. A significant part of this very long and difficult case included KPC's attempt to recover market entry costs ("deferred service costs" in this case). The March 17, 1995 decision significantly reduced the amount of market entry costs (deferred service costs) to be recovered from KPC's customers, but still incorporated a substantial amount in rate base for KPC's benefit. The March 17, 1995 Order was eventually appealed to the Kansas Court of Appeals on the ground that the market entry costs were assets of a prior company and were not purchased in 1988 and 1989 by KPC. On June 26, 1996, the Kansas Court of Appeals expressed serious concern as to the propriety of KPC recovering these market entry costs, which had been incurred by a predecessor company, and remanded the case back to the KCC for further review and determination as to when and how the market entry costs were purchased from KPC's predecessors. Williams Natural Gas Co. v Kansas Corporation Commission, 22 Kan. App. 2d 326. (Opinion issued June 19, 1996; review was denied by the Kansas Supreme Court on July 25, 1996.) On remand, KPC filed a Motion with the KCC on

1

7

8

9

10

11

12

13

14

15

16

17

18

19

November 13, 1996, asking the KCC to reopen the record in Docket No. 190,362-U and to recover market entry costs for the period November 1, 1988 through March 17, 1995. A copy of the Motion is attached as Exhibit WGE-3. On December 30, 1996, the KCC issued its Order on Remand, denying KPC recovery of any market entry (deferred service) costs and ordering a refund by KPC to Western of approximately \$7.5 million previously collected under the March 17, 1995 Order permitting KPC to recover market entry costs. KPC's Petition for Reconsideration of the December 30, 1996, KCC Order was denied by the KCC on February 3, 1997. KPC appealed the December 30, 1996, and February 3, 1997, KCC decisions and, in a June 20, 1997 Opinion upholding the Commission's Order on Remand, the Court of Appeals stated as follows:

We have examined the record, and we see no abuse of discretion by the KCC in its decision not to reopen the record and not to hear additional evidence.

#### As the KCC noted:

The record made in this proceeding is extensive (the official record contained 17,364 pages reflecting the testimony of 29 witnesses during 17 days of hearings and containing 64 motions, 39 separate orders, 12 post hearing motions, and 11 separate post hearing orders), and the initial briefs and reply briefs have provided substantial assistance in reviewing the record and understanding the arguments for and

2		entry cost.
3 4		If a party finds itself unable to squeeze all of its evidence on the issue into a record of this size, then it is beyond our help.
5		Kansas Pipeline Partnership v. Kansas Corporation Commn. 24 Kan
6		App.2d 42, 50 (1997).
7		Following the issuance of the Court of Appeals decision, KPC filed an
8		appeal to the Kansas Supreme Court.
9	Q.	Were there other dockets which were addressed in the Settlement
10		Agreement?
11	Α.	Yes. On February 5, 1997, two days after the Commission issued its
12		Order denying KPC's Petition for Reconsideration in Docket No.
13		190,362-U, KPC filed a tariff sheet with the KCC, seeking to direct bill
14		Western for \$11.1 million of project development costs, commonly referred
15		to as Linchpin Development Costs. KPC stated that it was authorized to
16		direct bill these Linchpin Development Costs pursuant to the Orders of
17		the Court of Appeals approving certain agreements between Western and
18		KPC by operation of law. Kansas Pipeline Partnership v. Kansas
19		Corporation Comm'n, 22 Kan App. 2d 410 (1996) (hereafter the "1996 KPP
20		case"). The KCC suspended the tariff filing and set it for hearing in
21		Docket No. 97-KPPG-460-TAR. The KCC denied KPC's tariff filing in an

Order issued on May 5, 1997, stating that the Court of Appeals decision in the 1996 KPP case did not authorize KPC to direct bill Western, as such project development costs were initially included in rates approved by the KCC in Docket No. 190,362-U, which rates became permanent as a result of the court's opinion in the 1996 KPP case. A copy of the May 5, 1997 Order is attached as Exhibit WGE-4. On June 11, 1997, the KCC denied KPC's Petition for Reconsideration. In conjunction with the activities of the KCC in Docket No. 97-KPPG-460-TAR, KPC filed a Petition for Writ of Prohibition with the Court of Appeals on March 12, 1997.

It appears that there was significant activity before the KCC and the

Α

10 Q. It appears that there was significant activity before the KCC and the
11 Kansas Court of Appeals in the late 1996 and early 1997 time period.
12 Were there other dockets before the KCC involving KPC in that time
13 frame?

Yes. On November 25, 1996, KCC Staff requested the partial suspension, effective December 1, 1996, of the Purchased Gas Adjustment (PGA) of Western for the purpose of investigating the prudence of the costs to be passed through for transportation and purchase of natural gas from KPC. The suspension related to the agreements entered into on October 3, 1991 and the August 8, 1988 agreement, which was also amended on October 3, 1991. The KCC granted Staff's requested suspension on December 2,

1996, thereby initiating Docket No. 97-WSRG-312-PGA. In response to a Request for More Definite Statement, the KCC filed the Affidavit of Glenn Smith on March 3, 1997. In his affidavit, Mr. Smith stated that, as a result of the 1991 contracts entered into by KPC and Western, Kansas consumers, during the 1994 through 1996 time period, had incurred more than \$25 million in additional costs than they should have. KPC and Western both opposed the Suspension Order and filed Petitions for Reconsideration of the Suspension Order, and the matter was set for hearing on June 30, 1997. A copy of Mr. Smith's affidavit is attached as Exhibit WGE-5.

4

5

6

7

8

9

- 11 Q. Please summarize the status of the relationship of KPC and Western
  12 before the KCC and the Court of Appeals as of June 1997.
- At that time, KPC had been ordered to refund approximately \$7.5 million 13 Α. in market entry costs in Docket No. 190,362-U, which order had been 14 upheld by the Kansas Court of Appeals and had been appealed to the 15 Kansas Supreme Court; KPC's request to direct bill Western for \$11.1 16 17 million in project development costs had been denied by the KCC in Docket No. 97-KPPG-460-TAR, as such amounts had already been 18 included in rates being recovered by KPC pursuant to orders of the KCC 19 in Docket No. 190,362-U; and Western's PGA was partially suspended by 20

- the KCC on the grounds that the 1991 agreements between KPC and
- Western were costing customers approximately \$8 million a year. A
- 3 hearing was scheduled on that matter for June 30, 1997.
- 4 Q. Were there also issues under consideration at the Federal Energy
- 5 Regulatory Commission (FERC) at about the same time?
- 6 A. Yes. The FERC had determined that KPC was subject to its jurisdiction
- 7 in a November 2, 1995, Order in Docket No. RP95-212, 73 FERC ¶ 61,160.
- 8 The November 2, 1995 Order also required KPC to file an application for
- 9 certificate authorization under section 7 (c) of the Natural Gas Act. On
- December 8, 1995, the FERC issued an order staying the effectiveness of
- the November 2, 1995 Order until 60 days after the issuance of an order
- on the merit's of requests for rehearing of the November 2, 1995 Order.
- On January 23, 1996, KPC filed the Application required by the
- November 2, 1995 Order, thereby initiating the CP96-152 Docket.
- 15 Q. What happened next at the state level?
- 16 A. KPC, the Staff of the KCC and Western entered into settlement
- discussions, attempting to resolve these issues, which culminated in the
- July 9, 1997 Settlement Agreement.
- 19 Q. Could you please summarize the Settlement Agreement?

I can, but I believe the best summary of the Settlement Agreement is found in the transcript of the hearing held on July 18, 1997 before the KCC. a copy of which is attached as Exhibit WGE-6. At this hearing, Mr. Martin Bregman, an attorney for Western, speaking on behalf of all parties, went over the Settlement Agreement, paragraph-by-paragraph, explaining its terms. Attorneys for KPC indicated their approval of all statements made by Mr. Bregman and his responses to questions asked by the KCC Commissioners. The Settlement was approved by the KCC in Docket No. 97-WSRG-312-PGA on July 29, 1997. A copy of the July 29, 1997 KCC Order is attached as Exhibit WGE-7. Among the highlights of the Settlement Agreement are that: (1) Western would pay KPC rates based on a cost of service of \$31 million for a period of 4 years from 1997 through July 31, 2001; (2) KPC would refund August 1. approximately \$7.5 million to Western ordered to be paid in Docket No. 190,362-U; (3) KPC would cease its merchant function immediately; (4) on August 1, 1998, there would be a slight step down in the Zone 3 Reservation rate resulting from including the contract demands for the (a) Paola/Osawatomie, (b) Ottawa and (c) 5,700 MMBtu contracts; (5) beginning August 1, 2001, KPC would decrease its rates to competitive rates, which the parties agreed would be the WGPC firm rates for

deliveries into Kansas City and Wichita; (6) on August 1, 2004, the Settlement Agreement allowed KPC to file for an increase in rates up to a cost of service of \$27.9 million; KPC, however, could not collect any increased rates on an interim basis; (7) KPC agreed that it would not include market entry costs in its rate base; (8) in consideration for the long term reduction in rates, Western made a payment of approximately \$7.5 million to KPC; (9) KPC agreed to cooperate fully to promptly execute any supplementary documents that may be necessary to give effect to the provisions of the Settlement Agreement; (10) the Staff of the KCC agreed not to challenge Western's prudence during the remaining term of Western's contracts with KPC; (11) KPC also agreed to cease resisting FERC jurisdiction.

- 13 Q. Following the approval of the Settlement Agreement at the KCC, please provide a brief description of the events at FERC.
  - A On October 3, 1997, the Commission issued an Order affirming its assertion of jurisdiction and establishing KPC's initial cost of service at \$21.8 million with a rate base of \$39 million. 81 FERC ¶ 61,005. On November 3, 1997, KPC filed a request for rehearing of the October 3, 1997 Order and, on November 10, 1997, KPC filed an Emergency Motion for Extension of Stay, claiming that the initial rates approved by the

FERC could have devastating financial consequences for KPC. The FERC granted the November 10, 1997 Motion on November 25, 1997. On December 2, 1997, KPC filed a Petition for Review of the Commission's October 3, 1997 Order in the United States Court of Appeals for the District of Columbia Circuit. On February 27, 1998, Dennis Langley sent a letter to all of the FERC Commissioners along with a Motion acceding to FERC Jurisdiction and Requesting Interim Relief. KPC requested the FERC, among other things, to allow KPC to continue charging the rates agreed to by Kansas Gas Service and approved by the KCC, and to permit such rates to remain in effect until KPC filed a Section 4 rate case. On April 30, 1998, the FERC granted KPC's February 27, 1998 Motion, and KPC became subject to FERC jurisdiction on May 11, 1998.

- 13 Q. Has KPC honored its contractual obligations under the Settlement
  14 Agreement?
- 15 A. No.

1

2

3

4

5

6

7

8

9

10

11

- 16 Q. Has Kansas Gas Service filed suit against KPC in Johnson County
  17 District Court?
- 18 A. Yes. On May 21, 1999, Kansas Gas Service filed suit. A copy of the
  19 Petition filed in that case, Case No. 99C06574 is attached as Exhibit
  20 WGE-8.

1 Q. Has KPC done anything else since the filing of the lawsuit to indicate that
2 it did not intend to live up to the Settlement Agreement?

3

4

Ŗ

7

8

9

10

11

12

13

14

15

16

17

18

19

Yes. I believe KPC's actions in this rate case are replete with breaches of А the Settlement Agreement KPC's rate case does not even mention the Settlement Agreement or the step-down in the Zone 3 rate which should have occurred on August 1, 1998, or the step-down in rates which should occur on August 1, 2001. The filing proposes that KPC's rates should be increased to a cost of service of \$34.6 million and that such increase shall be assessed only against Kansas customers. KPC's attorneys have indicated that KPC intends to collect the increased charges from Kansas Gas Service. This increase represents a further breach of KPC's agreement not to charge rates to Kansas Gas Service in excess of a cost of service of \$31 million agreed to in the Settlement Agreement. Also, KPC's inclusion of market entry costs (deferred service costs) in its filing and their indication that they intend to bill Kansas Gas Service for the full increase represents another breach because KPC is trying to raise again an issue which was disposed of in the Settlement Agreement. intention to recover the costs of prior rate cases from Kansas Gas Service also constitutes a breach of paragraph 1.3 D of the Settlement Agreement.

Q. Mr. Eliason, I realize that Kansas Gas Service takes the position in the Kansas state court that there should be no continuing business relationship between the parties and that Kansas Gas Service should be excused from performance of the Settlement Agreement and all other service contracts with KPC, but has Kansas Gas Service attempted to estimate what the value of the Settlement Agreement would be if it were given full effect for the remainder of its term?

ã

Α

Yes we have. We have attempted to estimate what the annual cost of service would be on a fixed basis through October 31, 2009 by present valuing the higher rates incorporated in the Settlement Agreement through July 31, 2001, the lower rates beginning August 1, 2001, and KPC's rates following the completion of a rate case that may be filed in 2004. We believe that the present value of the Settlement Agreement for Kansas Gas Service can be expressed in terms of a KPC cost of service between \$20.6 million and \$22.1 million per year through October 31, 2009. This valuation is based on the cost of service methodology which the parties used in the Settlement Agreement. This analysis is based on our assumptions of what Kansas Gas Service would pay KPC from October 1, 2000 through October 31, 2009, if KPC honored the commitments it made in the Settlement Agreement. First, we assumed

that Kansas Gas Service would pay rates based on a cost of service of \$31 million through July 31, 2001. At August 1, 2001. Kansas Gas Service would pay the comparable WGPC rate except that for the 5,700 MMBtu/day contract, Kansas Gas Service would continue to pay the current full KPC tariff rate until October 31, 2002, when the rate under that contract would also reduce to the WGPC rate. For purposes of determining the WGPC comparable rate, we utilized the current WGPC rate. We assumed that KPC would file a rate case on August 1, 2004, which they are permitted to do under the Settlement Agreement, and that any increase proposed in such rates would not be charged to Kansas Gas Service until such increased rates became final, which we assumed would occur by August 1, 2006. We further assumed that the cost of service approved in that rate case could range from \$22 million to \$27.9 million, the maximum amount on which KPC could base its charges to Kansas Gas Service under the Settlement Agreement. This element of the analysis creates the range of the total present value. Finally, we assumed that the rates ultimately determined from the rate case filed on August 1, 2004 would remain in effect from August 1, 2006 through October 31, 2009. In determining the present value, we utilized a discount rate of 10%. In making this analysis, we fully realize that we made assumptions such as

1

8

9

10

11

12

13

14

15

16

17

18

19

- (1) the current WGPC rate would remain at its present level; (2) that it would take two years for a rate case filed on August 1, 2004 to become final, and (3) that the FERC would determine the cost of service to be between \$22 million and \$27.9 million. We feel however, that such assumptions are valid and reasonable.
- Q. Why are you informing the Commission of the Settlement Agreement and
   its present value?
- As the Commission determines the cost of service of KPC, Kansas Gas 8 A. 9 Service believes it is helpful to compare the cost of service being determined now to the rates that KPC voluntarily agreed to charge 10 Kansas Gas Service over time. Also, the rates that KPC agreed to charge 11 Kansas Gas Service in the Settlement Agreement were based on 1213 competitive alternatives. Since KPC's unfulfilled promise to Kansas customers has been that it would provide a competitive alternative, the 14 rates (and associated cost of service) to which KPC agreed in the 15 Settlement Agreement should be compared to the cost of service and rates 16 17 that KPC proposes in this rate case. Moreover, this present value analysis makes it clear that the commitments which KPC made in the Settlement 18 Agreement were based on an average cost of service far below what it 19 proposes in this rate case. 20

- 1 Q. Is Kansas Gas Service requesting the FERC to implement the Settlement
- 2 Agreement in this rate case?
- 3 A. No. The Settlement Agreement is a contract between Kansas Gas Service and KPC, and the parties' contractual disputes are pending before the 4 state court in Kansas. As a result of KPC's repudiation of the Settlement 5 Agreement and fraudulent inducement, Kansas Gas Service has sought a 6 7 declaration from the court that it be released from the underlying 8 transportation agreements. If the court ultimately determines that 9 Kansas Gas Service should not be released from the underlying 10 transportation contracts, we will abide by the agreement and pay the 11 rates set forth in the Settlement Agreement, unless this Commission 12 determines that those rates are too high.
- 13 Q. Mr. Eliason, will you please provide your recommendation regarding
  14 KPC's request to recover deferred service costs?
- 15 A Kansas Gas Service requests that the FERC reject KPC's request for a return of and a return on deferred service costs.
- 17 Q. Could you identify deferred service costs?
- 18 A. KPC identifies deferred service costs as costs never recovered by KPC that

  19 were incurred between late 1989 and December 1991. KPC states that

  20 these costs were incurred as a result of three barriers to KPC's entry into

- the market: (1) limitations on KPC's certificate of public convenience and necessity in Kansas which prevented KPC from delivering gas directly to 2 3 end users by requiring such deliveries to be made through the local distribution company; (2) delays by Western in agreeing to new contracts 4 and new interconnects with KPC; and (3) WGPC improperly attempting to อี 6 bar KPC from entering the market.
- Why do you think that deferred service costs should be rejected? 7 Q.
- 8 There are several reasons why deferred service costs should be rejected. Α.
- 9 First, they are nothing more than out-of-period costs. (KPC is attempting
- 10 to recover money today for expenses incurred approximately ten years
- ago.) Second, as stated above, the Settlement Agreement entered into by 11
- 12 KPC, Western and the Staff of the KCC prevents KPC from recovering
- 13 market entry (deferred service) costs. Third, the KCC and the Kansas
- 14 Court of Appeals have rejected their recovery.
- 15 Q. How have the KCC and the Court of Appeals rejected their recovery?
- Mr. Langley states on page 53, lines 7 and 8, of his testimony that KPC 16
- has never tried to recover deferred service costs. Is it possible that he is in 17
- error? 18

- Exhibit WGE-3 demonstrates that KPC did attempt to 19 А Absolutely.
- recover deferred service costs from the KCC. Mr. Langley attempts to 20

hide this fact by changing the name of these costs from market entry costs to deferred service costs. This sleight-of-hand should be rejected. Furthermore, Mr. Lubow's statement, on page 27 of his direct testimony, that the reason that KPC did not request the recovery of these costs was because KPC thought it would recover the costs in Docket No. 190,362-U, is equally specious. First, they did in fact attempt to recover the costs, as shown in Exhibit WGE-3. Second, Docket No. 190,362-U was filed on March 25, 1994, over two years after KPC allegedly incurred these costs. The exasperation of the Kansas Court of Appeals, expressed in its decision described above, that KPC could not produce evidence to support its claim after 17,364 pages on the record, demonstrates that KPC's claims are groundless. Is there any meaningful difference between market entry costs and deferred service costs? No. Mr. Langley attempts to create a distinction between market entry costs and deferred service costs by claiming that market entry costs were those incurred by the prior owners of KPC from whom KPC purchased the assets that now comprise KPC. KPC claims that deferred service costs are those costs which accrued as a result of delays imposed on the current

Q.

Α.

owners of KPC, i.e., Mr. Langley (prior to the recent acquisition by

Midcoast). Again, Exhibit WGE-3 dispels that notion. A significant portion of the record in Docket No. 190,362-U is devoted to KPC's attempt to recover market entry costs, and KPC attempted to recover market entry costs up through March 17, 1995. Furthermore, I must point out that the testimony filed by Mr. Langley in this case regarding deferred service costs is very similar in scope to the testimony filed by Wendell Putman, on March 25, 1994, in Docket No. 190,362-U at the KCC. Exhibit No. 1 to Mr. Langley's testimony, the April 8, 1986 letter from Jack Roberts to Wendell Putman is also the first exhibit to Mr. Putman's March 25, 1994 testimony. Perhaps most importantly, Mr. Langley realizes that the Settlement Agreement specifically provides that KPC shall not recover any market entry costs. To avoid any claim that KPC is breaching the Settlement Agreement for requesting recovery of market entry costs, he just changes the name.

11 .

Α.

15 Q. Mr. Eliason, did Western delay entering into contracts and interconnects

with KPC?

No. Mr. Tangeman will provide a detailed accounting of efforts to enter into new contracts with KPC. Much of the delay was the fault of KPC and the fact that Western had contractual obligations with WGPC before taking service from KPC. KPC knew of these limitations or should have

made itself knowledgeable of these limitations when it proposed to do business with Western. Further, Mr. Brown's testimony shows that Mr. Langley's undocumented recollections of almost ten years ago should not serve as the basis for including \$10 million of deferred service costs (pre-depreciation; \$5 million after depreciation) in cost of service calculations and rate base. Finally, as to KPC's repeated references to the testimony of Mr. Greg Geisler and Wade Norvell in Docket No. 190,362-U regarding the alleged refusal of Western to do business with Phenix, which represented the great majority of KPC's claim for market entry cost in Docket No. 190,362-U, Kansas Gas Service refers the Commission to paragraph 29 of the December 30, 1996 Order on Remand, where the KCC stated

Additionally, Phenix's failure to generate higher earnings was attributed, in part, to its poor business plan, poor management and inability to attract capital. (R. Vol. 43, p. 11990; R. Vol. 61 p. 16296). Phenix was given the opportunity to earn its established rate of return. Simply because a public service commission has an established rate of return does not-mean that the company is guaranteed its See e.g. FPC v. Natural Gas Pipeline rate of return. Company, 315 U.S. 575, 590 (1942). 'The proper response for a utility faced with net losses is to apply to the Commission for a rate increase'. Sunflower Pipeline Co. v. Kansas Corporation Comm'n, 5 Kan. App. 2d 725, 719 (1981), rev. denied, 229 Kan. 671 (1981). Phenix never sought a rate increase to allow the recovery of additional market entry or start-up costs.

- 1 Q. Should the certificate limitations, as Mr. Langley claims, provide any basis for allowing deferred service costs?
- 3 A No. KPC knew of the limitations when it entered the business. Any
- delays it encountered were the result of its own errors and contractual
- 5 limitations on Western, which should have been known by KPC when it
- 6 entered the business.
- 7 Q. Mr. Eliason, would you please provide your recommendation regarding
- 8 KPC's request to recover an acquisition premium?
- 9 A. The Commission should reject KPC's request for a return of and a return
- on acquisition premium.
- 11 Q. What is the acquisition premium for which KPC seeks recovery?
- 12 A. I will not try to reconstruct the entire corporate history of KPC for the
- 13 Commission from beginning to end and all of its various purchases,
- mergers, joint ventures and partnerships to explain the acquisition
- premium. I believe that the best place in KPC's testimony on this subject
- matter is to review Mr. Lubow's testimony on page 21, lines 6 through 16,
- 17 where he states:
- Briefly, in August of 1988, Bishop obtained a 25 percent
- ownership in KPP. Bishop's interest had originally been
- acquired with an investor group (the Omega Group). When it
- became clear to Mr. Langley that the Omega Group did not
- share his vision nor his determination to penetrate the

Kansas City market, Mr. Langley sought another investment partner, joining forces with OKM. On June 22, 1990, Bishop and OKM acquired the remaining 75 percent of KPP. Later, in 1991, Bishop bought out OKM's interest. When Mr. Langley and OKM joined forces to buy out Omega's interest, they paid a price in excess of the undepreciated cost reflected on the books of KPP. It is that 'premium' or full purchase price, for which KPC seeks recovery in this proceeding.

- 10 Q. Could you provide some more elaboration about that acquisition and other acquisitions by Mr. Langley during this time frame?
  - A. Yes. In June 1990, when Omega's interest in the KPP line was purchased by Mr. Langley and OKM, Mr. Langley was already a partner with Omega in ownership of that line. The transaction essentially involves a combination by Mr. Langley and OKM to buy out a partnership owned by Mr. Langley and Omega at above book value. That initial partnership of Mr. Langley and Omega had previously bought the KPP line at book value. The stated goal of Mr. Langley in buying out Omega at that time was to link up the KPP line with the Phenix line, which transported gas from Western Kansas, and deliver the gas from these two lines to Kansas City. Mr. Langley had previously purchased the Phenix line in October 1989 at book value. In the June 1990 transaction to combine with OKM to buy out Omega's interest in the KPP line, Mr. Langley sold 50% of his interest in the Phenix line to OKM. Finally, in October 1991, Mr. Langley

and Chase Manhattan Credit Corp. bought out OKM's interest in the KPP line and the Phenix line. As of the date of the sale by Mr. Langley to Midcoast, Mr. Langley owned all of the interests in KPC. Through this convoluted series of transactions, Mr. Langley obtained a very valuable benefit, complete control of a pipeline which he ultimately sold for great profit to Midcoast. None of the acquisition premium requested here represents the building of a pipeline, it only represents the buying out of a partner's interest in a line so that Mr. Langley could fulfill his "vision." Ultimately, what the Commission is being asked to approve is not an acquisition premium, but a finder's fee. Mr. Langlev attempts to justify the transactions and his request for the recovery of an acquisition premium by claiming that the KPC line created through these acquisitions was cheaper than building a new line, that KPC provided a valuable benefit to consumers in Kansas by providing less expensive gas to Kansas City, thus putting downward pressure on the prices of WGPC, and that KPC provided a more flexible, higher quality of service for LDCs in the Kansas City area. As I will discuss below, these justifications do not deserve merit.

17

- 1 Q. Mr. Langley has made extensive comments regarding the competitive
- benefits brought about by his efforts to establish KPC as a going concern.
- 3 Do you agree with his assessment?
- 4 A Yes and no. I agree with Mr. Langley that Western was actively
- 5 encouraged by the KCC to develop competitive alternatives to WGPC and
- 6 its predecessors. KPC was one of the options which Western was
- 7 encouraged by the KCC to consider. I will also agree that, for the period
- 8 from 1988 through 1994, KPC's rates were fairly equivalent to the rates
- 9 charged by WGPC. Since 1994, KPC's rates have become significantly
- higher than the rates charged by WGPC. For example, for gas delivered
- into Wichita, the demand rate currently being charged by KPC is
- 12 \$11.456/MMBtu and the comparable demand rate charged by WGPC is
- 13 \$5.895/MMBtu. For deliveries into Kansas City, Kansas and Johnson
- 14 County, the demand rate currently being charged by KPC is
- 15 \$19.965/MMBtu and the comparable demand rate charged by WGPC is
- \$18.857/MMBtu for gas delivered over all three zones on KPC's system.
- 17 Q. Do you agree with Mr. Langley's statement on page 48, lines 12 through
- 18 15 of his prepared direct testimony, which states as follows: "KPC
- provided high quality, hourly, daily, bundled and monthly load following
- services to Western Resources. It also provided Western Resources'

peaking service. To my knowledge, none of these services were available

to Western Resources from WNG [now WGPC]."

15

16

17

Α.

No. In the early years of service from KPC and its predecessors, Western had significant concerns over the quality of KPC's service. problems are addressed in the testimony of Richard Tangeman. experience with these problems contributed in part to the delays in obtaining additional contracts with KPC. During the early years of our relationship with KPC, WGPC also provided a bundled service of gas sales and transport. The fact that WGPC terminated its merchant function while KPC both sold and transported gas as an intrastate pipeline did not make KPC any more valuable, and in fact it was less valuable, to Western than WGPC. WGPC has also provided superior hourly, daily, monthly and peaking services compared to KPC throughout the entire period of Western's contractual relationship with KPC. Finally, WGPC provided storage service, while KPC did not, and does not, provide such service. In sum, from a customer's point of view, Mr. Langley's claims that KPC provided service superior to WGPC are completely unfounded.

18 Q. Please comment on Mr. Langley's reference to testimony by

19 Mr. Tangeman about price benefits associated with KPC's presence.

On page 44, lines 7 through 20 of his testimony, Mr. Langley makes reference to the testimony of Richard Tangeman in KCC Docket No. 97-WSRG-312-PGA, as support for his claim that KPC provided price In this testimony, Mr. Tangeman points out that customers benefits. received savings under the August 8, 1988 contract between KPC and Western. Mr. Langley only obliquely identifies the source and date of I testified above, Docket No. Mr. Tangeman's testimony As 97-WSRG-312-PGA was an investigation begun by the Staff of the KCC claiming that costs incurred by Western from KPC should not be allowed to be passed through because they were too high and, according to Mr. Smith's affidavit, attached as Exhibit WGE-5, Kansas consumers had overpaid by approximately \$25 million from 1994 through 1996 as a result of Western's purchases from KPC. As I said before, Western strenuously objected to the inquiry of Staff, but Western did have to acknowledge that KPC's costs were high. In his testimony filed in Docket No. 97-WSRG-312-PGA, which was actually filed on May 23, 1997, not October 11, 1996, as alleged by Mr. Langley, Mr. Tangeman did make the statement referenced by Mr. Langley. But Mr. Tangeman also stated that, while KPC had provided savings of over \$2.5 million during the November 1988 through September 1993 time frame, during the period of

19

1994 through 1996, KPC's costs were \$5.4 million higher in 1994, \$8.7 1 2 million higher in 1995, and \$10.4 million higher in 1996. Richard 3 Tangeman's testimony, Docket No. 190,362-U at p. 8. (These cost 4 estimates should be compared to Glenn Smith's estimated overages of \$9.1 5 million in 1994, \$14.2 million in 1995 and \$18.4 million in 1996, as 6 provided in his April 14, 1997 testimony, which were much higher than 7 the \$25 million originally claimed in his affidavit filed on March 3, 1997, 8 in Docket No. 190,362-U (see Exhibit WGE-5). Notwithstanding these prices, didn't the KCC allow KPC to recover an 9 Q.

acquisition premium in Docket No. 190,362-U?

Yes it did, but the KCC's March 17, 1995 Order allowing KPC to recover an acquisition premium hardly constitutes a ringing endorsement of KPC

when it stated:

13

14

15 16

17

18

19 20

21

22

23

While the Commission is mindful that a comparison of system demand charges would indicate that Applicants' rates are nearly three times the demand charges of WNG for gas delivered in the Kansas City area and nearly twice as much as WNG for gas delivered in the Wichita area, the Commission believes this may be justifiable with Applicants holding only 10 percent of the market share.

Order, KCC Docket No. 190,362-U, March 17, 1995, pp. 71-72.

I believe that this strained logic reflects how far the KCC was willing to go to stay the course it charted in 1985, when it granted KPC's predecessors

their certificates of public convenience and necessity in order to stimulate 1 competition. In the KCPLP order, the KCC stated: 2 The Commission further finds that the sales and services 3 proposed by [KCPLP] will result in competitive pressures 4 being placed on present suppliers to decrease their prices to 5 reflect current market clearing levels, and that such will 6 7 result in a benefit to Kansas customers. Kansas Pipeline Company, L.P., Docket No. 142,683-U, Order, at 30-31 8 (January 11, 1985). 9 Similarly, in the Phenix case, the Commission stated: 10 11 The Commission also finds, as it did in the Kansas Pipeline case that, in general, the sales and services proposed by 12[KCPLP] will result in competitive pressures being placed on 13 present suppliers to decrease their prices to reflect current 14 market clearing levels, and that such will result in a benefit 15 to Kansas customers without promoting ruinous competition. 16 Phenix Transmission Company, Docket No. 143,3006-U, Order; at 50 17 (May 29, 1985). 18 With KPC's rates for the last five years and KPC's current filing, the 19 KCC's prognostication as to the benefits of KPC have proven to be 20 erroneous. This Commission is not trapped by a body of orders that 21 inevitably led to high rates. The KCC vigorously sought to promote 22 23 competition and gave KPC rate increases, resulting in rates far in excess of the pipeline with which KPC was supposed to compete, just to keep 24

25

KPC alive to compete in the future. The rates proposed by KPC do not

- represent a competitive threat to anyone, because they are double the rates of their competitor.
- 3 Q. What is your recommendation regarding KPC's proposed depreciation rates?
- A. Although I am not an expert on depreciation, I believe that KPC's proposals on depreciation should be rejected, and its current depreciation rates should be retained. KPC's current depreciation rates for accounts 367, 368 and 369 were set at 2.3% in KCC Docket Nos. 188,933-U and 188,933-U. In their application to establish their rates in those dockets, KPC's predecessors stated in both dockets as follows:

12

13 14

15

16

17

18

19 20

21 22

23 24

25

26

27

28

In a recent Order issued by the Commission regarding United Cities Gas Company (Docket No. 181,940-U), in response to an Application filed in 1992, the Commission ordered a forty (40) year average Service Life for Distribution Mains (Account 376). Separately, Williams Natural Company, an interstate Gas natural transmission company regulated by the Federal Energy Regulatory Commission, with facilities in the same geographic area as KNP has, for several years, recorded Transmission Plant depreciation over an average Service Life of forty-three (43) years, with an annual depreciation rate of 2.3%

WHEREFORE, KNP respectfully requests that the Commission issue an Order authorizing, directing, and ordering KNP, commencing January 1, 1992, to record deprecation for Transmission Plant Account No. 367, 368, and 369, for both Equipment in Existence Prior to Purchase by KNP, and for New Purchases of Equipment, over a Service

2 annually.

3 The KCC approved KPC's predecessors' application in Docket Nos.

4 188,933-U and 188,934-U on October 19, 1993. WGPC, KPC's competitor

5 with facilities in the same geographic area as KPC, currently continues to

6 have a depreciation rate of 2.3% for transmission plant (see WGPC FERC

Life of forty-three (43) years, and a Depreciation Rate of 2.3%

Form No. 2, at p. 338, December 1998).

1

- 8 Q. Besides the specific recommendation outlined above, do you have any general comments regarding KPC's filing for depreciation?
- 10 A. KPC's filing represents a continuation of KPC's disregard for the concerns
  11 of the customer. Essentially, KPC witness Edward Feinstein is telling us
  12 that there will not be any gas available. KPC, however, told everyone that
  13 they would be a competitive alternative to WGPC. How can they be a
  14 competitive alternative to WGPC if they are not going to have access to a
  15 long term supply of gas, as Mr. Feinstein suggests¹? Furthermore, as

Dan Tutcher, President of Midcoast, appears to contradict Mr. Feinstein's concerns over supply with the following statement at a November 9, 1999 conference call with financial analysts, announcing Midcoast's acquisition of KPC, when he stated: "The pipeline on the supply side connects up with TransOk and Panhandle Eastern and ANR in central Kansas and Northern Oklahoma and the Panhandles of Texas and Oklahoma. So the supply side of the pipeline is extremely diverse as well."

demonstrated in the testimony of Richard Tangeman in this case, it appears that KPC has failed to realize that it still needs its Ottawa compressor station to satisfy the needs of its customers. The early retirement and accompanying increase in costs through salvage value and increased depreciation rates would prevent KPC from meeting its requirements under its contracts with Kansas Gas Service. With Mr. Feinstein's recommendations, it appears that the goal of KPC is to get as much money out of Kansas Gas Service as soon possible before the contracts with Kansas Gas Service expire.

10 Q. Please comment on KPC's level of outside services.

Α.

They are too high, involve too many attorneys and reflect an out-of-test period adjustment. In his direct testimony on page 25, lines 4 through 10, regarding Adjustment 13, KPC witness Robert Welchlin adjusts KPC's outside services from \$1,081,041 to \$2,500,000. Mr. Welchlin states that outside services are abnormally low during the test period and that they should be adjusted upwards to \$2.5 million. Mr. Welchlin states that \$2.5 million is more reflective of KPC's outside services during the 1996 through 1998 time period and KPC's budget for 1999. Kansas Gas Service cannot agree with the utilization of either substitute measurement period. As to the 1996 through 1998 time period, many of those expenses involve

legal bills or consulting fees primarily focused on matters before the KCC, to which KPC is no longer subject or KPC's lawsuit with Panhandle Eastern Pipeline Company, a matter which KPC claims is non-jurisdictional. See KPC Workpapers, Adjustment 13. For 1996 through 1998, KPC's legal bills for their KCC counsel were as follows:

}	I	1996	1997	1998
	, 1			
	Smithyman & Zakoura	\$232, 763	\$234,475	\$2,450
i	Logan & Logan	\$103,480	\$147,488	\$6,251

As can be seen from the above, KPC's expenses at the KCC declined dramatically. Furthermore, KPC's former outside general counsel, Tino M. Monaldo, Chartered, will no longer serve as general counsel for KPC after the acquisition by Midcoast. His annual expenses were as follows:

13	V	l 1	1996	1997	1998
14	Tino Monaldo	1	\$146,4770	\$185,033	\$307.615

KPC utilized the law firm of Bryan Cave in 1998 in KPC's lawsuit against Panhandle Eastern, which KPC claims is a non-jurisdictional matter, and their expenses were \$314,000. Also, KPC utilized the services of National Economic Research Associates (NERA) in its litigation with Panhandle, and their expenses were as follows:

NERA \$50,027 \$209,453 \$457,212

1

8

9

10

11-

12

13

14

15

16

17

18

19

20

The total of these five groups of lawyers and consultants, which provided services in areas no longer relevant to KPC's FERC-jurisdictional activities, is approximately \$800,000 per year. The workpapers for Adjustment 13 show an annual average for outside services before adjustments of \$2,000,000. The net average for KPC is then \$1,200,000 for the time period, which is very close to the \$1,081,041 incurred during the same time period. As to the budget for 1999 contained in the workpapers for KPC, KPC shows expenses of \$750,000 for Bryan Cave, \$135,000 for Fred Logan and \$300,000 for Tino Monaldo. The expenses for Bryan Cave and Fred Logan are related to Kansas Gas Service's lawsuit against KPC. Kansas Gas Service finds it highly objectionable for KPC to charge Kansas Gas Service for defending against Kansas Gas Service's lawsuit against KPC, which was created by KPC's repudiation and breach of the Settlement Agreement. In addition, Mr. Monaldo, whose well-paid services as general counsel of KPC were budgeted for \$300,000 for 1999, will no longer be utilized by KPC after the acquisition by Midcoast. By deleting these expenses from KPC's 1999 budget, KPC's budget is reduced to \$1,460,000, which is close to the \$1,081,041.

Docket No. RP99-485-000 Exhibit No. KGS-1 (WGE-1)

- 1 Q. Does this conclude your testimony?
- 2 A. Yes.

### VERIFICATION

STATE OF KANSAS	)	
	)	SS.
COUNTY OF JOHNSON	)	

Before me, the undersigned Notary Public in and for the said county in said state, personally appeared William G. Eliason, who being by me first duly sworn deposes and says that he is the individual identified and responding to questions in the attached direct testimony and that the same is true and correct to the best of his/her knowledge, information and belief.

William G. Eliason

Sworn to and subscribed before me on this 17th day of april , 2000.

WGE-8. MR. BERMAN: I'm sorry, your Honor.

MR. MARTIN: Maybe the court reporter has an extra copy you can use.

Page 2065

MR. BERMAN: If I could borrow that. I have an incomplete version with me.

Thank you.

BY MR. BERMAN:

9 Q Just so we can get some clarity in the record, 10 the settlement agreement that we've been referring to is 11 marked as WGE-2, as an attachment to your Exhibit KGS-1; is 12 that correct?

A That's correct.

14 We previously heard Mr. Bell describe the parties 15 to this agreement. Do you have the same understanding 16 about the parties; that is, that the Bishop entities and 17 also the entity KPP that are referred to throughout the 18 settlement, that Kansas Pipeline Company is successor and 19 interest to those entities?

A That is my understanding, sir.

21 Q And that Western, which is referred to throughout 22 the settlement, that Kansas Gas Service is the successor 23 and interest to Western?

A Yes.

Q Do you know who drafted this document?

terms of the settlement agreement.

think they should do?

account in rendering their decisions?

A I'm not sure I know the answer to that.

PRESIDING JUDGE: There's no one answer. It's

THE WITNESS: Should they be considered in making

your opinion. Is this something that you think the FERC

should do or I should do, or is it something you don't

a decision in this docket as to what the rates are? I

would generally say -- there are many aspects to that

question, but I would say, generally not. You're trying to

set just and reasonable max rates in this proceeding here.

which are different than what was bargained for under the

BY MR. BERMAN: Q Do I understand from what you're saying, or is it correct from what you're saying, that notwithstanding whatever rates are provided for in the KCC settlement, that in your view, the FERC and the Judge can determine the just and reasonable rate based on application of standard ratemaking principles without regard to whatever is specified in the KCC settlement? A Generally speaking, that's correct. There are

probably some terms within the settlement that may be considered as you go down the road, but certainly, we're

Page 2064

trying to establish something completely different than what was established in the form of the settlement.

O Are there any terms in the settlement that have to be considered today by the Judge or the FERC in determining the just and reasonable rate to be charged by Kansas Pipeline Company?

A At this moment in time, I can't think of any.

Q I'd like you to look at the settlement. That's been previously admitted into evidence as Exhibit KCC-13. And I can hand you a copy of KCC-13 if you don't have that.

A It's attached as an exhibit.

PRESIDING JUDGE: It's attached to Mr. Eliason's testimony.

MR. BERMAN: Your Honor, just to be clear, attached to Mr. Eliason's testimony is an order by the Kansas Corporation Commission addressing the settlement. The settlement document itself is not -

MR. MARTIN: No, it is - that and several other items related to the KCC settlement, including a transcript of the hearing before the Kansas Corporation Commission.

22 PRESIDING JUDGE: There's a little bit more to 23 it. If I have the same documents you do, I have one 24 entitled "settlement agreement." It's in KGS-1.

MR. MARTIN: Exhibit WGE-2, and continued through

Page 2066

A As I recall, it was compiled from all three parties. I speak loosely when I say Kansas Pipeline was one party, because in the signatory pages, you'll see that

4 there are many, but all three parties were very much a part 5 of drafting this contract.

Q Why don't we turn to section 1.2 of this document, page 3 of this document. Section 1.2 states that

7 "for seven years from the date the KCC approves this 8

9 agreement in KCC docket number 97-WSRG-312-PGA, KPP shall

10 not file a rate case seeking a new cost of service with FERC." 11

12 Is it your contention that Kansas Pipeline 13

Company has violated this provision that I just read?

14 A No, sir. In the course of our negotiations of 15 this agreement, it was contemplated that a rate case such

16 as this would be possible, if not likely. I believe the 17 transcript of the KCC hearing, where we discuss and

18 ultimately approve the settlement we're talking about here

19 that you read from discusses that specifically, that there

may be a rate case exactly like this resulting from Kansas 20

Pipeline acceding to FERC jurisdiction. And attorneys for

both Kansas Pipeline and Western Resources address that 22 23

O If I understand you correctly, even though it 24

says there "KPP shall not file a rate case," it was your 25

10

25

Page 2067

understanding that KPP could, in fact, file a rate case under certain circumstances?

A It was always the understanding of the three parties negotiating the contract that that terminology related to a unilateral filing by Kansas Pipeline, and that's not what we have here.

3

4

7

17

18

19

21

22

Q What we have here does not reflect the understanding you've just described. You have to understand more deeply what the parties have discussed in order to understand this contract. Is that what you're saying, this document?

A I don't know if I agree with that. I think the document speaks for itself, and it's always been my understanding, and was at the time and is now, that the document and/or negotiations in the course of drafting that document meant a unilateral filing by Kansas Pipeline.

Q Why don't we turn to section 1.5 of this document, at page 7. It says "Western and KPP have entered into a multiple delivery point agreement, a copy of which is attached as appendix B, which resolves the FERC tariff issues."

Would you describe for me the current status of that multiple delivery point agreement?

A It's the best of my knowledge that the agreement itself, if I'm not mistaken, may have been excluded, or

Page 2069

Page 2070

was ultimately used to alter or amend the general terms and conditions of Kansas Pipeline's agreements, such that they 3 now pretty much conform. It isn't like it was purely 4 rejected. A majority of the terms of that agreement are 5 part of the general terms and conditions of the Kansas 6 Pipeline agreement. 7

From our perspective at Kansas Pipeline, the agreement itself may not have survived, if that's the right term, but the terms have. With regard to your question of are there others; nothing comes to mind right now, sir. There may be. I can't think of anything else that would fall into that category.

Q You said that the majority of the terms of the agreement are now effective through the FERC filed tariff; is that correct?

A I don't know if -- much of them are. Many of them are, yes.

18 MR. MARTIN: Your Honor, I think we've been 19 patient so far, but we are going well beyond the scope of 20 his testimony on this.

PRESIDING JUDGE: I've permitted some of this because I did with the previous witness. Again, this is a very sort of difficult kind of cross-examination, because he attached this document, and they're asking for his

general understanding of it. And that's all he can testify

Page 2068

rejected, so to speak, by the FERC in this proceeding. PRESIDING JUDGE: I've read your background again, Mr. Eliason. As I understand it, you are not a

lawver: am I correct?

THE WITNESS: That's correct. I appreciate you bringing that to my attention. Sometimes I get carried away.

(Laughter.)

PRESIDING JUDGE: Actually, you answer as well as any lawyer might have answered on the stand, and I don't mean to suggest that there was anything in your answer. I just wanted to make that point on the record clear, while you're being asked for an interpretation of this agreement, you are not yourself a lawyer, but actually, probably have lawyers on your staff who do this kind of interpretation for you.

THE WITNESS: Thank you.

#### BY MR. BERMAN:

Q I think what you just said, Mr. Eliason, the multiple delivery point agreement was rejected, so to speak. Are there any other portions of this document that, to your knowledge, were rejected, so to speak?

A That "rejected, so to speak," it sounds a little 23 24 harsh when you say it that way. First of all, in clarity, most of what was in the multiple delivery point agreement to, is his general understanding. And if that's not what the official position of the KGS is, you'll have to bring that out on redirect.

#### BY MR. BERMAN:

Q If I could turn your attention to appendix -- is it appendix B of this settlement? It's a multiple delivery point agreement that's attached -- just for the record -right after the agreement and all the signature pages. There's an appendix A, and then there's a -- the next page after that starts "multiple delivery point agreement"; is that correct?

A I believe that's correct. Let me make sure I'm in the right spot here. I have what looks to be a multi-delivery point agreement here in front of me.

Q If I could turn you to paragraph 10 on page 4 of that agreement. If you could read that briefly and tell me if, in fact, it was your intention that this agreement would govern over Kansas Pipeline's FERC gas tariff no matter what FERC gas tariff may say? Is that your contention?

PRESIDING JUDGE: Why don't you take some time and read this, Mr. Eliason, if it's been some time since you've read it before. Would you like to?

THE WITNESS: Yes, I'd like a few minutes. PRESIDING JUDGE: Why don't we go off the record

Schedule 5-5

Page 2071 Page 2073 and allow you to read paragraph 10. Ill suggest that there may not be any language that 2 (Discussion off the record.) specifically addresses the positions that could be taken by 3 THE WITNESS: Would you please repeat your the two parties. By that, I mean no specific reference to 4 question? this type of a rate case. There is, however, very specific reference as to what the two parties will support at the 5 BY MR. BERMAN: 5 6 Q If you could tell me if it was, in fact, your 6 FERC. I believe it's Kansas Gas Service's position that we 7 intention that this agreement would govern over Kansas must and will and have supported a cost of service for 8 Pipeline's FERC gas tariff, no matter what the FERC gas 8 Kansas Pipeline of 31 million in this particular 9 tariff may say. 9 proceeding. 10 A I'll preface this answer by saying I'm not an 10 Q Is it your position that it's impermissible for 11 attorney, but I will say that the last sentence of that 11 Kansas Pipeline Company to seek a cost of service in this 12 paragraph in question indicates that this agreement, in the 12 proceeding based on a revenue requirement greater than 31 13 event of a conflict, would be -- the provisions of this 13 million? 14 agreement would prevail. 14 A It's my opinion, sir, that Kansas Pipeline can O Just to clear something up, I want to be sure. 15 15 file for a cost of service greater than 31 million. You signed this agreement; right? However, pursuant to the terms of this settlement, they are 16 16 A That's correct. not able to charge that cost of service to Kansas Gas 17 17 18 O If we could go back to paragraph 1.7 of the main 18 Service in Kansas. 19 body of the settlement and agreement. 19 Q To your knowledge, does the FERC-approved tariff 20 A 1.7? 20 for Kansas Pipeline Company permit Kansas Pipeline Company 21 21 Q Yes, on page 8. It says there, in the second to charge Kansas Gas Service anything other than the just sentence, 'no party is restricted from taking any position 22 and reasonable rate level determined by the FERC in this 22 in the FERC proceeding, no matter what level cost of 23 case? 23 service is requested." 24 A Again, I'm not an attorney or an authority on 24

able to take any position in the FERC proceeding
    whatsoever, no matter what level cost of service is
2
3
    requested?
        A Sir, I think that paragraph needs to be read in
4
5
     context with the rest of the document here.
           If you would give me just a second, please.
6
7
          PRESIDING JUDGE: We'll go off the record for a
8
     few minutes.
9
          (Discussion off the record.)
10
           PRESIDING JUDGE: Back on the record.
          THE WITNESS: This agreement contemplates the
11
     Kansas Pipeline filing, unilaterally filing a rate case
12
     sometime after year 7. And I believe this sentence would
13
    indicate that no party is restricted from taking a position
14
15
    in that rate case.
```

Was it your intention that any parties would be

BY MR. BERMAN:

Q It's your position that sentence relates to only after year 7?

A That's correct.

O Could you explain, to your knowledge, whether there's any paragraph here that explains what positions may be taken by the parties in rate cases that may be ordered by the FERC immediately in the first few years of the

24 agreement? A I don't believe, without searching the document, 25

would allow for that. And certainly, when I was party to the negotiations of this contract, Kansas Pipeline made it 3 very clear that they could and would be able to live to the 4 terms of this contract, either through more than -- there 5 were means by which the Pipeline would be able to 6 accommodate the terms of this contract when it entered into 7 FERC jurisdiction.

this matter. It's generally my opinion that those tariffs

O Does that mean, Mr. Eliason, when you say that the "tariffs would allow for that," that Kansas Pipeline Company would provide a discount for Kansas Gas Service below the just and reasonable level determined by the FERC in this proceeding?

A I can't speak to the proper term of discount. I'm not that authoritative on FERC issues. It's my understanding there are means. And I believe a "discount" is actually a proper term in this instance; whereas, we use "discount" when we go to the five-and-dime store.

I guess my answer to that is, it was the 19 understanding of the parties, as it was described to us by 20 Kansas Pipeline at the time, that they would have a means to charge us the rates delineated in the settlement 22 agreement. And I don't know if that means that the term -the proper term "discount" or some other way of doing it, I 24 don't know.

Q Is that explained somewhere in the settlement

21

A The closest reference we have to that, I believe, is the -- and its very vague -- but the paragraph at 5.8, where the parties agree to cooperate fully to execute and supplement documents that may be necessary to give effect to the provisions of this agreement. And there was no specific reference as to what those documents would be, what filings would be necessary at FERC.

And once again, I suspect because that's maybe --I'm going to speculate -- it's something of a liquid thing, and we were assigning this in 1997. Clearly, the hearing for jurisdiction wouldn't happen the next day. There may be some differences as to how to do it.

To pre-describe in detail what those documents and filings might be may have been onerous at the time, but that is the reference where the parties agree that all parties will cooperate in full to implement the rates prescribed within the terms of the settlement.

Q I'd like to turn your attention to paragraph 1.6 of the agreement; that's at the bottom of page 7. And turning to the top of page 8, there's a reference here to 25 determining comparable rates. It refers to using the

Q If Williams were to frame different rate schedules framed in a different manner, how would it be that someone would figure out the comparable Williams rate to be applied to Kansas Pipeline Company?

A It turns out this is a means of price in transportation on this pipeline that had been preestablished in earlier contracts; so we have a precedent for it. What would happen is, you would identify what these services would cost from Williams to get gas at the points of receipt here under this contract, or these contracts, and use that as the comparable rate.

If they chose to change their tariff from FTS-P to QTS-P, for example, if the QTS-P, whatever that means. is the rate that would otherwise be used, the comparable rate for getting gas to these receipt points, then that would be the tariff that would be used.

Q Would the same Williams rate be applicable to all contracts between KGS and Kansas Pipeline Company?

Q So there are different Williams rates that apply to different contracts?

A Yes.

23 MR. MARTIN: Your Honor, I'm going to have to 24 object. I think --

PRESIDING JUDGE: There's no question now,

Page 2076

cost-based recourse firm transportation service rate in effect at the time KPP makes such charges to Western.

Can you say right now what the comparable rate will be when the comparable rates go into effect, what the actual rate level will be?

A I don't believe I can, sir, no.

And why is that?

They will be based on the rates of -- as this says, the rates of Williams Pipeline, Williams Natural Gas at this time, and those rates may change between now and the time in August of next year.

Q It says there, "which is currently provided under rate schedules FTS-P and FTS-M," and I guess "currently" refers to the time of execution of this document,

Does Williams still have a rate schedule FTS-P and FTS-M?

A Yes, I believe they do.

O To your knowledge, will Williams continue to have a rate schedule FTS-P and FTS-M into the future?

A To the best of my knowledge, they will.

But when you reference "which is currently provided under those rate schedules," were you trying to take into account the notion that they might form different 24 rate schedules that were framed in a different manner?

A Yes, I believe that was the intent.

Page 2078

Page 2077

Mr. Martin. It's been asked and answered.

MR. MARTIN: I think this whole line of questioning is not designed to bring out anything --

PRESIDING JUDGE: I can't go behind what counsel is going to do. So far as I've heard, I don't hear any objectionable questions that anyone has raised any objection about. I think we have a limited interest in this particular area.

MR. BERMAN: Your Honor, I won't be too much longer.

> PRESIDING JUDGE: Whatever that means. BY MR. BERMAN:

Q If FERC determines that the just and reasonable cost of service for Kansas Pipeline Company is a lower level than the \$31 million, is it your contention that Kansas Gas Service gets charged something less than the \$31

17 million? 18

A I believe that -- and I don't know if this is possible within the rules established here at FERC, but if the rules would provide for the rate to be established at

21 below 31 million prior to August of next year, that Kansas

22 Gas Service, if the filings or whatever is necessary that

23 would allow for Kansas Pipeline to charge us a rate greater

than the max rates, if they were in place and the FERC 25

recognized them, I would say yes, the 31 million would

Schedule 5-7

9

13

14

Page 2079

prevail, if the FERC allows for that. I don't know if that's possible.

21

25

Q Let me be sure I understood that. You're saying that even if FERC determines a number lower than 31 million, you think that Kansas Gas Service should pay the 31 million? Is that what I heard you say?

A I'm not sure that is possible, sir. I'm just saying that we bargained for 31 million, and we bargained for the rates prescribed in years - the rates in there. To the extent, between now and August, we think that -well, once again, I don't know if the FERC would allow for that, sir. I guess I don't know if that's viable.

O Is it your position that FERC should determine a rate lower than \$31 million for Kansas Pipeline Company in this proceeding?

A No, sir. It's our filed position and mine that we support 31 million, sir.

MR. BERMAN: Your Honor, I'm going to have marked for identification Exhibit KPC-76.

(Exhibit KPC-76 identified.)

MR. BERMAN: Your Honor, for the record, this document is the answer of Kansas Gas Service Company to a motion of Kansas Gas Pipeline Company in docket number

24 CP96-152-000, et al., at FERC, and it's a file stamped

25 "copy" that was filed with the Office of the Secretary at

a protest of Kansas Gas Service company submitted in docket number CP96-152-012. And again, it's a file stamped "copy" 3

from the FERC Comraission's records, file stamped August 25, 4 1998.

Page 2081

Page 2082

5 For the record, as was true for the previous 6 document, the signatory list includes Herb Martin and John 7 DeCoursey.

I would move the admission of this document on the same basis as the prior document.

10 PRESIDING JUDGE: If I read this through, there would be statements in here that would be somewhat 11 12 different from what the witness testified to?

MR. BERMAN: Yes, your Honor.

PRESIDING JUDGE: Any objection?

15 MR. MARTIN: Yes, your Honor. KPC-77 is woefully 16 incomplete. It is not the entire filing that was attached to the protest. 17

18 PRESIDING JUDGE: That's a legitimate objection. 19 I'm going to hold this in abeyance until you get that 20 settled, if you can. If not, it will have to be rejected.

21 MR. BERMAN: Your Honor, I see that there was an 22 appendix that's not attached here. We'll get a copy of the 23 appendix.

24 PRESIDING JUDGE: If you're going to do this, you have to do the whole document and not just portions

Page 2080

FERC on March 16, 1998.

I would ask that we go through the same procedures we went through.

PRESIDING JUDGE: Tell me how this ties into the witness's testimony.

MR. BERMAN: This document discusses legal issues related to the impact of the KCC settlement, and what it means and what it does not mean, and its bearing on the assertions that are made by the witness concerning the KCC settlement. It's really the same -

PRESIDING JUDGE: There would be differences from what he testified to, are you saying?

MR. BERMAN: Your Honor, I think that the positions that have been taken have not been entirely consistent through time, and we'd like to argue them on brief. I'd rather not burden the record with going through in detail the discussions that are actually in here.

PRESIDING JUDGE: Any objection to 76?

MR. MARTIN: No, your Honor.

PRESIDING JUDGE: 76 is admitted.

(Exhibit KPC-76 received.)

22 MR. BERMAN: Your Honor, I'd like to also have marked for identification and hand out KPC-77.

23 24

(Exhibit KPC-77 identified.)

MR. BERMAN: Your Honor, for the record, this is

thereof.

MR. BERMAN: We'll get copies of that and provide it to you. I will note these are all in the Commission's records.

PRESIDING JUDGE: I understand that, but if we're going to have portions of it, we better put the whole thing in and -- especially if the other side has suggested that it is material that should be in.

MR. BERMAN: We will get that material.

10 PRESIDING JUDGE: In the meantime, that's held in 11 abeyance. Anything else?

MR. BERMAN: With that, your Honor, I'm through. PRESIDING JUDGE: Do you have any redirect,

14 Mr. Martin? 15

MR. MARTIN: I do, your Honor. Is this a good time to take a few minutes?

17 PRESIDING JUDGE: Yes, if you would like to have that time, I think it would be an excellent idea. 18

19 Is 15 minutes sufficient for you, Mr. Martin?

20 MR. MARTIN: Certainly.

21 (Recess.)

22 PRESIDING JUDGE: Mr. Martin, do you have any 23 redirect for this witness?

24 MR. MARTIN: I do have a few, your Honor. Thank 25 you.

PRESIDING JUDGE: Surely. REDIRECT EXAMINATION BY MR. MARTIN:

Q Mr. Eliason, counsel for Kansas Pipeline asked you earlier whether Kansas Pipeline has the authority to charge Kansas Gas Service any rate other than the maximum just and reasonable rate, or maximum rate now in effect. Are you familiar with the nonconforming service agreements that have been accepted by the Commission, the agreements between Kansas Pipeline and Kansas Gas Service?

A Yes, I am.

14

15

16

18

19

21

Q Do those nonconforming service agreements include provisions which allow Kansas Pipeline to charge a rate lower than the maximum just and reasonable rate, or the max rate sent by the Commission?

A Yes, they do.

Q Counsel also asked you what, in your view, would be the rates that should be charged to Kansas Gas Service in the event that this Commission were to establish rates based on a cost of service of less than 31 million a year in this proceeding.

Could you tell us what -- in your view, what rates should be charged to the Kansas Gas Service in that event?

A Well, as I said earlier, the just and reasonable

Page 2085

1 PRESIDING JUDGE: It was obvious - when you said 2 "max," you meant maximum? 3

THE WITNESS: Yes. 4

PRESIDING JUDGE: No, I just wanted to make sure that everybody was clear on that. It's hard to pick up for the court reporter.

THE WITNESS: I'm sorry.

8 PRESIDING JUDGE: It's perfectly understandable. 9 BY MR. MARTIN:

Q Just to continue that point, counsel also asked you, or at some point earlier in your testimony, you testified that Kansas Gas Service, in this proceeding, is supporting the cost of service based on the 31 million, or rates based on the cost of service of 31 million.

Is that, in fact, your testimony, or Kansas Gas Service's position in this proceeding?

17 A It is. And it's pretty clear in my direct that 18 between now and next August, were supporting rates for Kansas Gas Service that are equivalent to a 31 million cost 19 of service. That's the extent of what we're supporting. 20 21 After that point in time, we drop down to competitive rates

22 for three years.

23 MR. MARTIN: I have no further questions, your 24 Honor.

PRESIDING JUDGE: Any recross, Mr. Berman?

Page 2084

rates are max rates. To the extent that is the rate at the present time, those are max rates, then we would pay the 3 lesser of the -- the rates, as prescribed in the settlement or the max rates.

I alluded to the fact earlier that I'm not real clear about where we are on various filings, but the bottom line is, we would pay the minimum or the lesser of those two rates, whether it be the settlement rate or the just and reasonable rate established here.

O When you testified now to some other possible filing, in other words, could you tell us what you had in mind there?

A Well, I've probably been around too many lawyers here lately.

PRESIDING JUDGE: It's infectious.

year old or a year in length, I should say.

THE WITNESS: There may be some provisions. I'm not prepared to address them in any great detail, but it's my understanding there may be some provisions, some negotiated rate provisions that have, in the past, allowed parties to pay more just and reasonable rates. But that could only apply between now and August of next year, because after August of next year, the settlement prescribes it will be at comparable rates. The 24 opportunities for that to come into effect is less than a

Page 2086

1 MR. BERMAN: No, your Honor. 2 PRESIDING JUDGE: Then I think this witness can 3 be excused.

MR. MARTIN: Except are you going to say, your Honor --

PRESIDING JUDGE: We still have the matter of the one pending exhibit, but that doesn't need the presence of the witness.

MR. MARTIN: Thank you, your Honor.

Thank you, Mr. Eliason.

PRESIDING JUDGE: Thank you, Mr. Eliason. I appreciate your time and your effort in coming here and your testimony. Thank you very much.

MR. MARTIN: Your Honor, I wonder if at this time, it might be appropriate to stipulate in the testimony of another witness for Kansas Gas Service.

PRESIDING JUDGE: It's a good day to stipulate. MR. MARTIN: As I understand it, the Pipeline has waived cross-examination of Kansas Gas Service witness Richard H. Tangeman. We have previously marked and filed and provided to your Honor and to the reporter copies of Exhibit KGS-2, which is the testimony -- prepared direct testimony of Richard H. Tangeman. And attached to that are two exhibits designated as RHT-2 and RHT-3. Your Honor, I would move the admission of this.

Schedule 5-9

Page 2087 Page 2089 1 PRESIDING JUDGE: I assume it's been agreed, you worked with and negotiated with back several years ago. In 2 have no objection to the admission of this evidence? 2 fact, he made those corrections. And I'm not intending to 3 MR. BERMAN: Your Honor, we waive cross and have 3 alter in any way the corrections that Mr. Langley made on 4 no objection to the admission of Mr. Tangeman's testimony 4 the stand to his testimony. 5 and supporting exhibits. 5 PRESIDING JUDGE: KGS-3 is rejected because the 6 PRESIDING JUDGE: KGS-2, with the supporting 6 witness is not available for cross-examination. 7 exhibits that are marked RHT-2 and RHT-3, are admitted. 7 (Exhibit KGS-3 rejected.) 8 (Exhibit KGS-2 received.) 8 PRESIDING JUDGE: Is there any other --9 MR. MARTIN: We had one other witness who had 9 MR. MARTIN: Nothing further, your Honor. 10 prepared direct testimony. 10 PRESIDING JUDGE: We have then concluded your 11 PRESIDING JUDGE: Is that William Brown? 11 case; am I correct? Kansas Gas is resting? 12 MR. MARTIN: William Brown, who we mentioned 12 MR. MARTIN: Yes. 13 previously, your Honor. Mr. Brown passed away, and 13 PRESIDING JUDGE: Not literally. obviously, is not available for cross-examination. 14 14 MR. MARTIN: None of us will rest. 15 PRESIDING JUDGE: Clearly not. 15 PRESIDING JUDGE: Not until we end this. 16 MR. MARTIN: I would offer it. 16 Let's go off the record. PRESIDING JUDGE: Have you had a chance to review 17 17 (Discussion off the record.) 18 Mr. Brown's testimony? 18 PRESIDING JUDGE: It being very close to 4:30, we 19 MR. BERMAN: Yes, your Honor, and we object to 19 are going to recess for the evening and commence the 20 its admission into evidence. Mr. Brown addresses and 20 hearing again in the morning at 10:00 a.m. 21 discusses his personal knowledge, apparently - or I think 21 Thank you very much, and I'll see you tomorrow 22 contends it's his personal knowledge - concerning the 22 morning. 23 events that were involved in the contracting with Kansas 23 (Whereupon, at 4:20 p.m., the hearing was 24 Pipeline Company or its predecessors in the late 1980s and adjourned, to reconvene at 10:00 a.m., on Thursday, October 24 25 early 1990s. 25 19, 2000.) Page 2088 And there are items in his testimony that we (FERC - KANSAS PIPELINE COMPANY; DOCKET NUMBER 1

Page 2090

2 wanted to cross-examine him on, and given that he's not RP99-485-000; WASHINGTON, D.C.; VOLUME 18; WEDNESDAY, available for cross-examination, we believe it's improper 3 OCTOBER 18, 2000.) 3 4 and inappropriate to allow his testimony into evidence. 4 5 There's no exception to the hearsay rule that 5 CONTENTS would allow admission into the evidence of testimony when 6 6 WITNESS DIRECT CROSS REDIRECT RECROSS 7 there was no opportunity for appropriate cross-examination 7 of the witness. And the fact that the witness is deceased CARMEN MORRISSEY 8 8 9 does not make it fall within my exception of the Rules of 9 by Mr. D'Alessandro 1973 2007,2011 10 Evidence that allows its admission. 10 by Mr. Berman 2014 11 PRESIDING JUDGE: Do you have any agreement on 11 JOHN S. BELL 12 by Ms. Myers-Kerbal 2027 2054 12 that? MR. MARTIN: I would your Honor. Some of the 13 by Mr. Berman 2031 13 points that were made in Mr. Brown's testimony were 14 WILLIAM G. ELIASON 14 by Mr. Martin 2057 15 2083 accepted in Mr. Langley's rebuttal testimony, and caused 15 him to make some corrections, which I think are tantamount 16 by Mr. Berman 2060 16 17 17 to --RECESSES: A.M. - 2001 18 18 PRESIDING JUDGE: It's one more little quirk in NOON - 2010 the evidence that we have to deal with. To the extent that 19 19 20 P.M. - 2051, 2082 20 Mr. Langley disputed that, do you want to leave that in, or 21 -commued-21 do you want to withdraw that? 22 MR. BERMAN: Your Honor, what counsel is 22 23 23 referring to is, you may recall -- it was several weeks ago -- but Mr. Langley made several corrections to his 24 24 25 prefiled testimony, describing who he had contacted and 25
