12.1.12 Revenue Plan Arrangements (Continued)

- C. The Service Commitment Period applicable to each Qualifying Metro Frame Relay Service shall be the longer of a period equal to: (i) the period commencing with the Start of Service Date therefor and continuing until the expiration of the Term applicable to the Revenue Plan in question; or (ii) six (6) months. Upon the expiration of the Term of a Revenue Plan, all monthly recurring charges relevant to Qualifying Metro Frame Relay Service (other than Qualifying Metro Frame Relay Service that has not completed its Service Commitment Period) will revert to Company's then current Base Rates and month-to-month Service Commitment Period discount, if any, applicable to Qualifying Metro Frame Relay Service then provided. The Minimum Monthly Commitment under a Revenue Plan will not include pro-rated charges for Metro Frame Relay Service, Local Access charges, Ancillary Service charges, Taxes or any other recurring and non-recurring charges for collocation of Customer equipment in Company POPs or other services provided to Customer by Company.
 - (2) The length of the Customer Commitment Period and the Minimum Monthly Commitment for both domestic WorldCom Frame Relay Service and Metro Frame Relay Service will determine the applicable discount of the Base Rates for Qualifying Metro Frame Relay Service, i.e., for purposes of determining the applicable discount of the Revenue Plan, the Customer Commitment Period equates to the Service Commitment Period in the discount schedules and the Minimum Monthly Commitment equates to the applicable Minimum Monthly level in the discount schedules.

- E. Notwithstanding any provision of this Tariff to the contrary and provided Customer is not in default of its obligations pursuant to this Tariff, after a Service Order for Qualifying Metro Frame Relay Service is accepted by Company, Customer may cancel all or a portion of the Service described in the Service Order if Customer provides written notification thereof to Company thirty (30) days in advance of the effective date of cancellation. In such case, Customer shall pay to Company all charges for such Service provided through the effective date of cancellation plus a cancellation charge determined as follows:
- (1) Prior to Start of Service, the cancellation charge shall be an amount equal to one (1) month's Base Rate Charges (then in effect at the time of cancellation) for the Metro Frame Relay Service in question plus all non-recurring charges which would have otherwise been due (e.g., Installation charges) upon Start of Service therefor and costs, if any, reasonably incurred by Company from third parties (e.g., Local Access providers or interconnecting carriers) as a result of such cancellation.
 - (2) Following Start of Service, the cancellation charge shall be an amount equal to six (6) times the monthly recurring Base Rate Charges (then in effect at the time of cancellation) for the Metro Frame Relay Service in question less Base Rate Charges for such Service actually provided to Customer through the effective date of cancellation (but in no event less than zero) plus costs, if any, reasonably incurred by Company from third parties (e.g., Local Access providers or interconnecting carriers) as a result of such cancellation.

- F. Commencing with first calendar month/billing period of Customer Commitment Period and continuing for each calendar month/billing period thereafter through expiration of the Customer Commitment Period, Customer subscribing to the Revenue Plan will obtain Metro Frame Relay Service from Company pursuant to this Tariff and the Company interstate Tariff FCC No. 9, which is subject to an aggregate of applicable Base Rate Charges ("Aggregate Base Rate Charge") equal to Minimum Monthly Commitment. Regardless of whether Clause (1), (2) or (3) is determined to be the greater amount, the Customer is also liable for any charges, expenses, fees, or penalties incurred by Company or its affiliated companies due to cancellation of Local Access plus any costs, expenses, or additional charges reasonably incurred by Company on behalf of Customer as Customer's agent.

13.7 Foreign Exchange (FX) Service

13.7.1 Description

FX Service enables a Customer to receive Company-provided Exchange Access Service at a point outside the Local Exchange Service Area that normally serves the customer's location. FX service can be used to receive one-way inbound digital traffic only. Customers subscribing to FX service must purchase an entire T-1 and meet the following conditions: 1) 100 percent of the traffic carried must be inbound local; and 2) the average off-hook time per call is more than ten minutes.

The Local Exchange Calling Area and all Usage Services rates which apply to a FX Exchange Access Service are the same as those which regularly apply to other Company-provided Exchange Access Services bearing the same NPA-NXX designation.

Customers are prohibited from using FX service to place outbound calls including, but not limited to "911" emergency numbers. This restriction is required in order to assure that emergency calls are routed to the Public Safety Answering Point serving the geographical area associated with the Customer's telephone number. The Company strongly recommends that each Customer maintain at least one telephone exchange service access line bearing an NPA-NXX designation associated with the Customer's actual geographic location for emergency use.

FX Service customers are not eligible to enroll in the On-Net Term Plan or Local On-Net Term Plan discount programs.

SECTION 13 – MCI WORLDCOM ON-NET LOCAL EXCHANGE SERVICE13.8 Local ISDN Primary Rate Interface (Local ISDN PRI)

Local ISDN-PRI is an alternative arrangement for individual local exchange services such as Local Trunk Basic and Local Trunk DID. Local ISDN-PRI is provisioned at the 1.544 Mbps rate via the Primary Rate Interface standard of the Integrated Services Digital Network (ISDN). Local ISDN-PRI provides the Customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.

- 13.8.1 Local ISDN-PRI Service Arrangement - One or more Service Configurations can be combined to create a Local ISDN-PRI Service Arrangement. Customers may have multiple Local ISDN-PRI Service Arrangements per location, however for each Service Arrangement one Service Configuration 1 must be included. The controlling D channel will always reside on Service Configuration 1.

The D channel is a 64 Kbps channel that carries signaling and control for the B channels. The capabilities of the D channel are contained within the customer's Service Configuration.

The ISDN Digital Facility is ordered separately and not included as part of the Service Configuration.

- 13.8.1.1 Service Configuration 1 - The first Service Configuration for any Local ISDN-PRI Service Arrangement must be a Service Configuration 1. Service Configuration 1 provides twenty-three (23) 64 Kbps B channels and one (1) primary 64 Kbps D signaling channel. The primary D channel is an-out-of-band signaling channel used to control and route all of the B channel traffic within the Local ISDN-PRI Service Arrangement.

- 13.8.1.2 Service Configuration 2 - This configuration is only available in conjunction with Service Configuration 1. It provides an additional twenty-four (24) 64 Kbps B channels which are controlled by the D channel on Service Configuration 1. Multiple Service Configuration 2s may be associated with a Service Configuration 1 subject to switching equipment limitations.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separately DID telephone numbers, as found in Section 13.2.2 preceding.

SECTION 13 – MCI WORLDCOM ON-NET LOCAL EXCHANGE SERVICE

13.8 Local ISDN Primary Rate Interface (Local ISDN PRI) (Continued)

13.8.1 Local ISDN-PRI Service Arrangement (Continued)

13.8.1.3 Service Configuration 3 - This configuration is also only available to subscribers who have a Service Configuration 1. It provides a backup 64 Kbps D channel and twenty-three (23) additional 64 Kbps B channels. The backup D channel will control and route all of the B channel traffic of a single PRI Service Arrangement in the event the D channel on the primary configuration (Service Configuration 1) fails. A maximum of one Service Configuration 3 may be included with each Local ISDN-PRI Service Arrangement. Service Configuration 3 is available subject to switching equipment capabilities.

The bearer (or B) channels are used for information transfer between users. B channels provide the same features as Local Trunk Basic and Local Trunk DID. To receive the DID capability, customers must order separate DID telephone numbers, as found in Section 13.2.2 preceding.
