

Evergy Missouri West
Case Name: 2020 EMW Renewable Energy Standard Compliance Report
Case Number: EO-2021-0346

Response to Mantle Lena Interrogatories - OPC_20210513
Date of Response: June 02, 2021

Question:8003

Please identify each of the wind PPAs in Table 1 of the RES Plan as either resources acquired 1) to meet the RES, 2) because they are economic, 3) to meet customers' energy requirements, or 4) as RER program resources.

Response:

Gray County, Ensign, Osborn, Rock Creek, Pratt, and Prairie Queen PPA's were entered because of favorable economics and are not directly attributable to RES compliance, although RECs from these resources can be utilized to meet RES compliance and the energy will be used to meet customers' energy requirements.

The Cimarron Bend III PPA is designated to special contract and renewable energy rider tariff customers and should not have been listed.

Response prepared by: Randy Erickson, Energy Resource Management
