July 11, 2012

Electric & Gas Utilities

Dear :

You are invited to attend NARUC's simulation experience, "Complying with EPA Regulations," on September 5, 2012 at our offices in Jefferson City, Missouri. This simulation will be very similar to the simulation presented at MARC in Des Moines this year. The description of that event was as follows:

"Using a scenario format organized by NARUC, this interactive session will allow participants to explore different scenarios for compliance with EPA's rules on Mercury and Toxic Substances (MATS) and Cross-State Air Pollution (CSAPR) in a hypothetical set of situations that will help them understand issues that confront decision-makers under different compliance approaches. This workshop will also explore how energy efficiency and demand-side resources may play a role in cost-containment and compliance."

I had the opportunity to attend this event at MARC this year, and found it both educational and generally informative regarding questions of EPA compliance. As vital stakeholders in this process, we encourage you to send a representative from your organization to participate in the workshop. We will all benefit from this hands-on learning experience, and it will give each of us some common understanding of the processes involved and present an opportunity for increased collaboration in our State.

The space is limited to 50 participants and will be held in the Governor Office Building, 200 Madison Street, Jefferson City, Missouri, Room 470. Please let us know as soon as possible who you will be sending to the event. To RSVP, contact Joyce Neuner at (573) 751-0946, or joyce.neuner@psc.mo.gov by August 17, 2012.

Sincerely,

Kevin D. Gunn
Chairman
